Didn't Want Much

"Brown's about the nerviest chap I ever knew."

"What now?"

"He meandered into an automobile store yesterday and asked the salesman to give him a sample."—Boston Transcript.

Old

Salesman—Step this way, sir. I have a nice line today.

Mr. Grump—Never mind, I've heard it.

PART SHE WALKS ON

Madge—Helen says she kissed George right on the street." Friend—"What part of George is that?" Madge—"The part she walks on I guess."

When Can He Get the Car?

"You have been engaged to Jack a long while. When are you going to be married?"

"Pretty soon now," rejoiced the young thing. "Jack pays the last installment on the engagement ring this month, and then the jeweler says he will let him have a wedding ring."—Portland Evening Express.

The Poor Fellow

Marbleton—When Browne gets angry he always slams the door as viciously as he can. An awful habit.

Peverley—Yes, but he nearly wore himself out at the public library yesterday—trying to slam the revolving door.

Guess Who

Jerry—A fool! Do you mean me?

Miss—Oh, no, not exactly. I mean the fellow you stare in it's face while you're shaving yourself.

HER METALLIC VOICE

Miggie—She has a decidedly metallic voice."—Jenny—"Yes; they painted her throat with iron so often when she was young."

Competition

Judge—So you've stopped swearing since you married?

Caesar—Yes. Children around the house, you know.

Judge—Well, it is a bad example to set.

Caesar—It wasn't that. I just couldn't compete with 'em.—American Legion Monthly.

Have Kidneys Examined By Your Doctor

Take Salts to Wash Kidneys If Back Pains You or Bladder Bothers.

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or side headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then eat fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness. Jad Salts is inexpensive, cannot injure and makes a delightful effervescent lithia-water drink.

Whooping Cough Relieved

This dread cough is one of the most dangerous of children's diseases. There is no cure for whooping cough, it usually runs its course, but a few drops of the wonderful Dr. Bell's Glessco Concentration will relieve the violent coughing paroxysms, and avoid vomiting, the dangerous "whooping" and the exhaustive stomach. Glessco is a safe, reliable remedy which is used for croup, bronchitis and whooping cough.

A DRIVE THAT DIDN'T DIVE

One of the outstanding features of the election this year was that the tariff figured so little in the results. Several months ago it was announced by the free traders that the campaign would be based on the tariff issue. It was asserted that the farmers were not getting any benefit from protection, but were penalized by it, that the West was seething with political revolt and that the protectionists would be buried under an avalanche of votes in November.

But nothing of the kind happened. Constructive farm leaders pointed out that what the farmers need is not less, but in some instances, more protection against the products of Argentine and other cheap producing countries. They showed that practically everything which the farmer uses exclusively in his business is already on the free list, and that nearly everything he raises and sells is protected. They proved that he is getting the benefit of protection by showing that products of the soil coming into the United States paid more tariff last year than the products of foreign factories.

The drive against the tariff therefore died aborning. It was felt but seldom during the campaign and when the free trade argument was used in the debatable states the free traders generally had the worst of it. The protectionist candidates running campaign didn't get started was that the political leaders of all parties realized that free trade would not be a popular issue this year. The demand for protection is getting less sectional and more and more general in America every year.

UNANIMOUS FOR MARINE

One of the most gratifying signs of the times from an American standpoint is the way American people have responded to the hearings which have been held in various parts of the country by members of the U. S. Shipping Board in an effort to get the gist of the sentiment of the people of the United States on the American merchant marine. Everywhere in the East and West, the South and the North the response has been that the people of the country want our flag kept on the high seas.

It used to be said that one reason why our merchant marine was not built up, lay in the fact that the people of the Middle West, with their great influence in public life, were cool toward it. That may have been the situation once but times have changed and the Middle Westerner, whose eyes were opened by the great war, the economic developments since that time, is now as keen for the merchant marine as the citizen who lives near the seaboard. In addition the Middle Westerner is beginning to vision the day when the great central rivers of the country are again to become common carriers, floating the products of the great West down to the seaboard where they can be loaded onto ships and carried to the four corners of the world. And he knows that if there are American ships to carry his produce he will never be held up by any foreign shipping combine, and so lose what the rivers have saved for him.

The sentiment has been found so well nigh universal that the Shipping Board officials who have conducted the nation-wide hearing are thoroughly convinced that the people of the country want the merchant marine and they will to report to congress.

The next session of Congress promises to be an important one for many reasons, and one of the biggest of these reasons is that the solution of the merchant marine problem will be taken up. «Every enterprising American citizen should use his influence to see that his congressman and senators that take the attitude on this question.

Holiday rush orders by LONG DISTANCE

To get the goods you want when you want them use Long Distance. Direct, personal and attention compelling, it is the fastest way of replenishing your stock during the holiday busy season.

A complete line means more customers and more satisfied customers for you. Long Distance calls can help you to get and keep those customers. The rates are reasonable.

Quits Smoking 50 Years to Buy Stamp Collection

Philadelphia.—By denying himself tobacco for fifty years and thus saving ten cents a day, Daniel J. Grossmer of 207 West Central avenue, South Williamsport, Pa., has acquired what is regarded as one of the outstanding collections of exclusive American stamps.

In the extensive collection of the Williamsport man, who displayed it while attending the convention of the Patriotic Order Sons of America here, is to be found every historical species of stamps from the famous one which embed the Revolution to the latest product of the Treasury department.

Revolutionary and prerevolutionary stamps are gathered together in his ample collection book with stamps issued by Rhode Island and Pennsylvania, by Rhode Island to raise money to build a bridge, by this state to enable a Methodist church to erect a new edifice.

Strange-looking money, including such novel early colonial currency as two-thirds dollars, also is embraced in Grossemer's unusual collection. He prides himself principally, however, not on the extensiveness of his collection, but on the fact that it is all American in nature.

Faroe-Shetland Channel Has 3 Layers of Water

London.—A strange three-layer arrangement of water has been revealed by recent hydrographic investigation of the Faroe-Shetland channel, north of Scotland. The layers are so distributed that a swimmer in the channel could take his choice of swimming in Atlantic ocean water at the surface or diving into the Norwegian sea which flows at the bottom, while between top and bottom he could enjoy a mixture of the two kinds of water with a dash of Icelandic arctic current added to the blend.

The observations of the channel have just been reported to the International council for the exploration of the sea.

Naps as Dentist Drills

Waynesburg, Pa.—William Jacobs picked out an unusual place for an afternoon nap. He fell asleep, three times in an hour's sitting in a dentist's chair, where he was having several teeth filled. Jacobs said that the monotonous sound of the dentist's drill caused his slumbers.

Pity the Porter

Washington.—Pity the poor pullman porter; his tips average only $20 a month and his annual salary $870, take it from Representative Celler of New York, who proposes a congressional investigation of the matter.

ANOTHER IMPRACTICAL ONE

ALMOST every day somebody comes forward with a plan for outlawing war and bringing on universal peace. Evidently the public at large has no great faith in the Bok prize peace plan which was supposed to include the formula for putting Mars to sleep for all time to come. The latest plan is that of the World Alliance for International Friendship through the churches, and it is about as impractical as the rest of them. Impracticability, in fact, seems to be the principal feature of most international plans put forward for promoting something or other.

The plan of the conference above mentioned is "that America take the lead and call an international conference for the purpose of adopting a universal treaty in which the nations shall forswear their ancient rights of waging war and agree to submit their disputes to the permanent court of International Justice." This is a pretty big program. Assuming for the sake of argument that this is a good plan, and that the World Court could actually enforce its decisions and make all nations large and small bow to it, a very doubtful assumption to say the least, how is this all going to be brought about?

They have been having an international meeting in Geneva recently for the purpose of trying to get the nations to cut down their armament. This conference has been marked with wrangling from beginning to end. And it has broken up without accomplishing anything. The nations have been unable to agree on what constitutes armaments, let alone to get some mutual basis for cutting down military equipment. Now if the nations gathered together in the shadow of that great monument of brotherhood, the League of Nations, can't even agree on what armament is, how can we expect to get them together in a nationalistic capital like Washington and to agree not only to cut out something they are unable even to define, but to forswear every right they have ever had for going to war or defending themselves in case of attack? It is easy to get together in some sort of a convention and adopt high sounding resolutions about regulating the world, but it is vastly more difficult to put these resolutions into effect.

No sane American wants war. We will all agree to refrain from fighting so long as we are not attacked. But we cannot pacify the world, and we do not want to go ahead in a sheep-like manner and eliminate our own defensive weapons as an an example for an unappreciative world. And so, in the meantime, we will go ahead minding our own business and keeping our defensive machinery in first class condition.

WHAT THEY SAY

The American Federation of Labor did the expected and the inevitable thing in reaffirming its stand against American recognition of the soviet. Conservative American labor bears the first brunt of the red offensive against the existing social order in this country in the incessant attempts of radicals to "bore within" its organizations and turn labor aside from the peaceful utilization of its bargaining power with the employers to raise wages and improve conditions. Labor's increasing material stake in the country through its participation in corporate ownership and banking control is gall and wormwood to the fomenters of social unrest, whose first objective naturally is to unhorse the existing leadership. Enlightened self-interest, therefore, as well as sound American patriotism, dictates the federation's course.

The A. F. & L. leaders are not to be taken in by the precious scheme of sending an investigating "mission" to Russia to see how labor is faring in the bolshevist domain. Various such "missions" have gone to Russia from this country and Europe; invariably they are fitted with official blinders by the soviet, dined, feted and carted about the country to see what their hosts want them to see. Invariably they return to pronounce Russia a foretaste of a workers' paradise and to advocate recognition. The farce lies in the fact that such "missions" are also invariably hand-picked among "picks" and radicals, either from the parlor or the trade union ranks, who go over to be persuaded of what they were perfectly sure about before they started. The federation has too much horse sense to "fall" for this trick proposal.—Philadelphia Bulletin.

The demands of socialists, communists and many-ventured pacifists do not much impress the great American Legion. The Legion members know more about the "the horrors of war" than all the yapping pack of enemies and parasites in this country who spend their time in making appeals for the abandonment of our national defense. The Legion served in the world's greatest, most horrible war. Officers and members of the Legion do not wish again to experience the "horrors of war." To this end they are doing everything that in their power lies to assist in the prevention of war, and it is their belief that the way for the United States to adopt in order to attain to a reasonable degree of national security is to keep the nation so well defended that no other power or powers will care to engage us in combat.

This country wants no more of war, but the slightest study of conditions in Europe and parts of Asia since the signing of the armistice sufficiently indicates that war remains a very strong probability. In coming wars the United States has no wish to have a part; it need have no part if it keep itself well defended and competent to refuse to be drawn into conflict, or competent to enter such conflict in behalf of a righteous cause with sufficient power and prestige to influence the determination of battle in the interests of humanity and justice.—Cincinnati Enquirer.

Readers' Paradise

There are four million books in the British Museum library.

THE THEATRE

Charleston fans will probably turn out in full force for Alian Dwan's new picture, "Padlocked," scheduled for Saturday and Sunday at the ralace theatre. For the word has gone out that Lois Moran the charming little actress who has the featured lead in the modern American drama, dances two new Charleston specialties that are certain to "catch on" with the public.

The first dance is called the "Charleston a la Tamale." It was evolved by Miss Meran in collaboration with Ernest Belcher, popularly known as the "dancemaster of the movies."

The second new dance is the "Charleston a la King." It was imported by Miss Moran direct from Paris, where it is all the rage among professional dancers in the Montmartre and at fashionable soirees

A diamond in the rough. That's Stuffy McGee, the character impersonated by George Orey in "The Arizona Sweepstakes," to be shown at the Palace theatre next Wednesday and Thursday, with the popular Hoot Gibson as the star. Incidentally "Stuffy" makes one realize that even the most calloused exteriors are only camouflage for the softest hearts.

"Stuffy" is a member of one of the toughest gangs in the toughest section of a big city. He is not averse to a drink, a little gun fight is one of his greatest pleasures, either from the parlor or the trade union ranks, who go over to be persuaded of what they were perfectly sure about before they started. The federation has too much horse sense to "fall" for this trick proposal.—Philadelphia Bulletin.

Now They're American

Sardines used to come from Sardinia. Some of them still do, others come from Portugal and from Spain, but the great majority of them now come from the rugged New England coast and from the Pacific coast. Sardine fishing is a four months' industry in the Atlantic waters, and lasts six months in the Pacific. It is rapidly growing to be one of the most sizable phases of the canning industry.

WANT COLUMN

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 30-tf.

RURAL Carrier Examination, Charlevoix. Salary $1800 and maintenance. Age 18-50. Don't miss this opportunity. Coaching courses $5. Write for free particulars. L. Hampton, Box 1818 KK, Washington, D.C. 1-4

LOST—A man's winter coat lined with sheepskin. Lost between Howe's place on Petoskey avenue and Charlevoix water plant. Finder please return to 310 Antrim street. 32-2t

FRESH FLORIDA ORANGES

Fresh Sweet Florida Oranges $3 per box of three hundred large size. Sound fruit and satisfaction guaranteed, or money back. We pay express charges. A box of these makes an appreciated Christmas gift.

Remit with Order.

Acme Farms,
GAINSVILLE, - FLORIDA

The Seal With the Double Barred Cross

If you could know
That the seals
That you send
For Christmas seals

Might chance to be
The very pennies
That would surely
bring
To some little
child
The health that
otherwise
It might not know.
Would you not
spend,
More and more such pennies?
Would you not forego
Some luxury pleasure even
If you know
You could do that?
Or it might chance

That yours
might be
The pennies
To restore
A stricken
mother
To her stricken
child.
Or to bring
a broken
father
Back to earthly power.
Would you not
spend more
pennies?
The more
the pennies
That you
spend
The more
the good
The pennies
Then buy the Christmas seals
Unbelievably bright.

TINY THINGS COUNT

Here are four of dozen inventions that you can hold on your hand, and each one of them has made a fortune for its creator. Patent office records show that simple inventions have usually been the most profitable.

To the Taxpayers of the City of Charlevoix:

Notice is hereby given that the December Tax Roll of the City of Charlevoix has been delivered to me, and that the taxes therein levied are payable at my office at any time on or before the 9th day of January 1927, without charge for collection. On all taxes remaining unpaid after the ninth day of January, a collection fee of four cents on the dollar will be added, and collected.

ELMA H. COOK,
City Treasurer

Office Hours: 9:30 a.m. to 12 m.; 1:30 p.m. to 5.

Odd Doll Customs

Because of the antiquity of the doll it is natural that various customs and traditions should develop about it in various parts of the world. In Orange Free State in Africa every Finge maiden receives upon maturity a doll that she retains until she becomes a mother. Then her mother gives her a new doll, which she carefully preserves until a second child is born. These dolls are held sacred and the children never voluntarily parts with them, says the New York World.

Fox's Race With Train

For three miles a sifter fox ran ahead of a logging train at Klamath Falls, Ore., racing over the ties in the glare of the headlight. Seeing that the animal was nearing exhaustion and would not leave the track, the engineer stopped the train. The fox allowed him to pick it up and release it in the brush. Later the engineer learned that the fox had been bred in captivity, had escaped from a neighboring fox farm and was worth more than $1,000.

Snake Causes Collision Fatal to 3 Motorists

Atlantic City, N. J.—A snake at a railroad crossing was responsible for the killing of three motorists at Folsom in a crash with a railroad train.

The snake was crawling across the highway near the crossing, William Aitkin of Camden, N. J., driver of the car tried to dodge running over the snake and succeeded. In the momentary distraction he failed to see the approach of the Cape May flyer of the Philadelphia & Reading railroad, which hit the auto instantly.

Rose McCannon and Anna Skinner, each twenty-five of Toronto, and William Williams, five, of Camden, N. J., were killed. Aitkin and his wife, Ida, were seriously injured.

S. S. Fort of Petoskey, was here last Thursday on his way to St. James.

H. W. Garret of Grand Rapids, is a business visitor in Charlevoix today.

Dr. Guy C. Conkie of Boyne City was a Charlevoix visitor last Friday.

Mr. and Mrs. Garrett Cole of Nomad, spent the major part of this week with friends in this city.

Mrs. Bob Russell is laid up with a broken leg, the result of a fall on the ice near her home last Friday.

Attorney E. N. Clink of East Jordan, was in Charlevoix last Tuesday attending to professional legal business.

Now is the time to make your selection of toys for Christmas. Let us lay them away for you. Higley Gift Shop.

J. M. Goldie of Massachusetts, spent several days here recently with his old time friend, Supt. Geo. H. Coverdale.

Mr. R. F. Sloan Sr., drove up from Muskegon last Tuesday and will spend several days here attending to business affairs before making the return trip.

Mr. John McCann and family, after spending the summer and fall months at St. James, returned to Charlevoix last Sunday and will remain for the winter.

The S. S. Roen, Capt. John Roen entered this port last Sunday and will be in winter quarters on Round Lake for some weeks, until the opening of navigation in 1927.

A small fire at M. B. Hooker & Son's garage that did but a small amount of financial damage claimed the attention of fire department members and a few citizens last Monday.

Mr. and Mrs. Robert R. Bonthron, who left on a motor trip to Chicago recently, spending several days with relatives in the big city, returned to Charlevoix last Friday evening.

Gustave Mielke, Mr. and Mrs. Hugh Boyle and Mrs. Fischer of St. James, spent the early part of the week in Charlevoix on business, returning to St. James Wednesday on the Rambler.

Mont Withers and John Slezak spent several days recently at Beaver Island on a hunting trip. They returned last Tuesday bringing with them eight fox skins as evidence of the success in the expedition.

Vincent S. Madison and Ira A. Adams who spent some part of the hunting season in Crawford county, returned to Charlevoix last Friday, bringing with them a nice buck that was taken near their camp early in the season.

Governors of several states will hold their 1927 conference at Mackinac Island, the dates being set for July 25-26-27. It will be one of the great meetings of the year at Mackinac Island at which many notables will be in attendance.

E. W. Coulter returned to Charlevoix last Thursday and will spend the next few weeks in this region in the interest of the D. M. Ferry Seed Co. placing contracts with agriculturalists for various kinds of seed crops for the 1927 season.

The Women's Christian Temperance Union will meet Friday afternoon with Mrs. Usher, 219 Clinton street. Mrs. Simmons will report the state convention. There will be special music and the committee will serve during the social hour.

John Kelderhouse, who has been employed at Whitehall for the past few months, returned to Charlevoix last Friday and will spend the holiday period at the parental home after which he will go to Big Rapids, where he will enter the Ferris Institute as a student.

Harold McCann has disposed of his fish tug "Liberty" and according to present plans will take an interest in the "Sea Hawk" with his brother Ulysses. Present plans also include a rebuild of the "Sea Hawk," the work to be done at the shipyards in Manitowoc.

Individuals who have read "An American Tragedy," by Theodore Dreiser, probably consider the same to a large extent, an overdrawn word picture, and the story following the Chicon vs. Olson case recently enacted at Prairie du Chene, Wisconsin; they can but find a striking analogous counterpart of the famous Dreiser novel.

Mrs. Milton Block entertained twenty ladies at her home, 505 State street, last Friday, making the occasion an opportune time for giving a miscellaneous shower for her sister, Mrs. Robert Howe, honor guest, who was married on Thanksgiving day. Mrs. Howe was the recipient of many beautiful and useful gifts as mementos of the function.

A bridge party at the A. L. Livingston home, in which all tables were engaged last Monday evening, with Mrs. Livingston and Mrs. Clarence N. Bridge hostesses, was a source of entertainment and pleasure to the guests of the function. First honors went to Mrs. Clarence Wood, second to Mr. M. A. Levinson with the consolation awarded to Mrs. Albon Smith.

The Chicago Male Quartet, which will be heard here Tuesday evening, December 14, presents one of the most popular forms of amusement ever designed for the entertainment platform. A good male quartet is always a "hit." The Redpath bureau, through which the quartet has been secured to come here, states that it receives more requests from the public for male quartets than for any other form of entertainment.

Good stiff winter weather has been the regular daily program for the past week. A light snow has fallen some time during the twenty four hours of each day and at that the ground has only a slight covering of the so-called beautiful. One night within the week thermometers touched the zero mark, the balance of the time reading from several degrees above to much higher temperature, but at no time has there been indications of tropical weather—nor do we expect to have such for some weeks to come. We all enjoy the good old summer time. We are also content with the present brand of winter.

Mrs. Ruth Golden of Clarion, Michigan was the first in Charlevoix county and one of the first persons in the state to purchase 1926 tuberculosis Christmas seals. Her letter containing a check in full payment for the number of seals sent her was received at the Lansing headquarters of the Michigan Tuberculosis Association in the morning mail the Monday following Thanksgiving even though the letters containing the seals had only gone out on the Wednesday evening preceding Thanksgiving. Returns from half of the counties in the state were also received. That the response to these letters should be so immediate and so generous is indicative of the high regard the people of Michigan have for the tuberculosis work according to Miss Mary Mair, seal sale director of the Michigan Tuberculosis Association.

According to recent statements the state owned ferries, St. Ignace and Mackinac City, did a more extensive business during the 1926 season than in any previous, making for an increased percentage of 400 over the first year (1923) when the ships were placed in commission. During the season just closed the ships transferred upwards of 80,000 automobiles across the straits, while the record for 1923 gives the number as 19,926; with the record given for 1924 placed at 33,631 and for 1925 60,322. The business for 1926 was practically all that the two ships could handle. Further increase of any considerable amount will necessitate the placing of another ship on the Mackinaw City-St. Ignace route in or to facilitate the prompt transportation of tourist travelers patronizing the most popular route in the state.

A sudden plunge in the waters of Round lake was experienced by Bob Struthers at a late hour last Sunday, such as he will not willingly take again, nor forcibly if he can avoid doing so. Fortunately the man's predicament was observed by one of the deck hands on the S.S. Roen that was tied up near by. Through the efforts of the deck hand Bob was returned to the ice and water but little the worse for his involuntary experience.

During the season just closed the ships transferred upwards of 80,000 automobiles across the straits, while the record for 1923 gives the number as 19,926; with the record given for 1924 placed at 33,631 and for 1925 60,322. The business for 1926 was practically all that the two ships could handle. Further increase of any considerable amount will necessitate the placing of another ship on the Mackinaw City-St. Ignace route in or to facilitate the prompt transportation of tourist travelers patronizing the most popular route in the state.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Dec. 11-12

Rex Beach's "Padlocked" with Lois Moran, Lois Dresser and Noah Berry. What a sweeping revelation of this restless age. An, exciting dramatic exposure of today's morals. Of a girl, and of the Broadway theatrical and night-life environment in which she struggles from the depths to a glorious victory. Also a comedy, "Open House." A big special. No advance in prices.

Wednesday Thursday—

Hoot Gibson in "Arizona Sweepstakes." The greatest race of the century. A cross-country epic that will bring you to your feet cheering at the reckless, brilliant riding of Hoot and his Universal Ranch Riders. Up and down hill, over fences, ditches and streams the horses and riders dash—horsemen unseated, plunging to the ground, narrowly escaping death beneath the onrushing hoofs of fiery chargers. It marks Gibson's greatest display of horsemanship—a thrilling and exciting spectacle that will hold you spellbound. And what a love story hinges on that race. Also Fox News and "The Hodge Podge."

COMING—Bebe Daniels in "The Campus Flirt."

FLOWERS

YOUR GIFT

Dominant on the Gift Table are Flowers—your gift, so wisely chosen. For family or friend, here is the one present you can depend upon to please—for everyone loves flowers. Then, too, this gift is easy on the check book. And you can telegraph Flower Gifts out of town.

Albert E. Edwards, Florist,

Member of Flower Telegraph Deliverers Association

Wed at Petoskey

Two wedding services at Petoskey this week united four young people in the bonds of matrimony. Rev. Willard S. Ross officiated at the ceremonies. The contracting parties were: Theodore S. Kibbe and Miss Myrtle May Guild of Charlevoix and C. Raymond Cross of Charlevoix and Miss Vivian Twite of Alpena. The newly weds will reside in this city for the present.

Vigilant Watch Kept on Priceless Books

Lining the walls of the reading room and three large galleries in the British museum, in London, are millions of books. Some are the only existing copies, and many are priceless.

Every possible precaution is taken to guard these treasures. The books are kept in strongly locked cases, from which they are never removed except by officials of the reading room.

No one may enter this room without a reader's ticket, and a reader cannot obtain a book without first filling up and signing an official form.

Unless it is a book of unusual value, the reader may examine it in the ordinary reading-room, but if it is a very rare volume he is escorted into a special inner room, from which escape, other than by the authorized exit, would be impossible.

In both rooms, men in plain clothes, bullet-pigeholed from the fingertips of readers, walk up and down, and contrive to keep within arm's reach of anyone who is perusing a special treasure. At the first movement to destroy or mutilate a volume, the vandal would be seized.

Railroad Lines Built Around Amazon Falls

Nearly all the rivers of the Amazon system are broken up by rapids or falls. The most famous of these are those that break the course of the Madeira and the Mamore for more than 200 miles. W. L. Schurz, commercial attache of the American embassy at Rio de Janeiro writes, in the National Geographic Magazine. It is around these rapids that the Madeira-Mamore railroad was built to serve as an outlet for the rubber and other products of northeastern Bolivia. Before the railroad's construction, rubber was brought down the river in large "boiteaunes" or canoes, which shot the less dangerous rapids and were dragged slowly around those more perilous. The return trip was a matter of months and the losses of men from malaria, hostile Indians and capsizing in the rapids were enormous.

Easy One for Father

"Pa," began little Lester Livermore, who is a great hand to ponder.

"That will do, my son," interrupted Mr. Livermore, who was endeavoring to read his newspaper. "I don't know what killed the lizard you saw when I was in Portugal. During the reign of Queen Catherine, John de Castro once gave a lady from his whiskers as security for a large loan, explaining that the gold in them would cannot equal the value of this natural ornament of my valor; and deposit it in my pocket as security for the money."—Pathfinder Magazine.

Silly Craze for Wealth

When the desire of wealth is taking hold of the heart, let us look around and see how it operates upon those whose industry or fortune has obtained it. When we find them oppressed with their own abundance, luxurious without pleasure, idle without ease, and despised and hated by the rest of mankind, we shall soon be convinced that if the real wants of our condition are satisfied, there remains little to be sought with solicitude or desired with eagerness.—Doctor Johnson.

One Cameroon Man Has 98 Wives and 460 None

London.—One man in every village in British Cameroons, West Africa, has 98 wives, while on the other hand there are 460 men in the town who have no wives at all.

Another man has 27 wives, while there are seven warriors with 10 mates each, and 250 with but two spouses.

Some of the tribes, says a government report, keep up slavery, which is rife and trial by ordeal, and generally live in the most primitive conditions. The non-fat bean tribes wear little clothing, and the women nude, and it is the women who do all the work.

Welcomed With Movies

New York.—Incoming immigrants are now being welcomed with a movie showing the rise of a poor boy, whose handicaps in early life were at least as great as theirs—Abraham Lincoln. Will Hays and Secretary James J. Davis helped inaugurate a new Americanization plan.

Christmas Cards at Holley Gift Shop, make your selection early. 32-2t

TO CLOSE OUT

The balance of our LADIES' WINTER COATS, a Most radical reduction will be made.

Step in and see what we will do. If you are in need of a coat you cannot afford to miss this' opportunity before the Coats are all gone.

M. A. LEVINSON & CO.

CHURCHES

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on W. Hurlbut.

Sunday School at 11:45 a.m.

Regular morning service at 10:30 a.m.

Young Peoples' meeting at 6:30 p.m.

Evening service at 7:30.

Prayer meeting Wednesday 7:30 p.m.

The Sewing Circle will meet at the residence of Mrs. Ed. Snider, in the country, on Tuesday, Dec. 14th. The Circle has made good progress in the past. If we work with one purpose in mind we'll win the goal.

The Young Peoples' services are getting better. Come! Join in the "Scripture Hunt", hear the singing and the speakers.

The regular services are getting better—why not come and make your presence felt with the people of God. We need God's people if we live and serve him in spirit and in truth—nay with the others, the Lord being my helper I will be there.

We will have a Xmas program.

Methodist Church.

C. E. Pollock, Pastor.

Junior and Senior church worship at 10:30 a.m. next Sunday.

The city band will play an opening concert next Sunday evening at 7:00 for the church service. The public is invited for the music, the message and the worship.

Thursday evening is prayer meeting time. A good service is always had by those who attend. Any person is welcome.

Dr. Frank Wilkinson will be the special speaker at men's meeting monday evening at 8 o'clock.

Judge Correll gave a very practical address to the men last Monday evening. His subject was "Crime." He insisted that for the prevention of crime we must have capital punishment, quicker method of obtaining a jury, greater reliance placed upon circumstantial evidence, quicker justice, and a sterner set of people in the jury box. It was an awakening address for the men to consider. The increase of the ratio of criminals in proportion to the population is startling. The address is worthy of repetition.

Great plans are under way for an interesting vesper service December 19th.

With a church supper for the public and a ladies' bazaar on Friday and Saturday at the Charlevoix Hardware store under the supervision of the Methodist ladies it is a very busy week of women's activities for the church.

The Epworth League will hold its regular Sunday devotional service at six p.m. next Sunday.

The Sunday School is doing excellent work and showing a substantial growth —it meets at twelve o'clock each Sunday.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

The Christmas Spirit was the pastor's theme last Sunday and he suggested that it be shown by "Neighborliness—Unselfishness—and Service." There is every evidence that old Santa is on his way to Charlevoix, and will all be glad to have him call on us again. May Christmas joy crown the lives of all as we approach the Christmas time.

The usual services will be held next Sunday and a cordial invitation is extended to all who do not worship elsewhere. A suggested text: Prov. 16:32.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "God, the Preserver of Man."

Sunday School at 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 2 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE — COPYRIGHT BY BRENTANO'S

PRECEDING CHAPTERS

Harry Ormerod, long proscribed traitor to King George as a Stuart partisan, returning from France to London rescues Alderman Robert Juggins from a band of assassins. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Charles Stuart himself bequeathed, unnamed, bells Juggins he has abandoned the Stuart cause. Juggins informs Ormerod of a fortune put in the American colonies to endow England by forwarding the Stuart cause. At his bank in Amsterdam Juggins learns that Ormerod's henchmen, Ian Veuile, badly injured, escaped. The two are in London together, having their schemes baffled by the plotters early return to America. Juggins arranges for Ormerod to go there with letters to Governor Burnet, friend of Juggins, and work to foil Murray. Disguised as Juggins' servant, Ormerod arranges to take passage to America.

CHAPTER III—Continued

"Why, it war for the right to grow and to flourish, a war for trade. At other times, mark you, nations clash over questions of honor or territory. So their statesmen say. Actually there is a spreading of trade by merchantry at the bottom of every war that has been fought since the world began. Truly we are fighting with France for control of the trade of the Atlantic—and control of the Atlantic trade means control of the Western Plantations, America. We are fighting, Master Harry, with laws and tariffs and unmanufacturing skill and adopting instead of with men and deadly weapons.

"The country which wins the fur trade will win control over the great self number of savages. And the country which is so placed, especially if it be England, will win the military struggle which some day will have to be fought for dominion in America. So I would have you feel yourself a soldier; a general of trade, sent out upon a venture of great danger and importance. It may be, Master Harry, that just now my lot and the future of England and of nations yet unborn, are—"

"Ah that I can, I will do!" I exclaimed.

"Good. I cannot ask more."

He clasped my hand in a wringing grip. "Good luck to you, lad, and write us occasion serves."

He went over the side with his lips pursed as if to whistle and a look of doleful pleasure on his face. Him, too, as it happened, I was never to see again. In fact, I wonder whether I should not have leaped over the vessel's side at that moment had I realized how complete was to be the severance of my life from all that I had known before.

By the cabin entrance under the poop I found the sentinel who had collected my scanty baggage. "Where do you berth?" he asked me, pausing at the foot of the ladder-stairs.

"With the second mate."

He opened the door on the right-hand, or starboard, side, revealing a space no tiny that I marveled how two men could force themselves into it at once. Two short, shallow bunks occupied two-thirds of its area.

"To all the passengers lodge aft here?" I asked him carelessly as he disposed of my trappings.

"All save the negro; he is to sleep in the galley behind the companion-way."

When he had gone I curled up in the lower bunk, which the second mate obligingly had surrendered to me. At last I must have dozed, for I was awakened suddenly by the strangest of sounds—a woman's voice singing. It was a song I had never heard before, with a Scots accent to the words and a wonderful lilting melody that was somehow very sad and all the while it was pressing to sweetness.

I rose from my bunk, and, stealing to the door, set it open, so that I might hear the better. I was so interested in the song and the singer's voice that I forgot even to watch the door of the cabin next to mine where she was singing. And judge to my surprise when the singer's door swung open and she stepped into the passage, almost at my side.

Her surprise, as was but natural, was greater than mine. So we stood there a moment within a long yard of each other, gazing mutely into each other's eyes. Her face, flower-white in the dim light that came down the companionway, had a sweetness of expression that belied the proud carriage of her head and an air of hauteur such as I had seen about the great ladies of King Louis' court. Her hair was black and all blown in little wisps that framed at her forehead and neck. Her eyes were dark, too.

I heard you singing," I said.

She turned and made to re-enter her cabin. But I raised my hand in a gesture of appeal.

"I am sorry," I went on quickly. "I did not mean to be rude. I—I could not help it."

She regarded me gravely, evidently puzzled by the incongruousness of my voice and my plowboy garments.

"You are never Scots, sir?" she answered finally.

"No, but I know Scotland."

A light dawned in her eyes with the words.

"Ah! then you will be knowing the song that I sang: 'Lochaber No More' 'tis called, and a bitter lament of exiles out of their own homeland."

"'Tis true," I assented eagerly. "Indeed—"

"But you will be meeting my—" she hesitated over so little—"my father presently, no doubt, and he will make be known to one another. Now I must go on deck."

And she walked by me with a faint swish of skirts that sounded like an echo of forsaken fairy music.

Her father! Who could he be? And then realization smote me.

Plainly, she could not be De Veulle's daughter—nor Captain Abbot's. She was Murray's.

Murray's daughter! I rebelled against the idea. It could not be. It ought not to be. What right had he to a daughter—and such a maid as this? 'Twas absurd! Manifestly absurd.

Why, I must hate the man. I had no other recourse. And he had a daughter! And above all, this daughter!

When I came on deck the next morning we were driving down-channel before a smart northwest wind. Murray stood by the weather rail with the negro, who I learned afterward was called Tom, at his elbow. As I crossed from the companionway Tom leaned forward and whispered something to his master. Murray walked straight across the deck to my side, his eyes fastened upon my face.

"How, now, Master Juggins," he said heartily, his hand outstretched, "and did you leave your good uncle—or is it cousin?—well?"

I perceived that he took me for the lout I was dressed to represent, and strove to play up to the disguise.

"Well enough, sir," I answered sullenly, shifting clumsily from foot to foot.

"'Tis good!" he exclaimed. "Faith I am vastly relieved. I have a warm regard for honest Robert Juggins. He has aged of late, perhaps?"

The question, designed to catch my simple mentality unawares, gave me inverside amusement.

"Oh, aye," I muttered.

"We have been rivals in our ventures, as you doubtless know," continued Murray.

"But he doesn't take it seriously, sir," I assured him gravely.

"Eh? What's that?"

"He laughs about it, sir."

And I giggled at this stupidity. After a moment's inspection of my countenance he seemed constrained to accept the remark as witless innocence, for a grim light of humor sparkled in his eyes.

"Laughs, does he? Zooks, I might have known it. He is a merry soul, Master Juggins, and I should like to see him footing a morris to a right merry tune. Saying, we shall see it some day. Who knows?"

"Who knows, sir?" I repeated vacantly.

"And you are to cast your fortunes in America, lad? You may count upon my good offices in New York. Faith, I shall be glad to do a favor if I can, for Robert Juggins' nephew—or did you say cousin?"

"I am—"

But he saved me from the lie.

"Ah, here is come one of our fellow passengers," he interrupted.

I turned to see De Veulle approaching us.

"'Tis a French gentleman," purmed Murray, bent upon winning my confidence with his easy manners and gift of tongue, "'tis his way to Canada. He, therefore, is a countryman of mine. Master Juggins—the Chevalier de Veulle."

All unsuspecting, De Veulle made me a slight bow, a look of indifferent dislike on his face at sight of my plebeian figure. The disguise was good, and I hoped I might even him for a time at least. But no man forgets another who has toyed with his life, and his indifference was dissipated the instant his eye met mine.

"Juggins!" he exclaimed in bewilderment. "Parbleu! 'Tis Henry Ormerod, the Jacobite refugee!"

Murray snapped his fingers to Tom, the negro, who had been a silent witness to our conversation. In an instant he stood beside us.

"Is this the man who came with Master Juggins to the hearing before the lords of trade?" snapped Murray.

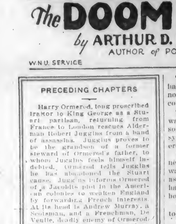
"He be, massa."

"You are sure?"

"Yes, massa."

Ormerod is to be brought to a realization of the treachery of which a man of "honor," led by overweening ambition, can be capable.

(TO BE CONTINUED.)



Ah, sir, there is a great sorrow at my heart for the country I love."

We said nothing while you might have counted ten, and in the silence she looked away from me.

"And you go with us to New York?" I asked fatuously.

Her eyes flared with a glint of humor.

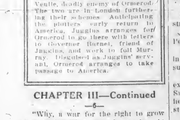
"Try, sir, will there be any other ship-ping place in the ocean?"

I laughed.

"Sir name," I began—and then I stopped abruptly.

My name at present was William Juggins, and I had a feeling of reluctance at practicing deceit upon this girl of our first meeting. But she saved me from my quandary.

"You will not be what you seem, sir," she said gravely. "That I can see, and perhaps you will not think me indiscreet if I say so much."



Ireland's Middle Age Place of Pilgrimage

Ireland has a place of pilgrimage which has held its position for 14 centuries. It is on an island in Lough Derg, and is said to be the only pilgrimage of modern times conducted like those of the Middle ages. It is freely noticed in medieval literature, and still today is very much alive. It is visited yearly, beginning in the month of June, by all sorts of people, and despite its rigors, it is so popular that a new church has been built and the railway companies run excursions to it. The pilgrims arrive footing and make their rounds of the stations in their bare feet. Three of the stations must be made each day of the three days of the pilgrimage. The first meal is of black tea and dry bread, and this is the last for 24 hours. A whole night is spent in prayer in the church. This is a trying experience, yet year after year hundreds return, and they include notable figures in public life. None but pilgrims are allowed on the island, and once there, all the strict regulations must be observed by all.

Money in Angora Rabbits

The raising of Angora rabbits for fur purposes is proving profitable and is being followed on a commercial scale in England. Some of the farmers pluck the fibers, while others clip the wool from the rabbit. The finer most practical for spinning is that which has attained a length of about four or five inches. Rabbit fur is not generally used in the manufacture of garments as a whole, but is more generally used as trimming on sweaters or like goods.

"Worth the Whistle"

"Worth the whistle" means worth calling, worth inviting or worth notice. It is derived from or suggested by the notion of whistling for a dog. There is an old proverb, "It is a poor dog that is not worth the whistling." In "King Lear" Shakespeare makes Goneril say to her husband Albany, "I have been worth the whistle."

Write Your Own Telegrams

The telautograph service is now being added to the state telegraph system of France and one can now transmit a telegram in his own handwriting to all the leading French towns. The service is not only useful for sentimental but practical purposes, as the curre will probably accept a signature sent by wire as legal.

Beret and Earlap Type Smart; Paris Features Fabric Contrast

Samples of Smart Headwear.

VERY considerate is it of our milliners this winter to make way for our fur collars by creating hats which have little or no brim. Of course with brims conspicuous by their absence, responsibility for the conveying of the style message devolves to a great extent upon the crowns of our hats.

There is the little hat shown first in this group—medium is written all over it, yet it is mostly all crown save just a suggestion of a running little brim, forming an earlap effect at the back. This clever model is styled of arctic blue antelope felt, edged with grosgrain ribbon of self tone. There spotted calfskin or some other equally as fashionable smooth fur. Sometimes the entire centre is made of the smooth felt, the cloth of the skirt being inset in the collar and cuffs.

Of course inspiration is the smooth short-jacket suit in this picture. Beige kasha is employed for the skirt with grackle blue velvet for the nifty coat.

A pleasing costume emanating from a leading Parisian atelier consists of a short Norfolk jacket of beige velveteen worn over a blue-colored crepe frock printed in tiny plaidings. Topping this outfit is a hat of stitched beige velveteen.

Very striking is an ensemble the skirt of which is black velvet. Over this is posed a short jacket of black-and-white-spotted calfskin. Ultrasmartness is the word for this combination.

And then there is the sleeveless jacket! French women are wearing them over dresses of matching crepe or supple cloth. Beige is a favorite color. It is said that the sleeveless jacket will play a very important part in spring styling.

JULIA BOTTOMLEY.

(©, 1926, by Western Newspaper Union.)

Short Jacket Suit.

Is of nut-brown felt with band effect of fat lambskin in tones of black and red. Further banding is accomplished with large grosgrain ribbon.

A band of felt arranged as a sash about the crown line of a soft draped felt hood finishes the stunning shape to the left below.

Again, the beret attains distinction in the model shown last in this group. The broad band of black belting ribbon together with two brushes of black lurrel insecure the finish-

Women's Dinner Coat

With the dinner jacket, which ranks as very smart, especially when the waistcoat is gold or silver lame, the thing to wear is a double-decked evening coat with a soft velvet top and a broad gold sash.

Black and Grey

A distinctive sport ensemble consists of a black kasha jumper worn with a gray kasha skirt, a black felt hat and a gray fox fur.

Jet Again Popular

Jet is coming into fashion again and is seen as trimming on dresses. But it is usually dyed green, blue or red, to give an emerald, sapphire or ruby effect, and it is used for evening dresses.

Fragile Capes of Tulle

Exquisitely beautiful, but rather fragile are capes made of rows and rows of tulle ruffles. Some are in a single tone, others in pastel shadings

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Charles V

A GOUTY old man sat in a monastery cell, surrounded by dozens of clocks and watches.

"I cannot even make two clocks tick in unison," he whined peevishly. "No wonder I failed to make millions of people think alike!"

The old clock fancier was Charles V, who had given up affairs of state at the age of fifty-six, and who was spending the two remaining years of his life in monastic retirement. He had had a half century of experiences such as lent a certain pathos to his complaint about the clocks. Born in 1500 to the greatest power ever inherited by mortal man, he had risen to heights reached by no other ruler of his century and had lived to see his most cherished plans fail to pieces.

Here are some of the titles that Charles fell heir to, all a mere boy: the archduchy of Austria, the sovereignty of the Netherlands, the kingdoms of Spain, Sicily and Navarre, and the rulership of all Spain's American possessions. In addition to this, when only nineteen, he was chosen emperor of Germany, and at twenty-six was crowned king of Italy. He ruled four nations which had nothing in common and no ties of mutual interest. These facts, of course, led to endless rivalries, revolts and international complications.

Moreover, a throng of outside enemies rose against the young monarch. Francis I, king of France, who had been one of his competitors for the German crown, promptly declared war on him, seizing the duchies of Milan and Burgundy, which Charles regarded as his own. Solyman, the Magnificent (under whom, from 1520 to 1566, Turkey reached its pinnacle of greatness), invaded Hungary, advancing to the very walls of Vienna, and, with his fleets, held the Mediterranean, menacing Italy and Spain. The Netherlands, too, were ripening for revolt, while a furious revolution broke out in Spain.

Added to this, an Augustinian monk of Germany, Martin Luther, defied the pope, protested against certain tenets of the Catholic church and announced a "reformed" creed. He drew to him thousands of Germans, his adherents becoming known as "Protestants." The security of the Catholic church, of which Charles was the acknowledged champion, was thus menaced. Altogether he had his hands full.

To beat back France's armies on the Flemish frontier and in Italy, to check the Turks in the Mediterranean and in his own duchy of Austria, to stem the tide of religious clamor in Germany and to reconcile clashing political parties—this was the task before him. He entered on the eight-year war with France, during which he drove the French from Italy and captured King Francis. He forced a humiliating treaty on Francis. This the latter at once broke, but in a second war was again beaten.

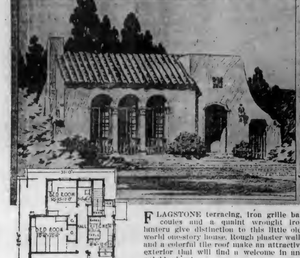
Soliman led a great Turkish army into Germany and Austria and Charles advanced in person to meet him, and drove the Turks back to their own territory. Then Francis, forming an alliance with Soliman, again invaded Italy. But Charles passed the affair so successfully that they were soon glad to sign a treaty of peace. The revolt in Spain was put down and the Netherlands for the time appeased, so Charles had at last time to attend to the Reformation, which, under Luther, Melanchton and other leaders, had by this time formed Germany from end to end. The emperor had crushed every military foe and had humiliated every royal rival; but here, in this new religious movement in Germany, he found an opponent he could not conquer—a power that throve under persecution.

Council after council was held scheme after scheme proposed. Compromises were suggested, but found favor with neither party. As if this one setback had undermined his whole edifice of greatness, so the failure of Charles in reconciling the religious sects into a united body was the source of disappointments and misfortunes. He had hoped to bequeath all his power and possessions to his son Philip, but to this the German electors would not agree. He then planned that on his death the mighty one-man empire he held would be split up as had those of Alexander and Charlemagne. To add to his worries, Henry II (son of Francis I) of France, backed by other rulers, invaded Germany and captured several important cities, notably Metz. Charles sought to recapture Metz, but failed, and until 1870 it remained in French hands.

Charles made one more throw of the dice against fate. He arranged a marriage between his son Philip and Queen Mary of England, thus forming an English alliance and strengthening his own power and that of the Catholic church. But the couple had no children. Philip left England in disgust.

His most cherished plans met at naught, his own subjects refusing to be gulded by him in matters of religion, his health broken, his territory scarcely enlarged, his son Maximilian (under whom, from 1520 to 1596

Practical Four-Room Plan for That "Castle in Spain"



FLAGSTONE terracing, iron grille balconies and a quaint wrought iron lantern give distinction to this little old world ancestory house. Rough plaster walls and a colorful tile roof make an attractive exterior that will find a welcome in any neighborhood.

But a carefully designed floor plan is its greatest appeal. One enters from the covered loggia directly into the large study and a half living-room, with its triple arched windows receding from the floor almost to the ceiling. The dining room alcove is conveniently located and well lighted. The kitchen has been deftly planned to give the greatest comfort and step-saving.

Everything about the house has been planned to give the utmost in stability and real house comfort. The walls and ceilings are insulated though out with celotex to cut down the coal bills in winter and keep the house cool in the summer. Who could wish for a more beautiful little home.

© Celotex-Insti. Institute, Chicago, 1926.

KIN OF ARGONAUTS FOUND IN CAUCASUS

American Woman Visits Lost Nation in Russia.

Wellsville, Maine.—That the gorges of the Russian Caucasus hide a "lost nation" which claims descent from Jason, wears chain armor like the ancients and still performs sacrifices and worships trees, is the strange tale brought back to America by Mrs. Karl Rankin, who has just returned from five years as a Near East relief worker in Armenia. Mrs. Rankin is the first foreign woman and the first American to venture into this lamorious and hidden land.

Mrs. Rankin, a native of Wellsville, is back in her old house on her honeymoon. It was as Miss Pauline Jordan that she spent five years in Armenia, after two years of study with Madame Curie in Paris. On her arrival in New York she married Karl Rankin, another returned Near East relief worker. The family were pioneers in Maine, coming here in 1640.

Tale of Her Trip.

Mrs. Rankin's story of her visit to the "lost nation" of the Sveyethians, as told to an interviewer here, is as follows:

"I was stationed at Alexandropol, in Russian Armenia, where 15,000 refugee orphans are being educated by the Near East relief. I found that a group of these children were of Sveyethian race, and it became necessary for somebody to visit their approximate mountain homeland in an effort to trace their relatives and if possible to repatriate the children in homes among their own people.

"Perhaps it was a foolhardy and venturesome trip for a woman, but I still feel the thrill of having accomplished it. I was told in Tiflis that I would not come back alive, but my mission was important.

"From the railroad I traveled three days on horseback to a village where I obtained local guides to accompany me through the mountains. For five days my horses climbed steadily, 12 hours a day. The trails often lay along the edge of terrific chasms, where a misstep meant death. Then we began to encounter scattered cottages and huts—hamlets of the most incredible that my Georgian guides had a terror of the natives, for they would often stumble to themselves in Russian, 'A dark people.' A dark people.'

"The country is accessible through a labyrinth of mountain passes for only a few weeks each year. I was the first American woman who had ever visited it. This people may truly be called a lost nation, because it is akin to no other people on earth today. Even the form of their hind feet are strange. The natives are white, with fair skins and blue eyes, and they talk a language unknown out side their boundaries.

Their Religion Different.

"Though they call themselves Christians, their religion is different from any other sect. They still perform sacrifices and there are remnants of ancient tree worship in their rites. Russian scholars say that these people are the descendants of Jason and the Argonauts. One of their prized relics is an anchor which they claim came from Jason's ship. It is preserved in a temple on the slopes of that great mountain upon which Prometheus is said to have been bound.

"During our trip we were compelled to seek nightly refuge in the houses of the people. They live in wooden huts of two stories, the lower floor sheltering their animals, while the upper floor is a single huge room where the whole family lives and sleeps. Their food consists mainly of barley-paste, an odd mixture of corn meal and goat's milk cheese.

"My mission among the Sveyethians was entirely successful. After a few days, they were no longer suspicious of me, and within a week they were quite friendly. They were tremendously impressed to find that Americans were caring for a group of refugee children belonging to their tribe, and they promised to send their head men to our orphanage headquarters to select the first unit of children for repatriation. It is quite likely that the American work for these children will result in breaking down the isolation of this people and bringing them back again into a world usefulness."

Farmer Builds Home in Indian Graveyard

Nashville, Tenn.—Jonathan Dennis, farmer, who lives five miles from the center of Nashville, has discovered that he built his home in the midst of an Indian graveyard, with human skeletons surrounding his house.

While digging in his front lawn to plant some flowers, Dennis penetrated an Indian grave. The burial site covers about two acres and is an Indian mound. John Trotwood Moore, state librarian and archivist, who investigated the find, will seek the aid of the Smithsonian institution in mapping the mound for further discoveries.

Several of the graves were investigated. One of the skeletons measured six feet, nine and a half inches. In the same grave was another skeleton, supposed to be the wife of the warrior, and between the two, the bones of a child.

Latest Fad

Biarritz, France.—The "latest cry" of fashion calls for the wearing of rubber earrings painted in bright colors.

Not Good Weather Sign

The weather bureau says that the position of the lunar crescent depends upon the angle that the moon's path makes with the horizon, and on any given date it is always the same in places having the same latitude. If this weather sign were trustworthy, the same kind of weather, either dry or rainy, would prevail on my given date throughout a belt of latitude extending entirely around the globe. Of course, there is no such uniformity of weather in relation to latitude. Near the equator the position of the young moon never makes an angle of more than 20 degrees with the horizon, and it is generally in an even more nearly horizontal position, so that in a part of the world notorious for regions of heavy rainfall, the moon is, according to the proverb, always a "dry" one.

Rubber Paving Indorsed

Tests are reaching the experimental stage of a rubber pavement, said one and one-half years ago at the entrance to the City hospital in Boston, are said to have shown marked advantages. In addition to having been only little during the interval, the pavement has the advantage that snow and ice do not collect on it in winter as on other types of pavement, thus doing away with slipperiness. The blocks are also almost noiseless and vibrationless. These rubber paving blocks are an invention of it. F. Hencick, a consulting engineer of Boston. They are made largely of reclaimed rubber. Those used in the present test are 12 by 9 inches in area and 3½ inches thick, and are laid in plastic sand and cement directly on the street foundation. A coast of asphalt paint was given their edges immediately before laying.

Plants Grow Rapidly in Continuous Light

Experiments in the use of intensive illumination as an aid to horticulture were made recently with 1,000-watt gas-filled lamps equipped with large reflectors. In every case the progress of the plants was remarkable, says a writer.

The plants were placed under the light when buds were just beginning to form. Daffodils and Lent lilies, when placed under the light for six hours a night, flowered in four days, growing about an inch a day.

The rapid progress of vegetation in the Arctic regions, once the sun has reached a fair altitude, has already been noticed by travelers. This is most likely due to the fact that daylight is continuous, although the presence of an unusually high ultra violet content is probably an influential factor.

The same explanation may account for the rapid growth of wheat in regions such as Alberta, in Canada, where the whole process of sowing to harvesting has to be completed in five months.

"FIRST PEOPLE" TURNED TO STONE

Legend of Petrified Indians Is Traced.

Washington.—The progenitors of the Mission Indians of California, the "first people," as they are called, were petrified into rock and can still be seen at the ruins of the old village sites. So say the legends gathered among the California Indians by J. P. Harrington of the bureau of ethnology, Smithsonian institution. Mr. Harrington devoted a year of intensive research, rescuing what can still be learned of the vanished culture of the Mission Indians.

Petrifaction seems to have been a common conception among the California tribesmen. At San Marcos Mr. Harrington found boulders on a hillside which are the warriors of a mythic battle. Some have the blood from wounds running down their sides seen as stains on the rock. Mr. Harrington saw a cartoon sandstone buttock the size of a man standing erect. It is surrounded at the present time by a grove of cactus which keep the curious at a respectful distance.

The wanderings of the "first people" over the earth, while it was still soft and muddy in its newness are also recorded as spirit footprints on the rocks. These Mr. Harrington found at several places and photographed.

"Medicine" rocks with a puzzled aspect were discovered at Ilticon. The stone has two tall bowlders standing some six feet apart. To have good luck in hunting, which required that one could jump successfully among the rocks in the mountains, it was the custom for Indian boys to spring from one to the other of these bowlders.

Grave to Gay

Mrs. Bertha A. K. Landes, mayor of Seattle, sold at a recent luncheon:

"To tolerate political graft is disrespectful to our country, to the American ideal. Yet every man and woman who tolerates graft and corruption is helping to undermine our government—is the footman—if I may turn from grave to gay—was disrespectful to the duke.

"A movie actor, for a joke, once quereled at a friend's dinner party where the guest of honor was a penniless old duke.

"'In the middle of the meal the duke caught the bogie footman's eye across the room and said:

"'Another glass of champagne, if you please.'

"But the footman frowned and shook his finger at the old nobleman.

"'No, Isaac,' he said, in a loud voice, 'I can't give you no more. You've had too much already.'"

Words Are Jefferson's

It was Thomas Jefferson, and not Washington, who in his first inaugural address spoke of "peace, commerce and honest friendship with all nations, entangling alliances with none." In Washington's farewell address, he said: "It is our true policy to steer clear of permanent alliances with any portion of the foreign world." It will be noticed that Washington spoke of "permanent alliances." In a speech to Congress Washington said: "To be prepared for war is one of the most effectual means of preserving peace." This is frequently misquoted by omitting the words "war of."

The Tight Cork

Some things that bother housewives and housekeepers, too, can be very easily remedied. Remember the times you have tried in vain to remove a tightly wedged cork from a bottle?

The solution, as provided by Science and Invention, is so simple it is almost funny. Simply wind a heavy piece of cord twice around the neck of the bottle, leaving long ends. Grasp the ends and pull them back and forth. When the friction becomes great enough the neck will become so hot that the cork will be automatically ejected.

When Boy and Puppy Meet

When boy and puppy meet, even though it is against the tuberculosis sanatorium rules, there is joy in the hearts of both. And why shouldn't there be joy, especially in the heart of the boy for he is going home soon after a stay in the Anghum county tuberculosis sanatorium, and then he can play with puppies to his heart's content. Through the Christmas seals, which finance the work of the Michigan Tuberculosis Association, frail lads are found throughout Michigan, and helped to grow into strong and healthy ones.

Two Kinds of Men

Some men put their souls into everything they do; others merely put their feet in.—Good Hardware.

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the
County of Charlevoix.
IN CHANCERY.
Walter S. Barr, as Trustee, Plaintiff,
vs.
Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham; Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Robert Bridge, Defendants.
County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix in said county, on the 25th day of October A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State, but that they reside in Jacksonville, Florida,

On motion of Lisle Shanahan, Attorney for the Plaintiff.

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors be entered in this cause within three months from the date of this order, and that in case of her or their appearance that she or they cause her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiff within fifteen days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants, Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of the minor children, Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, the next of kin of the said minors, to-wit: Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., all of whom are under fifteen years of age, shall nominate some person to act as guardian ad litem for said minors; and if such nomination shall have been made within twenty day after service of process on them or within twenty days after this order shall have been published once in each week for six successive weeks in the hereinafter provided; the court will appoint some suitable person so act as guardian ad litem for said minor children.

And it is further ordered that within forty days the said plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said County of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiff cause a copy of this order to be personally served on the said Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and a true copy countersigned by me,
CHARLES H. EMREY, Clerk.
LISLE SHANAHAN,
Attorney for Plaintiff.
Business address, 108 Clinton Street, Charlevoix, Michigan.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by William Slough and wife Clara L. Slough, of Ellsworth, Michigan, unto the First State Bank of Central Lake, Michigan, a Michigan Corporation, dated June 15th, 1920, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 18th day of June, 1920, in liber 67 of mortgages, on page 396, which mortgage was afterwards said assigned and transferred by the mortgagee unto Myron A. Weaver of Central Lake, Michigan, by assignment of mortgage dated November 15th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on November 20th, 1925, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,997.75, including the principal and interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statute to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by statute, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan (that being the place where the Circuit Court for the County of Charlevoix is held), on Saturday the 18th day of December, A.D. 1926, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage, being the land and premises and property situated in the City of Charlevoix, County of Charlevoix and State of Michigan, viz: Lots seven and eight except the north fifty feet of Lot seven of J. Milo Eaton's addition to the Village (now city) of Charlevoix, Michigan, according to the recorded plat thereof.

Dated September 9, 1926.

MORTGAGE SALE

Notice is hereby given that a certain mortgage dated May 6th, one thousand nine hundred and twenty five, given by Inez G. Davenport by K. G. Davenport, attorney in fact, and Rowena G. Davenport, wife of Oliver G. Davenport, in her own and dower right, to Alfred E. Hass. The said mortgage was recorded May fourteenth A.D. 1925, in liber sixty eight of mortgages, on page seven, in the office of the Register of Deeds for the county of Charlevoix, Michigan. Which said mortgage was duly assigned by Alfred E. Hass to Mrs. Verona J. Vincent, Sept. eighth, 1926, and recorded September 14th, A.D. 1926, in liber fifty three of mortgages, on page 536 in the office of the Register of Deeds for the county of Charlevoix, Michigan. The said mortgage contains a power of sale, wherein it is expressly agreed that should any default be made in the payment of interest, or any part thereof, on any day whereon the same is made payable, and should the same remain unpaid and in arrears for the space of ten days, that after the lapse of the aforesaid days, so much of the principal sum as remain unpaid, with all arrearages of interest thereon, shall, at the option of said party of the second part, or his assigns become and be due and payable immediately thereafter, although the period limited for the payment thereof may not have expired, anything hereinbefore or in the note contained to the contrary thereof in anywise notwithstanding. Power also being granted to the said party of the second part having paid insurance premiums and taxes thereon and premiums, elects that the whole sum of principal remaining unpaid, with interest, shall now due and unpaid the principal, interest, insurance premiums and taxes shall

Order for Publication—Final Administration Account

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 12th day of November A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Mary Shora, deceased.

Albert F. Bridge having filed in said court his final administration account and his petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.

It is Ordered, That the 10th day of December A.D. 1926, at ten o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said account and hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
30-3t Judge of Probate.

THE CHARLEVOIX SENTINEL

Volume 57 | Charlevoix, Michigan, Thursday, December 16, 1926 | Number 34

CONCERT GIVEN BY CITY BAND

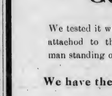
At the Methodist Episcopal Church Last Sunday Well Attended

A large church full of people listened with great appreciation to the band concert and the pastor's message last Sunday evening at Methodist Episcopal Church. The City Band very generously gave of their talent and time, playing several appropriate selections and greatly pleasing our home people.

The band is one of the essential institutions in our city's program of activities and the church keenly appreciated their generous musical contributions to the entertainment and worship of the evening.

The pastor preached on the subject, "Marching to Music." His theme was that while life is a marching program from the cradle to the grave, christian song and music gives cheer, winsomeness, power and appreciation to the journey which otherwise would be drab and colorless. He emphasized the fact that Christ had put a new song into the hearts and upon the lips of humanity.

THE MOOSE LODGE



Mme. Alexandra Kollontai, who was formerly Soviet minister to Norway, is to take charge of Russia's diplomatic relations in the western world, having been appointed envoy extraordinary and minister plenipotentiary to Mexico. She is one of the few women diplomats in the world.

BeginningThursday of this week, December 16th, and until further notice the Moose parlors, at 228 Bridge St., second floor will be open to the public on the following days:

Thursday Afternoons 2 p.m. to 5 p.m.
Saturdays from 8 a.m. to 5 p.m.

Farmers and town people are cordially invited. Late Newspapers, magazines and other reading matter will be there. Also a possible chance to listen to a radio just installed. All free! You are cordially invited. An attendant will be in charge.

BERT SHARROW RESIDENCE IS DESTROYED

Fire Did Much Damage to Their Home Last Saturday Afternoon.

The Bert Sharrow residence on Allen street, was practically gutted by a fire that originated from an oil stove, late last Saturday afternoon, together with the larger part of the household equipment—furniture, etc., in all making for a heavy loss for the entire family.

The fire spread rapidly throughout the building giving but little opportunity for removal of furniture and other articles, before the advanced stage when the fire department arrived on the scene. The members of the company were quickly in action and for upwards of two hours fought continuously before they had the fire under control at which time the residence was in ruins, only the outer shell of the structure remained, with its contents, with the exception of three or four pieces of furniture that had been carried from the building during the early part of the fire.

Limbs of Mammals

Normally the limbs of mammals are four in number, but the hind pair are suppressed in whales and sea cows. The limbs assume the form of fins in the former and paddles or flippers for flight and paddles for swimming. There are about 600 genera and 3,000 species of mammals extant.

U. S. IS GAINING IN WORLD TRADE

Increase Is Shown Since Pre-War Days.

Washington.—A striking picture of the foreign commercial and financial transactions of the United States during the fiscal year just ended and the international trade balance statement made public by the Department of Commerce.

In a foreword to the statement, which takes total account the inestimable and so-called "invisible" or less tangible items of trade, Secretary Hoover pointed out the increase in total international transactions from $10,000,000,000 in 1913 to nearly $8,500,000,000 last year as "showing very strikingly the enormously increasing importance of our foreign commercial and financial relations."

The figure was a gain of approximately $1,100,000,000 over the 1923 total and nearly $3,000,000,000 more than the annual prewar average.

"Increasing economic stability in foreign countries," the secretary said, was reflected by a net import of fully one-fourth of the estimated amount of American currency held abroad and by the fact that the movement of foreigners' bank deposits in this country declined for the first time since 1921.

"During the year the United States has strengthened its international investment position. Our total foreign holdings now amount to about $10,000,000,000, having increased by more than $1,500,000,000 during the year. Our total returns from foreign investments are now greater than at any time in our history."

In the absence of complete and accurate figures which, it was said, would not be obtained for some months, but visible and invisible, to be equal, the statement, allowing for "errors and omissions," estimated the final residual balance last year at $64,000,000 against the United States. The same balance in 1924 was $74,000,000 in this country's favor.

Although the excess of exports in merchandise dropped $304,000,000 from the 1924 figure and a marked increase of $325,000,000 in imports of new foreign securities was shown over that year, these were balanced by equivalent credit changes.

Moon's Center of Gravity

The center of gravity of both the earth and the moon, or the point about which they both actually revolve in their course around the sun, lies within the earth. It is 1,000 miles below the surface. The tides are caused mainly by the moon.

Extreme in Tattooing

The most extraordinary tattooing idea was that of a French cuachman, who, at the time a famous court case was in progress, had his body covered with 120 illustrations of the trial.

BUY CHRISTMAS SEALS

Buying them is more than an obligation—it's an opportunity

HIGHWAYS BUILT BY STATE AND FEDERAL GOVERNMENT

Between Thirty and Forty Thousand Miles of Road Each Year Since 1921

Highways nearly long enough to circle the earth have been constructed during 1925-26 by the highways departments of the Federal government and the several States. Approximately $463,000,000 is being spent for road building.

Between 30,000 and 40,000 miles of surfaced roads have been built each year since 1921. Under the Federal Aid Act, the total cost of highways completed up to July 1, 1924, was $549,655,000 of which the Federal government paid $237,852,000. These highways are 32,412 miles long.

Projects completed since July 1, 1924, cost $44,769,000 of which the Federal government paid $21,291,000. The length of this section of highway is 2,643 miles.

MACKINAW CITY BANKER SUICIDES

Last Friday—Revolver Is Used to Commit Rash Act

M. J. Swonteek, cashier of the People's Bank of Smith & Company, at Mackinaw City, was found in the bank vault dead last Friday noon, December 12th. He was discovered by a customer of the bank who had called to transact some business with the institution.

Death was due to a shot fired from a revolver that found lodgment in the cashiers head—the shot probably fired by the cashier for the purpose of committing suicide.

An examination of the books of the financial institution failed to show irregularities or discrepencies. Apparently there was no shortage in accounts as the examiners report that the books were in excellent condition with all funds accounted for; therefore the cause for the unanticipated act is more or less of a mystery.

BLIZZARD MONDAY NIGHT WITH SNOW

High Wind, Moderate Temperature, Barometer Registered 28.3

This entire region was visited by a regular blizzard of no mean proportions last Monday afternoon which continued from late afternoon throughout the night, becoming more moderate during the early hours Tuesday.

Low barometric pressure Monday forenoon gave ample notice to all parties watching the drop in the little instrument and as daily papers heralded the approach of the blow nearly everyone was warned as to the blizzard prospect and were not greatly surprised when the first sharp blasts of wind announced its appearance.

Monday forenoon barometric pressure registered 28.3, a drop from 29.9 in a few hours of time, therefore the appearance of the blizzard was not a matter of surprise to those who studied their weather instrument or daily weather paper.

Tuesday forenoon there was a decided change, and though there was some wind the high gale of the afternoon and night previous had greatly moderated, practically disappeared, with conditions nearly normal.

The blow came from the southwest and throughout the prevailing wind was from that direction. But little snow fell during the time the blow was at its height, nor did thermometers register more than a degree or two below the freezing point. But for the high wind which continued several hours weather conditions would have been considered moderate by our local citizens.

Tuesday was a fair winter day until toward evening when the storm increased, continued through the night and Wednesday, equally as bad as the blizzard of Monday but much colder, thermometers registering as low as 0 o'clock a.m., all making for typical winter weather conditions.

The storm appears to have been general throughout the entire country, extending from coast to coast and into the extreme south where snow and low temperature has more or less damaged citrous fruits and other crops.

POLITICAL STATUS OF SENATE AND HOUSE MARCH 4, 1927

The Seventieth Congress Will be Equally Divided in the House and Senate

As a matter of record, the following statement of the political condition of the Congress which met Dec. 6th, and the Congress which comes into being March 4, 1927, may prove of interest. In the Congress which met Dec. 6th, in the Senate there were 53 Republicans, 42 Democrats and 1 Farm Labor. In the House there were 247 Republicans, 182 Democrats, 7 Farm Labor and 2 Socialists. There is also one vacancy in the 12th Illinois District.

The 70th Congress which begins Mar. 4, 1927, have this political status: Senate 48 Republicans, 47 Democrats and 1 Farmer Labor. House, 238 Republicans, 195 Democrats 2 Farm Labor and 1 Socialist.

BLAZE TEACHES TOWN VALUE OF THE TELEPHONE

Without Service Following Fire, Rhinelander, Wis., Finds What Service Is Worth

Some people may sigh for the "good old days" but if so they are not residents of Rhinelander, Wis.

Rhinelander, served by the Rhinelander Telephone Company has 8,500 population, and not long ago, as a result of a fire, the city was without telephone service for thirty-one days and was forced back to methods of communication that existed almost half a century ago.

The damage which resulted from the loss of telephone service amounted to more than $100,000 to $200,000, and this does not take into consideration the loss of trade to other communities and the fact that some business thus lost taken up by others may never be won back. Following a week in which business activities were paralyzed, conditions began to readjust themselves, but in a rather primitive way, for methods of merchandising had to be changed and the social life of the community was more or less disrupted.

Archaic methods of communication were utilized. When contact with the hospital was required, it was established by a flashlight system. When a doctor was needed, a red light was flashed. This brought a policeman, who in turn would go to find a doctor. People had difficulty in locating doctors because they were out on cases and had no means of keeping in contact with their offices. Without telephone service it was necessary to keep all fixtures on duty at night. The police force was trebled. Taxicabs had to keep moving around, looking for passengers, and the service had to be cut down, as it was found it didn't pay to run too many taxis without telephone service. Many grocery stores had to send men out to fill orders usually received by telephone, and then again had to send them out to deliver the goods.

Practically all business concerns suffered, for modern business is not done by salesmen alone. The instantaneous contact between sellers and consumers was lost.

Rhinelander never appreciated its telephone service quite so much as when it didn't have it at all.

Readers' Paradise

There are four million books in the British Museum library.

FORMER CHARLEVOIX CITIZEN DIES

Mrs. Ella A. Giddings, at Pontiac Last Week Buried Here

Mrs. Ella Ackert Giddings, an early Charlevoix resident, passed away at the family home, 732 N. Johnson street, Pontiac, last Thursday. Funeral service was held at the residence Friday and the body shipped to this city for interment where it arrived Saturday, and removed to the home of her nephew, Morris Ackert, 1101 Bridge street, where a short service was held before the remains were deposited in Brookside cemetery.

Mrs. Giddings maiden name was Ella Ackert. When about six years of age she came to Charlevoix with her parents and continued her residence here until she went to Pontiac about 37 years ago, where she has since resided. She was educated in the Charlevoix schools and for a term of years prior to her going to Pontiac was a teacher in the public schools.

In 1862 she was united in marriage to Horatio E. Giddings by whom she is survived; also by four brothers, John, Jasper and Robert Ackert, Charlevoix residents, and William Ackert of Maine

MAJ. H. A. DARGUE

Maj. Herbert A. Dargue, assistant chief of the war plans section of the army air corps, has been selected as commander of the army's proposed 18,000-mile flight around South America, visiting every country south of the Rio Grande.

FRIDAY'S STORM WAS FELT ALONG M11

Pere Marquette Passenger, Mail and Freight Trains on Schedule.

Snow that laid in deep drifts in cuts along the Pere Marquette line to automobile drivers just Friday. In the main the train crews found the condition for driving the only difficulty being in any one of the several cuts distributed along the trank line.

These were negotiated, but not with out more or less difficulty by the traveling public. Friday night high winds continued piling the snow into the deep cuts, resulting in deep banks of snow where the deepest ones had to be found, all making for even worse conditions, holding up regular travel and annoying to the public, particularly those traveling by automobile.

Service along the line of the P.M. R. R. system during this period was not appreciably retarded, passenger, mail and freight trains making their regular trips as usual. The slight disturbance appeared to be general throughout the entire north country and in some localities even worse than along M11.

Ambidexterity

If, in spite of precautions, you should one day direct the aerial, penetrating odour of chimney fire, pepper-and-tea pounds of table salt down the chimney and if the same time turn in an alarm of fire.—Domestic article in a woman's magazine.

BRITAIN SEEKING NEW POWER SOURCE

Growing Shortage of Coal Viewed With Alarm.

London.—Alarmed at the continual dearth of coal, the British public is creating around for substitutes. Alfred J. Lockwood, a well-known engineer, muses on the possibilities of the future:

"Coal from China, 'long coal' as brought to Europe in 'evil clippers,' resembling the famous 'tea clippers' of an earlier day, is, he declares, to creep to the surface and be easily mined by the cheapest labor in the world. The day soon when China will flood the world with coal at prices no one else can match. The huge chalk cliffs of Great Britain may be burnt. The cool, but tiny fires of such an enormous deposit of lime of which only a trifling amount could be used, for extracting what chalk is not considered practical.

Doctor Hewitt's theory that nautical mind grow oil-burning fuels which could be used for fuel.

Sir Charles Parsons, F.R.S., famous inventor of the Parsons turbine, told the British Association for the Advancement of Science that we should get all the heat we needed drilling a big hole into the earth and pumping up the heated air to the same depth.

CHANGES IN FLOOR SPACE

S. M. See & Sons Make Improvement to Store Interior

Increase in the amount of stock carried necessitates many changes in the store of S. M. See & Sons. In accordance with a new plan adopted by the firm to enlarge and carry a complete line of general housefurnishings more floor space is required. In order to secure this the present space occupied by the built up office will be transferred to the rear of the salesroom thereby gaining space valuable for display purposes.

More and valuable space will be gained near the front of the salesroom by the removal of a room that is enclosed near the stair leading to the display gallery. Built up shelving is being placed on the gallery extending its full length and from floor to ceiling on which will be displayed the line of smaller articles connected with the general department.

Other changes are under consideration and these will be carried out later as the exigencies of the business demands. The transformation program now under way not only adds a large amount of floor space to their extensive salesroom but adds materially to its appearance all making for a finer and more metropolitan business house. The new work is in accordance with plans and the construction work in full charge of L. S. See, owner-manager.

F. & A. M. ELECTION OFFICERS INSTALLED

Tuesday evening members of Charlevoix Lodge No. 262 F. & A.M. elected officers for the ensuing term as follows:

J.W.—M.—George W. Beaman.
S.W.—Horace E. Fowler.
Treas.—Wm. Pollock.
Sec.—Charles E. Sterritt.
S. D.—John D. Sorenson.
J. Dress.—E. J. Hiller.
Tyler—Henry Partridge.
Stewards—Albert Cook and Gerald W. Richardson.

The new officers were installed immediately following the election, Past Master John W. Kirby acting as installing officer and Simon M. Rose as Grand Marshall.

Upwards of fifty local members were present at the meeting and participated in the work of the evening. Next regular communication Dec. 27th.

BUYS THE SEA HAWK

Captain Harold McCann left for Manitowoc, Wisconsin with the Sea Hawk, a ship recently purchased by him, where he will have the ship repainted to suit his purposes, a new Fairbanks Morse oil burning engine installed and other machinery and equipment added. When the ship is ready for service he will navigate the waters in commercial lisiting along the west coast of Lake Michigan, returning to this port for time to open the spring seasons catch.

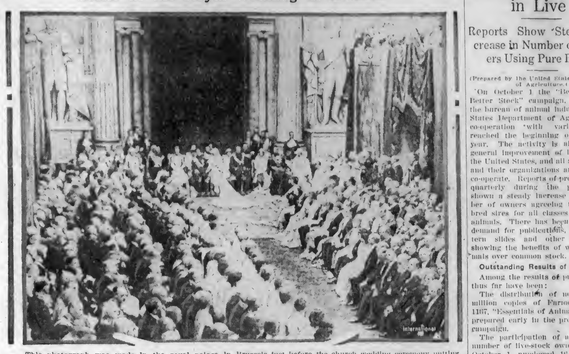
YOUNG COUPLE WED

A very happy wedding service was solemnized at the Methodist Episcopal parsonage Tuesday, December 14th, at eleven o'clock in the forenoon, when Miss Freda Myrtle Sutton and Peter Bakke were united in holy matrimony. Miss Freda, the groom is engaged in the estimable young people of Charlevoix. They expect to make their home in this city, where the groom is employed as a fisherman. Rev. C. E. Pollock officiated at the service, using the beautiful ring ceremony.

Scene at the Royal Wedding in Brussels



This photograph was made in the royal palace in Brussels just before the church wedding ceremony uniting Crown Prince Leopold of Belgium and Princess Astrid of Sweden. The young couple and their immediate relatives are seated in the center background.

Lodi Treasure Myth Exploded

Secret Passage in Palace Reveals Skeleton, but Gold Is Missing.

Rome.—When one mentions Lodi, this prosperous city of Lombardy, one thinks of fine Parmesan cheese, for many experts insist that the very finest is made in this district. But now Lodi is connected with hidden treasure, and the legend of a golden stag buried under its foundation when the ancient city was attacked by the Milanese prior to 1158, when Emperor Frederick took it under his protection and a new city was built five miles from the destroyed town.

It was about a month ago that the people of Lodi were aroused from their everyday stolidity by the rumor that a treasure had been found under the ancient palace of the Sommariva. In former years, whenever there was any digging in the vicinity of the Luss Poggeo, gold coins were found, and workmen often showed their finds secretly to their friends. But the present discovery was on a far greater scale, it was said. It was supposed that a golden stag, golden helmets and shields, with other equally rare treasures, had been found.

The Sommariva owned their palace from 1221, when they were leaders of the popular party and enemies of the Orvenaghi, who headed the nobles. The Sommariva were Ghibelline and the others Guelph, and there was continual fighting. The Podesta made peace by exiling the Orvenaghi, and the Sommariva became lords of the town.

Palace Ceded to Ghisi.

The family held the palace until 50 years ago, keeping it in its original form until the time of Napoleon, when the head of the family was a general in the Austrian army. Napoleon stormed the bridge in 1796. After the return of the general from the war he had the palace reconstructed, but left the old fortifications as they were, as well as the fireplace. He died in Vienna and his successors remained in possession until the head of the family, Marchese Emilio di Salerno, moved to Milan. He ceded the palace to the Ghisi family. It still retains much of the old building, and in order to keep it in touch with the traditions of its ancient Lodi neither steam heat nor an elevator has been installed.

Some weeks ago during a cold spell the wife of the owner, Ghisi, called an old servant and told her to light the fire in the ancient fireplace, at the back of which was an old coat of arms. Sticks and logs were being put into place when one of them hit the coat of arms, and as it by magic it sprung open, leaving a gaping hole.

The servant screamed and her nuisiness rushed in to see what had happened. She saw a huge opening in the back of the fireplace. Her son with friends decided to explore. With torches and rope they entered, one by one, and found a winding staircase leading to the lower level, a distance of 18 feet down. It was necessary to take sticks, as the lower cavern was full of snakes, which had evidently been there for many years. On all sides were ancient walls with fragments of sculpture; on the floor were golden coins and a human skeleton.

Pit Reached Bottomless.

As night had fallen and they did not wish to alarm the people in the section of the palace where a convent of Elisabi nuns has its school, they postponed further search until daylight. The skeleton was taken to a sanitary office in order that they might examine it carefully and learn to what period it belonged. From the lower cavern the search continued down a vaulted passage under other palaces. The search has been delayed, as it is necessary to get permission for the examination of other properties under which the passage runs.

Old inhabitants remember that in the gardens of the Sommariva palace there was a big hole which was supposed to be bottomless. The legend surrounding this was so impressive that it was considered necessary to cover up the aperture so that no accident should occur. It is thought this was connected with the fireplace in the library, and was a secret entrance for those who did not wish to be seen entering the house. Those were troublesome times, and now found it necessary to surround their movements with a great deal of mystery.

Ghisi, the owner of the palace, has thrown light on the discovery by admitting that his father, after he had bought the house, was very much interested in the legends in the books in the library. He studied there often, and discussed with his son the possibility of finding the hidden treasure. One day when he was sitting in the library near the fireplace he inadvertently knocked against the wall and found that it sounded hollow. With a sharp instrument he pried into the wall, and succeeded in finding a secret hiding place. In this repository was a box, which he opened. Inside was a document in which the secret of the hidden golden stag was told.

Kept the Secret.

There was a coat of arms with a shield of the golden stag, and underneath was the same coat of arms that was in the fireplace, while below was a cabalistic sign with two crossed bones and four circles containing the legend, "Ab igne per inferu ad lucem." The father kept the secret of this document to himself. Possibly he feared ridicule if he started searching for the treasure, or possibly he could not understand the hidden directions. When he was on his death bed he called his son and handed him the box with the secret document, telling him all he knew of the treasure supposed to be hidden under the palace. This inscription has now been deciphered to mean: from the fireplace, ah igne; to the subterranean, per inferu ad lucem; which means to enter back of the fireplace, descend below and continue until you reach the light, which is the exit into the garden.

It is necessary, as these walls are a historical monument, to undertake the search together with a government engineer sent by the department of excavation. As the family is certain that apart from the few golden coins there is no other treasure, it has decided to leave the passage open, and live in the tradition that a treasure was once hidden underneath.

Progress Made in Live Stock

Reports Show Steady Increase in Number of Owners Using Pure Breds.

(Prepared by the United States Department of Agriculture.)

On October 1 the "Better Sires—Better Stock" campaign, fostered by the bureau of animal industry, United States department of agriculture, in co-operation with various states, reached the beginning of its eighth year. The activity is aimed at the general improvement of live stock in the United States, and all stock owners and their organizations are invited to co-operate. Reports of progress issued quarterly during the period have shown a steady increase in the number of owners agreeing to use pure-bred sires for all classes of domestic animals. There has been also a wide demand for publications, posters, lantern slides and other information showing the benefits of well-bred animals over common stock.

Outstanding Results of the Work.

Among the results of public interest thus far have been:

The distribution of nearly half a million copies of Farmers' Bulletin 1107, "Essentials of Animal Breeding," prepared early in the progress of the campaign.

The participation of an increasing number of live-stock owners, who, on October 1, numbered 10,603 persons, each of whom signed a written declaration to use pure-bred sires exclusively.

The publication of a department circular advertising the names and rates of pure-bred live stock—assuring that good breeding increases the earning power of farm animals as well as adding to interest in their breeding.

The recent publication of a circular describing the results of the extensive beef-cattle demonstration at Sinks-Barfarms, Grady county, Okla. This circular shows the value of pure-bred beef bulls in producing steers that topped the market sixteen cents off twenty times and that sold consistently for about $2 a hundred pounds more than the average of other cattle on the same markets.

The publication of charts and pictorial material portraying the greater dressing per cent of well-bred cattle, sheep and swine and better market returns.

The establishment of the first county in the United States (Union county, Kentucky) free from cattle ticks and scrub bulls.

Many Barn Signs Issued.

In recognizing the efforts of live-stock owners to improve their herds and flocks, the department, in co-operation with county agents and state extension workers, has issued several thousand lithographed barn signs reading "Better Sires—Better Stock," and issued certificates of recognition to co-operating stock owners.

For the benefit of persons unfamiliar with the early organization and operation of the work, the department of agriculture distributed a packet of literature, consisting merely in signing a blank, which may be obtained on request, in which a stock owner declares that henceforth he will use pure-bred sires exclusively for all kinds of animals raised. The blanks have been distributed among county agents and extension workers in most states.

Some communities have made outstanding progress in the improvement of their live stock. Thirty-three counties have one hundred or more farmers who are using pure-bred sires exclusively and in several counties the number exceeds five hundred such owners. Fifth ward, in the interest of progress, dated October 1, may be obtained on request to the Bureau of Animal Industry, United States Department of Agriculture, Washington, D. C.

Correct Feeding Is Big Factor With Chickens

Correct practice in feeding is the greatest factor that makes for success in the poultry business. One important practice that does not have so many followers as it deserves is the feeding of scratch grains to induce the fowls which are usually grown at home.

Those who feed a mash in winter often quit feeding it as soon as the snow drifts melt away, for they think that when the hen can get out-of-doors she would be unable to rustle for her living. It is a mistake to do away with the mash entirely. Even though it is offered to the fowls they will not eat as much of it as they will in the winter, but they will have an opportunity to balance up their ration. This is essential in order to get a large quantity of eggs. A good scratch grain consists of equal parts of cracked corn and whole wheat. Feed a little of this grain in the morning to make the fowls exercise and give all they will clean up in 15 or 20 minutes at night.

Coffee-Drinking King Uneasy After 62 Cups

Fergus Falls, Minn.—A new version of "uneasy lies the head that wears the crown" came into existence in the case of Gust Comstock, world's champion coffee drinker.

After sipping sixty-two cups of coffee in twelve hours he could not sleep, Comstock, who drinks an average of twenty cups a day, and who sleeps like the proverbial top ordinarily, reported in his usual form after a period of restlessness.

His performance, marked by the tripling of marks set by eleven contesters, resulted in the breaking of his own record of fifty-six cups, established at Hibbing two years ago.

Comstock's pride was aroused when he was presented with a belt, studded with sixty-two one-cent coins, each representing a cup in the world's championship mark. In the evening he was an honor guest at an American Legion banquet.

The champion, who is employed as a porter at a local barber shop, plans to "rest up" before taking on any challengers.

CALLS DAUGHTER DIVORCE HOSTAGE; WINS HER CASE

Mother Says Child Was Held by Father to Force Her to Free Him.

Chicago.—Obvious excitement on the part of Mrs. Alice G. Agard, 5740 Pine Grove avenue, when she appealed to Superior Judge Joseph Sabath for a divorce, aroused the judge's interest. He questioned her and she said her five-year-old daughter, Johanna, had been held hostage a year and a half by her husband, Nelson Agard, wealthy publisher, to force her to get a divorce.

Judge Sabath immediately ordered the child brought into court and the mother and little girl met for the first time in 18 months. Mrs. Agard clasped her daughter in her arms and both wept joyfully.

"But I wouldn't have him as a husband now," she declared. "I've got my child back and that's all I want."

Then she told how she had reclaimed the girl, she elected to obtain a divorce, anyway, and resumed her testimony, charging cruelty. She was granted a decree.

Mrs. Agard said that early in the summer of 1925 she was living at the Buena Terrace hotel. She testified that her husband, then a magazine publisher in Chicago, now living in South Haven, Mich., kidnaped the child, who was playing in the hotel lobby. Then, according to her story, Mrs. Agard received this message through an attorney: "You may have your child back when you obtain a divorce."

Later Mrs. Agard made an appointment to meet her husband in Boston in an attempt to get possession of the child, but he failed to appear, she said.

Finally, despairing of obtaining custody of her child in any other manner, she filed suit for divorce.

Nine Wives Widows as Hubby Succumbs

New York.—Nine wives were bereaved when their collective husband, John Lawrence Lo Sasso, died in Clinton prison, Dannemora, where he was serving a sentence of five years for bigamy and two years for perjury.

They recorded wives were: Frances, of Ogdensburg, N. Y.; Rena, of Fort Chester; Anna, of New York; Dora, of Syracuse; Velma, of Fitchburg, Mass.; Minnie of Lake George, N. Y.; Mamie of Gloucester; Bertha of Poughkeepsie, N. Y., and Flora, of Osborn, N. Y.

Bertha Haze of Poughkeepsie caused Lo Sasso's arrest.

To teach women the principles of housekeeping and make them self-supporting, the Bolivian government has established a professional school in Cochabamba.

Completing the World's Largest Monument

Workmen are here seen putting the finishing touches to the central statue of the King Victor Emanuel II monument in Rome, the largest in the world. Work on the monument was started in 1878. The statue of Victor Emanuel is of bronze plate and gold.

Figures in the Crisis in Rumania

Sweet clover should be planted in the spring if a two-years crop is desired.

Conditions in your barn determine in a measure your success and prosperity.

The cheaper grades of cod liver oil are as good for feeding poultry as the more expensive grades.

Fix the work harness at spare times so they will be in good shape when they are needed.

Alsike is the best clover for soils inclined to be acid; white sweet clover, second best. Then come mammoth, yellow sweet and medium red, according to experiments at the Ohio station.

THE DOOM TRAIL

By Arthur D. Howden Smith

Author of PORTO BELLO GOLD, Etc.

(© by Brentano's.) WNU Service

PRECEDING CHAPTERS

Harry Ormerod, long proscribed traitor to King George as a Stuart partisan, returning from France to London, rescues Alderman Robert Juggins from a band of assassins. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Juggins feels himself indebted. Ormerod tells Juggins he has abandoned the Stuart cause. Juggins informs Ormerod of a Jacobite plot in the Highlands to entertain Prince Charles Edward by forwarding to Prestonpans, Scotland, a force under Andrew Murray, a Scotsman, and a Frenchman, De Veulle, deadly enemy of Ormerod. The two are in London further-ing their schemes. Anticipating the plotters' early return to America, Juggins arranges for Ormerod to go there with letters to Governor Burnet, friend of Juggins, and work to foil Murray. Disguised as Juggins' servant, Ormerod arranges to take passage to America. On the ship he meets a girl, Mary's daughter, ardent Jacobite, who believes him to be Juggins. De Veulle recognizes Ormerod, and exposes him.

"Surely."

"You are Captain Ormerod, formerly chamberlain to King James III?"

"Yes."

"And you not long ago abandoned the king's service and fruitlessly sought a pardon in London?"

"Yes."

"That is enough for me. You are a traitor, a deserter, proven out of your own mouth."

"But—"

"No, sir; there is nought you can say would interest me. I should despise you none the less had you deserted in the same circumstances to my own side. It makes it no less culpable that you deserted from my side because our fortunes were at low ebb."

"But you shall hear me," I protested.

"This is absurd, what you say. You have given two bare statements of fact and twisted into them the implications skilfully made by a personal enemy. You—"

"Last night, sir," she said cuttingly, withdrawing the folds of her cloak so that they might not touch me, "you played upon my sympathies with your tale of exile and a brother buried in the Clan Donald country, and I was all for sympathy with you and sorrow for your sorrow. You as much as told me you were one of the Good People. You let me deceive myself, after you had deceived me first. Oh, you will have acted inexpressibly!"

"What I told you was true! I was out in the '19; I fled to Scotland with my brother; he died and was buried there; I escaped with the remnants of the expedition; I am an exile at this moment."

"An exile! Phaugh! Think on the honest men can truly say that in their misfortune this day! And you—I could weep for the shame that your dead brother and the mother that bore you will be feeling as they look down upon you!"

With that she was gone, and I was left cursing De Veulle, whose treacherous tongue had planted the distorted shreds of truth in her mind; cursing Murray, who must have spied by and listened to it all, snugly amused; cursing my cousin who had put me in such a plight, after whaling my inheritance; cursing the men and women at the Cernioch who had given me such office and ungrudging loyalty with such rewards; cursing Juggins for having embarked me upon the ship with the girl; cursing myself for getting into such a false position regarding the girl—

But no. Common sense came to my rescue then. There was something unaccountably fine about her attitude, something I should never have thought of in connection with a Murray's daughter, both beautiful and attractive she might be. There was devotion for you, faithfulness to a lost cause, the single-minded truthfulness which only a good woman can possess.

The twilight faded rapidly, and I found myself with no appetite for the crowded main cabin, where De Veulle and Murray played piquet, or my stuffy berth. I strolled the deck, thinking in thought. I counted over what Juggins had told me, memorized anew many of the messages he had intrusted to me, speculated upon the possible turn of affairs. I planned in some serene way to win a fortune in that unknown new world ahead of me, and with the proceeds to one hand and a pardon in the other, return and redeem Cernioch from those abominable Hampshire cousins.

With chin cupped in hand I leaned upon the starboard rail in the black well of shadow which was formed by the overhang of the forecastle, and the towering piles of canvas that clothed the foremast. Somewhere beyond the wastes of watery darkness that veiled my eyes lay England, the home which had disowned me. I—

Without any warning a huge arm was twisted around my shoulders and a hand so huge that my own seemed to make no impression in it was clamped down over my mouth. Another arm encircled my waist. My arms were pinned to my sides. My legs kicked feebly at a muscular body which pressed me against the bulwark. Fighting back with all my strength, I was nevertheless lifted gradually from the deck and shoved slowly across the flat level of the rail.

Do what I might, I could not resist the pressure of those tremendous arms, which seemed to have a reach and a power twice those of my own. I gasped for breath as they squeezed my lungs—and in gasping I sensed a queer taint in the air, a musky odor which I did not at once associate with the seamen or anyone else on board the ship.

It was no use. I could not resist. The smoke-like arms mastered me. One last wistful try to a grip on my legs. I was whirled into the air and dropped clear of the rulling—falling, falling, until the cold waters engulfed me.

CHAPTER IV

A Truce

I came to the surface, fighting for breath, my hands battling fruitlessly at the stony side of the ship, which slid past me relentlessly as the passage of time... I tried to cry out, but the salt water choked me. Not a sound came from the decks above. The blackness was absolute, except for the ghastly gleam of a watch-lantern on the poop.

Death was only a brace of minutes away—not death from drowning, but death from the bitter cold that paralyzed my limbs and smote my heart. In the mad desperation of my fear I loosed myself waist-high out of the water, hands clutching and clawing for the support that a reason must have denied me to expect.

I was sinking beneath a mountain towering wave along the counter when my fingers came in contact with a dripping rope, which slipped through their grip and lashed me in the face. My hands possessed themselves of it again, and I took a long turn in the end.

With teeth clenched I drew myself upward along the rope, thrusting forward with my feet for purchase against the side. Sometimes I slipped on the wet planks, and then I was put to it to hold my position. But after all I withdrew my body from the water, and presently I was able to pull myself up the rope, hand over hand, until I reached a small projecting structure at the level of the deck to which was fastened the starboard rigging of the mainmast.

On this bit of a platform I rested myself, below the level of the deck works, one grim thrust round a luminous eye. The whole affair had taken not more than five minutes had elapsed since I had been heaved overboard, and obviously no one had witnessed the incident, for the deck was as quiet as it had been when I was attacked.

Who had done it? I accepted as a matter of course that the mysterious attack could have been one of the crew. No, I must seek the answer in the realm of my known enemies, and those immense, twining arms could belong only to the ugliest negro. I scrambled over the bulwark in a dash, and crouched down upon the deck to survey the situation. It was one against three—no, four; I reiterated bitterly; for I made no doubt the girl Mary would be forced against me. I must have some weapon.

(TO BE CONTINUED)

Ormerod is to realize that in Murray he has an opponent who will stop to anything to gain his ends to which he is fanatically devoted.

Insects Provide Food for Imprisoned Frogs

A "Methuselah" frog has come to light. Two workmen tiled the floor of a cellar in the new 200 feet down the face of a cliff at Headlol slate quarries, came across him. They had to shift a massive boulder to get at his tiny house in the solid stone.

Frogs—or toads—have been found in all manner of unlikely places—even in coal mines. How do they get there? On what do they live? Prof. Sir William Boyd Dawkins answered the question when eight frogs were found in hard gritstone on Werneth Low.

No frogs were in the world, he said, when the stone itself was being formed. Their ancestors then had not even dropped their tails.

The real explanation was simple. Frogs crept into the stone through some face fissure when they were very small. Flies and insects also obtained an entry in the same way, and on these the frogs lived, grew fat, and could not get out again.

No other explanation is possible. Frogs have been sealed up in plant pots, but they have always died. It has been proved that they cannot live without food for a longer period than twelve months.—London Tit-Bits.

Ancient English Term

The term "whole cloth" has been in use in the English language from about the year 1375. The first official record there is of it is to be found in the "Parliamentary Rolls" of 1432, when whole cloths were used for making cloaks. A whole cloth, says the Liberary Digest, is "a bolt of cloth of the full size manufactured," as distinguished from piece cloth, which is "cloth from which a garment has been cut."

In figurative use, connoting a bad sense, the expression "cut or made out of the whole cloth" is used with the significance of "entirely" or "wholly," so that when we speak of "a story made out of the whole cloth," we mean an absolutely untruthful one. Sometimes, however, the expression is used, with a good sense, as when we speak of a man of unblemished reputation and integrity, and refer to him as being "cut out of the whole cloth."

Uncle Eben

"Education teaches a man to read an' write," said Uncle Eben, "but it ain't guarantee to keep 'im from doin' both foolishly."—Washington Star.

Three engines are provided for in a new type of Fokker airplane being designed in Holland.

CHIFFON FROCKS FOR THE DANCE; CLOTH COATS SANS FUR TRIMMING

IN ACCORDANCE with fashion's decree, youth will dance its merry way through the coming holiday festivities robed in lovely, colorful chiffon. Rather than the glimmer and sparkle of palliettes and beads which her elders select for the adornment of more sophisticated dress, the young girl chooses the diminutive of French flower trimmings—just like Gertrude Olmsted, the youthful film actress of beauty-prize fame, is wearing in this picture.

Peach-colored chiffon trimmed with French flowers is a brief description of this delectable gown. But look close: do you not observe something unusual about this adorable dance creation? Yes! That's it! A bag of chiffon festooned with the same kind of flowers which trim the dress! And it is lined! This boon would attend the dance next week or this without a cunning bag flower-trimmed to match one's dress?

Two-toned chiffon dresses are ever so attractive and so up-to-date. This method of combining a light chiffon with a dark one is the same order as inspirational to the designer, who is thus enabled to work out many clever stylings. One very fetching dance frock following out the two-tone idea uses a delicate coral tone for the waist portion with a skirt of deeper toned red. A three-tone effect appears in the border and the girdle of a frock in green.

Another way of achieving a two-tone effect is to wear a shoulder bouquet whose flowers are of deeper tone than the dress. Often the chiffon frock is smartest modes rely on tailored simplicity for chic, rather than upon for adornment. Quality-kind material and nutrition styling are the marks of distinction which characterize the non-furred coat. The all-cloth-sans-fur wrap, often the preference of the elegant Parisienne for informal daytime wear, usually boasts a cape which tops a straight, narrow, mannishly tailored coat portion, just like this picture shows. The material is likely to be finest navy blue twill, although dark green suede cloth is also finding favor in recent models, while there are some few beige and gray cape types which are without fur.

A handsome separate for neckpiece

Embellished With Wee Flowers.

Late Paris Modes in Coats.

of a broad shirred ruffle which is frankly full about the neckline. Gray suede cloth with a discreet use of gray squirrel for collar and cuffs was the medium chosen for the model here shown.

Fur-lined, but not fur-trimmed—at least not ostentatiously so, bespeaks coat elegance for a select model. Sports coats thus fashioned employ in their development stunning novelty modes, such as English tweeds, Scotch plaids and similar weaves of highest standard.

JULIA BOTTOMLEY.

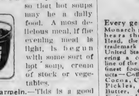
The KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Now blessings light on him that first invented this same sleep! It covers a man all over, thoughts and all, like a cloak; it is meat for the hungry, drink for the thirsty, heat for the cold, and cold for the hot. It is current coin that purchases all the pleasures of the world cheap, and the balance that sets the king and the shepherd, the fool and the wise man even.—Cervantes.

FOOD FOR WINTER DAYS

During the chilly early winter days it is wise to have a stock pot on hand, so that hot soups may be a daily food. A most delicious meal, if the evening meal is light, is begun with some sort of hot soup, cream of stock or vegetables.



Chicken Warmein.—This is a good cold weather dish. Stew a nice fat fowl in plenty of water to make broth. When the fowl is cooked remove it and cut all the meat from the bones. In the broth cook two or three bunches of celery cut into small pieces; when cooked remove the celery and add noodles, cook them until done, and with all the other things kept hot, serve a nest of cooked noodles on the dinner plate, cover chicken and celery that is left over with mashed potatoes. Save enough of tender hearts of celery and some of the white meat of the chicken for chicken salad. The broth that is left may be served by adding cream and egg, making a most nourishing soup for the night meal, a day or two later.

Cranberry Ice.—Cook a quart of cranberries in a pint of water six minutes. Strain through a fine-mesh sieve, add a pint of sugar and stir until dissolved. When cool add the juice of two lemons and freeze to a mush. This will serve a dozen.

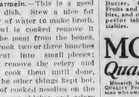
Chicken and Green Pepper Sandwiches.—Parboil for ten minutes green pepper with seeds and fiber removed. Chop fine and mix with one cupful of cooked seasoned chicken, moisten with mayonnaise. Spread thinly sliced rye bread with butter, spread with the filling.

Pressed Corn Beef Sandwiches.—Cook corn beef until it falls in shreds. Drain and arrange the shreds beautifully with some of the fat in a small bread pan. Reduce the liquor in which the meat was cooked to one and one-half cupfuls, pour over the meat, place a weight on it and let stand overnight. Unmold and slice in thin slices. Use as sandwich filling with slices of Spanish onion dipped in French dressing.

Sandwiches.

For a cold night supper dish there are a variety of fat sandwiches to appeal to the appetite.

Hot Egg Sandwiches.—Cut small onion very thin and fry in little butter until tender but not brown. Add to egg, which has been cooked to taste



place on buttered bread with the onion. Set under broiler a moment to brown and serve at once, seasoning well.

Cheese and Herring Sandwiches.—Work one cream cheese and two teaspoonfuls of mustard to a thick paste mixture. Skin and bone and finely mince fillets of herring, or those put up in mustard may be used; there should be an equal measure of cheese and fish. Moisten with mayonnaise, spread slices of bread with the cheese mixture and press the fish into slices of buttered bread; put slices together in pairs.

Gingerbread Sandwiches.—Cut gingerbread into three-inch squares, split and spread with cottage cheese that has been moistened with cream and well seasoned. On the other squares place chopped preserved ginger or orange marmalade. Put together in pairs and serve with hot tea or cider.

Hungry Hunter Sandwiches.—Have ready a round steak that one hunter has killed, tenderize and pare away a little smaller than the slice of bread. Pound the steak with the edge of a heavy saucer until the fiber is broken and the meat becomes tender enough. Drop into a well-greased hissing-hot spider and turn quickly when seared. Cook until well browned, spread with butter, sprinkle with salt and pepper and minced parsley. Place on buttered bread, cover with another slice and serve at once. Serve with horseradish if preferred.

Steamed Sliced Bread.—Butter stale bread and steam until hot, spread with butter again and cover with jam or berries of any kind. Serve with sugar and cream.

Lobster Salad Sandwiches.—Remove the meat from a freshly cooked lobster, or if one at hand, a canned one. Finely chop and add an equal quantity of chopped celery and one-fourth the quantity of hard-cooked eggs. Moisten with mayonnaise. Spread thinly sliced and buttered bread. Cut the sandwiches into narrow strips Serve with ten at bridge parties.

Cottage cheese well seasoned and mixed with green pepper and chives or finely minced nutmeg makes a delicious filling for sandwiches.

Blasphemous Mass

The black mass is a travesty of the Christian mass used in connection with the ritual of the Satanists, a religious sect defying Christianity and glorifying the devil. It persisted in France as late as the Nineteenth century.

Soup Used by Gauls

The Gauls made soup 2,000 years ago from man's fat and the ashes of beech trees, says the Dearborn Independent.

The Fudge Party

When it's cold and windy outside, turn the kitchen over to the boys and girls and give them some Monarch Cocoa. Such wonderful fudge they'll make and the fun they'll have.

Every genuine Monarch package bears the Lion Head, the oldest trademark in the United States registered for use on coffee, and one of the world's most famous trademarks. Coffee, Tea, Cocoa, Spices, Extracts, Flavors, Baking Powder, Canned Fruits and Vegetables, and other superfine table specialties.

MONARCH

Quality for 70 Years

Monarch is the only nationally advertised brand of coffee that has been sold unchanged through the years with ever increasing success.

Slow and steady wins the race.

If Back Hurts Begin on Salts

Flush Your Kidneys Occasionally by Drinking Quarts of Good Water

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority, who wants every active man and woman to drink lots of water each day. Most of the waste and poisons in the blood. Then you get sick. Headache, backache, dizziness, nervousness, constipation, dizziness, sleeplessness, bladder disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a burning sensation, begin to drink soft water in quantities; also get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush clogged kidneys and stimulate them to activity, also to help neutralize the acids in the system so they no longer cause irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, which everyone can take now and then to help keep the kidneys clean and the blood pure, thereby often preventing serious kidney complications.

Stomach Sufferers

PAIN and Distress one to four hours after meals.

BLOATING and Distention?

GAS that presses on heart causing pain, shortness of breath, dizziness?

MR. HULL ON TARIFF

One of the most ardent disciples of free trade in the House of Representatives is the Honorable Cordell Hull of Tennessee. In a recent outburst of wrath against this "iniquitous system," Mr. Hull declared that the "excess, the injustices and the anomalies of the present Fordney tariff are without parallel today except in the case of Russia." He charged that the tariff was devised for the benefit of fifteen per cent of our population and that the other eighty-five per cent pay the freight. He blamed all agricultural troubles on to the tariff and declared that the best way to get rid of the present treasury surplus would be to lower the tariffs.

Mr. Hull is right in the last statement. Abolishing the protective tariff would get rid of the treasury surplus without doubt. Most of our experiences with free trade have brought us empty treasuries and even bond issues to pay the current expenses of the government. We could without doubt cut down our revenue from imports and the same time cut down our revenue from income taxes. For the flood of importations, following such action would trim a lot of incomes, big and little and so of course decrease the income tax revenue. For the less prosperity, the less incomes and the less taxes.

But Mr. Hull forgot to tell us what would go along with this sort of tax reduction. With cheap foreign goods would come local depression, a big army of unemployed and bread and soup lines. This is not theory, it is a statement based on past experiences. If the free-traders want this kind of tax reduction they are welcome to say so but they are speaking only for themselves and not for the great body of Americans, capitalists and wage-earners alike.

It was a little unfortunate for Mr. Hull's statement that it was followed so closely by the report of the Department of Commerce, showing that we are now the most prosperous nation in the world with the highest standard of living the world has ever known. We not only have a surplus in the treasury, but we have a job for every man. Our workingmen have very comfortable homes, equipped with radios and other modern accessories, and many of them can ride to work in their own automobiles.

We are innocent enough to wonder how this could all be true if the protective tariff is as iniquitous a thing as Mr. Hull seems to think. Why is it that the only country in the world which is really prosperous, which has a real standard of living, happens to be the one with this same terrible Fordney tariff?

WHY AGAINST FREE TRADE?

Secretary Mellon produces figures showing the American tariff has not reduced the import of goods and raw materials, American dollars, earned by American labor, are buying most of the world's silk, nitrates, coffee, shellac and rubber. Labor made prosperous by American tariff schedules is using foreign products in vast quantities.

Reduced tariff would mean a temporary flow of more foreign goods in America, resulting in lessened employment and reduced buying by Americans at home and abroad. America would be harmed and Europe would not be helped. With America now the world's greatest customer, any reduction of that buying power would harm the trade not only of Europe but of the world.

Europe has various standards of living. These are below the living standards in America. To a very great extent the standard of living on this side of the Atlantic is protected and maintained by American tariffs; and as Mr. Mellon notes:

"Unless we are willing to bring our standard in America down to the level of that of Europe, we cannot consider a change in our tariff, however, desirable such a change may seem to Europe."

There is, of course, no good or compelling reason why this nation should lower its own standards to those of the Old World, or why it should hand over to Europe the advantages it now has and, by removing the tariff, permit more manufacturing to be done abroad, where the labor costs are less. Nor is it likely that these advantages will be lightly surrendered. As the Mellon statement says:

"It is inconceivable that American labor will ever consent to the abolition of protection which would bring the American standard of living down to the level of that of Europe, or that the American farmer could survive if the enormous consuming power of the people in this country was curtailed and his market at home destroyed."

It is, indeed, "inconceivable." By reason of it tariff guarded prosperity this country has no unemployment problem. Its "real wages" are the highest paid anywhere in the world. America has not seen a soup house since 1914. It has no desire to ever see another. For that reason its face is set against the doctrines and policies of free trade. —Philadelphia Public Ledger.

CLOAKS AND HATS HIGH

Few Americans know that Benjamin Franklin, whom we look upon as scientist, statesman and philosopher had an only daughter of whom he was very fond. While Franklin was in France for the colonies Mrs. Bache, the daughter, wrote him of the social affairs and gaiety in Philadelphia and in reply he reprimanded Mrs. Bache and her friends for their activity. The cost of living was high then as the following extract of a letter from the daughter to her illustrious father will show:

"This winter approaches with somany horrors that I shall not want anything to go abroad in, if I can be comfortable at home. My spirits, which I have kept up during my being drove about from place to place, much better than most people's I meet with, have been lowered by nothing but the depreciation of the money, which has been amazing lately, so that home will be the place for me this winter, as I cannot get a common winter cloak and hatbut just decent under two hundred pounds, as to gauze now, if in fifty dollars a yard, 'tis beyond my wish and I should think it not only a shame but a sin to buy it if I had millions. It is indeed, as you say, that money is too cheap, for there are so many people that are not used to have it, nor know the proper use of it, thatlget so much that they care not whether they give one dollar or a hundred for anything they want; but to those whose every dollar is the same as a silver one, which in our case, it is particularly hard; for Bache could not care to do business in the manner it has to be done in this place, which has been almost all by monopolizing and forestalling."

A different Christmas Gift

An Extension Telephone for Mother

A gift that Mother will appreciate 365 days in the year. An extension telephone will save many of the steps that tire her out. If you have a telephone now, an extension simply means you can have another telephone upstairs or the same telephone at a cost of only a few cents a month. By all means give Mother the dainty things that every woman loves—she deserves the best—but for her, too, a useful different gift—an Extension Telephone. She will appreciate it.

MICHIGAN BELL TELEPHONE CO.

BACK TO THE STAGE

Mrs. Thomas Whiffen, who for years was one of the best loved of American actresses, now at the age of eighty-three, is back again on Broadway to play in the revival of "The Two Orphans" in New York city. Mrs. Whiffen bought a farm in Roanoke, Va., because she thought it was time for her to retire, but when the old time to return to the white lights she could not refuse.

Flip of Coin Chooses Township Treasurer

Port Huron, Mich.—For minor township office, the treasurership of Burnside township near Imlay City has set a precedent for being bitterly contested.

At the outset there were seven candidates in the field for the office. All were eliminated but John Riley and Dolph McNary. At the April election Riley received 147 and McNary 148 votes. A recount was held and one of McNary's votes was thrown out, leaving the election tied.

Riley and McNary then decided to toss a coin for the honor. Riley won the toss. He gave McNary another chance with the coin, but again it fell in favor of Riley. Riley is now Burnside township treasurer.

Uneasy Bed

Pittsburgh, Pa.—James Campbell went to sleep in a newly laid cement sidewalk and police were forced to cut off part of his hair and clothing before he could be freed.

Facts About the Telephone

A good sized manual telephone switchboard contains a million soldered connections.

The average American makes as many telephone calls in six weeks as the average Englishman does in a year.

In the past two years the number of telephone conversations in New York City has increased by over a million a day.

From a telephone standpoint, France is no better developed than is the island of Cuba, as both have but 1.7 telephones per hundred inhabitants.

Reference to the first telephone directory of the city of Hartford, Conn., published 48 years ago, discloses the fact that Samuel L. Clemens (Mark Twain) was one of the few individuals listed.

THE THEATRE

The Campus Flirt—If you want a college education in the course of an hour—one devoid of study, yet teaching the latest thing in laughs—get down to the Palace theatre next Saturday and Sunday.

The reason? Bebe Daniels! She's back again—the same vivaciously dashing bit of femininity who romps through Paramount comedies to the accompaniment of a thousand laughs. This time they're all dressed up and steeped in college atmosphere.

Bebe is cast as a "miscast"—a girl who is sent to an educational college because it is her father's alma mater. He feels that his daughter's snobbish, arrogant ways are merely a cover through which the girl's true character will come smiling after after a period of shoulder-rubbing with other students. Of course, Bebe gets off on the wrong foot. How she changes and finally "finds" herself, creates and causes an ocean of laughs.

Three popular and brilliant figures of the screen, last seen together in "The Bright Shawl," are reunited in "The Beautiful City," which is coming on Wednesday only, Dec. 22, to the Palace theatre. They are Richard Barthelmess, the star; Dorothy Gish, his leading woman, and William Powell.

All three players are old friends on and off the screen. When Dorothy Gish made a series of comedies, Barthelmess was her choice of leading man, and it was with Dorothy Gish that he made his very earliest success. Willian Powell and Dorothy Gish aren't even a bit of fun over to their credit. They appeared together in "Romola," in which Lillian Gish was starred, and received wide praise for their respective performances.

What would you do if you planned a quiet little dinner to celebrate your wedding anniversary and came home only to find that your wife had forgotten all about it and insisted on leaving you alone with the dinner while she attended a social affair? That's just what happens to Lewis Stone in "Too Much Money," First National attraction at the Palace theatre, Dec. 23-24, in which Stone and Anna Q. Nilsson are co-featured.

He had bought his wife a beautiful diamond bracelet to celebrate the event. Naturally he felt quite pleased to find the party was spoiled, in fact, he was so peeved that he turned all his money over to a friend and the next morning a moving van came along and took away all his furniture while his wife was staging a pajama breakfast party. He then explained he had lost his money and was broke.

Egotistical Husband

The palm of revengeful spite must be given to the Elizabethan who left a to his wife the sum of £500 ($2,500) which, however, she could not make use of but was to be expended after her death, so that she might have the satisfaction of knowing that she would be buried in a style most befitting my widow."

To the Taxpayers of the City of Charlevoix:

Notice is hereby given that the December Tax Roll of the City of Charlevoix has been delivered to me, and that the taxes therein levied are payable at my office at any time on or before the 5th day of January 1927, without charge for collection. On all taxes remaining unpaid after the ninth day of January, a collection fee of four cents on the dollar will be added, and collected.

ELMA B. COOK,
City Treasurer

Office Hours: 8:30 a.m. to 12 m., 1:30 p.m. to 5.

W. C. T. U. ANNUAL REPORT FOR 1926

Special days observed during the year were: The Day of Prayer; Victory Day and Independence Day, July 4th.

Up to date topics have occupied the interest of the members during the year. The Volstead Act; World Courts; Community House-keeping; Uniform dress for school children; Women's place in Politics; Bible in the Public Schools; Direct Primary; National Issues; The Shephard Towner Bill; Law in regards to children attending public dance halls; The Cigarette Law; a campaign on this law was carried on in the public and parochial schools, and the law was placed in all places where cigarettes are sold, and an essay contest was held in the 6th, 6th, 7th and 8th grades of the public schools and St. Mary's school on the "evils of the cigarette." Eleven dollars in prizes were given; a medal contest was also conducted—Stanley Hamilton was awarded the medal. Honor cards were given each participant by Mrs. Jennie Alcox.

A banquet in February with Judge Parm C. Gilbert as speaker, and a reception for the teachers of our public schools were among the pleasures of the year. Flowers, fruit and words of cheer have been sent to the sick and "Shut Ins" and four baskets at Christmas time to the needy families.

The Union has lost three members by death; Mrs. Inora Gorsel, Mrs. Jennie Alcox and Mrs. Sarah Emrey.

A membership drive resulted in twenty-two new members.

Delegates to the County, District and State meetings have been sent by this Union.

Charlevoix Union entertained the District Convention on September 15-16; also elected delegates to the Republican County Convention.

Contributions have been made to the Frances E. Willard and Mary T. Lathrope Memorial Funds.

The National Guards, which are composed of officers in Sunday Schools in the city, observed Quarterly Temperance Sunday in four schools in the city, with appropriate exercises.

Active members of the Union have been encouraged in the neighborhood, with a leader and assistant for each group. Certain goals have been adopted and January 28th all groups will have a meeting to become acquainted with the plan of work and have a social hour.

Mrs. James Simmons, delegate to the state meeting at Owosso, gave a very inspiring and encouraging report, and some excerpts from Mrs. Calkin's address only emphasize the work done in the local Union. She said, "what we need is a fresh baptism of common sense." Democracy can, and will protect its people, its homes and its National honor. Laws enacted by an honorable process, after long deliberations cannot be defied, nor the power of Government to enforce them be questioned.

We need obedience to the law because it is a good law and is a permanent law and a success.

Mrs. A. J. Usher entertained the December meeting and the social committee served dainty refreshments.

Mrs. E. E. Cross, Sec'y.

Heavy Breathing

Wee Betty had been shopping with her mother. She was tired and as home was some distance away she said: "Mother, let's inhale a taxicab."—Boston Transcript.

Want to Be Miserable?

If you want to be miserable, observe the following: Think about yourself, what you want, what you like, what respect people ought to pay you, and what they think of you.

Celotechnic Institute Studies Home Builders' Problems

B. G. Dahlberg.

THE Celotechnic Institute of America was recently established, with headquarters in Chicago, to study the problems of American home builders and to place at their disposal the latest discoveries in scientific construction.

It is the aim of B. G. Dahlberg, its founder, to delve into all home building problems and to give to the American public the benefit of its research work and to supply the very latest data on most modern building practices.

It will be a veritable laboratory of building facts including structural problems, modern plans, roof and floor lamination, building trends, analysis, laboratory tests, experimentation in refrigeration, sheathing and interior finishes.

"Important discoveries are constantly being made which practically revolutionize previous home building methods," declares Mr. Dahlberg. "In all the facts we give the public we will have an eye on economy, as well as utility, comfort, health and beauty. It is the aim of the Institute to help the home builder build better homes without any material increase in the cost of construction. It will be a real service bureau for the home builder."

Mr. Dahlberg is among the youngest of America's captains of industry. Born in Sweden, the early part of his life in America was spent in railroading, a good portion of it as an associate of the late James J. Hill, the great empire builder of the Northwest. In more recent years he has been prominently identified with a number of large construction projects. A vision of great efficiency and economy in building, growing out of his experience, finally led to the decision to establish the institute.

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Dec. 18-19

Bebe Daniels in "The Campus Flirt." Bebe as a captivating college miss in a super-comedy produced in the new lavish Daniels manner. She's the snappy sorority sister with the magic eyes who slips through college on sheer nerve and the way she hypnotizes everyboy. Picture beautiful Bebe startling the campus with her flirtations and her gowns!

EXTRA ADDED TREAT—"Big Boy," the kid with the derby and the big shoes in "My Kid," two reels of delightful comedy. Don't miss this.

Wednesday Only---

Richard Barthelmess and Dorothy Gish in "The Beautiful City"—they sound the soul—cry of the Ghetto—every step toward the sunlight marked by the heartbeat of hidden humanity—struggling, fighting they reached the heights—in a big, big story that puts new meaning on the word drama! Also "Felix The Cat" and Fox News.

Thursday, Friday--

"Too Much Money" with Lewis Stone and Anna Q. Nilsson. Here's melody of the millions—dancing of the moaning of golden saxophones . . . with a fleet of motor cars to defy time . . . scattering priceless pearls in her dizzy pace . . . only to find each pearl a tear in the end—made for those with too much money and those with not enough! Also a comedy, Al. St. John in "Pink Elephants."

COMING! "We're In The Navy Now" with Wallace Beery and Raymond Hatton.

DECEMBER 24th—free show at 4 o'clock for all the school children under 12 years of age.

Varnish Under Furniture

There are a great many pieces of furniture in all houses that have never been varnished on the bottom or back because these surfaces are not exposed to view. Unvarnished wood readily absorbs moisture from the air. This causes it to swell and to contract as the wood dries out. Warping and loose joints follow. A coat of varnish on these unseen parts will exclude moisture and prevent trouble.

Long Lecture Career

Ralph Waldo Emerson, the celebrated American essayist, began his long career as a lecturer in 1833-34. For over thirty years he lectured on such subjects as "Human Culture," "Human Life" and "The Present Age."

Shoes in Stone Age

Did stone age men wear shoes, is an interesting question. The Stone age men hunted or tamed animals. They used the flesh of those animals for food, the furs for clothing and the leather often for sandals just as much as we do nowadays; and they made them out of leather, as we do. Only the shape was very much cruder. —Exchange.

"Seedy Looking Fellow"

"Seedy" literally refers to a plant which has gone to seed." A poor, shabby and unattractive looking person is supposed to resemble a plant in its last stages. The term "seedy" is especially applied to a person who is in need of a haircut and whose clothes are shabby and threadbare.

Lawrence R. Chase went to Muskegon last Monday and will spend a short time with R. F. Sloan Sr. before returning to Charlevoix.

Four local fishermen with their ships are located near the Foxes at present —they are: John Cross, Charles Cross, John Nordrum and Charles Bissell.

The Noble House has been closed for the winter months and will again be opened in the spring by the owner-manager, Mrs. Cora Noble, who will spend the next few weeks in Ann Arbor.

Mr. and Mrs. James B. Parsons will close their home, 206 Belvedere avenue for the winter and expect to spend the next few weeks in Alma, Lansing, Detroit and Chicago, leaving Charlevoix early next week.

Captain John Roen recently delivered 200 tons of coal to St James dealers and a full cargo to parties in Boyne City. In addition he has delivered a large amount to local Charlevoix citizens

One hundred new hymn books have recently been placed in the M. E. church for the use of those who take part in the song service. Request is made that same be not taken from the church as all are needed regularly.

Wednesday afternoon the northbound passenger train on the F. M. system was running forty-five minutes late, due no doubt to the storm that has been raging throughout the state for the last few days.

Captain Max Fralick, with the fishing tug Liberty, recently purchased of Captain Harold McCann, sailed for Wisconsin a few days ago with the intention of spending the next few weeks fishing in Lake Michigan waters along the Wisconsin shore.

The Ladies Literary and Sewing Club of the M. E. Society, within the last few days have paid $165 of the church debt, $135 going for part payment of a note, $10 on a radiation obligation and $10 to the treasurer toward paying a deficit in church funds.

The Congregational young people and some invited guests gathered in the church dining room for a social evening last Monday. Games, stunts, refreshments and finally singing the old songs around the piano combined to make a happy occasion for all the participants.

The burning out of a chimney on the Earl Johnson residence, 201 State-st., last Monday night attracted some attention and called out the fire department members. A strong wind was blowing at the time, the fire department being called as a precautionary measure.

The annual meeting of the Charlevoix Association of Commerce Jaciary 12th, 1927; plans for the same with something out of the ordinary on the program is being arranged by a committee who will announce later the entertainment, provided and place of meeting.

By a recent business deal Joseph Smith acquired the interest of Clarence Bartlett in the fishing boat Ethel S. and the equipment used in the business heretofore carried on by the two gentlemen; also the net house and dock on Round Lake, thereby becoming sole owner of the properties.

An epidemic of scarlet fever in causing some annoyance at Harbor Springs. Public meetings are under a ban due to several cases of the disease in various families that are kept under strict quarantine. Schools are kept open, but will be closed should the epidemic continue or spread extensively.

Local commercial fishermen who have been in the vicinity of Fox Islands must be having a more or less strenuous time. Some of them have been out of this port for four or five days, but as they were well supplied with provisions there is little apprehension regarding their safety and comfort at this writing.

Mr. and Mrs. Louis S. Orlowski and son Louis S. Jr., leave for Iowa today with the intention of spending the winter in that state providing the climate proves beneficial for the son. Otherwise they will journey to some southwestern state, probably New Mexico or Arizona for a more health giving region.

Mr. and Mrs Richard Shapton will spend the winter months in some southern point, Southern Pines or possibly at Miami. They left for Southern Pines last Monday, but at time of their departure were undecided as to whether or not they would make an extended visit at that point, as Florida holds some attractions for them.

Holiday shoppers should find no difficulty in supplying their wants and needs in Charlevoix. Stores and shops are carrying complete lines in ornamental, useful and needful merchandise suitable for all seasons, but particularly so for the holidays. Salesroom windows are nicely decorated, make an attractive appearance and carries the spirit of Christmas cheer for everyone.

Some weeks ago the W. H. White Co. missed a brass trimmed harness from their barn on Mill Three. The same harness was found on a pair of horses owned by Wm. Blake and was taken possession of. Blake claims he recently purchased the team and harness of Jim Crandall in North Boyne. Jim Crandall will be remembered as the man who had the still and a lot of mash two weeks ago.—Boyne Citizen.

Pre-holiday hooteh must be easy to obtain in Harbor Springs according to recent reports as five Indians, two men and three girls, were recently convicted upon a charge of drunk and disorderly conduct and sentenced to the county jail for periods of from ten to twenty days, following their conviction a few days ago. Two of the girls are reported as Harbor Springs residents, one from Charlevoix, while the two men are Harbor Springs citizens.

If a newspaper should publish current gossip, or hints and illusions of the best society in the community it would be ostracized and the editor horsewhipped or burned at the stake. Think a minute of the mean and low things you say about your neighbors and your neighbors and imagine how it would look in print. Don't criticize the newspapers for what they print. A newspaper that contained one half the nonsense current among the best citizens would be considered unfit to read.

Indications at the present time leads us to conclude that everyone in Michigan will enjoy a white Christmas.

There has been but slight change today in weather conditions over that of the past day or two. A little warmer but with no perceptible abatement of high wind such as has prevailed since Monday afternoon. Wednesday at 6 o'clock p.m. thermometers registered at 10 above; this morning at 7 o'clock at 12 above. Barometric pressure at this same hour 29.3. In this there has been no change for a 24-hour period.

Eat Lots of Apples

The American people lead the world as apple eaters. Although we fall considerably short of the proverbial "apple a day," we average about three apples a week per capita. The British come second as eaters of apples. They consume an average of two apples a week per capita. The consumption of this fruit is comparatively light in Europe.

African Golf

Rhodesian golfers are said frequently to encounter lions, elephants or a stray rhinoceros on their courses. It may be very irksome to go out after birdies and land nothing but a rhinoceros.—Detroit News.

CHURCHES

Congregational Church
Rev. B.G. Mattson, D.D., Minister

Morning worship, 10:30, with sermon from the text "Day Into Day Uttereth Speech." Sunday School at noon. Young People's meeting at 6 p.m., and evening service at 7:30, continuing the series of little journeys in the Gospel of John, picturing the intimate interviews when Jesus came face to face with men and women, searching their inner lives.

Service at Ironton at 2:30. The pastor had to resort to sleigh runners last Sunday but found a goodly congregation who made the trip worth while by their loyalty.

Plans ahead for special occasions at Charlevoix Church are as follows: December 26th a vesper pageant of Christmas scenes to be given at 4:15 p.m.; January 2nd a vesper program of music appropriate to the Christmas season; January 9th a special evening sacred concert by the Charlevoix City Band assisted by organ and piano. We have purposely avoided holding a vesper service on December 19th, believing that our churches should as far as possible avoid conflict of special programs with those prepared by other churches.

Visitors and the public generally are heartily invited to attend any and all the services of our church and will be made welcome in every way.

Methodist Church.
C. E. Pollock, Pastor.

Sermons next Sunday:
"Glad Tidings," 10:30 a. m.
"No Room In The Inn," 4:15 p. m.

A remarkable vesper service is planned for next Sunday at 4:15 p. m.—a Bethlehem service of music, Christmas memories and message. It will be rendered by the augumented choir and pastor. You may bring your friends and get a new and a renewed vision of the meaning of Christmas. All are always welcome. Put a pleasant place in your Sunday afternoon by attending church before Christmas.

One Hundred new hymn books have been placed in the church for public use —be on hand Sunday and each Sunday and keep yours in use.

The Epworth League will hold its devotional service at six p. m. next Sunday.

Church School Christmas exercises will be rendered Christmas eve., Santa Claus, a Christmas tree and gifts will feature the evening.

Men's meeting next Monday evening will begin with a chicken pie supper. The speaker of the evening will be Mr. Feuer, superintendent of public schools at Boyne City. Invitations are on hand for fifty or more men. If you wish a place at the table you better get in touch with the president, Mr. Frank Bird, or call the pastor about it. Another of the great and good times is in store for the men. Any man is welcome to attend, but the committee ought to know if you are coming so ample provision may be made. This is not a paid supper!—join the men, that is all.

Church of God
Rev. Paul L. June, Pastor

Services held at the Chapel on West Hariaut Avenue:
Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30
Prayer meeting Wednesday evening at 7:30.

The Sewing Circle will meet at Mrs. Ed. Sanders, near the Loch School, on Thursday afternoon, Dec. 16th.

A cordial invitation is extended to all to come to services.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Is the Universe, Including Man, Evolved by Atomic Force?"
Sunday School 12 o'clock.
Wednesday evening service 7:45
Reading room, Tuesdays and Saturdays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.
Rev. Fr. Odelo.

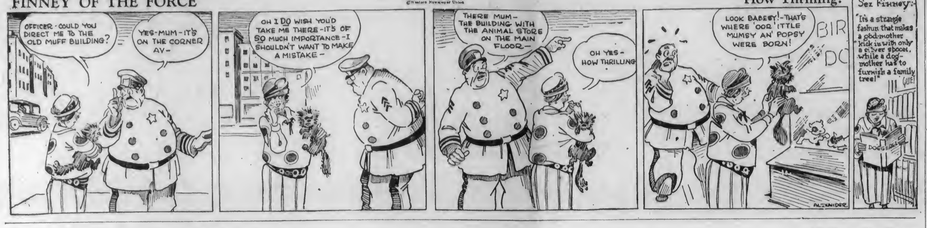
FINNEY OF THE FORCE

By F. O. Alexander



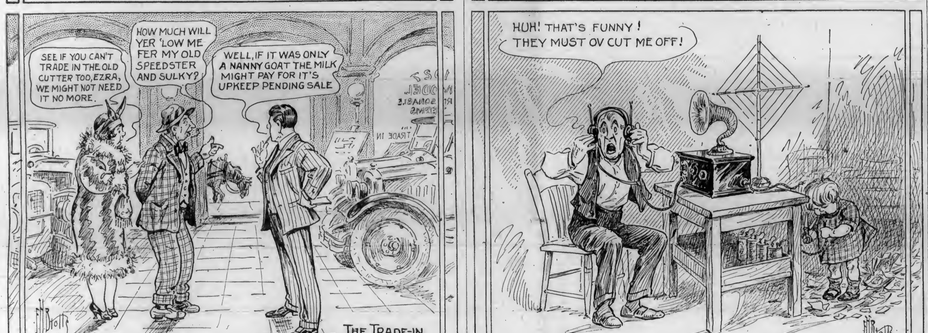
How Thrilling!

MICKIE, THE PRINTER'S DEVIL

By Charles Sughroe

Hail to the Boss

Along the Concrete



Ether Waves

THE FEATHERHEADS

By Osborne

Felix Disciplines Himself

How It Happened

"Yes," she admitted, "we were engaged, but we are strangers now."

"You must have quarreled terribly!" we said.

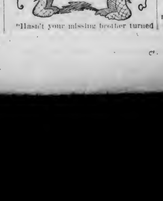
"No; his family moved into the apartment house in which we live, and naturally since then we have not known each other."—Kansas City Star.

A Finding Confirmed

"Green is going to retire from business for five years."

"Oh, I haven't time say that before."

TURTLE SOUP



"Hasn't your missing brother turned up yet?"

"No, poor fellow, I'm afraid he's in the soup."

Her Title

Edgar—Why did you call that girl "countess"? Is she of the nobility?

Edmund—No, she works behind a counter in the dime store.

But She Enjoyed It

"How did your wife like those old-world pictures?"

"She couldn't resist the temptation to dust the furniture."

Hastened

"We will be friends until the end."

"Will you lend me a five-dollar bill now?"

"This is the end."

Girls!

"Well, what did you do with your bathing suit?"

"I put it in the wash basin and it just disappeared."

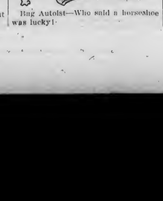
Her Motto

Brounson—Our new cook is the laziest I've ever seen!

His Wife—Yes, she thinks that too many broths spoil the cook.

Every ton of coal burned involves a large waste of valuable material.

NO LUCK



Rug Autoist—Who said a horseshoe was lucky!

Votary of the Fleshpots

Sunday School Teacher—Now, Freddy, what happens to a man who never thinks of his soul, but only of his body?

Freddy—Please, teacher, he gets fat.

Today's Big Offer to All Who Have Stomach Agony

Read About This Generous Money Back Guarantee

When you have any trouble with your stomach such as gas, heaviness and distention, why feel with things which at best can only give relief.

Why not get a medicine that will build up your upset, disordered stomach and make it so strong and vigorous that it will do its work without any help.

Such a medicine is Dure's Mentha Pepsin, a delightful elixir that is sold by your local dealer and druggists everywhere with the distinct understanding that if it doesn't greatly help you your money will be gladly returned.

It has helped thousands—it will no doubt help you.

SKIN BLEMISHES

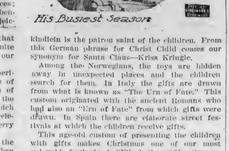
When Christmas Comes

It's a Real Doll House!

The Christmas Trees Arrive

"Here's One for You!"



His Busiest Season

OUT of the distant past comes a whispered greeting that warms the heart of humanity. Merry Christmas! It echoes and re-echoes back across the long ages. It throbs through the generations of life, while kingdoms rise and fall, while men and nations move like checkers on a checkerboard.

Merry Christmas! It stirs the heart like some beautiful old memory. It quickens the pulse like a passionate violin. We forget to play at grownup, and in a moment we are all children again.

"Of all the old festivals," says Washington Irving, "that of Christmas awakens the strongest and most heartfelt associations. There is a tone of solemn and sacred feeling that breaks with our conventional and lifts the spirit to a state of hallowed and elevated enjoyment."

From the early centuries of Christianity the anniversary of the birth of Christ has been celebrated. It is called "Christmas" because in early England the festival was called "Christesmesse," which means "Christ's mass." At first the time of the festival varied in different places. Some churches observed it in December, others in January, April, May. There is no historical record as to the exact birth date of Christ. It seems possible, says Lillian Eichler in her "Customs of Mankind," that December 25 was established as the festival day because it marked the beginning of the great winter festival when Britons, Germans, and Gauls made merry in pagan fashion. Christmas replaced these old pagan festivities, the customs of the old blending into the customs and symbols of the other.

The celebration of December 25, as Christmas, spread to various parts of the Christian world. Later, as the festival spread, differences in date occurred owing to differences in calendar. But the general belief prevailed that Christ was born "at the hour of midnight on Christmas eve."

Many of our popular holidays appear to have been nature festivals at one time. Easter and May day were very likely spring festivals; Hallowe'en, an autumn festival.

Christmas was originally a festival of the winter solstice. At this period of the year it was customary to hold great feasts in honor of the heathen gods; to dance and make merry. But the early teachers of Christianity prohibited these primitive festivities as unsuited to the character of Christ.

Yet the old festival was not discarded entirely. Its symbols and customs were adapted to the new festival in celebration of the anniversary of Christ's nativity. And so we find Christmas patterned with many curious customs that are of pagan origin. The Yule log, the holly, and the mistletoe go much further back into antiquity than we suspect.

It is said that the first Christmas day festival held in Britain was celebrated by King Arthur in the city of York, A. D. 521. It lasted several days. The new customs were grafted upon the old, and the new symbols were adaptations of old ones. The festivals appealed instantly to the masses; a thy spark was fanned into flame and it has burned brightly throughout all these generations.

By the early Middle ages, Christmas had become the greatest of popular festivals. Begin-and-long observed the day. Churches were decorated and quaint plays concerning the nativity were enacted. Carols were sung in the streets and images of the Virgin and of Christ were carried about from house to house. Alas, of course, there were feasting and merrymaking, as there always are at a festival time.

In Shakespeare's time the Christmas festivities were extremely elaborate. Sometimes they lasted until Twelfth day, or Epiphany—twelve days after Christmas. During this period there was no work of any kind. The people gave themselves over to feasting and gay celebration.

Then there was a reaction, as there generally is. The Puritans developed a keen distaste for the Christmas festivities, and prevailed upon parliament to prohibit them. Christmas was declared a day of fast, and festivities were prohibited by law. After the Restoration, however, the old observances came back—somewhat subdued, but gay and festival as ever.

The observance of the Christmas festival spread all over the Christian world. The date is not everywhere the same, nor are the customs identical; January 6 is the date observed in the Armenian church. The Dutch watch for St. Nicholas on the eve of December 6. The French have their own particular Christmas observances; the Germans have theirs. But wherever and whenever Christmas is celebrated, it is a day of rejoicing and good cheer.

At one time the customs and observances that we associate with Christmas had a very definite significance. Today they survive as part of our social scheme.

In America we have made of Christmas a period of great social activity. The old customs of other lands, combined with tender memories of the first Christmases in this country, make of the holiday a rare interval of joy and cheer which find expression in a semisocial, semireligious celebration. Everybody wishes everybody else a merry Christmas, and even the echoes are glad!

The first Christmases in America were not the gay festivities to which we are accustomed. They were days like all the rest, devoted to work and prayer. Governor Bradford wrote, "Ye 25th day began to erect ye first house for common use to receive them and their goods." A few years after this was written the Church of England established Christmas services in Boston.

Our Christmas celebration carries threads from many lands. People coming here from France, England, Germany, Norway, Italy—all brought their own customs with them. Our Christmas tree and Santa Claus are imported. Our carols and our stocking superstition come from across the ocean. Even our "Merry Christmas" belongs to England.

Yet our Christmas festivities are individual, American. They are like those of no one country, but like a tapestry that has been patterned with many beautiful threads, our festivities reflect the customs, beliefs, and superstitions of many and widely separated lands.

Jolly old Santa Claus with his tinkling sleigh bells and pack of toys is very closely associated with the American Christmas. Our children hang up their stockings in high glee, fully believing that Santa will come down the chimney and fill them with good things, until, of course, they are old enough to separate fact from infancy, or until some cruel person shatters the beautiful belief.

Santa came to America by way of Holland. The old Dutch settlers of New York brought with them all the joyous and loopsidde observances of their fatherland. They introduced to their neighbors in the New world St. Nicholas, or San Nicolaas, patron saint of children. And San Nicholaas promptly grew a long white beard, before his jovial stoutness in a red coat, and made his new to America as Santa Claus.

England, too, has its Santa Claus. The name appears to be derived in slurred interpretation from San Nicolaas—the Dutch for which would be St. Nicholas. According to the popular myth, both here and in England, Santa Claus is supposed to sweep down the chimney, and fill the stockings hanging before the fireplace with gifts.

St. Nicholas became everywhere the child's saint, though his personality underwent some striking changes as he traveled from country to country. In Holland he remained St. Nicholas, but his personality was modified by memories of Woden, god of the elements and the harvest. He became the patron saint of the children of France, although it is Bonhomme Noel (Father Christmas, sometimes called Pere Noel) who brings the good things for the children. In Germany the Christkindlein is the patron saint of the children. From this German phrase for Christ Child comes our synonym for Santa Claus—Kriss Kringle.

Among the Norwegians, the toys are hidden away in unexpected places and the children search for them. In Italy the gifts are drawn from what is known as "The Urn of Fate." This custom originated with the ancient Romans who had also an "Urn of Fate" from which gifts were drawn. In Spain there are elaborate street festivals at which the children receive gifts.

This agreed custom of presenting the children with gifts makes Christmas one of our most enjoyable festivals. In "Elizabeth and Her German Garden" the thought is beautifully expressed.

For days beforehand, every time the three babies go into the garden they expect to meet the Christ Child with his arms full of gifts. They firmly believe that it is thus their presents are brought, and it is such a charming idea that Christmas would be worth celebrating for its sake alone.

There is an ancient tradition in Holland that St. Nicholas makes his rounds upon Woden's horse, Sleipner. This famous old horse of Norse mythology is represented by the reindeer whose hoofs our children are supposed to hear on Christmas eve.

According to the old tale, the children of Amsterdam set their little wooden shoes in the chimney corners because they believed Sleipner would pass by unless he saw them there. And St. Nicholas would give no gifts unless he saw the little shoes in a row by the chimney place and so knew that the children were tucked away in bed. Evidently some parents of long ago created the myth for, their own convenience; it spread quickly, as such things do, and gradually became an established custom.

From Holland the custom spread to France, and children, were taught to place their wooden shoes upon the hearth to receive the gifts of Bonhomme Noel. In Germany and Scandinavia the gifts are not placed in the shoe, but hidden in out-of-the-way places about the house.

The stockings that the children of England and the United States hang up on Christmas eve developed from the shoe. Stores won't stretch, you know, and stockings are so much more roomy! Thus the shoe of Amsterdam became the stocking of New Amsterdam, and the custom was established.

There existed in the east of Russia, among the peasants, an old custom whereby the young girl discovered through divination whom she would have as husband. The traditional formula, still prevalent, is, "Come and take my stockings off." Among the professional classes, and sometimes in the lesser nobility, parents placed money in the stockings of their child—boy or girl—at marriage as a gift for the other partner in the ceremony. Some writers, prominently among them Havelock Ellis, believe that the custom of hanging up the stocking at Christmas is a relic of these two customs from Russia.

Turkey, Cranberries Great Xmas Feast

AS THE plum pudding is the symbol of England's Yuletide feast so the lordly turkey gobbler stands supreme as the piece de resistance of the American Christmas dinner. His majesty, the turkey, however, without his favorite accompaniment of cranberries would lose much of his reputation as the choice of Christmas viands and, though undoubtedly he holds the spotlight of public interest at this season, a word or so regarding the cranberry should not be out of order.

Cranberry cultivation is restricted to Massachusetts, New Jersey, Wisconsin, Oregon and Washington with the palm for production going to the "State of Great Hills." The American, fruit has been cultivated for nearly a century, while some of the present meadows have been bearing for more than 50 years. The fruit originally grew wild in New Foundland, the Alleghenies, North Carolina and the Great Lakes region. Since its cultivation it has fallen a victim to varied fungus diseases due to continued planting in the same location. Although fungi are its bane, there is one variety, the Mycorhiza, that lives in the rootlets and assists growth.

At this time, when the Christmas feast is a pleasure close at hand, it is interesting to know that the delicious, ruby cranberries come from a crop that is annually valued at $1,000,000. The total loss from disease is estimated at 25 per cent, at least, or $750,000 a year.—Frances Marshall Morgan.

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Walter S. Baer, as Trustee, Plaintiff,
vs.
Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham; Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Robert Bridge, Defendants.
County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix in said county, on the 25th day of October, A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Court Commissioner presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff,

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors be entered in this cause within three months from the date of this order, and that in case of her or their appearance that she or they cause her or their answer to the bill of complaint to be filed and a copy thereof served upon the solicitor for the plaintiff within twenty days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants, Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, the next of kin of the said minors, to-wit: Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., all of whom are under fourteen years of age, shall nominate some person to act as guardian ad litem for said minors; and if such nomination shall have been made within twenty day after service of process on them or within twenty days after this order shall have been published once in each week for six successive weeks as hereinafter provided; the court will appoint some suitable person to act as guardian ad litem for said minor children.

And it is further ordered that within forty days the said plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said County of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiff cause a copy of this order to be personally served on the said Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and
countersigned by me,
CHARLES H. EMREY, Clerk.

LISLE SHANAHAN,
Attorney for Plaintiff.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Guy Pearl and wife, Marion Pearl, of Charlevoix, Michigan, unto Charlevoix State Savings Bank, a Michigan Corporation of Charlevoix, Michigan, dated May 21st, 1924, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, May 22nd, 1924, in Liber 64 of Mortgages, on Page 173, on which mortgage there is claimed to be due at the date of this notice the sum of $534.62, including the principal sum due with interest, together with an attorney fee as provided by statute and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statute to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by statute, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix County, Michigan (that being the place where the Circuit Court for the County of Charlevoix is held), on Saturday the 5th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage are described as follows, to-wit: The premises commencing at the Northeast corner of Section nine, town of Eliwerch, Michigan, unto the First State Bank of Central Lake, Michigan, a Michigan Corporation, dated June 15th, 1920, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 4th day June, 1920, in liber forty of mortgages, on page 206, which mortgage was afterwards said, assigned and transferred by the mortgagee named in said mortgage to the State Bank of Central Lake, Michigan, by assignment of mortgage dated November 17th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on November 20th, 1925, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the circuit court for the County of Charlevoix is held) on Saturday the 19th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northwest fractional quarter of the northwest quarter, all in section seven, township thirty two North of Range seven west.

Dated November 15, 1926.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Oliver G. Davenport by K. G. Davenport, attorney in fact, and Rowena G. Davenport, wife of Oliver G. Davenport, in her own and divorce right, to Alfred E. Haas. The said mortgage was recorded May the fourteenth A.D. 1925, in liber sixty-eight of mortgages, on page seven, in the office of the Register of Deeds for the county of Charlevoix, Michigan, and which said mortgage was duly assigned by Alfred E. Haas to Mrs. Lorena J. Newman, by assignment dated May 25th, 1926, and recorded September 14th, A.D. 1926, in liber three of mortgages, on page 539 in the office of the Register of Deeds for the county of Charlevoix, Michigan. The said mortgage containing a clause, whereon it is expressly provided that should any default be made in the payment of interest or any part thereof, on any day whereon the same is made payable, and should the same remain unpaid and in arrears for the space of ten days, that after the lapse of the said ten days, no much of the principal sum as remain unpaid, with all arrearages of interest thereon, shall, at the option of said party of the second part, or his assigns become and due and payable immediately thereafter, although the period limited for the payment thereof may not have expired, anything hereinbefore or in the note contained to the contrary thereof in anywise notwithstanding. Power of sale being granted to the mortgagee or also being granted to the mortgagee to effect insurance, pay the premiums thereof, to pay taxes that are in default, to be added to the principal and accrued interest. Therefore the said assignee of the second party having paid insurance premiums and taxes thereon said premiums, elects that the whole sum of principal becomes due, upon which there is now due and unpaid the principal, interest, insurance premiums and taxes in the sum of Three thousand eight hundred sixteen and 64-100 dollars. That the said mortgage will be foreclosed by a statutory sale of the premises therein described. That certain piece or parcel of land situate and being in the village of Walloon, in the county of Charlevoix and State of Michigan, and described as follows, to-wit: Commencing at a point twenty five feet south of the center of the L. S. & M. S. railroad right of way in the center of the Boyne City and Springvale State road, thence south thirty feet, thence west to meander line on east shore of Walloon Lake, thence northerly along said meander line to the south boundary of said C. & M. L. R. R. right of way, thence east along said railroad spur, to the place of beginning, being part of the southwest quarter of the southwest quarter of Section nine, township thirty three North, Range five west. At the front door of the court house in the City of Charlevoix, that being the place of holding the circuit court for the County of Charlevoix, at ten o'clock in the forenoon of the eighth day of January A.D. 1927.

Dated this 14th day of October A.D. 1926
MRS. VERONA J. VINCENT,
Assignee of Mortgagee

WILLIAM G. McCUNE,
Attorney for Assignee,
Office at Petoskey, Michigan. 25-13t

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Irene E. Young, of Charlevoix, Michigan to Sarah Jane Myers, of Charlevoix, Michigan, dated the 28th day of November A. D. 1922, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 29th day of November A.D. 1922, in Liber 53 of Mortgages, on page 465, whereby the power of sale contained in said mortgage has become operative, on which mortgage there is claimed to be due at the date of this notice the sum of One Thousand Twenty Three Dollars, for principal and interest and taxes paid by the mortgagee to protect his security, and no attorney fee of Twenty-five dollars, provided for in said mortgage, and no suit or proceeding at law having been instituted to recover the moneys secured by said mortgage or any part thereof;

Now, Therefore, By virtue of the power of sale contained in said mortgage, and the statute, in such case made and provided, notice is hereby given that on Friday the 24th day of December A.D. 1926, at ten o'clock in the forenoon, I shall sell at Public Auction to the highest bidder, at the east front door of the Court House of the City of Charlevoix, in the County of Charlevoix, State of Michigan, (that being the place where the Circuit Court for said County of Charlevoix is held), the premises described in said mortgage, or so much thereof as may be necessary to pay the amount due on said mortgage, with seven per cent interest, and all legal costs, together with an attorney's fee of Twenty five Dollars, as provided by law and the amount due on said mortgage, the premises being described in said mortgage as follows, to-wit:

Lands and premises situate in the Township of Hayes, County of Charlevoix and State of Michigan, viz: East Half of the Northeast Quarter of Section Two, Township Thirty three North, Range Seven west containing Eighty acres of land according to the return of the Surveyor General.

Dated, September 29th, 1926.

Lava-Coated Trees in Hawaiian Forest

On the slopes of a volcanic mountain there is a perfect forest of lava trees, which is believed to have been formed many centuries ago. The trees which form this forest are amazingly lifelike, even the grain of bark being represented, yet they are nothing but shells of lava. The way in which this strange forest was formed is interesting. The original trees were of a kind known locally as ohia, a species abundant in the Hawaiian Islands. During a terrific outburst on the part of the volcano, when the lava poured out in a vast cataract, 40 or 50 feet deep, the whole of a thickly wooded region was overwhelmed. The bulk point of lava is at 2,000 degrees Fahrenheit, but it instantly solidifies at a point a few degrees below this high figure. . . . When the trees were buried in the stream of liquid fire, the lava which came into touch with the trunks and branches immediately solidified, owing to the contact with the cold bark. The main flow of the molten stream swept on, leaving each tree with only a thin coating. This was sufficient to set the wood burning; and, in course of time, all the branches and the trunk of the tree were consumed, leaving nothing but the lava mold.

Much of It Useless

Knowing everything would be the same as having the nuts, full of rubbish.—Toledo Blade.

South Sea "Belles"? He Finds Them Fat!

Monrovia, Calif.—The dream of South sea romance has been shattered. The lure of tender graces that has been built around the belles of Samoa has faded into the unsympathetic glare of hard facts as related recently by Dr. Russell Pemberton, Monrovia scientist, in an address before the University club.

Most of the maids of Samoa are "mushy," Doctor Pemberton declared, and become very large in early life.

On the island where the observatory is located, there are about 200 whites, 700 half-casts, who claim equal standing, and a larger, but disinheriting number of true natives.

The islands, he declared, have the most equable climate in the world. The thermometer was never known to go above 91 degrees, or below 72 degrees, day or night, winter or summer. Rain affects the temperature more than nightfall, he said.

Robert Louis Stevenson, the novelist, who died and was buried on these islands is regarded as a god by the natives, the speaker said. His eccentricities were so pronounced that they always attribute divine favor to such persons.

Chef Draws Notables of France to Lake Hotel

Geneva, — When M. Briand of France, and M. Quinones de Leon, the Spanish representative on the council of the League of Nations, come to Geneva, they never fail to take lunch at the Chalet Russe, which is seven miles outside Geneva on the shore of Lake Leman.

For many years Aime Lavanchy, chef of the Chalet Russe, was chef at the Spanish embassy at St. Petersburg, during the period when Marquis de Chanpongrado was ambassador. M. Quinones de Leon is the nephew of the Spanish marquis, and this is the reason which first led him to frequent the Chalet Russe. Briand knew the chef gained his knowledge of cooking in Paris.

It was at Moscow in 1883 that Prince Oldenburg asked him to prepare a special dinner in honor of the coronation of Alexander III, and on that occasion the emperor gave Lavanchy a gold medal to commemorate a very wonderful repast.

Girls Ride "Rods"

Omaha, Neb.—Another last refuge of man has been invaded by women. The hobo is quitting the "rods" for automobile cushions, but the girls are beginning to give him close competition in hogging lifts.

Sues Druggist

Montgomery, Ala.—J. B. Sanford has entered suit for $5,000 against a druggist because, he avers, a prescription clerk gave him carbolic acid instead of medicine to stop a stomach ache.

Now They're American

Sardines used to come from Sardinia. Some of them still do, others come from Brittany and from Norway, but the great majority of them now come from the coast of New England and from the Pacific coast. Sardine fishing is a four months' industry in Atlantic waters, and lasts six months in the Pacific. It is rapidly growing to be one of the most sizable phases of the canning industry.

Facts Most Important

Much discussion is based wholly on opinion, and argument soon becomes only talk. Unanswerable argument is backed up with facts, hence the necessity for facts. Today more than ever before, cold facts are what thinking people want.—Grit.

MAY BE HABITABLE PLANETS GALORE

Scientist Points Out Possibility of Unseen Worlds.

New York—There may be thousands of habitable worlds in the universe, said Prof. Henry Norris Russell, professor of astronomy at Princeton university, in a lecture in the American Museum of Natural History.

The only planet of which we know which may contain life is Mars, he said, because it is the only one on which the necessary conditions obtain. Within observation of those on the earth in inter-stellar space there may be planets unseen to those on earth which also hold some form of life.

Water, air and heat are necessary to maintain life, said Professor Russell, at least life as we know it.

"If this earth were taken away from the sun for a year the oceans would not only be frozen but the atmosphere would be condensed to liquid air washing on the rocks of a frozen sea," he said.

If all the worlds were considered to determine which were life on them at least one billion would have to be examined, he said.

"The heavens are literally crammed with stars," he added, throwing on the screen a picture of the north polar sky. "Each of these is a sun to show the myriad worlds caught by the camera.

"Of the billion worlds," he said, "not one single one is inhabitable. Why? Because they are too far away."

"That means that they are large and hot, that their heat is such as to be fatal to life.

"In such a region there is no hope of looking for life as we know it, but there might exist organized beings purely gaseous, but that sounds more like a ghost than anything we know."

CHARLES P. TAFT, II

Charles P. Taft, II, son of the former president and chief justice of the Supreme court, is attempting to follow in the footsteps of his illustrious father. Young Taft has just succeeded in winning his first political triumph by securing the Republican nomination as prosecuting attorney of Hamilton county (Cincinnati), Ohio, after a stiff fight. William Howard Taft made his debut in politics as assistant public prosecutor in Hamilton county in 1881.

Limbs of Mammals

Normally the limbs of mammals are four in number, but the hind pairs are suppressed in whales and sea cows. The limbs assume the form of legs for terrestrial progression, wings for flight and paddles for swimming. There are about 600 genera and 5,000 species of mammals extant.

WHAT THEY THINK OF US

Not Money Grabbers but Money Spenders

NOT SEEKING WORLD DOMINION

American Tourists Annually Leave a Billion Dollars in Europe

Some extent of the European misunderstanding of American can be gathered from the recent addresses of Ambassador Herrick in Paris and of Ambassador Schurman in Berlin. Our representative in Germany declared in his Thanksgiving Day speech that we are not money grabbers but money spenders and he pointed to the fact that American tourists annually leave a billion dollars in Europe, roughly, he said, to pay off the debt which the European nations owe to America.

And Mr. Herrick our ambassador to France, stated in his Thanksgiving day address that we are not seeking world dominion and that all we want to do in an international way is to mind our own affairs.

Of course every American knows that we are not shylocks and that we are not seeking to enslave the rest of the world financially or otherwise. But the significant thing is that these two distinguished Americans felt it necessary to deny these things. The fact that such statements were considered timely shows something of the opinion which European people have about us.

There has been a great deal of propaganda in Europe to the effect that America intends to bleed white the debtor nations and to enslave the rest of the world by putting it in financial bondage so that the United States may become the one dominant power of the globe.

Of course Americans at home know that what we want most of all is to be let alone in our international ways so that we can work out our own destiny. So far as the debts are concerned we are asking for what we consider very modest payments, considering the amount loaned and service rendered.

But European politicians, when talking go wrong, take the easy way and blame America for all their troubles. And a great many of their people believe them.

There is no way that we can immediately remedy the situation and clean up the misunderstanding. Cancelling the debts and joining the League of Nations will not do it. Time is the great healer in international as well as in personal affairs, and doubtless the situation will help to right itself. It is already improving. In the meantime we can only stand up for what we believe is right and so far as possible, go about our own business.

Origin of Cribbage Lost

Little is known concerning the history of cribbage. It appears to be of English origin and was formerly known as "noddy." It is mentioned under that name in an epilogue by Sir John Harrington in 1616. The earliest description of the game is found in the "Complete Gamester," 1674. The place and time of the first game of cribbage are not recorded.

MERELY GIANT PIG, IS AFRICAN RHINO

But Hunters Find His Appearance Deceptive.

The most typical African animal is a subject that will start an argument among the big-game hunters as quickly as will the question of which animal is the most dangerous. A real contender is the rhinoceros, says William D. Boyce, in Illustrated Africa.

The rhinoceros and the elephant are close rivals for the honor of being the most powerful animal now living. The five species of rhinoceros are found nowhere outside the warm section of Africa, Asia and the Indian archipelago, although in very distant centuries, in what geologists term the Eocene and Miocene ages, the rhinoceros was native to Europe and North America, and fossil evidence of a great woolly species has been found in England, Europe and Siberia.

This great, stolid brute is fast disappearing from the plains of Africa, and, like the elephant, is gradually retreating before the onward march of the hunters, into the forests. A hunter is now permitted to kill but one rhino; formerly there was no limit.

This four-footed monster really is a giant pig with many of the habits of a pig; weighing from one to two and one half tons, he looks a most unwieldy animal, yet he can be as nimble as a cat and there are times when one suspects that he has the traditional nine lives of the cat. His food consists chiefly of roots, which he grubs up with his powerful nose upon which the horn, composed of hard skin and matted hair, grows bigger as he gets older. The horns of the rhinoceros finds a ready market at $2 a pound in China, where it is ground into powder and sold, according to reports, for tabulation as a medicine.

In his native environment, the rhinoceros is almost as deceptive in appearances as is the African buffalo. Looking at him when he is standing in the grass staring at nothing in particular, seemingly thinking very hard, with a farraway look in his dull, small eye, one imagines that he thoroughly enjoys the attention of his friends, the tick birds, which feed on the ticks infesting his hide.

The tick bird not only keeps the rhinoceros moderately clean, but acts as a guard and alarm clock for him. His excellent is very poor. Loud squawks from the birds stir him into activity; and then his nose, swinging from side to side, as he tries to get wind of the danger which has alarmed his feathered sentinels.

PUPILS OF THE PUBLIC SCHOOLS WILL BE GIVEN HOLIDAY VACATION

The Charlevoix public schools closed yesterday and will not reopen until after the holiday season period. In the mean time students will enjoy a short vacation—a rest period and be really to pursue their studies when they reconveue for school work. Nearly all members of the school faculty will spend the vacation period, according to personal fancy, but in the main with members of their families in the home town and those points are widely distributed. Schools will reopen soon after January 1st, 1927, when classes will again take up their school activities for the remainder of the school year and prosecute the examinations until promotion and graduation day.

THE NIGHT OF THE STAR

Pageant at First Congregational Church Next Sunday—4 p.m.

A pageant of the nativity under the above title, will be presented at the Congregational church at 4 p. m. next Sunday by the vested choir with the assistance of other singers. An outline follows:

Processional,—"O, Come All Ye Faithful," Cathedral Candle Bearers leading.

"'Tis the Night of the Dear Savior's Birth," solo by Mrs. Adams.

Prayer and address by pastor.

Offertory.

"The Prophecy of the Messiah's coming.

"O Rest in the Lord," solo by Mrs. Jack Superway.

Prologue, "Watchman Tell Us of the Night." The star appears.

Scene 1. Bethlehem—the Shepherds —the angelic hosts.

Scene 2. The Babe in the manger—come and worship.

Scene 3. Adoration of the shepherds.

Scene 4. The wise men come bringing gifts.

The Promise of Peace by the Angel of the Star. (Miss Helen Mason.)

Postlude—"Hallelujah Chorus."

Mrs. Archie Livingston, as Mary, will sing a Lullaby and the choir will render appropriate numbers as the scenes of the pageant progress.

A cordial invitation is extended to the community to participate in this hour of worship.

Charged With Law Violation

W. D. C. Germaine, charged with having liquor in his possession, was convicted by a jury last week at the conclusion of a trial in the court of Grand Traverse county. At a previous term of circuit court his conviction was secure under the same charge. The case was taken to the supreme court on appeal when it was reversed, the court finding error had been made in the charge of the Judge at time of the first trial. Germaine was in earlier years prominent in public affairs in Traverse City, during which time he was twice elected mayor of the city.

MAIL SERVICE TWICE WEEKLY

Arranged for Saint James by Postoffice Department at Washington, D. C.

Late information is to the effect that mail service, twice a week, will be the schedule between Charlevoix and St. James, temporarily at least. This news comes from the postoffice department at Washington, D. C., to postmaster George W. Weaver, who is authorized to arrange for such service at a stipulated price per round trip, commencing with December 31st.

The tug Venus, Captain John McCann, made a trip for the department Tuesday and will probably continue the service during the time the order is in force.

TENNIS TOURNAMENT FOR 1927

Plan for Superior Event in Charlevoix; W. G. Parker Attend Meeting

IN GRAND RAPIDS MONDAY

The 1927 Tournament Will Be Attended By Many Tennis Enthusiasts

W. G. Parker, well known tennis player and enthusiast over the game, attended a meeting of the Western Michigan Tennis Association held at the Kent County Club, Grand Rapids, last Monday, and returns with encouraging reports of the meeting, tennis activities for the coming season and particularly so for the local situation and prospects for a tournament of the character similar to that of 1926 and previous years for the 1927 season.

Local fans and business men are of the belief that the local activities in furthering the tennis tournament and all tennis projects and the securing of more co-operation and participate among a larger number of celebrities, professionals, semi-professionals and amateurs in the game on local courts this year. Some stellar events in which they will see real star players in opposition and action.

In the work last season the work of arranging for enrollment games and season program the local committees were most ably assisted and supported by Harold Cartier, whose efficient cooperation can not be counted on wholly for the 1927 season, due to the fact that he is now located in New York City, thus his former position as tournament manager must be filled and in this it appears that Mr. Parker is the logical man to assume the position as he has had vast experience in tournament work, technical knowledge of the game and an expert at the game.

Plans for the 1927 games are as yet in embryonic form, but will soon assume proportions and definite form as local players are enthusiastic and ready to "carry on" in an effective manner and put on a tournament superior.

Tennis players throughout the state were in attendance at the Grand Rapids meet and all pronounced the meeting an unqualified success and expressed the opinion that tennis was gaining in popularity with the prospect for good tournaments in 1927 especially bright.

State officers were elected at the Grand Rapids meeting last Monday and it is pleasing to note that Mr. Parker was placed on the board of directors as a member.

Forget Them Awhile

Troubles are like babies; they only grow bigger by nursing.—The Outlook.

SHEDS NEW LIGHT ON URBAN GROWTH

Writer Makes Point as to Drift From Farms.

That the urbanization of the United States has not been so rapid as a casual reading of the census figures seems to indicate, is the contention of Hubert W. McCullough in the Survey. Admitting that the relative decline of the rural population was marked between 1880 and 1920, he argues that the drift from the farms to the big cities has not been what is popularly supposed.

Use by the census bureau of the term "urban" to classify villages and towns of more than 2,500 inhabitants is misleading in that "urban" is read by thought of in connection with cities, whereas when this classification is subdivided it appears that growth has been by no means equal among villages, towns and cities of different sizes.

Many places formerly classed as rural, as their population grew to more than 2,500, have passed into the "urban" classification merely because their population has exceeds that figure. A part of the urban growth, therefore, may be said to be in reality a mere bookkeeping transaction.

Between 1900 and 1920 about 4,020,000 people passed from the rural to the urban classification without ever changing their homes. Instead of the large cities receiving the bigger part of increase, places having from 25,000 to 100,000 inhabitants had the greater gain. Mr. McCullough also shows that the bulk of the increase went not to urban regions. They and to the book-keeping increase of urban population without representing a loss from the rural regions. Making deductions for this element, the urban increase rate drops from 69.4 per cent to 52.7 per cent. The corrected rate of increase for the rural population is 23.4 per cent, which is about equal to the annual increase of births over deaths.

Interesting as are these figures, they should not be taken as indicating that the citywards trend has been checked. The back-to-the-farm movement has never been really popular, and the lure of towns and cities, even if only in the 25,000 to 100,000 class, continues to be so strong as to be a problem of national importance.

It is true that mechanical devices have greatly increased the agricultural output in proportion to the number of agricultural laborers, thus liberating a certain proportion of the farm population.

CHRISTMAS SEAL SALES

Many are Active Throughout the Country in Selling Seals

Five thousand six hundred and seventy-eight rural school teachers in Michigan and one hundred and thirteen thousand rural pupils under their direction have been working the past week to promote the sale of the tuberculosis Christmas seal, the seal with the double-barred cross on the shield of white. Five thousand six hundred thirty-eight teachers and one hundred thirteen thousand pupils have been learning how to fight tuberculosis, learning to protect others and to protect themselves.

The Tuberculosis Christmas seal has been called the greatest little educator in the world. In selling the seal, rural pupils learn of its purpose and its work. A new stimulus is given the health idea. Both learn that with tuberculosis as with other diseases the sure path to cure is by way of prevention.

Not only do they learn through selling the seal, but through the funds derived from the sale they are taught lessons of hygiene.

It is this work of education, this work of prevention that becomes one of the chief means of combating tuberculosis until such time as a serum or vaccine is found for tuberculosis as it has been found for smallpox and diphtheria.

Excuses

Representative Gilbert N. Haugen said in Washington the other day:

"The men who block the Corn Belt's demands offer us very fine explanations and excuses. Well, they remind me of an anecdote.

"A married man at a store hotel, tried to kiss a pretty girl, but she pushed him off and said:

"'How dare you try to kiss me? Only this afternoon I saw you kissing your wife. And I heard you tell her, too, that she was all the world to you.'

"'Yes, that's right,' the man answered calmly, for he was full of explanations and excuses. 'There are two worlds, you know. Wife is the Old World, you are the new one.'"

NOTICE!

The Charlevoix-Petoskey Bus Line will discontinue its Sunday schedule after January 9th, until further notice. All parties wishing to make connection with Sunday trains at Petoskey should call for special prices.

H. E. FOWLER,

Think Better Under Strain

Your easygoing, pleasant fellow isn't going to get there as fast as the man who grits his teeth, knits his brows and holds his muscles tense, says Popular Science Monthly. A series of psychological tests recently was tried on persons while they were gripping a dynamometer, a pair of hand grips with meter attached, and also repeated while the subjects were sitting in relaxed positions. The results showed that persons can think much better and faster when their muscles are under tension.

INCREASED ELECTRICAL POWER, MORE NEEDED FOR USE IN THE STATE

The State of Michigan is thriving on a diet of electric power and its ability to consume it seems to be unlimited. During the 12 months ending with November, the state used half a billion more kilowatt-hours than in the corresponding year. "No one type of service is responsible for the gain," said Mr. Byerley. More electricity was used in homes, more lines were built to reach towns and villages not presently served, more factories and farms harnessed their machines to motors more streets and highways were lighted, more advertising signs and store lighting contributed to retail merchandising. Many miles of new lines will be needed to serve the rapidly developing resort section.

FORMER PRINCESS DOES SCRUBBING

Likes Housework Better Than Life at Court.

Berlin.—Scrubbing floors as an avocation is infinitely preferable to sitting in the princely halls of Potsdam, says Princess Alexandra Victoria, the divorced wife of Prince August Wilhelm, the former kaiser's fourth son.

The princess, who is now the wife of former Commander Hoemann of the Imperial navy, recently was found cleaning floors by a prominent Berlin lawyer who unexpectedly called upon her at her home in Munich.

"No doubt you are surprised to see me doing housework," the princess said, with a smile, "but, believe me, I am a thousand times happier managing my own home and supporting myself than I ever was when breathing the sugary air at the Potsdam court."

Princess Alexandra, who is a princess of Schleswig-Holstein by birth and a niece of the late Empress Augusta Victoria, depends on her artistic skill for her livelihood, as her husband, who is a simple bourgeois, has no fortune, but merely his officer's pension. During a recent exhibit at a fashionable Berlin hotel her landscapes and portraits brought favorable comment from critics.

The princess' Munich home is a snug, comfortable apartment, in which, as a typical German housewife, she does her own housework and cooking. Since left-wing rule in 1920 and her marriage in 1922 the only thing that has marred the happiness of this domestic paragon, who is almost forgotten and is still famed for her beauty, is the longing for her only son, thirteen-year-old Prince Alexander.

The boy was awarded to Prince August Wilhelm by the court, in accordance with German custom, and is being raised with the third and fourth sons of the former crown prince at Potsdam.

European Corn Borer Control

Aid of Powerful Organizations Is Being Sought Against Pest.

(Prepared by the United States Department of Agriculture.)

Continuance of the complete research and control program against the European corn borer, as carried on by the United States Department of Agriculture and its co-operating agencies, was strongly recommended in an international conference held recently in Detroit. Representatives of the federal, state and Canadian Departments of Agriculture took part in the conference, and also those from the college of agriculture and experiment stations of nearly all the corn belt states, leading manufacturers of farm machinery, and others. It was agreed that the corn borer situation is now so serious that the aid of the most powerful financial and business organizations of the country should be sought against the pest. A public relations committee was appointed, with this and other functions.

Quarantine Commended.

In the comprehensive report presented by the joint committee on the corn borer appointed by the American Association of Economic Entomologists and the American Society of Agronomy, the quarantine and research work of the department was commended. The committee also found that considerable progress has been made in the development of harvesting machinery to meet the corn borer menace. All co-operating agencies were urged to support present policies in respect to the corn borer quarantine enforcement.

An unbiased tour of inspection covering sections heavily infested by the corn borer and the corn-borer laboratories at Monroe, Mich., and Chatham, Ont., gave an opportunity to see many interesting features of the work, and some of the insect parasites of the corn borer in action. Demonstrations were made of two types of corn harvesting machinery. In Essex and Kent counties, Ont., where much of the corn acreage had been completely ruined, many severely damaged fields were seen. In one field all the corn were infested, and the average was 32 borers to the stalk.

New Harvesting Machines.

Several new and promising types of harvesting machines were demonstrated at the Monroe County farm, Michigan. There were two types of corn harvester, each equipped with a cornshow-cutting device, which cut the corn so as to leave practically none of the stalk standing for cattle to eat in the pasture. This latter thing is very important in the control of the borer, because most of the insects now in the stalks will die if the stalk is left in a corner of the lot where it loses all of its nitrogen as manicata gas which escapes into the air.

"Any time during winter, when the ground is dry, there is a good time to spread manure on small grain," says S. C. Bair, extension agronomist at the North Dakota State college. "This is better than to pile the manure outside of the barn. When piled loosely and exposed to weather the manure is always damaged by certain bacteria which change the nitrogen to ammonia gas and this escapes into the air. Much of the value of the manure is thus lost. Leaching loss also plays a part in this loss of fertility."

Mr. Bair states that when manure is spread out on the field, there is too little in one place for the destructive bacteria to become active. Rains will leach out the nitrogen but it is carried into the soil where it is so badly needed.

FARM NOTES

Grapes are propagated in the winter by means of cuttings.

Cod liver oil will help keep the poultry flock in good health and keep the eggs coming this winter.

Keep the lantern in good trim and well filled. In case of a suddenly sick horse or cow you need the best light possible.

Prune the fruit trees after they have shed their leaves, while the weather is good and the farm work is slack.

Where plenty of skim milk is available it may pay to feed calves to an older age before putting on the market. Some farmers find this a fairly satisfactory practice.

Pigs in the cornfield often catch cold when cold fall rains or frosty nights catch them without shelter. Flu and pneumonia can be largely avoided by providing shelter so that they can sleep in a dry place.

The steady increase of dairying, higher prices for hogs, and a general demand for more diversification in farming has attracted the attention of farmers to buttermilk for fed hogs, especially growing pigs.

Keep a watchful eye on stock that are given to burrowing into the straw stack—it may bury them once and for all. To provide some kind of a shelter for them on stormy days is a good insurance against a fatal straw slide.

Notable Invention

The patent for the Crompton loom or cloth-weaving machine was issued to William Crompton of Taunton, Mass., on November 23, 1837. By this machine it became possible to weave intricate patterns of cotton fabric by machinery.

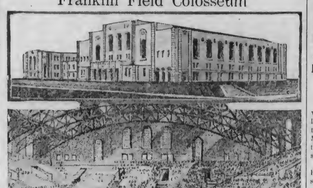
SENATOR FROM MAINE

Franklin Field Colosseum



Interior and Exterior View of New University of Pennsylvania Colosseum.

After several months of discussion over the name of the new indoor stadium just completed at the University of Pennsylvania, the committee appointed by Sydney E. Hutchinson has decided on Franklin Field colosseum.

The committee consisted of Ralph Morgan, chairman of the basket-ball committee, Dr. H. Tait MacKenzie, internationally known sculptor, and E. R. Bushnell, member of the United States Olympic team in 1900 and former graduate manager of athletics.

The new colosseum will be one of the finest in the country. It will have seating arrangements for 10,000 persons in the form of a stadium with rumage that are a feature of the outdoor stadia. Thirty rows of seats will be installed with eleven movable rows that can be removed and they can be moved away to permit four basketball games to be played simultaneously.

The arrangements for basket ball are to be the best procurable. Lighting fixtures will be installed to flood the playing floor with a soft light that will be easy on the eyes of the players. The playing floor will be so constructed that a maximum speed can be attained without danger of slipping.

Ohio State to Open New Michigan Field

Fielding H. Yost, director of athletics at the University of Michigan, announces that Ohio State will be the Wolverines' opponent in the dedication of the new Michigan stadium on October 22, 1927. Michigan had hoped to have Harvard for its dedicatory foe, but on the Crimson's refusal to schedule the game, Yost offered the honor to Ohio State who were helped by the Wolverines when the Big Horseshoe in Columbus was dedicated in 1922.

Work on the Michigan stadium is being rushed and the big bowl that will seat 70,000 will be ready by next September.

Sargent Given Watch

The Professional Golfers' association will hold its 1927 championship tournament at the Cedar Crest Country club of Dallas, Texas, early next November.

Delegates from 22 districts of the association participated in the balloting on the selection of the course, which will take the title event to the South for the first time.

Alex Pirie, of Chicago, was elected to succeed George Sargent, chosen in the photograph, at luncheon as head of the association. Sargent's retirement after six years as president was accompanied by presentation to him of a platinum watch.

Girls of Chili Ardent Devotees of Athletics

Castle-like buildings, the traditional ideas of feminine dignity the girls of Chili are now manifesting great interest in sports and have organized a number of athletic clubs in the larger cities of the country. Basket ball and tennis, as well as track and field events, are among the more vigorous activities in which Chilian girls are now participating.

A few years ago Chilian girls read with awe and amazement of the athletic accomplishments of their American sisters in the United States and gossiped disdainfully among themselves about how unsuitable the American woman is tending to become. But since then sports have been creeping into the country little by little until today the Chilian girls are accepting them as essential to their physical charm and health.

Girl athletics were first introduced by means of tennis and golf, which naturally carried with them a certain social prestige. Later the sensation commenced to take interest in swimming.

Change in Ring Code

Proposed changes in the boxing rules provide that the difference in weight between contestants in the 125, 135 and 147-pound classes shall not exceed seven pounds, and in the lightest classes five pounds; that in national championships the contestants be required to weigh in only on the opening day of the tournament, and that the national committee shall have the right to seek competitors from the same association. Action will be taken in the future.

The Cornell-Pennsylvania game has been a Thanksgiving day gridiron attraction each year since 1893, with the exception of the war years, 1917 and 1918.

Around the Orchard

PROPER PRUNING HELPS VINEYARD

Owners of commercial or home vineyards would do well to adopt the long cane pruning system, demonstrations conducted last year by W. H. Martin, Jr., extension horticulturist of the Kansas State Agricultural college, showed.

Ninety per cent of the vineyards in Kansas are pruned on a short cane system at present, Mr. Martin estimates. His demonstrations, duplicated five times each in Doniphan, Shawnee, and Wyandotte counties, have convinced him that the yield will be doubled at least on the long cane system as compared with the short cane.

Four pruning methods were employed in the demonstrations—the four-cane Kniffen system, four canes, 10-buds long on each vine; the two-cane Kniffen, two canes, 20 buds long; the short arm fan, eight canes, five buds long; and the spur, 15½ canes, three buds long.

Average yields, in pounds per acre, from the four pruning systems in the 15 demonstrations made were as follows:

Four-cane Kniffen, 3,570; two-cane Kniffen, 3,565; short arm fan, 2,263; spur, 1,545.

The reason for the increase, Mr. Martin explained, is that the fruit two or three buds on a cane either are sterile or produce very small bunches of grapes. The most fruitful buds are found on the sixth to ninth nodes, counting from the ninth or thirteenth bud. The two-cane system overlooked by the demonstrators, Tom, has regained the deck safely.

Protect Against Winter Damage From All Rodents

That young orchard which is coming along so nicely should be protected against winter damage from rabbits and mice.

The best device of this sort is a tube of old window screening or other finely meshed wire, placed about the trunk of each tree. It should extend two feet above the ground.

Old sacks or corn stalks are sometimes tied around the trunks to keep off rabbits. While this device may serve, it actually encourages mice damage, since these pests nest in any convenient trash.

Better clean and keep away all such rubbish, and be sure of safety by using the screening at only a little more cost.

Horticultural Hints

Strawberry fields must be covered with a straw mulch to a depth of four or five inches.

* * *

Keep a weather eye on the bugs and blights. Keep the sprayer in working order and shoot on sight.

* * *

It is much better to take out the old canes and keep the raspberries and blackberries clean.

* * *

A recent survey of New Hampshire revealed that more than half of the apple trees in that state are of the Baldwin variety.

* * *

Keeping a good set of records is largely a matter of habit. There is no other way of knowing and keeping improvements.

* * *

The cherry trees, which are a famous feature of the national capital, were propagated from 12,000 stocks raised with particular care in a Japanese nursery.

* * *

Apple trees can be pruned at any time during the dormant season. Late winter and early spring is preferred by many growers for the pruning of young trees.

* * *

The cheapest, most effective poisons for rats and mice is barium carbonate, a chemical compound which has neither taste nor smell. Hamburger, canned salmon, bread and butter, fresh eggs and apples make good bait. Mix one part of the barium carbonate to four parts by weight of food.

Grapes and Bush Fruits Need Winter Protection

Grape vines and berry bushes do not ordinarily need winter protection in the commercial fruit areas, but in the other sections, where winter temperatures sometimes fall to as low as 30 degrees below zero, they should be sheltered, according to Prof. Joseph Oskmup at the New York State College of Agriculture at Ithaca, N. Y.

This is often provided by "laying down" the canes before the ground freezes, and covering them with earth. With grapes, this is really done if they have been trained to the fan system. Berry canes also may be laid on the ground and covered with straw, and earth. Loosening the plants in the ground with a spade will often aid in doing this.

The different kinds of bush fruits as well as the different varieties of each kind vary widely in their hardiness. Red raspberries are the hardiest of the brambles; black raspberries are intermediate; while blackberries are the most tender. Currants and gooseberries are hardy and need no winter protection.

The grapes best suited to cold locations are, in general, those classed as early or very early which mature in a relatively short season.

Protect Against Winter Damage From All Rodents

That young orchard which is coming along so nicely should be protected against winter damage from rabbits and mice.

The best device of this sort is a tube of old window screening or other finely meshed wire, placed about the trunk of each tree. It should extend two feet above the ground.

Old sacks or corn stalks are sometimes tied around the trunks to keep off rabbits. While this device may serve, it actually encourages mice damage, since these pests nest in any convenient trash.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE — COPYRIGHT BY BRENTANO'S

PRECEDING CHAPTERS

Harry Ormerod, long proscribed traitor to King George as a Stuart partisan, returning from France to London, rescues Alderman Robert Juggins from a band of assassins. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Juggins feels himself indebted. Ormerod tells Juggins he has abandoned the Stuart cause. Juggins informs Ormerod of a Jacobite plot in the American colonies to weaken England by forwarding French interests. At the head is Andrew Murray, a Scotsman, and a Frenchman, De Veulle, deadly enemy of Ormerod. The two are in London furthering their schemes. Anticipating the plotters' early return to America, Juggins arranges for Ormerod to go there with letters to Governor Dinwiddie. Juggins, not wanting to fall into Murray's clutches, disguised as Juggins' servant, Ormerod manages to take passage to America. On the ship he meets a girl, Marjory Dinwiddie, ardent Jacobite, who believes him to be loyal to the Stuarts. De Veulle recognizes Ormerod but keeps his knowledge, by surprise, Ormerod is thrown overboard by the captain, Tom, tal regains the deck safely.

CHAPTER IV—Continued

I looked around me, noting that the watch were all in position upon the forecastle or the poop. Then I remembered that ranged around the bottoms of the masts were large hatchets of wood, iron-tipped, which were used in making fast the halliards. I ran across to the mainmast and tore one from its stod.

Nobody had yet seen me in the pitch darkness, and I stole across the deck to the door which led to the entrance in the poop, my water-soaked shoes quite soundless. The door was ajar, and I opened it very carefully, listening to the murmur of voices in the main cabin. Murray and De Veulle were sitting on the bench which ran across the stern, the table in front of them littered with papers. So much I saw when the entrance into the main cabin was darkened by the body of the negro, Tom.

He saw me descending the stairs, and apparently took me to be one of the officers coming off watch. At any rate, he stepped back to let me pass, and stood there, waiting to give me room. The passage was not more than fifteen or sixteen feet long, and as I approached him I smelled again that mawkish, musky odor—the body smell, as I afterward discovered, of the savage, black or red—which had overwhelmed my nostrils just before I was pitched over the side.

"Tom—that devil—warned me. I took a firm grip on my improvised club and, stepping into the door of light in the main cabin, swung square around, face to face with Tom. He threw up both hands and staggered back with a wild scream of terror, eyes popping from his astounded face.

I gave him no time for recovery, but brought down the iron-tipped end of the handle with all my force against his skull. The blow would have killed any save a black man. I meant to kill him. As it was, he dropped like a slaughtered ox, and lay in a crumpled heap at the lower floor.

Doors hanged in the passage, and I stepped to one side, setting my back to the bulkhead, the while I fastened my eyes upon the doorway through which Murray and De Veulle regarded me. "Twas Murray recovered first.

"Zooks," he remarked, taking snuff with his usual nervous action. "It seems that Tom is growing in the way of making mistakes."

"Aye, and such mistakes are like to rerect upon others," I replied fiercely.

"If I were a refugee from justice, I should be careful how I threatened law-abiding subjects," he answered calmly. "Well, well, it seems we have more company."

I followed his glance to the passage, where stood the girl, whilst over her shoulder peered the two grotesque features of my silent cabin mate, Master Ringham.

"What hath happened?" he asked, "is the negro dead?"

"I think, sir," I said. "He—"

"Not he," corrected Murray cheerfully. "You know not Tom, good Master Ormerod. He hath a skull as thin as can be only he opened with blasting powder."

"It matters little," I returned. "The rascal attacked me above, Master Ringham. I pursued him down here. There is naught more to be said. I will settle with his master."

The second mate looked questioningly toward Murray. I failed to comprehend us, but I had not missed the vetted threat he had addressed to me nor his use of the name Ormerod. Remember, I was still known to the crew as Juggins.

I was uncertain what attitude the captain might take if he was told that I was a political prisoner. There might be a reward at stake—and sailors were haunt like other men.

"Why, that is fairly spoken," rejoined Murray, assuming a pig-my surprise. "I know naught of the circumstances, Master Ringham, but perhaps I may settle with our friend here. As for the negro, I will attend to him."

"There seems be no more violence," warned Ringham, his eyes on me, his words addressed to all of us.

"Violence," rejoined Murray jovially. "Let us reject the idea altogether. Why should we disturb sweet reason's rule? Eh? Master Orm—er—Juggins?"

"No," I said shortly; "I could not prove it. I have no witnesses."

"And you could not even go into a court of law," he pursued, "for you are an outlaw, denied benefit of law or clergy."

"Yes," I flared in answer; "and you, sir, what think you might be your fate in New York if I denounce you to Governor Burnet for attempted murder? Would he make use of the opportunity—or no?"

The realization of this trump card I held had come to me in a flash of inspiration. Now by my face up for all to see, and there could be no doubt it gave my enemies cause for uneasiness.

"I do not think I am so weakly situated as you had supposed," I mocked him. "Aye, you may denounce me to the captain for a Jacobite conspirator, and it may be he will see fit to believe you. You see there is my case. But when we reach New York, and I am brought before the officers of the Crown, I may have a different story to tell. Think you the governor would be loath to implicate a French officer and the man who is leading the fight against his struggle to control the fur trade?"

Murray nodded his head slowly, and sank back in his seat.

"Sure, you are a lad after my own heart," he said. "That was well thought of. 'Tis checkmate—for this present. We must have a truce."

"And, furthermore, if this case is not enough, let me tell you that this man here"—I pointed to Murray; for the first time, I think, I used assumed scorn—"would have you before the captain or any court of law."

I saw the twinkle in his eyes and knew that he was playing with me.

"Of the part played by Chance in arranging meetings that alter the course of lives, Ormerod is soon convinced, as the next installment of this narrative proves.

(TO BE CONTINUED.)

Great Metropolis Has Seen Many Reverses

London existed as a town before the Romans licked it into shape before the great wall that still can be traced, if tradition may be accepted. The Thames was unconfined and spread sluggishly among the reeds; the tide came up, forcing it to form pools behind and inundating the wide tracts of marshes. A thousand years after the Romans left, the houses, thatched with reeds, still were overlooked by woods and thickets, inhabited by deer and wild beasts and the swamps were alive with bittern and duck. All the time London was growing, but on no settled plan. The process of development was continually interrupted, yet after each check it went on again. Bonfires destroyed it; the Danes wiped it out; Alfred the Great rebuilt it and within a century it was burned to the ground. Thereafter, fire and pestilence swept over it at frequent intervals, but it emerged stronger from every trial. London refused to be removed from the map, and its persistence was a visible expression of the determination of its people and a vindication of its position as a world mart.—Vancouver Province.

Sport With Dragon Flies

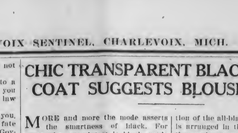
One of the most popular amusements among Japanese boys is the sport of catching dragon flies on long poles smeared with lime. When the insects are captured, they are tied with fine string and flown from the sticks. The dragon fly is known to almost every part of the world except the polar regions, more than twenty-one hundred species being classified. A peculiarity of some kinds is that they choose a favorite twig on which to roost and always return to it even after long excursions after food.—Popular Mechanics Magazine.

Surely a Lifetime Pet

It is said that the whale lives to be about 400 years old. People who dislike the idea of parting with a pet should procure a young whale.

The Coming Man

A coming man should arrive economically. I know men said to be promising who have been on the verge of bankruptcy for years; they have made no progress since I have known them; and bankruptcy will nullify per many of them when they become old, and are able to do less promising. . . . A man who is not a little better off at the end of every year, is failing.—E. W. Howe's Monthly.



A Black Georgette Frock.

CHIC TRANSPARENT BLACK FROCK; COAT SUGGESTS BLOUSE EFFECT

More and more the mode asserts the smartness of black. For coats, the very latest is black suede trimmed in black wolf or lynx. The black velvet capes strikingly draped answers the call of the millinery mode. For dressy wear, in spite of the flare for gay colors, the sentiment for the all-black frock is very pronounced.

What the all-black party or formal afternoon frock lacks in color it makes up for in dainty grace of diaphanous draperies and alluring transparencies. A black georgette frock like the one in the picture, inset with black lace and with a deep lace cape collar is a desirable possession. It serves so charmingly for so many and varied occasions.

Worn over a flesh-colored satin slip it is ideal for the informal party or for afternoon tea. Posed over a black silk slip it becomes a costume of quiet elegance. The charm of the transparent black dress is that it allows so many delightful effects with the interchanging of various colorful costume slips.

The latest caprice among black dinner gowns is that all of lace with long tight-fitting sleeves, for sleeves to the wrist are fashion's latest whim for the sheer evening dress. The skirt of the all-black mode. The fringe is arranged in tiers on the skirt portion and appears in clever appointments on the sleeves with little or none on the bodice.

A decided blouse for the evening wrap, but merely the suggestion of a blouse for the practical daytime topcoat—this is the season's decision of the mode. The promise has been how to introduce the blouse into the coat of cloth without interfering with the straightline silhouette—for women of fashion are loathe to forsake alert-looking lines. In more ways than one this coveted effect has been achieved.

Model of Dark Green Suede Cloth.

In bouffant with all intricately contrived girdle.

Black tulle evening gowns also seem to be fashion's favor. The full skirts are a mass of fluttering tiers and the heartiness are always scalloped or pointed or gracefully irregular.

Recently arriving imports accented yokes of exquisite white or metal lace, with black as an outstanding number on the present style program.

The fringe-trimmed black chiffon frock is also an interesting interpretation of the all-black mode. The fringe is arranged in tiers on the skirt portion and appears in clever appointments on the sleeves with little or none on the bodice.

A decided blouse for the evening wrap, but merely the suggestion of a blouse for the practical daytime topcoat—this is the season's decision of the mode. The promise has been how to introduce the blouse into the coat of cloth without interfering with the straightline silhouette—for women of fashion are loathe to forsake alert-looking lines. In more ways than one this coveted effect has been achieved.

The KITCHEN CABINET

(By Jack Wootten, Newspaper Union.)

So long as men shall be on earth
There will be tasks for them to do.
But long for them to know their worth
Each day shall bring its problem new.
And here shall dream of nightlier deeds
Than ever have been done before.
There always shall be human needs
For men to work and struggle for.
—Edgar Guest.

EVERYDAY GOOD THINGS

For a luncheon dish scalloped corn makes a most tasty one. The following is an old dish:

Corn a la Southern.—To one can of corn add two well-beaten eggs, one teaspoonful of salt, one-eighth of a teaspoonful of pepper, one-half tablespoonful of sugar, two tablespoonfuls of butter and one pint of scalded milk. Turn into a buttered baking dish and bake in a slow oven until firm.

Corn Oysters.—Beat two eggs, add one can of corn, one teaspoonful of baking powder, one tablespoonful of butter and nine-half cupful of flour; season with salt and pepper and fry on a hot griddle in small spoonfuls. Nice served with chicken or squab.

Mock Crab.—Melt four tablespoonfuls of butter, add one-half cupful of flour sifted with one-half teaspoonful of salt, three-fourths teaspoonful of mustard, one-fourth teaspoonful of paprika; when well blended pour on gradually one and one-half cupfuls of milk. Bring to the boiling point and add one can of corn, one egg slightly beaten, three teaspoonfuls of worcestershire sauce. Turn into a buttered baking dish, cover with crumbs and bake until the crustons are brown.

Fried Celery, Tomato Sauce.—Wash and scrape celery, cut into three-inch lengths, dip into batter and fry in deep fat. Drain on brown paper and serve with tomato sauce. To make batter mix one-half cupful of flour, one-fourth teaspoonful of salt, a few grains of pepper, one-third of a cupful of milk and one egg well beaten.

Cooked celery served with cheese and white sauce as an escalloped dish makes a good hot dish for luncheon or supper.

Baked Chestnuts.—Remove the shells from a pint of chestnuts, put into a baking dish and cover with sea-soned chicken stock. Bake until soft, keeping covered until nearly done.

Boiled Chestnuts With Sauce.—Remove the hard shells from the nuts, blanch these in boiling water ten minutes, then drop them in cool water and rub off the brown skins. Drop the blanched nuts into rapidly boiling water and cook until tender when pierced with a fork. Drain and let steam over boiling water, until the sauce is made. Serve with a rich white sauce or a drawn butter, or a Hollandaise.

More Good Things.

The following is a delicious way of serving chicken: Dress the chicken and cut into serving sized pieces, stew until tender. If the chicken is tough add two tablespoonfuls of vinegar when it is cooked. Add salt, four or five whole cloves and peppercorns. Then lay by, two cupfuls of milk and one-half cupful of cream. When it boils thicken with a tablespoonful or two of flour stirred smooth with cold milk. Pour over well baked baking powder biscuits split and buttered and placed on a hot platter.

Parsley Puff.—Boil parsnips until tender, put through a sieve, add a tablespoonful of butter to each cupful of pulp, season with salt and pepper. Beat two egg yolks, add to each cupful of white sauce, and cook and add the stiffly beaten whites, pour into a well buttered baking dish and set into hot water; bake until brown.

Another Way With Parsnips.—Clean the fresh vegetables and cut into narrow strips, put on to cook with a tablespoonful or two of butter for each cupful of sliced parsnips, add no water, cover tightly and steam, cooking carefully until tender. There will be moisture enough in the vegetable to keep from burning. When tender add salt and pepper and stir until lightly browned.

Spanish Cream.—Dissolve two tablespoonfuls of gelatin in one-half cupful of cold water. Cream the yolks of two eggs with one-half cupful of sugar. Pour over these the gelatin, stirring all the time, adding a pint of hot milk. Add a pinch of salt and flavor. Put back in a double boiler and cook as thick as boiled custard. Cool and fold in the stiffly beaten whites of two eggs. Put into a mold and set away to chill.

Dumplings.—Take one beaten egg, one cupful of buttermilk, one-half teaspoonful of salt—if buttermilk is sweet add no soda, if slightly sour add a pinch of soda—flour to make a drop batter, adding two teaspoonfuls of baking powder. Drop into a hot stew of meat or chicken and cover at once; cook from eight to twelve minutes, according to size of the dumplings.

A delicious frosting for any plain cake is a boiled frosting to which a little cream, chopped nuts and raisins are added.

What Boys Know

"Willie, have you any works of art in this city?"

"Yes'm. The filling stations."

Today's Big Offer to All Who Have Stomach Agony

Read About This Generous Money Back Guarantee

When you have any trouble with your stomach such as gas, heartburn and indigestion, any food with things which at best can only give relief.

Why not get a medicine that will build up your appetite, disordered stomachs and make it so strong and vigorous that it will do its work without any help.

Such a medicine is Dare's Mentha Pepsin, a delightful effair that is sold by your local dealer and druggists everywhere with the distinct understanding that if it doesn't greatly help you your money will be gladly returned. It has helped thousands—it will no doubt help you.

Doesn't Matter

"I would like a book," said the girl. "Something light?" asked the librarian.

"It doesn't matter, daddy'll carry it home."—Christian Science Monitor.

When You Catch Cold Rub On Musterole

Musterole is easy to apply and works right away. It may prevent a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster.

Musterole is a clean, white ointment, made of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

The Vogue of Blue

The vogue of all shades of blue is reflected in dainty trifles such as lipstick holders, powder boxes, and tiny cigarette boxes, all beautifully enameled in a brilliant shade of sapphire blue.

Back to the Ornate

Jet fringe, which we associate with the dowager, is being used on very slim, slender and youthful evening frocks of black tulle or chiffon.

Use Feathers

Chiffon evening frocks are a bit more sophisticated than they were last season, and often are given an unusual effect by the use of ostrich feathers shaded from light to dark in the color of the frock.

To Remove Tar Stains

Tar stains may be removed from cotton fabrics by covering the spot with butter and allowing it to remain for a few hours before washing.

Matrimonial Ideas of Ecuador Jungle Folk

Good bachelors enjoy little advantage among the jungle folk of Ecuador, wherever as sturdy build and ability to work are the greatest assets a woman can have. If you went hunting for a wife amongst the Jivaros and picked a young, nice-looking girl, you would be considered decidedly lacking in judgment, G. M. Dyott writes, in World's Work. It would be just as sensible to examine an ostrich egg on the strength of having seen her photograph. The original might turn out very different from the portrait. So with an Indian girl, she might develop into a useless woman. The young Jivaro can't afford to take such chances when he takes his first plunge. His wife No. 1 must be a sure bet and generally the son profits by the extensive knowledge which the father has amassed on the subject of matrimony. It is only when a man is well on in years and needs young blood in the family that he can run the risk of adding a girl-wife to his menage.

The woman's influence in the home is much greater than is generally supposed. Both individually and collectively they awing considerable power, and woe betide the man who deliberately abuses them, for he will let himself in for a world of trouble. In our own homes one woman can make things pretty disagreeable, if she wants to; but these minor chances of peace an Indian might have with five or six women arranged against him! In one part of the Amazon country a wife, if neglected by her husband, sometimes resorts to rather a unique method of getting even. She prepares a peculiar concoction which is served surreptitiously in her husband's food. It has the peculiar property of turning him into a driveling imbecile. Custom permits her to marry another man if her husband becomes a lunatic, so she takes advantage of the opportunity and her first husband trails along after the newly married pair like a dog, waiting on them hand and foot.

Cold Storage

E. W. Bottfield, the noted artist, told at a dinner in Center Bridge a story about a landscape painter.

"Dawb," he began, "is always hard up. Well, a great lady invited him to lunch at her palace in Fifth avenue the other day, and Dawb, of course, accepted, only too glad to put himself outside of a sumptuous meal, you know.

"The meal was very sumptuous, and there were a dozen big wigs present, but Dawb was quite at his ease. During a lull in the talk the great lady gave him a condescending smile and said:

"'I think the warm weather is here to stay, don't you? At any rate I put my sables in cold storage this morning.'

"'Cold storage!' said Dawb, and he prodded the great lady in the ribs. 'Cold storage! Haw, haw, haw! I never heard it called that before. My winter suit and overcoat went in yesterday afternoon.'"

Napoleon's Many Hats

How many hats did Napoleon wear in his lifetime? Of course the number must have been considerable, and yet one usually thinks that the term Napoleon's hat must apply uniquely to a single petit chapeau. One has just been sold at the Hotel Drouot for 45,000 francs, its purchaser giving a guarantee that it would not leave France. But Napoleon's hats can be found everywhere. There are no fewer than three of them in the Musee de l'Armee at the Invalides, and in provincial museums and in private collections they must be numerous. The list of the specimens of the headgear of the emperor, if it could be accurately drawn up, would be a long one. When one speaks of Napoleon's hat one should therefore qualify the phrase: It is not "the" hat of Napoleon, but only (assuming it to be a genuine relic) one of his hats.

Identity

A little colored boy about four years old whose parents have a charge account at a grocery, went to the store and asked for a pint of milk. Having obtained the milk he started to walk out. The new clerk to whom he was not known said: "Wait a minute. Who is this for?"

"It's for the baby," the boy replied.

The clerk smothered her laughter and tried another question. "Whose little boy are you?" she asked.

"I'm mamma's boy," the child replied.

POLE SOUGHT IN 1897 BY SWEDISH AIRMEN

Fate of Balloonists Still Remains Mystery.

New York.—Whichever of the flying men bound for unknown polar regions this summer is the first to reach the pole, he probably never will be certain that he actually was the first man to fly there.

Twenty-nine years ago, with far cruder equipment than any of the adventurers this summer are taking, three Viking airmen tried to sail through the sky to the end of the earth. There is some evidence that they passed over the pole, or very near it, although what finally happened must be relegated to Eskimo legend.

The leader of the party was Prof. Salamon August Andree, a Swedish scientist and civil engineer interested in ballooning. His companions were two other Swedes, Nils Strindberg and Knut Hjalmar Ferdinand Fraenkel. Professor Andree was convinced there were trade winds blowing through the upper atmosphere from Spitzbergen, across the pole to North America, which would carry his balloon in safety over the polar ice cap.

Carried Many Bottles.

He carried the last word in scientific apparatus for his day—only a generation ago. In place of radio apparatus he carried a large quantity of bottles that he could drop overboard with messages on a few carrier pigeons. Professor Andree's balloon measured 97 feet from top to bottom, the big alone being 75 feet from summit to opening. It consisted of three thicknesses of silk glued together and covered with five coats of varnish.

On July 6, 1897, the party left Trondhjem, Norway. On July 8 it passed the North cape, and on Saturday, July 11, at 2:30 in the afternoon, it took off from Dune's Island, Spitzbergen, with the pole 500 miles to the north. The day was clear and a strong wind was blowing. As the balloon started it narrowly escaped striking a rock in the Sweerenburg sound. As it rose out of the varying undercurrents of air it swung about like a carrier pigeon getting its bearings, and then, meeting the upper currents which Professor Andree predicted, it started away at the rate of about 22 miles an hour.

For an hour the balloon could be seen from shore. It was equipped to stay in the air 50 days and carried provisions for four months.

One carrier pigeon returned a few days later with this message:

"July 13, 12:30 p. m.—82.2 degrees north latitude, 15.5 degrees east longitude. Good progress toward the north. All goes well on board. This message is the third by carrier pigeon.

"ANDREE."

In September, 1899, a buoy which Professor Andree was to have dropped overboard when he passed over the pole was picked up, on the shore of Kilig Charlee Island and identified by the inscription, "Andree Polar Expedition."

Found Year Later.

A year later a bottle containing note No. 143 was found near Vardoe, in the most northeasterly part of Norway.

That was all. Years went by without another trace of the expedition. Liberal rewards were offered by the king of Sweden for genuine relics of the expedition. Many parties were organized and spent thousands of dollars searching the Arctic regions for remains.

At last, in December, 1900, a friendly Catholic priest, who had won the confidence of the Eskimo tribes near Hudsoher lake, 900 miles north of Prince Albert, in the province of Saskatchewan, Canada, brought back an uncertain tale. Bishop Pascal of the diocese of Prince Albert saw an Eskimo carrying a revolver and noticed that other members of the tribe seemed to have an unusual quantity of rope.

When he inquired they told him that a great "white house" had come down from the sky, that the men in it had starved to death and that the rope had come from the house top.

A month later Father Turquette, another priest, brought back additional news. The Eskimos admitted he said, that the white men had hunted game. This angered them and they killed the white men.

One other subsequent report with the stamp of authenticity was made. Christian Leder, a Norwegian explorer, said Eskimos told they saw the balloon come from the sky and saw smoke and thunder come from strange sticks which "two devils" carried. One of the "devils" they killed with their arrows, but when the other made signs that he was not hostile, that he was hunting birds only, the tribesmen realized that they had killed a human being and fled in fear. They saw no more of the other man.

Likes Mustard

New York.—The new shah of Persia is fond of mustard, but so far as having been a ban vivant is concerned, is not the stuff he has been painted, says Arthur Upham Pope, commissioner from Persia to the Philadelphia exposition.

Claims Record

Campbell, Mo.—This town claims the record for church attendance. Ninety-five per cent of the population of 1,800 persons went last Sunday.

Those Who Lift

There are some men and some women in whose company we are always at our best. While with them we cannot think mean thoughts or speak ungenerous words. Their mere presence is elevation, purification, sanctity. All the best steps in our nature are drawn out by their intercourse, and we find a music in our souls that was never there before.—Henry Drummond, in "The Alchemy of Influence."

Our Pet Peeve

GREAT SOLDIER MET DEATH LIKE CAESAR

Wallenstein One of Greatest Military Leaders

The man who probably came nearer to making himself a Napoleon than any other in Europe, from the assassination of Caesar to the appearance of the Corsican, was Wallenstein, whose tremendous influence made him an outstanding figure in history.

Just three centuries ago, in 1626, Wallenstein raised an army for the Holy Roman empire to oppose the Bohemians, after the latter had been augmented by the Danes and other northern Protestants. He smashed the forces opposed to him and drove them through Hungary. Then he drove north, clearing great sections of Germany, but was repulsed in an attempt to capture Stralsund on the Baltic. He had, however, been so thoroughly victorious that his foes seemed conquered. But as so often happens, the triumph had been too complete. Wallenstein had been arrogant in his treatment of the princes for whom he was fighting and they suspected he planned to overthrow them and make himself a dictator over central and eastern Europe. They brought about his dismissal by Emperor Ferdinand.

Gustavus Adolphus, who had made Sweden the master power of the North, then entered the arena and France was backing him with subsidies. The victors were suddenly put on the defensive by the march of the Swedes through Germany, while their allies, the Saxons, occupied Bohemia. The princes who had brought about Wallenstein's fall had to implore him to rescue them. At first he declined, then consented when offered but only command over all the imperial armies, but power over conquered territory greater than had ever been bestowed by a monarch.

Wallenstein quickly pushed the Saxons out of Bohemia and overran Saxony. Gustavus Adolphus had to march north to meet him and at Lutzen, in 1632, the great armies met in battle. It was the day, but the defeat did not lessen Wallenstein's dreams. Plots and counter-plots thickened, until eight or nine of his officers were bought and agreed to assassinate their leader. On a February night in 1634, at a banquet in one of Wallenstein's castles, three of his followers were slain. The conspirators hurried to Wallenstein's quarters and found him in bed. With his customary courage, he threw his arms outward hurling the sword thrusts. The blade of an assassin went through his breast.—Boston Post.

Oil-Boom Towns "Bite Off" Too Much in Bonds

Oklahoma City.—Cities that "might have been" and on which high tax rates were levied after heavy bond issues had been voted are frequent in Oklahoma history.

Duvall and Pershing, both small oil towns in Pittsburg, were given as examples by Randell Cobb, assistant attorney general in charge of the state bond department.

Six years ago oil was brought to the surface in the vicinity of the little village of Pershing. Visualizing a large city in the future, the architect-citizens voted a $1,200,000 bond issue for a water works system.

Oil production dwindled and the city's population decreased. Pershing is now indebted for nearly half its valuation.

At Duvall, when oil was found, a "boom" occurred and citizens voted large amounts for municipal improvements. Then the population decreased and taxes bounded to excessive rates.

A number of citizens moved outside the city limits to avoid paying the levy.

Moon's Center of Gravity

The center of gravity of both the earth and the moon, or the point about which they both actually revolve in their course around the sun, lies within the earth. It is 1,050 miles below the surface. The tides are caused mainly by the moon.

Extreme in Tattooing

The most extraordinary tattooing Men was that of a French evangelist, who, at the time a famous court case was in progress, had his body covered with 120 illustrations of the trial.

WANT COLUMN

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 30-tf.

FOR SALE—Cottage very desirably located by Pennsley avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

THE THEATRE

"Classified"—A new Corinne Griffith—an amazingly saucy creature, with pep and impudence fairly exuding from every pore. The stately and demure and essentially cultivated personality known as Corinne Griffith on the screen has undergone such transformation. And, if wondering admirers who read these lines still doubt let them go to the Palace theatre, Wednesday, Dec. 29th, and see for themselves. Which they will undoubtedly do in any case.

Miss Griffith's complete change of personality is accomplished in a new Jane Murfin adaption of an Edna Ferber story, "Classified," which comes to the screen from First National. In it she portrays a sophisticated yet sentimentally inclined flapper type. She brings to the screen for the first time to our knowledge the want ad girl of the big newspaper. The realism of Miss Griffith's work in this new direction is a revelation and represents another triumph for one of the screen's most versatile actresses. Jack Mulhall ably supports Miss Griffith.

"The Silver Treasure"—Rowland V. Lee, who directed "The Silver Treasure," screen version of Joseph Conrad's thrilling novel, made a deep study of the famous Pole's writing before attempting to photograph the initial scenes in the South American romance featuring Geo. O'Brien. This William Fox picture opens at the Palace theatre next Tuesday and Friday.

"I felt," said Mr. Lee, "that the reading public was entitled to the very best when it came to a question of portraying the influential characters, of this master craftsman. With this end in view, I made it my business to familiarize myself with every detail of his work. I have long been a lover of Conrad and realized the necessity for the utmost fidelity. Insofar as possible, we have followed Conrad's ideas in every instance."

"George O'Brien, one of the screen's most stalwart heroes, gives one of the best performances of his career in the title role. Joan Renee, in the leading feminine role, acquits herself most creditably.

"We're In The Navy Now"—What "Behind The Front" was to the doughboy, that's what "We're in the Navy Now" will be to the sailor.

Paramount's first Wallace Beery—Raymond Hatton starring comedy brings those two inimitable buddies to the screen as the greenest goofy Jobs who ever donned naval blue. Theatre goers attending the Palace theatre next Saturday and Sunday are assured the time of their lives as they follow Knockout Hansen and his pal Sergeant Quirt from the province of Siam to the Yellowstone river, over to France, back again and finally, to the same pugilistic arena.

It is of interest to know that "Behind The Front," the first film to show the enemy side of the war, was numbered among 1920's biggest money-makers. And it really isn't to be wondered at. As the story of Napoleon's retreat from Moscow entered the hearts of a nation. Their adventures were unreal but still so laughable, that it wasn't long before they became the talk of movie-land.

Moon's Center of Gravity

The center of gravity of both the earth and the moon, or the point about which they both actually revolve in their course around the sun, lies within the earth. It is 1,050 miles below the surface. The tides are caused mainly by the moon.

Extreme in Tattooing

The most extraordinary tattooing Men was that of a French evangelist, who, at the time a famous court case was in progress, had his body covered with 120 illustrations of the trial.

SEEKS TREASURE BURIED IN RIVERS

Would Salvage Ships Lost in Northwest.

Miles City, Mont.—Treasures of lost ships, buried under the shifting sands of the Yellowstone and Missouri rivers, will be sought by Elmore Ellsworth Weniger, who has passed a quarter of a century gathering information as to their location and possibility of recovery.

In the skeleton of these treasure ships, Weniger believes, still remain quantities of the cargoes of priceless pelts, gold, silver, quicksilver and various other merchandise, the value of which government reports indicate to approximate $20,000,000. A portion of the cargo of one wreck, buried for 30 years, Weniger already has salvaged.

Steamboating on the northern waters of the Missouri river began 103 years ago, when 8 fleet of six river steamers were built under government contract for use with the ill-fated Yellowstone military expedition, which had as its object the establishment of a fortified post at the mouth of the Yellowstone river.

One of these, the Thomas Jefferson, provided the first Missouri river wreck near the mouth of the Yellowstone. In 1831 the American Fur company started a fleet of steamboats on the Missouri. Its George Washington struck a snag below Council Bluffs, Iowa, and went down.

The Assiniboine, also owned by this company, was grounded in 1832 near the present site of Bismarck, N. D., with a cargo of 1,185 packs of pelts and robes.

The Pontiac went down with a cargo of 700 barrels of whisky, 500 casks of wine and 500 casks of brandy, none of which ever was recovered. The Lewisville, loaded with whisky, quicksilver and general stores, went down 40 miles below Sioux City. At this same spot are eight other sunken steamers.

SHE'S MISS BROADWAY

Miss Irene French, winner of the "Miss Broadway" contest conducted by the Broadway association in New York.

Courtship of 44 Years Ends With Wedding

Philadelphia.—A courtship begun 44 years ago came to an end when Albert T. Gardner, sixty-eight years old, married Miss Lessie L. Gillies, sixty-one years old, in St. Matthew's Episcopal church, where he has been the organist for more than half a century.

Rev. C. Herbert Reese, the rector, performed the ceremony, which was witnessed by the members of the choir and vestry and a few close friends.

Miss Gillie met her husband 44 years ago, when she came to Philadelphia from Uniontown, N. J., and while it was a case of love at first sight, there were many financial difficulties in the way of their marriage. While he was undertaker and organ and choir for a neighbor, she was burdened with the care of two invalid sisters, the last of whom died a month ago. All domestic obstacles being removed, with an increase in salary for Mr. Gardner in view, the couple decided to terminate their long courtship. They are living at the southeast corner of Twentieth and Brown streets.

Battling Women Take Bite of Officer's Hand

Pittsburgh, Pa.—When women fight Marquis of Queensbury rules are just a lot of apple-sauce and a solution of the law taken but chances in the rush of peacemaker, biting, scratching and kicking count most.

That's why Patrolman Parker Seybold is nursing a bitten right hand and bruised shins. He tried to quell—at least separate—Mrs. Mary Johnerick, fifty years old, and Mrs. Mary Dorsky, who were staging a private battle in the former's home. He says Mrs. Johnerick bit and kicked him when he entered the house to stop the fight.

Seybold was passing the Johnerick home when he heard the commotion. Duties say the women were "clinched" following an argument over the ownership of several pigeons.

Protective Garments

Plate glass overalls, masks and gloves have been designed for chemists in mixing acids, powders, and other inflammable materials. The development of the suits was forced by dangerous fumes that injure workers who mix tricoer ballet material. The powder used is so explosive that it is often ignited by static electricity. Glass uniforms are made of small pieces of material bound together by copper wires.

CHURCHES

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At 10:30 morning worship with sermon by the pastor on the subject, "Shall Ye Reward the Year."

Sunday School at 12. Vesper Pageant at 4:15—see full program under title "The Night of the Star."

The congregation of the Ironton church are especially invited to attend this vesper service as far as it is possible for them to get to town. The service at the Ironton church will be omitted for the coming Sunday.

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on West Horlbut Avenue:

Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.

The Christmas program will be given Sunday morning at the time of the Sunday School lesson at 11:45.

May the spirit of Christmas hover around and over us as we think of the Blessed Star of Hope which came to this world to lighten mortal hearts. That which appeared to the wise men of the East; and bore recollections of the most notable event; of that memorable scene when the heavenly hosts appeared to those frightened shepherds singing the good news "Glory to God in the highest and on earth peace and good tidings to men." May the peace of our Lord and Savior abide at the door of ou hearts and emit consolation, happiness and joy to those who may be burdened with sorrow and grief, for He is our only hope and consolation.

Wishing you all a Happy, Merry Christmas.

Methodist Church.

C. E. Pollock, Pastor.

"MERRY CHRISTMAS TO ALL."
"Christ and the Year," 10:30 a.m.
"The Lost Word," 7:30 p.m.

Both services of worship next Sunday will be of challenging interest to church people. Christmas music of excellence in both services. In the evening the pictures of the Nativity will be shown. A special sermon based on a great reality and illustrated by Van Dykes narrative "The Lost Word" for this hour.

Christmas tree and Santa Friday evening this week at 8 p. m. A wonderful program has been prepared, and all are expected to enjoy this evening of hallowed tradition and sentiment.

The vesper service last Sunday afternoon was a great inspiration to a church full of people. The Christmas spirit was much in evidence. The large picture was highly appreciated, and the appearance of the angels at just the right moment in the picture was rather startling. The public may see the picture again on Friday evening. The choir and orchestra did good work and were highly appreciated.

To the pastor was given the privilege of speaking on "The Meaning Of Christmas" at the Christmas exercises of the high school, on Wednesday afternoon of this week.

The men had a tasty supper of chicken pie and the things that usually goes with it, last Monday evening. The address by Supt. Feuer from Boyne City was greatly enjoyed by the men. Other talks were made by Rev. Burns and Mr. A. J. Usher. Much fun and jollity, and music, song and wit helped to make the evening memorable. The men will meet next Monday evening and another and different program is planned. This is not a denominational affair but is for all men who wish best things.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Christian Science, Lesson for Thanksgiving Day."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sunday Masses, 8 a.m. and 10:30 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:30 a. m.

Rev. Fr. Odelo.

Great Metropolis Has Seen Many Reverses

London existed as a town before the Romans fetched it into shape laid out the great city as we know it, and traces of traditions may be accepted. The Thames was unconfined and liberal in its ways of flowing until the tide came up, forcing it to form backwaters and inundating the whole district of marshes. A thousand years after the Romans left, the houses, thatched with rushes, were built over duck. All the time London was growing, but not at the settled pace, progress of development was continually interrupted, yet after each check it went on again. Bonfires destroyed it; the Danes wiped it out; Alfred the Great rebuilt it and within a century it was burned to the ground. Thereafter, fire and pestilence swept over it at frequent intervals, but it emerged stronger from every trial. London refused to be removed from the map, and its persistence was a visible expression of the determination of the people and a visible proof of its position as a world mart.—Vancouver Province.

Postwar Diplomacy

Representative Moore, who advocates "open diplomacy and covenant laws, said at a dinner in Washington:

"Diplomacy seems to have gone crazy. The analogy of the Russian judges its next-door neighbor reminds me of Charlotte Lyne.

"Miss folks are fickle,' said Chloride Lyone. 'Dey ain't no reliance ter be put on 'em.'

"'Cause why?' asked her girl chum.

"'Dat wealthy young Rastus Dough come 'round iss' night tryin' ter kiss me,' said Chloride, 'and so as not ter seem too brazen and awkwicious-like Ah lifted him in de smellier wiv a hot flatiron, and jes' foh dat he jilted me.'"

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Dec. 25-26

Wallace Beery and Raymond Hatton in "We're in the Navy Now," an Edward Sutherland production with Chester Conklin and Tom Kennedy AHoy, Mates! Here's a side splitter for you. Beery and Hatton, the inimitabe pair of "Behind the Front," are in the Navy now! And, shades of Davy Jones, but there's a treat in store in this high seas and the shy skes! "Gobs of Laughter." Also a good comedy "Teacher, Teacher." Admission, adults 35c, children 15c. Note:—This picture is being shown in the larger cities at advanced prices.

Wednesday Only---

Corinne Griffith in "Classified," by Edna Ferber who wrote last year's greatest novel "So Big." A big pulsing drama of the working girl of today!—a story that tells what every girl fears—with Corinne Griffith moving throu its drama with Orchid—like beauty in clothes that will feast your eyes, with Jack Mulhall and Charles Murray. Also a Fox News and "The Hodge Podge."

Thursday, Friday---

"The Silver Treasure" from the novel "Nostroms" by Joseph Conrad a mighty romance of love, life and honor in the struggle for wealth with George O'Brien, Lou Tellegan, Hedda Hopper and Joan Renee. This thrilling picture full of action and intrigue, with a climax that should appeal to all classes of photo-lovers. And a comedy "Uppercuts" with Jack Duffy, new prize fight comedy has action, situation, gags, sets and large east of big production.

"Mother of States"

This name is applied to Virginia because so many states have been carved from her original territory. At the time of the settlement of Jamestown the name Virginia was applied to all that part of North America lying between the thirty-fourth and forty-fifth degrees of latitude, extending from coast to coast. This region now comprises the greater part of the United States. When Sir Frances Drake circumnavigated the globe he stopped on the coast of California which he spoke of as "the back of Virginia." Seven states have been carved from the territory claimed by Virginia at the time of the Revolution—Ohio, Indiana, Illinois, Michigan, Wisconsin, Kentucky and West Virginia.

Silver Guarantee

Sterling silver is silver of standard fineness. The British government legally fixes the fineness of its silver coinage in the proportion of 925 parts of silver to 75 of copper. Such silver is known the world over as sterling silver. A silver dollar contains 371.25 grains of silver and 41.25 grains of alloy.

Definition of Treason

Whoever, owing allegiance to the United States, levies war against them, or adheres to their enemies, giving them aid and comfort, is guilty of treason. Misprision of treason consists, in general, of having knowledge of, concealing and not disclosing the treason of others.

PERSONALS

Home talent entertainment at M. E. church, Jan. 11. 34-3t

Ray Ashton is assisting with the city mail delivery during the holiday rush.

C. A. Barry, of Central Lake, spent Saturday last in Charlevoix on business.

Ira A. Adams spent Thursday and Friday of last week in Bellaire on business.

Adolph F. Young, of Detroit, has been a Charlevoix visitor since last Monday.

Fresh Martha Washington Candy for Christmas, 75c per pound. Call Mrs. R. A. Emrey, telephone 659.—adv.

Mrs. Anna K. Wood, went to Detroit last week with the intention of spending the winter with her brother in that city.

Mrs. James M. Saunders, after spending several months here, returned to California last Monday, accompanied by her grand-daughter.

Cecile Louise Pollock returned from Albion College last Friday to spend the holidays with her parents, Rev. and Mrs. G. E. Pollock.

Lou H. Comfort arrived here a few days ago and will spend about two weeks "at home" before resuming his work for the government.

Raymond W. Faulkner returned to Charlevoix last Saturday for the holiday vacation. Following that he will continue his studies at the U. of M.

Edward Klooster, a former business man in this city, now residing on a farm in the vicinity of Williamsburg, was a Charlevoix visitor last Saturday.

Oakley Crandall, for some time past employed at Flint, returned to Charlevoix to spend the holidays with his parents, Mr. and Mrs. Grant Crandall, 311 Lewis-st.

W. J. Gallagher, of St. James, was a business visitor here for a day or two last week. Friday he went to Chicago where he will visit relatives for a short time.

The Misses Helen and Phila Armstrong will be guests of their parents, Dr. and Mrs. R. B. Armstrong for the holidays. The former coming from Chicago and the latter Ann Arbor.

Frazier Mattson is taking advantage of the holiday vacation by visiting his parents, Dr. and Mrs. B. G. Mattson. He returns to the U. of M. as soon as the vacation period is concluded.

Mr. and Mrs. James Gaskin will spend the holiday season with friends in Grand Rapids and Detroit. They left for Grand Rapids yesterday where they visit for one or two days before going to Detroit.

Fresh Martha Washington Candy for Christmas, 75c per pound. Call Mrs. R. A. Emrey, telephone 659.—adv.

Nally Routley spent some days here last week with his brother. Mat Routley, returning to Bellaire Saturday.

Leroy Allers returned to his home, St. James, last Tuesday, after spending several days in Charlevoix on business.

Richard Saltonstall, senior at Olivet College, will spend the holiday vacation at the parental home, 408 Mason-st.

Mrs. E. O. Cram left for Flint last Saturday, whese she will spend the holiday season with her sons, Leland and Verl.

Mr. and Mrs. Charles Arnold will spend Christmas day with Mr. and Mrs. Frank N. Metcalf in Central Lake, according to present plans.

Captain and Mrs. M. J. Bonner went to Grand Rapids last Monday with the expectation of spending the winter in the furniture city.

Gilbert B. Saltonstall, student at the U. of M., is spending the holiday season with his parents, Mr. and Mrs. B. Saltonstall, 408 Mason-st.

Mr. and Mrs. Jack Superusw, of Madison, Wis., arrived here Tuesday to spend Christmas with their grandparents, Mr. and Mrs. N. A. Shores, 305 Dixon-av.

Thomas Chambers, engineer during the season on the S. S. James E. Sanford, will spend the next few weeks with his parents at Mackinac Island, leaving for that place today.

Miss Margaret Fitch is spending the Christmas season with her parents, Mr. and Mrs. A. L. Fitch. With the close of the holiday season she returns to Kalamazoo where she is employed.

Captain and Mrs. James Sanford will spend the holiday season with their son, Attorney Joseph Sanford, in Muskegon. Later they will probably go to Chicago, Ill., and Monroe, Mich., for a short visit.

Miss Mildred Parker, who for the past year has been in Grand Rapids, returned to Charlevoix last Tuesday, accompanying her father W. G. Parker, who spent the early part of this week in Grand Rapids on business.

Mr. and Mrs. Bert McDonald, of Milwaukee, and Mr. and Mrs. Frank Nackerman, of Detroit, were visitors in Charlevoix early this week. Tuesday they went to St. James where they will spend the holiday season.

Miss Catherine McCann returned from Ann Arbor a few days ago and will spend her holiday vacation with her parents, Mr. and Mrs. John McCann, 200 E. Hurlbut-av, returning to the U. of M. soon after January 1st.

Captain John Chambers goes to Ypsilanti today where he will join his family for the holidays. Following his return which will be about December 15th, the family will occupy the Louis S. Orlowski residence an south Bridge street.

We learn through a personal communication, that our old time friend, summer resident and persistent Charlevoix booster, "Uncle" Louie Winternitz, is spending the winter at St. Augustine, Florida, and that he is stopping at the Hotel Bennett.

Captain and Mrs. Thomas Bonner finished their duties for the season at Beaver Island last week. Thursday they came to Charlevoix, remaining with friends until Saturday when they continued their trip to Chicago, where they will reside during the winter.

The speaker at the Men's Meeting next Monday evening at the Methodist Episcopal church is John Lake from Petoskey. Mr. Lake is much in demand as a speaker at Rotary and Kiwanis club meetings and is popular with men. An excellent supper is planned for seven o'clock.

A delightful function with bridge entertainment, and Mrs. Frank H. Wilkinson, hostess, was the program at the Wilkinson residence last Friday, in which some twenty women friends were guests. Delicious refreshments were served, all making for a most enjoyable afternoon.

An all home talent entertainment, to be given by the Ladies Aid Society at First Methodist Episcopal church, Tuesday, January 11th, is being prepared. Parties in charge say that it will be a most pleasant, enjoyable feature and that its production will furnish ample entertainment for the evening.

Harold LaChance leaves for Chicago today where he will spend the winter months with relatives and friends, returning to Charlevoix with the opening of the season of navigation for 1922 for the Charlevoix-St. James Transit Company with which he has been connected during the season just finished.

Members of the Congregational Sunday School have arranged a special program for Christmas eve., which they will present in the church auditorium at seven o'clock p. m. Naturally the program, entitled, "The Light of the World," will be typical of Christmas season. Everyone will be welcome.

A new government building, "postoffice," was open to the public a few days ago, a matter that is the cause of rejoicing to Cheboygan citizens. The new structure including the ground cost about $80,000 complete in its appointments and in capacity such as will be adequate for the purpose intended for a long term of years.

Miss Marjorie M. Myers is here to spend Yuletide season with her parents, Mr. and Mrs. F. S. Myers. At the close of the vacation period she returns to the U. of M. where she will resume her student work.

Miss Freda McMillan returned from Ann Arbor a few days ago and will spend her vacation with her parents, Dr. and Mrs. F. P. McMillan, 219 Park Ave., returning to the U. of M. at the close of the holiday season.

The plant of the Petoskey Portland Cement Company discontinued operations last Saturday. This action is only temporary and the plant according to statements made by officials, will be in full operation again in about six weeks, running to full capacity.

Albert and Kenneth Widdifield, according to present plans, will arrive here Friday to spend the holiday season with their parents, Mr. and Mrs. Harry W. Widdifield, 102 Upright-av. Following this they return to Chicago to resume their regular routine.

The government lighthship Relief, assigned to navigation that was located at Grays' Reef during the summer months left the port of Charlevoix for Milwaukee, her winter quarters, last Friday, after spending a week or more in the inner harbor to secure shelter during the blizzard.

Mr. and Mrs. Frank M. and Mr. and Mrs. Franklin U. Sears started for Miami, Florida, last Saturday. They are making the trip over some fine Dixie motor route. The start for this trip had been planned for an earlier date, but due to inclement winter conditions was delayed several days.

Captain Lester Gallagher who spent the summer months aboard ship in the Chicago harbor, was a passenger on the S. S. Sanford, bound for St. James last Friday. Following a vacation of a month or more with his family and friends at St. James the Captain returns to Chicago to re-engage in the shipping service.

Mr. F. O. Aylett, a pioneer of Northern Michigan and for nearly fifty years one of the high minded and honorable residents of Elk Rapids, passed away in that village last week at the age of 76 years. He was prominently identified with the fraternal order of F. & A. M., under whose auspices the funeral service was conducted last Thursday.

Captain John McCann made a trip to St. James with the tug Venus last Tuesday, taking with him a large amount of mail which had accumulated in the local postoffice since the trip of the James E. Sanford last Friday. In addition to the government mail the ship carried a quantity of freight etc., for delivery to St. James merchants and residents on the Island.

The S. S. James E. Sanford made her final trip of the season to St. James last Friday. During the 1920 season the ship has given excellent service to patrons, both St. James and Charlevoix, making trips with exceptional regularity, missing but very few runs regardless of rough weather, some of which only the most hardened intrepid sailors wish to encounter.

All local commercial fishermen who, for some days during the blizzard of last week, returned to their home port after the storm had subsided to a point of safety for navigating their small ships. With the advent of moderate weather early this week some of the fishermen returned to the fishing grounds and will make an effort to salvage some part of their nets that were left when they made their ran home.

Moderate weather conditions have prevailed for the past few days. During the present week we have had one or two mild snow falls, but little wind and only a small am

Websters Not Related

Julius H. Tuttle, librarian of the Massachusetts Historical society, says that so far as he can learn there was no known relationship between Daniel and Noah Webster. Daniel Webster, the great statesman and orator, who was born at Salisbury, N. H., January 18, 1782, was descended from Thomas Webster who first appeared in Watertown, Mass., in 1638. Noah Webster, of dictionary fame, who was born in Hartford, Conn., October 16, 1758, was descended from John Webster, one of the first settlers of Hartford in 1636. According to Mr. Tuttle, it is not known how Thomas and John were related, if at all.—Pathfinder Magazine.

Hollywood's Beginning

Hollywood, the gaudy home of the world's movie-struck people, owes its rise to its obscurity. It was selected because of its insignificance but so many years ago. When the first studio was established there in 1911 the population was about 7,000. Today it is estimated at 125,000. With the rise of Hudson to power the fame of Hollywood spread. Although Hollywood became a part of Los Angeles in 1910 it still retains its name.

Christmas Sketches from Dickens

DON'T be cross, uncle," said the nephew.

"What else can I be," returned the uncle, "when I live in such a world of fools as this? Merry Christmas! Out upon merry Christmas! What's Christmas time to you but a time for paying bills without money; a time for finding yourself a year older, and not an hour richer; a time for balancing your books and having every item in 'em through a round dozen of months presented dead against you? If I could work my will," said Scrooge indignantly, "every idiot who goes about with 'Merry Christmas' on his lips should be boiled with his own pudding, and buried with a stake of holly run through his heart. He should!"—Christmas Carol, Stave 1.

* * *

The noise in this room was perfectly tumultuous, for there were more children there than Scrooge, in his agitated state of mind, could count; and, unlike the celebrated herd in the poem, they were not forty children conducting themselves like one, but every child was conducting himself like forty. The consequences were unparalleled behind belief; but no one seemed to care; on the contrary, the more uproarious they were, the more they delighted Scrooge, who, indeed, was as noisy as one of the little urchins.

"Here's a game," said Scrooge. "Blind man's buff. Tomorrow I'll play you at it. And we'll have a good game, and I'll show you how it's played. Here's the first of the new deal. There's the top for you. I'll answer for the color of the waistcoat, I promise you, you'll get a better view of it than you have of the time on my watch. So much the better. Aha! How are you! Merry Christmas!"

To a poor one most conspicuously, he gave a good many smart pulls and tweaks; for the shortness of the notice did not admit of his providing more than a shilling. Total expenditure, three pounds three and ninepence.—Christmas Carol, Stave 3.

* * *

Oh, a wonderful pudding. Bob Cratchit said, and calmly, too, that he regarded it as the greatest success achieved by Mrs. Cratchit since their marriage. Mrs. Cratchit said that now the weight was off her mind, she would confess she had her doubts about the quantity of flour. Everybody had something to say about it, but nobody said or thought it was at all a small pudding for a large family. It would have been flat heresy to do so. Any Cratchit would have blushed to hint at such a thing.

At last the dinner was all done, the cloth was cleared, the hearth swept, and the fire made up. The compound in the jug being tasted, and considered perfect, apples and oranges were put upon the table, and a shovel full of chestnuts on the fire. Then all the Cratchit family drew round the hearth, in what Bob Cratchit called a circle, meaning half a one; and at Bob Cratchit's elbow stood the family display of glass, two tumblers and a custard-cup without a handle.

These held the hot stuff from the jug, however, as well as golden goblets would have done; and Bob served it out with beaming looks, while the chestnuts on the fire sputtered and crackled noisily. Then Bob proposed:

"A merry Christmas to us all, my dears. God bless us."

Which all the family re-echoed.

"God bless us every one!" said Tiny Tim, the last of all.—Christmas Carol, Stave 3.

* * *

"I don't know what day of the month it is," said Scrooge. "I don't know how long I have been among the spirits. I don't know anything. I'm quite a baby. Never mind. I don't care. I'd rather be a baby. Hallo! Whoop! Hallo here!"

He was checked in his transports by the churches ringing out the lustiest peals he had ever heard. Clash, clash, hammer; ding, dong, bell, bell, dong, ding; hammer, clang, clash! Oh, glorious! glorious!

Running to the window, he opened it, and put out his head. No fog, no mist; clear, bright, jovial, stirring, cold; cold, piping for the blood to dance to; golden sunlight; heavenly sky; sweet fresh air; merry bells. Oh, glorious! Glorious!

"What's to-day?" cried Scrooge, calling downward to a boy in Sunday clothes, who perhaps had loitered in to look about him.

"What's to-day, my fine fellow?" said Scrooge.

"To-day?" replied the boy. "Why, Christmas day."

"It's Christmas day!" said Scrooge to himself. "I haven't missed it. The spirits have done it all in one night. They can do anything they like. Of course, they can. Of course, they can. Hallo, my fine fellow!"

"Hallo!" returned the boy.

"Do you know the poulterer's, in the next street but one, at the corner?" Scrooge inquired.

"I should hope I did!" replied the lad.

"An intelligent boy!" said Scrooge. "A remarkable boy! Do you know whether they've sold the prize turkey that was hanging up there?—Not the little prize turkey, the big one?"

"What, the one as big as me?" returned the boy.

"What a delightful boy!" said Scrooge. "It's a pleasure to talk to him. Yes, my buck!"

"It's hanging there now," replied the boy.

"Is it?" said Scrooge. "Go and buy it."

"Walk-er!" exclaimed the boy.

"No, no," said Scrooge, "I am in earnest. Go and buy it, and tell 'em to bring it here, that I may give them the directions where to take it. Come back with the man, and I'll give you a shilling. Come back with him in less than five minutes and I'll give half-a-crown!"

The boy was off like a shot. He must have had a steady hand at a trigger who could have got a shot off half so fast.

"I'll send it to Bob Cratchit's," whispered Scrooge, rubbing his hands and splitting with a laugh. "He shan't know who sends it. It's twice the size of Tiny Tim. Joe Miller never made such a joke as sending it to Bob's will be!"

The hand in which he wrote the address was not a steady one; but write it he did, somehow and went down stairs to open the street door, ready for the coming of the poulterer's man. As he stood there, waiting his arrival, the knocker caught his eye.

"I shall love it as long as I live!" cried Scrooge, patting it with his hand. "I scarcely ever looked at it before. What an honest expression it has in its face! It's a wonderful knocker!—Here's the turkey. Hallo! Whoop! How are you! Merry Christmas!"

It was a turkey! He never could have stood upon his legs, that bird. He would have snapped 'em short off in a minute, like sticks of sealing wax.

"Why, it's impossible to carry that to Camden Town," said Scrooge, "You must have a cab."

The chuckle with which he said this, and the chuckle with which he paid for the turkey, and the chuckle with which he paid for the cab, and the chuckle with which he recompensed the boy, were only to be exceeded by the chuckle with which he sat down breathless in his chair again, and chuckled till he cried.

Shaving was not an easy task, for his hand continued to shake very much; and shaving requires attention, even when you don't dance while you are at it. But if he had cut the end of his nose off, he would have put a piece of sticking-plaster over it, and been quite satisfied.

He dressed himself "all in his best," and at last got out into the streets. The people were by this time pouring forth, as he had seen them with the Ghost of Christmas Present; and walk-ing with his hands behind him, Scrooge regarded every one with a delighted smile. He looked so irresistibly pleasant, in a word, three or four good-humored fellows said, "Good morning, sir! A merry Christmas to you!" And Scrooge said often afterward, that of all the blithe sounds he had ever heard, those were the blithest in his ears.

The "Modern" Girl as Seen in 1868

The modern girl is a creature who dyes her hair and paints her face as the first article of her religion.

Whose sole purpose of life is plenty of fun and luxury and whose dress is the object of such thought and intellect as she possesses. Her main endeavor in this is to outvie her neighbors in extravagance.

With purity of taste she has lost also that far more precious purity and delicacy of perception which sometimes more than appears on the surface.

The modern girl has done away with such moral usefulness as consideration for others, or regard for counsel or rebuke.

It was all very well in the old-fashioned times when fathers and mothers had some authority and were treated with respect, to be tutored and made to obey, but she is far too fast and flourishing to be stopped in mid-career by those slow old morals.

It leads to slang, bold talk and fastness, uselessness at home, dissatisfaction with the monotony of ordinary life, and horror of all useful work.—From the Saturday Review of 1868.

Sign Pleases Broadway

Talk about the freedom of the times! "Undies," silk stockings and nighties are washed and hung flutter-ing on a line right over Broadway in New York, where thousands may—and do—see every night of the week. Crowds are talking about it. The "world's largest electric washer" operates vigorously, the lid flies open, articles of apparel hop out and run through a wringer and flies ultraciously fly up and pin themselves in a row on a line, flapping in the breeze —all in electric light from 2,000 little winking lamps. It is one of the most intricate and arresting electric signs Blase Broadway has ever seen.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Columbus

CHRISTOPHER COLUMBUS, Genoese mariner, student and explorer, battered charges of heresy and insanity in the latter part of the Fifteenth century by evolving the idea that the earth was round and that by sailing west from Europe one might in time hope to arrive in the East Indies. After many failures he succeeded in interesting Queen Isabella of Spain and a capitalist named Pinzon in his great idea. With a fleet of three little ships, manned by a crew of felons and other offscourings of European ports, he began his supposedly insane journey which later proved successful.

Criminals and beggars, led by a fanatic on a mad cruise, made possible by the generous whim of an uneducated woman!

On October 12, 1492, Columbus reached San Salvador island. Three later voyages he made, spending no other parts of the new continent. For reward he fell into disgrace, was imprisoned and died in poverty and obscurity, with no realization whatever of the inestimable importance of his discoveries

After him John and Sebastian Cabot, father and son, explored North America in the name of the miserly King Henry VII of England (the "Henry of Richmond" who conquered and succeeded Richard III), and were followed by that worthy monarch that their voyage was a failure.

Sir Walter Raleigh a few years later colonized Virginia and introduced tobacco into Europe. He named the newly settled province after Elizabeth, the "Virgin Queen" of England. His reward, was imprisonment and execution. Captain John Smith followed him, making the Virginia settlements permanent and speeding up New England. He, too, died obscure and in poverty.

Balboa, in the name of Spain's king, pushed on from Darien across a trackless wilderness and discovered the Pacific. He was beheaded. The Spaniard De Soto explored the great Southwest, discovering the Mississippi river and finding an untimely grave in its waters. Pizarro and Cortez, Spanish adventurers, conquered Mexico and Peru. The former explorer was banished from Charles V's court, the latter was murdered in his palace.

Hendrik Hudson, English sailor in the Dutch merchant service, discovered New York in 1609, landing first at Coney Island, then stopping at Manhattan Island and then proceeding up the river that now bears his name to a point north of Albany. Later, while exploring Hudson's bay in search of the North pole, he was cast adrift in a small boat by his own men and left to die. Parker and other adventurers meantime had "put Canada on the map" as French territory.

So much for discoverers and explorers. They risked their lives, their fortunes, their whole careers, but for themselves, but for the greater wealth and glory of the kings they served. Their final reward in nearly every case was poverty, disgrace or execution. Never before or since was history heroes. They are immortal in fame, but their earthly recompense was shame and death.

Roughly speaking, America was divided up among Europe's nations as follows: Spain held the Far South; England, the Virginias and adjacent colonies; the Dutch ruled New York; England, the New England colonies; and the French, Canada. But the English colonists were hardier and backed by greater home power than were any of the other settlers, except perhaps the French. So by 1655 England held all the Atlantic coast north of Florida and south of Canada. War sprung up between the French and English colonists, the Indians siding with the French. After a long and bloody struggle the English finally won.

England, however, neglected and oppressed her American colonies, failing to send them secour, levying heavy and unjust taxes; declaring them no representation in parliament and sending incompetent men to govern them. For centuries dissatisfaction increased throughout the thirteen colonies, and in 1775 they formally banded together against the mother country, and in the following year drew up the Declaration of Independence, casting off forever the yoke of monarchy. The eight-year war followed, wherein the weak little colonies, under George Washington's glorious leadership, fought with varying success for their rights, at last winning complete victory and freedom.

The new Union, still under Washington's guidance, began its career as a republic. Despite a second war with England, in 1832, and the needless, tragic Civil war between North and South, in 1861-1865, the country has grown and prospered as none other in all history; taking its place among the greatest nations on earth and winning the respect of those who in earlier days predicted speedy collapse for the mighty young republic, and setting a high example of government, freedom and patriotism to the world at large.

Care of Goldfish

They cannot be any satisfactory success with goldfish unless they are kept in an aquarium with growing plants. When the plants are growing properly leave them and the fish alone, putting in occasionally pure water needed to supply loss by evaporation. Feed the prepared fish food, and only the little eaten each day. Once the tank is well going, leave it alone, save for the triweekly siphoning off of excrement and other dirt in it.

Being absolutely sure on the Subject of Quality

THE HIGH QUALITY OF
Baker's Breakfast Cocoa
is Not an Accident
It is the result of a judicious selection and blending of cocoa beans, of which there are many kinds of many grades, skilful roasting, a very delicate manufacturing process, and great care in packing, all of which explains why Baker's Cocoa has a delicious flavor and retains its full measure of nutriment.

Ocean Currents Prove Whimsical

The Shetland isles face the Atlantic storms, which beat on them so fiercely that not a tree lifts its head on the islands. But what the ocean takes away with one hand it brings in the other, for with every gale it throws timbers, timber and driftwood, use for Liquid Veneer.

None of the timber could tell a story, and many a drifting jog or bough has a long sea yarn knitted it. The first fires that were lit on Shetland when the Stone circle builders lived there were made of logs and driftwood that perhaps had been carried by the current of the Gulf stream all the way from Florida and the Gulf of Mexico.

Last year a passenger on a steamer off Palm Beach, in Florida, dropped a bottle in the sea containing a letter. He thought the bottle would surely be washed ashore somewhere in the United States, but no; the wilful sea bore it far away from the New world, and deposited it on the shores of Shetland, where it has lately been picked up.

Stop Croup in 15 Minutes
Croup usually comes suddenly—at midnight—without warning. Be prepared to open the dangerously clogged throat at once. Rub on and take internally a prescription which often brings relief in 15 minutes. Used by mothers in millions of homes for 50 years. The quickest known relief for Coughs, Colds and Whooping Cough. If you have children, get a bottle of this time-tested remedy, Creomulsion, today. From your druggist. Only 25c a bottle. —Adv.

GARNEKED GEMS

Often a retrospect delights the mind.—Dante.

Only the best effort can still the longing of the soul.

None so blind as those who will not see.—Matthew Henry.

When we pull up a weed we leave a clean place for a flower.

Too low they build who build beneath the stars.—Young.

"Many complain of their memory, few of their judgment."—Poor Richard.

A man isn't necessarily hurtful because he declines to meet his obligations.

Truth is the foundation of all knowledge and the cement of all societies.—Dryden.

Our idea of a modest man is one who even keeps his opinion of himself to himself.

Love may make the world go round, but it takes money to lubricate the machinery.

More than 70000 African elephants are killed each year for the ivory in their tusks, says the Dearborn Independent.

"DANDELION BUTTER COLOR"
A harmless vegetable butter color used by millions for 50 years. Druggists and general stores sell bottles of "Dandelion" for 35 cents.—Adv.

Use for Monoxide Gas

By attaching a long tube to the exhaust pipe of an automobile and running it into an icehouse the Animal Rescue league of Pittsburgh has found a quick and humane way of destroying sick and injured animals, dogs and cats in the streets. The monoxide gas given off when the engine is raced dispatches the suffering animal quickly.

Successful

"How did your pathetic song go over?" "Great! Even the seats were in tears."—Boston National News.

Form life is a combination of a science and an art. It is the science of agriculture and the art of living.

It takes a subordinate to realize the inefficiency of a superior.

$4,000 IN PRIZES
1,055 PRIZES IN ALL
Enter the great Liquid Veneer Contest. Only 25 words in all. Use no more than 10 words what you consider the outstanding characteristics of Liquid Veneer, or tell us of an unusual use for Liquid Veneer.
In case of a tie, the first prize of $500 or one of the 1,054 other prizes offered by prominent business men will act as judges. Contest closes December 31st, 1927. You don't delay! The necessary coupon is in the package of Liquid Veneer on your dealer. If he hasn't any you write us. Don't miss this big opportunity.
Liquid Veneer is sold by hardware, paint, drug, auto, radio, grocery and general stores.

The Low Rumble of the Kettle Drum
—the Synchrophase brings in all such illusive sounds

EVERY inflection of a speaker's voice, the delicate overtones which give music its beauty, are faithfully reproduced because of the Grebe "Colortone"—perhaps the greatest recent contribution to radio reception. This gives you absolute control over sound quality, irrespective of the loud speaker's characteristics. You can vary it to suit your own taste and do away with the artificiality which has heretofore interfered with radio enjoyment.

Mere demonstration and then comparison Quite reasonable with that of other sets.

The Grebe Synchrophase

Withers Variety Store.

MANY REGIMENTS HAVE THEIR SONGS

Music Helpful in Keeping Up Morale.

Washington.—The American soldier is a singing warrior. On the march, in the barracks or camp, or even going into action, he raises his voice in melodious harmony with his comrades to the rendition of popular airs, according to the United States Army Recruiting News. Music is an important factor in keeping up the morale of a combatant organization. Regular song leaders are used in training camps and soldiers are encouraged to lend their voices to mass singing.

Have Own Songs.

Many regiments in the present-day army have songs and ballads peculiarly their own, airs which are known as that particular organization's very own. Some of these songs have been written especially or adapted by the regimental band for state occasions. Three regiments have distinctive ballads set to the tune of "The Girl I Left Behind Me," "Semper Fidelis" and "Annie Laurie." One regiment, the Forty-second infantry, made up of enlisted men from Porto Rico, has for its march "Ecos de Borinquen," whose name indicates its origin, Borinquen being the old Indian name for Porto Rico.

Two organizations, the Thirty-fourth infantry and the Eleventh infantry, use a march called "Le Regiment de Sambre et Meuse" in commemoration of their having fought along those streams in the World war. One regiment, the Forty-fifth infantry, stationed in the Philippines, has adopted a march of Spanish origin called "Alerta Voluntarios." Another regiment uses the time of the French "National Defile March."

Among the many regimental marches several deserve special mention. The Seventh infantry, for instance, which has adopted "The Girl I Left Behind Me," first heard this tune played by British bands during the battle of New Orleans in 1815. When the band of the Seventh (then a fife and drum corps) caught the air, they played it also, and the tune was at once recognized as the regimental march of the Seventh infantry. The Seventh will be the only infantry song regiment in that battle, which was fought after the Treaty of Ghent had been signed. The words were given to the regiment by an Irish officer captured during the engagement.

Legend of "Garry Owen."

"Garry Owen," the stirring regimental march of the Seventh United States cavalry, has a historic legend connected with its inception. In 1868 the troopers of the Seventh were engaged with the hostile Cheyennes at Wasiita, in what is now the state of Wyoming. Attack was to be made at dawn on Chief Black Kettle's Cheyenne Indian village and a special signal for the concerted rush of the cavalry was necessary. "Garry Owen" was played for the first time upon that occasion and the blood-stirring air of that march carried the cavalrymen into the crowing action against the savage redskins. An interesting incident happened in connection with this march is that it is known to have been General Custer's favorite song and tune. At 5 a. m. on May 17, 1876, during the final parade and review of the Seventh cavalry at Fort Lincoln, the regimental band played this air. This was the march by which General Terry left the fort with the regiment on the expedition in the Little Big Horn area which was to end in Custer's massacre.

One other regimental march worth calling attention to is that of the Ninth infantry. The march is called "The Old Ninth Infantry." The name to this song came from the old light opera, "Sergeant Kitty," but the composer of the words is unknown. It is believed to have been first sung at a minstrel show given by the Ninth early in March, 1907.

Of late a custom has been introduced at the United States Military Academy at West Point. The cadet band plays various regimental marches on the parades while the cadet corps participates in each evening during dress parade without and also at the band concerts on Sundays and holidays. The purpose of this custom is primarily to bring the future commissioned officers of the army into closer touch with the airs of the regiments to which they will be assigned later.

Find Sand Fly Carries a Deadly Kala-azar Germs

London, England.—The cause of the spread of kala-azar, a highly fatal malady of the Orient, similar to malaria, is being tracked down by a British commission organized for the study of this disease.

It is indicated by extensive experiments that a species of sand fly carries the minute organism that is its immediate cause. An Indian representative of the bedbugs and a mosquito of the same family as the one that transmits malaria have been infuntiated in the distribution of kalazar in previous investigations.

It is of the utmost importance, say medical authorities, that the ways of transmission of the fever be known without delay, so that steps can be taken to check it. It is a serious menace in both Assam and India, in the thickly settled sections where the population runs over 1,500 individuals to the square mile.

The real frequency of the disease, according to the commission, is rarely apparent until centers for its treatment are opened in rural districts.

Old Manuscripts Verified

The Roerich museum of New York announced that an expedition sent from the museum has verified the existence of manuscripts in the Hemis monastery of Ladak, written during the life of Christ and relating his travels and preaching in India, Tibet and Central Asia. The expedition, which has been in Chinese Turkestan since 1925, was detailed in that region by the Dalai of Khotan. The members were later released after their weapons were confiscated by the native government. It is the opinion of the museum that the manuscripts at Ladak will throw much light on the vague years of the life of Jesus before his return to Jerusalem in his twenty-ninth year. Many are skeptical as to the authenticity of any such manuscripts.—Pathfinder Magazine.

Wild Holds Its Own

The persistence of the wild life close to the haunts of man did his works is more than remarkable. When man first intruded into the wilderness fishes and animals were his easy prey. They did not know anything about him and promptly looked upon him only as some fellow animal who had come to share their lot. They were childishness not long enough and they learned quick lessons from disillusionment.

Today wild animals know how to care for themselves. For years their ranks rapidly decreased, but when man believed that the vanishing point almost had been reached there were seen signs of increase. All the animals had become "foxy."

Had Lost No Time

Moses and Sam were digging a trench over in France. Although not in an especially safe spot, for a time they were unconscious of their danger. Then a shell flew over their heads and exploded just beyond. Others followed. At the fifth explosion Moses asked inquiringly: "Sam, don' ya all think it's about time we-all done got religion?"

"Chuff!" retorted Sam scornfully; "Moses, you nutsoid is thoby shirtless, boy. Me, I done got religion when de fust bomb bust."

Humor in Wills

Full of grim humor was the will of a French lawyer, who left 10,000 francs to a humble orphan as a mark of restitution to those whom who had been unduly enough to engage his services. A thousand pounds each was the legacy left by a testator to his hospital nurse and cook, for their respective kindnesses in driving a pink monkey from the foot of his bed and taking scarlet snakes out of his soup.

GREAT RIVER WILL ATTEMPT COMEBACK

St. Paul-New Orleans Barge Line Planned.

Moline, Ill.—In the Mississippi river to stage a comeback?

With the assured operation of a barge line on a six-day schedule between St. Louis and Minneapolis, following the great success of the federal barge line for several years past between St. Louis and New Orleans, there appears to be a new and brighter day dawning for the "Father of Waters," at least from a freight standpoint.

An agreement, reached after a series of conferences between Minneapolis and St. Paul business men and Secretary of War Davis and Gen. T. Q. Ashburn of the Inland Waterways corporation, means that the government will supplement the $200,000 subscribed by the upper river cities to the extent necessary to provide adequate transportation service above St. Louis.

At the outset the equipment will include three boats of 600 horsepower each, 182 feet in length, 32 feet beam and a mean draft with 7-foot of 3 feet 6 inches. There will also be fifteen steel barges of 400 to 500 tons capacity each.

This fleet will insure sailings six days of the week, connecting at St. Louis with the Mississippi-Warrior service.

Bids will be opened in time to permit construction during the coming year and starting of the service with the opening of navigation in the spring of 1927.

Channel to Be Deepened.

Some improvements of the river are planned. Forty-one miles of the channel between Moline and St. Louis will be deepened. In the Moline district of 605 miles, about 400 miles have a minimum depth of six feet at low water. It is the purpose to deepen the remainder by either dredging or scouring before the new barge service starts.

There was a time when this artery of commerce was big with importance, both for the transportation of passengers and freight. A trip on the river was regarded as a treat. The cuisine of the lordly steamers was world renowned. And to add to the lure there was always the chance of a test of speed, sporting events of no mean importance.

Perhaps the most treasured memory of the veterans was the great race between the Natchez and the Robert E. Lee in 1870. Those boats ranked with the largest and fastest craft on the river. The Natchez was built at Cincinnati and was commanded by Capt. T. P. Leathers. The Robert E. Lee was launched at New Albany just after the Civil war, John W. Cannon being in command.

There was the greatest rivalry between the two companies owning these boats and it was finally decided to arrange a race, purely for the purpose of determining speed superiority.

Captain Cannon stripped the Lee for the race, removing all the upper works and staging that could be dispensed with. He refused all business of any kind, and no passengers were carried.

The race was to be upstream from New Orleans. On the afternoon of June 30 the Lee hocked out from the levee and five minutes later the Natchez followed.

The Lee Wins Handily.

The entire nation watched the race with breathless interest. The telegraph reported the progress and the relative positions of the two craft at every point. At the principal cities of Natchez, Vicksburg, Helena and Memphis thousands assembled on the river banks to watch the flight of the river leviathans.

The Natchez lost, due to some ill luck in rounding into a fog bank north of Cairo, which caused a delay of six hours. Captain Cannon reached St. Louis with the Robert E. Lee an easy winner, his time being 3 days, 18 hours and 20 minutes.

With the passing of the river steamers also went the gamblers. The spirit of adventure was rampant in those romantic days. Large sums of money were carried by the planters. The betting spirit was rife, and the card sharks found rich pickings.

Time Lost by Finest Official U. S. Clock

Washington.—America's most timely clocks off the beating moments with a variation of only one-hundredth of a second a day.

Enclosed in an air-tight chamber, especially constructed to keep outside influences away from the government's master timekeeper, the standard clock at the bureau of standards, which has this small variation in time, is used as a yardstick for measuring time intervals at the bureau. The clock is electrically wound twice a minute.

Its time is checked each day by comparison with the noon signal from the naval observatory, which uses solar observations to set the nation's time.

Stage Fright

Rumford, Maine.—A timid young swain and his girl are missing and city's comic expiation is minus its big feature. Arthur Treworthy and Alice Bunnell were to have been married at the show and to have received many gifts. The police scoured the town in vain when they failed to show up. They had stage fright, presumably.

The medico-social worker of the Michigan Tuberculosis Association not only arranges for the hospitalization of tuberculosis patients but very often she herself takes the patient to the sanatorium. This work is financed through the sale of the tuberculosis Christmas seals, the seals with the double-barred cross, whose life saving influence reaches every county in Michigan.

Mouth

Two definitions of "mouth": the feeding valve of the stomach; the safety valve of the boss. The one may also call it the testing field for both love and gastronomy.

Then, the heart of the fool is in his mouth; the mouth of the wise is in his heart.

A large mouth is the sign of generosity of mind and feeling, and then of those blessed with a large mouth one never hears it said that they have the big mouth.—Frank Harrison in Los Angeles Times.

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the
County of Charlevoix.

IN CHANCERY.

Walter S. Baer, as Trustee, Plaintiff,

Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham, Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Robert Bridge, Defendants.

County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix in said county, on the 25th day of October, A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham, Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors are not residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff.

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors be entered herein within three months from the date of this order, and that in default thereof or their appearance that she or they cause her or their solicitor to cause a copy of complaint to be filed and a copy thereof served upon the plaintiff's solicitor within thirty days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof the said bill may be taken as confessed by the said defendants, Grace L. Oldham, Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of the minor children, Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors, at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and countersigned by me.

CHARLES H. EMREY, Clerk.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by William Slough and wife Clara L. Slough, of Ellsworth, Michigan, to the First State Bank of Central Lake, Michigan, a Michigan Corporation, dated June 15th, 1926, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 18th day June, 1926, in liber forty of mortgages, on page 396, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Rose Slough of Ellsworth, Michigan, by assignment of mortgage dated November 17th, 1926, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, November 20th, 1926, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the City of Charlevoix, Charlevoix, County Michigan, (that being the place where the circuit court for the County of Charlevoix is held) on Saturday the 19th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northwest fractional quarter of the northwest quarter, all in section seven, township thirty-two North of Range seven west.

Dated November 15, 1926.

MORTGAGE SALE

Notice is hereby given that a certain mortgage dated May fifth, one thousand nine hundred and twenty five, given by Oliver G. Davenport by K. G. Davenport, attorney in fact, and Rowena G. Davenport, wife of Oliver G. Davenport, in her own and dower right, to Alfred E. Hass. The said mortgage was executed and delivered on the fourteenth A.D. 1925, in liber sixty-eight of mortgages, on page seven, in the office of the Register of Deeds for the county of Charlevoix, Michigan. Which said mortgage was duly assigned by Alfred E. Hass to Mrs. Verona J. Vincent, Sept. eighth, 1926, and recorded September 14th, A.D. 1926, in liber fifty three of mortgages, on page 530 in the office of the Register of Deeds for the county of Charlevoix, Michigan.. The said mortgage containing a clause, wherein it is expressly agreed that should any default be made in the payment of interest, or any part thereof, on any day whereon the same is made payable, and should the same remain unpaid and in arrears for the space of ten days, that after the lapse of the said ten days, no matter if the principal sum or the main unpaid, with all arrearages of interest thereon, shall, at the option of said party of the second part, or his assigns become and be due and payable immediately thereafter; although the period limited for the payment thereof may not have expired, anything hereinbefore or in the note contained to the contrary thereof in anywise notwithstanding. Powers also being granted to the second party to effect insurance, pay the premiums thereof, to pay taxes that are in default, to be added to the principal and accrued interest. Therefore the said assignee of said mortgage having paid insurance premiums and taxes thereon said premises, hereby elects that the whole sum of principal becomes due, upon which there is claimed to be due and unpaid at the date of this notice, for principal, interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the City of Charlevoix, Charlevoix, County Michigan, (that being the place where the circuit court for the County of Charlevoix is held) on Saturday the 19th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northwest fractional quarter of the northwest quarter, all in section seven, township thirty-two North of Range seven west.

Dated November 15, 1926.

ROSE SLOUGH,
Assignee of Mortgagee.

LISLE SHANAHAN,
Attorney for Assignee of Mortgagee.
108 Clinton Street,
Charlevoix, Michigan. 31-13t

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Isaac Jane Myers, of Charlevoix, Michigan, to Sarah Jane Myers, of Charlevoix, Michigan, dated the 26th day of November A.D. 1922, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 29th day of November A.D. 1922, in Liber 51 of Mortgages, on page 465, whereby the power of sale contained in said mortgage has become operative, on which mortgage there is claimed to be due at the date of this notice the sum of One Thousand Twenty Three Dollars, for principal and interest, taxes paid by the mortgagee to protect his security, and an attorney fee of Twenty-five dollars, provided for in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage or any part thereof:

Now, Therefore, By virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Friday the 24th day of December A. D. 1926, at ten o'clock in the forenoon, I shall sell at Public Auction to the highest bidder, at the east front door of the Court House in the City of Charlevoix, in the County of Charlevoix, State of Michigan, (that being the place where the Circuit Court for said County of Charlevoix is held), the premises described in said mortgage, or so much thereof as may be necessary to pay the amount due on said mortgage, with seven per cent interest, and all legal costs, together with an attorney's fee of Twenty five Dollars, as provided by law and the covenants therein, the premises being described in said mortgage as follows, to-wit:

Lands and premises situate in the Township of Charlevoix County of Charlevoix and State of Michigan, viz: East Half of the Northeast Quarter of Section Two, Township Thirty three North, Range Seven west containing Eighty acres of land according to the return of the Surveyor General.

Dated, September 29th, 1926.

FRED S. MYERS,
Administrator of the Estate of
Sarah Jane Myers, deceased,
Mortgagee

SERVANT'S WAGES OF $3 A WEEK RUN UP TO $80,000

Aged Woman Seeks to Recover Salary Which Was Charged at Commission Rate.

Jefferson City, Mo.—From court to court, from contracts to suits and to contracts again, goes the unusual "lifesavings" case of Sarah Duncan. Now on application for a writ prohibiting Judge Park of the De Kalb county bench from continuing jurisdiction in the case pends before the Supreme court.

Sarah Duncan is an aged negro. For 60 years she was a servant in the family of Lt. Clay Duncan, farmer of Osborne, Mo., who died 18 months ago. In his will was a cash bequest of $1,500 to Sarah, and provision for a trust fund of $2,500 for her old age.

Several months after her master's death, Sarah's lawyers filed suit to recover $80,000 life wages from the estate. There had been contracts of employment, stated the petition.

When she began working for Mr. Duncan at ten years of age, Sarah said, there was an agreement, at $2 a week wages, board and clothing. The wages were to be kept by her master, and invested in his name for her, at 6 per cent interest, compounded annually.

When she was eighteen, continued the petition, a new agreement increasing the wages to $3.50 weekly was made, the former also to be invested. For 52 years this arrangement continued, it is alleged. The negro woman remained a household servant, trusted and in a fashion "one of the family."

It figured out that at eighteen years of age, when she got her first real "raise" Sarah had $17,016 due her on the plus, and interest had mounted to $75,000 at thirty-five years of age, on $3.50 a week, $105. $95.77 was the total and interest was in excess of $200 a year. Then through 52 more years, until the total is figured at $80,000.

Florence Crittenton Homes

Charles Nelson Crittenton was an American philanthropist, born in Adams, Jefferson county, N. Y. He went to New York and established a drug store in the city in 1861; but after 1883, when his five-year-old daughter Florence died, he devoted all his time and wealth to the establishment of Florence Crittenton homes for orphans and unfortunate girls and their infant children. In 1887 the National Florence Crittenton Mission was incorporated and placed under the direction of a trustee board of fifteen of the leading women in Methodist Episcopal circles. Mr. Crittenton's lifetime in charge of the Florence Crittenton homes in the United States and in Mexico, Shanghai, the City of Japan, aggregated 25 years.

STATE FERRIES BUSY

Transfer Business Shows a Gain For the Year 1926

Receipts on the St. Ignace-Mackinaw City route by the state ferries for the year 1926, according to the report of the State Highway Commissioner, Frank F. Rogers, amounted to $202,625.55 as compared with gross receipts of $175,968.75 for the preceding year, an increase of $26,000, and this too, with rates for service greatly below the rates for 1925. The ferries transferred 72,852 automobiles across the straits in 1926 as shown by the statement, this being 15,039 over the number carried in 1925. The 1927 season bids fair from the present outlook, to show a still greater increase in business on the route.

"Stabat Mater"

The "Stabat Mater" is a medieval poem of uncertain authorship, generally ascribed either to Jacopone da Todi or to Pope Innocent III. It came into popular use in the Thirteenth century, although not at that time with any musical setting. Because of the beauty of the poem, it became a great favorite with composers, and hence a number of musical settings have been furnished for it, the earliest being that of Josquin des Pres, which appeared in 1520. Other compositions are those of Pergolesi, Haydn, Stefani, Claro, Astorga, Winter, Hammond, Dvorak, Verdi, Ernest Walker, and Sir C. V. Stanford.—Literary Digest.

Has Conscience

New York.—Father Knickerbocker is in $2,000 richer because of the conscience of one of his citizens. Two crisp $1,000 bills have come to the treasury through the medium of a priest.

Christmas Gifts

(Contributed to The Charlevoix Sentinel)

To children give the Santa Claus,
To youth a valentine;
To fourscore years give memories
Of Auld Lang Syne.

A picture of a moss grown roof,
A pasture, meadow brook,
A church spire piercing cloudless sky,
Gray marble slabs, Times memory book.

Fall tears for all the wasted years
For hopes that died, for songs unsung,
No tender touch of outstretched hand,
For dross in charity far-flung.

Give to the aged quiet hours
And dreams that all who follow star
May know the Babe, their Christ and King;
Find peace, though t'ory have wandered far.

—Charlotte Barnes Bigelow.

MISS FANNIE DIAL

Miss Fannie Dial, daughter of the former senator from South Carolina and Mrs. Nathaniel B. Dial, will make her debut, to society in Washington this winter.

THIRTEEN WINTER CLUBS ORGANIZED

Boys' and Girls' Club Work Enlarged in Charlevoix County

The winter of 1926-27 starts off with a large increase in membership in both the sewing and handicraft club projects and in good attendance and interesting Charlevoix county will enjoy its most successful year in club work. Without a single exception the new sewing clubs, organized early in November by extension specialists from the State College of Agriculture have already made rapid progress in carrying out their requirements and are deeply interested in the work. The early great emphasis was placed in having 100 per cent finishers in each club and a record number who were uncertain were not asked to join and it is hoped our percentage of finishers will be considerably higher than last year.

Great credit must be given to the leaders of the new clubs, who are doing their work for others and efforts unselfishly and without compensation to give these rural boys and girls instruction and training in sewing and manual training.

Following are the various clubs in the county:

Sewing Clubs.

1. Chaddock School Club—East Jordan. Leader, Miss Vera Bolling, teacher; Members seven.

2. Bury Bee Club—Boyne Falls. Teacher, Mrs. Carl Bryant; member, Miss Mary Benjamin; members five.

3. Clarion Club—Clarion. Leader, Miss Agnes Bryant; teacher; members eight.

4. Keep Working—Hilton School, Charlevoix; Leader, Miss Lottie Webster, teacher; members seven.

5. The Merry Sewers, Mountain School—East Jordan. Leader, Frances Gould, teacher; members seven.

6. Busy Folks' Sewing Club, Wildwood School—Boyne City; Leader, Marguerite Schepers, teacher; members six.

7. Bay Shore Club—Bay Shore School; Leader, Helen Germond, teacher; members nine.

8. Cheerful Workers, Burgess School House—Charlevoix. Teacher, Irene Bruce; Leader, Miss Raber; members eight.

Handicraft Clubs.

1. Phelps Handicraft Club, Phelps School—Charlevoix; Leader, Russell Dudley, teacher; members seven.

2. Wide-a-Wake Club, Burgess School and House—Charlevoix; Teacher, Irene Bruce; Leader, Sina Baker; members twelve.

3. Busy Builders, Korthase School—Boyne City; Leader, Celia Mae Howe; members seven.

4. Clarion Hammerfest Club—Clarion; Leader, W. C. Palmer; members eight.

5. Be Finishers, Hilton School, Charlevoix; Teacher, Lottie Webster; Leader, Orville Hilton; members five.

This gives a total of 98 boys and girls who have started the winter club work in the county. In addition a group of five boys in the Chaddock School are endeavoring to complete their requirements without a suitable place to work and without a leader. Working under these handicaps they are to be congratulated for their interest and spirit.

PUSH BUTTON RUNS HUGE CATTLE RANCH

Successors to Texas Pioneer Use Electricity.

Menard, Texas.—Otto Martin lighted a new ranch home, drew water with a pump, examined one of the new brooding units which were rapidly displacing the old wooden pegs, and thought it was progress. But he kept a few of the old candles on hand and preserved the old oaken bucket for safety. That was 1875, and the place was the famous 101,000 acre Las Moras ranch.

Otto's assignees and descendants now press a button. Magic lamps glow, electric cooks, oilcloth baited, pumps draw water, saws cut wood, sheep are clipped, refrigerators retard waste, grindstones grind, and smithless wafts. They just push a button.

Electricity also is transforming the cattle ranches.

Life Moves Faster Now.

Life moves with a swifter tempo on the land which Martin, Carlin Dodson and our 50 years ago. Otto would not know the place.

Trolling up the valley of the Colorado river from Austin, Texas, in the summer of 1877, as one train followed the clear stream of the Llano and, drawing up at a spot on the San Saba river in Menard county, inspected a corps of builder and square pointed nails, four of those Carlin built for ranch house in the desolate wastes that was then West Texas.

Recently the old place was razed and on its site, inside out of some of the cow's timbers, stands a ranch house of a new type—a sprawling bungalow with wide porches and spacious rooms, hardwood floors, and out in the rings. And beside each polished door is an electric light switch.

A strange thing moments on a truck having four timber arms, rushes about on Los Moras ranch these days. It is a moving "barber shop" equipped with "hair" shears electrically. Carlin used to trim a sheep on each backskin thong and harvest the wool with a clumsy pair of shears, and did it a time. Now the twinkling blades of the shears run from one 150 hair cuts a day each. An expert handclipper, working at top speed, cannot do more than 40.

Electricity Does It.

Descendants of the old ranch's dairy herd munch feed cut by electric ensilage cutters, give their milk to an electric milking machine and are comforted by an electric fan which drives away the flies. Mother Nature's old barnyard bridge, while an electric incubator hatches their chickens and an electric brooder raises them. Eggs are branded by electric irons and eliminated by electric clippers, while electric brans of a different type curl the maid's hair and pass the men's shirts.

The old farm road, a dusty one-rut far away hike the sunset as it formerly was a single concern, has been widened to 19,000. But this curtailed acreage produces more wealth than the original 100,000 acres.

Charles L. Martin owns the place, and his four sons, college trained, operate it. Only one thing new prevailing the collections are made by the county clerk and by him disbursed to the wives or other dependents. The county clerk issues a statement to the Judge at each session of the circuit court showing those in arrears and the court in possession of this information either orders the sheriff to bring in the person in arrears pleading him under performance bond or causing his arrest for nonpayment. This method has assisted the Superintendents of Poor who have in the past necessarily provided for families where the husbands and fathers deserted their families.

Judge Gilbert should be congratulated on his constant and careful consideration of this department, in placing the burden of supporting the families direct on the husband or father, and insisting on them doing their duty to the family and to the state. The following figures will give you some idea of the condition of this account and how the payments are increasing each year in Charlevoix county:

Collections made by County Clerk in 1923, $1,479.30; 1924, $2,398.90; 1925, $3,488.00; 1926, $1,546.04 to Dec. 10th. Total in four years, $11,912.24.

The court has also collected many costs in criminal cases which have helped materially in maintaining the criminal side of the court. That is in case a person is found guilty of a criminal charge, the costs or a part of them are charged to the defendant, whose pay at least a part of the expense of his criminal act, the amount determined by the court on investigation. In this way the tax payers are assisted in the maintenance of this side of the court by those actually causing the expenses.

Respectfully submitted,
CHARLES H. EMREY
County Clerk.

Dec. 27, 1926.

U. S. Servant Shares in $35,000,000 Estate

San Francisco, Cal.—Albert Berlin, a butler here, told newspapers he had received notification that he was one of the heirs to a $35,000,000 English estate left by the late duke of Argyll.

According to the servant's story, his father, the late John Frank Berlin, was once a wealthy manufacturer of steam turbines, was the first chemist to the estate, but allowed his claim to lapse. The elder Berlin later lost his fortune, and his son, Albert, was forced to butler, were without funds to bring a claim against the estate left by the duke.

The house of character and records in London recently reopened its doors to take voluntarily, Berlin says, and he plans to leave for England in three months to be present at the disposition of the estate.

REPORT OF THE COUNTY CLERK

Showing the Condition of Alimony Collections for the Past Four Years

The collections, under the direction of the court have increased from year to year in a most satisfactory way. Under the law in vogue in 1923 alimonies under divorce decrees were paid by the husband direct to the divorced wife, but now the law now prevailing the collections are made by the county clerk and by him disbursed to the wives or other dependents. The county clerk issues a statement to the Judge at each session of the circuit court showing those in arrears and the court in possession of this information either orders the sheriff to bring in the person in arrears pleading him under performance bond or causing his arrest for nonpayment. This method has assisted the Superintendents of Poor who have in the past necessarily provided for families where the husbands and fathers deserted their families.

Judge Gilbert should be congratulated on his constant and careful consideration of this department, in placing the burden of supporting the families direct on the husband or father, and insisting on them doing their duty to the family and to the state. The following figures will give you some idea of the condition of this account and how the payments are increasing each year in Charlevoix county:

Collections made by County Clerk in 1923, $1,479.30; 1924, $2,398.90; 1925, $3,488.00; 1926, $1,546.04 to Dec. 10th. Total in four years, $11,912.24.

The court has also collected many costs in criminal cases which have helped materially in maintaining the criminal side of the court. That is in case a person is found guilty of a criminal charge, the costs or a part of them are charged to the defendant, whose pay at least a part of the expense of his criminal act, the amount determined by the court on investigation. In this way the tax payers are assisted in the maintenance of this side of the court by those actually causing the expenses.

Respectfully submitted,
CHARLES H. EMREY
County Clerk.

NEW BUSINESS FIRM

Staley Brothers Will Open Hardware Store About March 1st

According to present plans a new business house will open in Charlevoix about March 1, 1927, under the ownership and management of Albert and Ernest Staley under the firm name of Staley Brothers.

The line handled be a general line of hardware and will be located on the main floor of the store building located at 216 Bridge street, in the same room, for a long term of years and until recently, occupied by the Emrey Clothing House, a

Beautiful Gateway to the Northwestern States

Minneapolis claims to be the gateway to the northern tier of states and the great Northwest, and the pride of the city is the symbolical gateway and plaza of imposing architecture in a public park in the business district, which opens to the northwest.

Romance of Sea Rivals Fiction

Canadian Fireman Who Saved Titanic Babe Becomes Heir to Millions.

Toronto, Ont.—Heir to $2,000,000 and guardian of a girl of fourteen whom as an infant he saved when the Titanic went down in 1912 is the happy fate which, according to his own story, has befallen John James, a fireman employed in one of Toronto's pumping stations. A few days ago James left for England for the purpose, he said, of concluding legal formalities.

Among John James' associates his story is accepted at its face value, for they have known him for many years as a trustworthy workman and a man of his word. Among others there is skepticism pending his return from England with his millions and his ward.

John James' story in any case stands unrivaled among romances of the sea. Here it is in his own words:

"I had shipped on the Titanic as a seaman under the name of John Jones. I did not use my own name because of a previous disagreement at the company's employment office.

"When the vessel struck the 'growler' I took my station beside No. 3 boat.

Receives Charge of Baby.

"It was as the passengers were getting into the boat that I received charge of the baby, who has been responsible for the events which have happened recently.

"A number of women had got into the boat. I remember they included Mrs. J. J. Astor and Lady Rothe, when a woman carrying a baby in her arms came forward. Her husband and two other little children were with her. She first handed me the child and then, on learning that her husband could not accompany her, refused to go herself. The other two children stayed with their mother, and I was handed a sum of money and an address in London, with instructions that should anything happen I was to deliver the child to that address. I was told I was keeping the baby for extra precaution. None of us dreamed for a moment the Titanic would sink.

"We lowered away and pulled off from the doomed vessel.

"Each hour I made each passenger take a teaspoonful of rum and I took some myself. It kept us alive, for the cold, following the proximity of the icebergs, was intense and I was dressed only in canvas breeches and jersey. I had not even shoes on. I had stowed the baby, wrapped up in my qiaskina, in the boat's locker. Now and again it would cry and I moistened its lips with a little rum and water. That, in my opinion, kept it alive.

Picked Up by the Carpathia.

"It was terrible when the passengers in the boat realized the giant vessel was gone. The tragedy has been sufficiently written about, and it is enough for me to say that the next morning we were picked up by the Carpathia and that the baby was still safe and sound.

"On the Carpathia they tried to take the child from me, but I had given my word to deliver it to its grandparents and I meant to keep it. The child was well cared for, of course, and after we reached New York I took it ashore with me and then back to England, where I was met by the grandparents at Liverpool and handed her over to them. At the time I was well compensated financially, and after the Washington and Southampton inquiries, at both of which I gave evidence, I returned to my calling on the sea.

"The grandparents would write me and send me money on the Titanic's anniversary, but it was not until the war that I saw them again. It was about six years after the Titanic's sinking that I was in hospital wounded. When I was discharged I was given a fortnight's leave and I went to spend it in London in the Union Jack club. I had nothing to do there so I thought I would call for the first time on the baby's grandparents, for I had been often invited when in London to do so.

"I went down by bus and, of course, I was wearing my sailor's uniform. When I arrived at the address I was surprised at the size and imposing front of the house I had come to visit. Mustering up my courage I rang the bell and when the door was opened by a butler asked to see the lady of the house. He viewed me with apparent doubt and then remarked that the lady of the house was not at home.

"'Take her my name,' I said, 'I know she will see me.'

"He was about to close the door when a little girl walked from a room to the left of the great hall across it. She was dressed in white, and as she crossed she saw me. She stopped and looked at me for a long moment.

"'What is your name?' she asked me, and I told her.

"'Martin,' she said, 'kindly let the gentleman in. I know him and grandmother will see him.'

"I was taken inside, where an old lady was sitting reading. I introduced myself and to my consternation she kissed me.

"'Send for Mrs. Martin,' she ordered the butler. 'Mr. James will stay with me.'

"I demurred, but she insisted and the whole of my fortnight's leave was spent in that wonderful house. Each day we would drive to the theater or some entertainment or other, while I met many people at her home. You can guess I was not entirely comfortable, but I gradually got used to the new luxury and my leave expired almost before it had begun, so to speak. Then I went back to the sea again. After the war, with £500 the old lady gave me, I came to Canada and started to buy now, life here."

Now, according to James, the grandmother is dead and he has been notified that he must assume guardianship of the child and is heir to an estate that is valued at $2,000,000.

An embarrassing change in his mode of life is entailed but James thinks he can best bridge the gulf by becoming a gentleman farmer, an old ambition with him.

In any case, he says, he will not abandon Canada or his friends at the city hall and elsewhere in Toronto

Diamond "Kings" Fear Diggers' Price Cut

London.—Diamonds soon will be as common as artificial pearls if the present unrestricted output from alluvial diggings continues, in the opinion of the South African diamond magnates, says a dispatch to the Daily Express from Capetown.

The correspondent says the diamond mine owners are perturbed over the increasing output of stones from the alluvial diggings, where individual seekers are finding plenty of diamonds and putting them on the market at prices below those charged by the De Beers syndicate.

Solomon B. Joel, Sir Ernest Oppenheimer and Sir Abe Bailey, mine owners, have arrived in Capetown from England with the hope of inducing the South African government to limit the alluvial output. Mr. Joel is a director of the De Beers Consolidated mines. He is a nephew of the late Barney Barnato, a poor Jewish peddler who went to South Africa in the early '70s, and made a large fortune in diamond and gold mines.

Shoos Pigeons Out of Church After 50 Years

Milwaukee, Wis.—The age-old problem of ousting tenants without hurting their feelings is facing Rev. Arthur H. Lord and the vestrymen of St. James' Episcopal church, because the time has arrived, they believe, to ask pigeons to move from the steeple of the church where they and their ancestors have lived for 50 years.

Two months ago a steeple-cleaning expedition was carried on by Otto Gehrke, sexton, and three men. They took 500 bags or nearly three tons of debris from the floor of the tower. It was seven years since a similar job had been performed, according to Gehrke and the debris included skeletons of dead pigeons.

Reverend Lord wishes they would find new homes, but says they may stay on the steeple as old dogs.

Baby War Refugee Is Made Heiress

London. — Fourteen-year-old Marie Surette Stevenson, a tiny Belgian refugee from the war-torn fields of Europe 12 years ago, is a British heiress as a result of that same war which spread misery and ruin across half of Europe.

Surette was born in Belgium, where her father was an artisan. When the nations leaped at one another's throats, she was two years old. Her father went to the front and along with thousands of other refugees, Surette was brought to England.

A fairy wand waved over the humdrum refugees' camp one day. Surette was scarcely old enough to see it. Lord and Lady Stevenson stepped out of their limousine in search of a child to gladden their house. The waif pointed to flaxen-haired Surette and she became their adopted daughter.

For three years Surette had filled the Stevenson home with laughter. Lady Stevenson died in 1917. But at her deathbed, Lord Stevenson promised Surette would never want for anything. The second Lady Stevenson, too, loved Surette. A few months ago there came the death of Lord Stevenson, and his will just made public, brings to Surette a legacy of $125,000 which is all her very own.

DETROIT WORKER INHERITS LARGE AUSTRIAN ESTATE

Estranged From Parents Since 1911 He Arrives Home In Time to Save Property.

Detroit, Mich.—Estranged from his parents since 1911 over a trivial quarrel, Ernest Meuser, an Austrian mechanic, who has made his home here since that time, returned to his former home in St. Polten bei Wien, near Vienna, last month just in time to claim the valuable estate of his father, which would have passed into the hands of a distant relative at the end of this year.

Details of the death of his parents while he was in America and information regarding the estate reached here recently in a letter received by Meuser's American wife, who indirectly was the cause of his return to Austria.

The quarrel that caused young Meuser to leave his home at the age of eighteen was an inconsequential matter, Mrs. Meuser said, but the young man took it deeply to heart and never corresponded with his parents. Four years ago he married. During the last year or two his health failed. Mrs. Meuser believed her husband's ill health was caused by his worrying over his estrangement from his parents and some weeks ago, unknown to him, she wrote to his mother.

It was returned to the Vienna post office marked "Addressee dead," and was opened by the postal authorities. From it the Austrian authorities learned of Meuser's address here and they wrote to him telling him that his father had died soon after the World war and his mother about two years ago.

By his mother's will, all the property, consisting of valuable manufacturing plants, was left to a distant relative unless the son claimed it before the end of the present year. On receipt of this information, Meuser at once left for Austria and arrived at St. Polten the end of last month, in time to establish his identity and claim the estates.

Mrs. Meuser is arranging to join her husband in Austria.

Famous "Big Ben" Cracked, Radio Fans Detect Flaw

London, England — Big Ben is cracked. Most all radio fans who have heard on their sets the clock strike the hours from the Westminster tower thought there was a flaw in the bell and this is confirmed by W. Boughton of the Ancient College of Youths, England's oldest bellringing fraternity.

He says professional bell ringers agree that Big Ben is so cracked "that you can stick your arm through the fracture."

Paper-mache pipes introduced by an Englishman are said to absorb excitedly all the nicotine as it is provided within the bowl.

Need of Horses "Halterbroke"

Animals Command Premium Over Absolutely Green Varieties.

(Prepared by the United States Department of Agriculture.)

The need of the Mexican army for horses has stimulated a demand for medium-weight animals of from 950 to 1,200 pounds that are straight of color and preferably broken to halter and saddle. According to John H. Huff, representative of the packers and stock yards administration of the United States Department of Agriculture, many green horses are being bought up by dealers and speculators at Fort Worth, Texas, and are being "halterbroke," since the requirement to lend is a big factor in selling the animals.

Command a Premium.

Animals that are only "halterbroke" will command a premium over the absolutely green kinds, and the dealers are getting bold for what the packer might have done with much less risk and with greater ease. Most of these horses are strong and fat and are bound to put up a pretty good fight before being broken to lead. The operation requires considerable time and energy on the part of the dealers and rarely fails to skin up the animal.

Some Are Better.

"The point is," says Mr. Huff, "that if the young colt in first hands was 'halterbroke' gentle, rounded up as soon thereafter as possible, the animal, even though never handled under force reaching maturity, would never forget its lessons. A desirable feature of 'halterbreaking' is the ease of yearling is that they are lighter in weight than they ever will be again and therefore more easily handled. They are less likely to injure themselves in training. Another good feature is that when the colt reaches the age to be broken to work, a good half of the job is done, due to the early halter training.

"The day of haphazard horse production is past, and there is no reason why the horse raiser of today cannot receive first-hand mighty close to real horse values through a little preparation of the colt."

Refuse Vegetable Pile Superior as Fertilizer

Where manure is difficult to procure, advantage should be taken now to secure leaves in as large a quantity as possible. While these may be applied directly to the soil and plowed in, it is much better to rot them in a compact form in a corner or out-of-the-way place and leave these, to rot and decompose for a year before using them in the garden. Sulphate of ammonia, an excellent nitrogenous fertilizer, can be used to advantage with the leaves, as it will hasten the process of decomposition and increase greatly the fertility of the humus. From 10 to 20 pounds of sulphate of ammonia may be mixed with every cubic yard of well packed leaves or lawn clippings. Or, preferably, it may be sprinkled on each layer sprinkle the sulphate of ammonia at the rate of one pound per square yard, and build up the piles, to at least a height of four feet so that there will be no leaching of available plant food.

Fowls Require Heavier Feeds in Cold Weather

Very naturally all kinds of fowls need a little extra feeding during cold and stormy weather. When it is cold our fowls consume quite an amount of food because it takes more to keep them warm—and this must be done before egg production will go forward. If the supply is sufficient only for the real needs of the body, and nothing extra, we need hope for but few eggs. If we have been feeding a certain amount of feed during the warmer weather of the summer and fall, and it has been just about right for egg production, it is time up to us to increase the amount both of mashes and scratch feeds. The change is generally easily assimilated and made use of. If hens have not started their fall and winter moult, they probably soon set to get them to work, we have found that a little run of warm mashes in the morning if well managed will help materially.

Care for Peach Trees

It is not uncommon for peach trees that are planted in sandy soil and whose roots are not packed well with soil at planting time to be disturbed by winds or cultivation or in some mechanical way. The root system is then unable to supply the tree with the moisture it needs. Another possibility, in which the wind is not concerned, is that of heavy fertilizing with manure or chemical fertilizer. Often trees are seriously injured the first season by excessive fertilizer application.

FARM FACTS

Get home-grown clover seed if you possibly can.

• • •

Whoa spring plowing is done, be sure it is done early, just as early as possible in the spring.

• • •

Some farmers still follow the practice of piling manure in the fields, which is certainly bad.

• • •

The disk plow is particularly adapted for nearly all types of deep plowing, that is, from 6 to 18 inches.

• • •

During 1925 farm wages were the highest since 1920, and three times what they were at the close of the Civil war.

• • •

Winter is the best time to apply lime to the soil. This is particularly true when lime is to be applied to pasture lands or wherever there is an established stand of a grass crop.

Canada's Little Red School House on Wheels

This school car, equipped and operated by the Canadian National railways for the Ontario government in order to bring educational facilities to the children, is finding strong supporters in the sparsely settled districts of northern Ontario, as well as in the other sections.

Arabs and Palestine Jews Agree to Live in Peace

Scene at a dinner attended by the leading Arab sheiks and Jews of Palestine where these ancient foes entered into an agreement to live at peace with each other henceforth.

Looks Like Union Jack but Isn't

During the recent war maneuvers of the British army, in a heavy wind and rain storm, these new one-man tanks were exhibited and performed well. The tank runs on either wheels or caterpillar tread and carries a machine gun.

TOLD IN A FEW LINES

A Danish whaler fishing off the coast of Norway recently got a "cargo" of oil worth $850,000.

Tunes played from 52 glasses by the Austrian musician Frohlich by fingers over the rims were broadcast from an eastern radio station recently.

After paying its deficit of 1924 of more than $3,000, Sweden's authorized broadcasting company made a profit of $55,000 in the past year.

Bombay claims the greatest density of population in the world.

The tally-ho coach service has been revived between London and Brighton after a lapse of six years.

Australia's net gain in population through immigration amounted to 30,862 in one year.

A pigeon that had flown from Louisiana was found recently in Rio de Janeiro.

GRAIN KING

Herman Trelle, homestead farmer of Wembley, Peace River, Alberta, who was crowned both wheat and oats king of North America at the big and grain show of the International Live Stock exposition. This is the first time in history the two champion-ships have been won by a single exhibitor. Trelle is an American by birth. Ten years ago he homesteaded 160 acres in the Peace River district, and now owns and farms 480 acres.

ENVOY FROM PERSIA

Visitors to the house of representatives often mistake this flag in the office of W. P. Jarrett, delegate from Hawaii, for the Union Jack, but it most emphatically is not. Delegate Jarrett says that the "flying" the Hawaiian flag, which was designed by a Britisher in Honolulu and therefore somewhat resembles the Union Jack.

England Has a New One-Man Tank

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD, ETC.

COPYRIGHT BY BRENTANO'S

W.N.U. SERVICE

PRECEDING CHAPTERS

Harry Ormerod, proscribed traitor to King George as a Stuart partisan, returning from France to London, rescues Aberman Robert Juggins from assassins. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Juggins owes himself indebted. Ormerod tells Juggins he has abandoned the cause. Juggins informs him of a Jacobite plot in the American colonies to weaken England by forwarding French interests. At its head is Andrew Murray, a Scotsman, and a Frenchman, De Vaulx, deadly enemy of Ormerod. The two are in London furthering their schemes. Anticipating the plotters' return to America, Juggins arranges for Ormerod to go there with letters to Governor Burnet, friend of Juggins, and work to foil Murray. Disguised as Juggins' secretary, Ormerod takes passage to America. On the ship he meets a girl, Murray's daughter, aridentil which he believes him to be Juggins, the Stuarts. De Vaulx recognizes Ormerod and attempts to kill him. Failing, assaults, Ormerod is thrown overboard by some negro. Tom, but regains the deck in safety. He accuses Murray of inciting the negro to murder him, but, of course can prove nothing. A truce is declared until the vessel reaches New York.

CHAPTER IV—Continued

"That is true," I assented.

"There is somewhat I would venture to observe upon, if you will permit me," he continued detachedly. "You are a youth of boldness and courage. You possess intelligence. You may go far in the provinces in years supposing you do not succeed in winning a patron. I opine that a pardon might be won if you went about it in the right way. There are gentlemen at Whitehall, who—"

His hesitation was eloquent.

"And you would suggest?" I asked mildly, faintly aware that I perceived the drift of his intention.

"I think well before you commit yourself to this venture. You cannot hope to overcome me. Why, the governor of this province, who has all the senegral powers at his command, has failed to balk me in my plans. My influence is no less in London. If you continue as you have begun you will end, I fear, in the Tower, but it is not be a shrewd. 'Tis merely a prediction."

"I fear me I should lose your good opinion did I take your advice," I replied.

He looked me straight in the eyes.

"You would," he said curtly, and he turned on his heel and left me.

Three hours later we lay at anchor in the East river under the lee of Nutten island, which some called the Governor's because it was a part of his estate. Here, too, was anchored in the East river under the lee of Nutten island, which some called the Governor's because it was a part of his estate. Here, too, was anchored a large man, six feet in his necessaries, and of about the same age as myself. He stalked along, arms swinging easily at his side, wholly imperviolous to the rabble of small boys who tagged behind, yelling and shrieking at him.

He was naked from the waist up, and on his massive chest was painted in yellow and red pigments the head of a wolf. He wore no other paint, and he was weaponless, except for the tomahawk and knife which hung at his belt.

The children danced around him so many little animals. They never touched him, but some of the more venturesome hurled pebbles from the walk at his brawny shoulders. I cannot repeat the catch-calls and rhymes which they employed, some of them too disgusting for print.

I looked to see some citizen intervene, but several who sat on their doorsteps or lounged in front of shops, making the inevitable pipe, viewed the spectacle with indifference or open amusement.

My wrath boiled over, and I charged down upon the tormentors.

"Be off," I shouted. "Have you no proper play to occupy your time?"

They fled hilariously, pleased rather than enraged by the attack, after the perverse habit of children who prefer

always to be noticed instead of ignored, and I was proceeding on my way when I was dumfounded by hearing the Indian address me.

"You speak English!" I exclaimed.

A light of amusement gleamed in his eyes, although his face remained expressionless as a mask.

"You do not think of the Indian as these ignorant little ones of the city," he asked curiously.

"I—I know nothing of your people," I stammered. "I am but thus day landed here."

"My brother is an Englishman?" he questioned, not idly but with the courteous interest of a gentleman.

"I am."

"Ta-wan-ne-ars thanks you, Englishman." He extended his hand. "Your kindness was the greater because you obeyed it by force."

I regarded him with increasing amazement. Who was this savage who talked like a London courtier?"

"I helped you," I said, "because you were a stranger in a strange city, and by the laws of hospitality your comfort should be assured."

(TO BE CONTINUED.)

Gay-Feathered Birds Make Best Warriors

Gay birds are the hardy athletes of the feathered world, according to a theory advanced by C. H. Henshaw, a London naturalist.

Male birds are forced to be bushingly beautiful in order to attract the more sober-colored females, Mr. Henshaw explains. But a bird that wears scarlet, blue or orange feathers, and that sings loudly and otherwise makes himself conspicuous, must be sturdy and alert if he is to survive long enough to establish a home and raise a family. He is as much a target for his enemies as the warrior who used to dash into battle wearing a red coat and riding a white horse.

How all this illustrates the old principle of the survival of the fittest is shown by Mr. Henshaw, who says: "The better mate an animal can get, the more chance the descendants will have of survival, and it is obvious that a mate that has to face more danger and yet manages to survive has in all probability a greater capacity for keeping alive than one which lives through less danger. Therefore the female that chooses a mate with a dangerous habit or structure chooses what is, aside from the dangerous part, a better and more fit mate."

This tends to raise the vitality of the bird species, he says, because the male has gained vitality is inherited by both sexes of his family, although his hazardous beauty is handed on only to his male descendants.—Science Service.

It Wasn't Love

Miss Simpkins was of uncertain appearance, age and rather fright-ened De Vere, a young assistant in a chemist's shop, by her demonstration of friendship. He felt sure she meant to hook him. Chance threw them alone in the shop and De Vere felt that his hour had come.

"Mr. De Vere," said Miss Simpkins, "I can no longer bear this unspeakable anguish. I have at last plucked up courage to ask you a question that concerns my future happiness and comfort. Will—will you be—"

"Madam," gasped De Vere, "it—it would break my heart to refuse. I have every regard and respect for—"

"Sir, what do you mean?" gasped Miss Simpkins. "Surely you can't object to my asking what brand of corn-cure you can recommend?"

Lion Has Lucky Bone

Like the children's wishbone, the lion has a "lucky bone," which natives in Africa always present to the hunter or other distinguished visitor who

Ormerod is to get an inkling of the power an unscrupulous man can wield by the employment of superstition to influence an ignorant people and attain leadership.

Many a man loses out in trying to take a short cut to success.

Chance of Quick Raise in Sport

The world of sport probably offers the biggest increases in salary in the shortest length of time of all lines of endeavor.

Back in 1916 Gene Tunney received $90 for his first fight. He received that sum for knocking "Kayo" Jaffe better than a phonograph record in three rounds.

Ten years later, in 1926, this very same Gene Tunney received $200,000 for relieving Jack Dempsey of the world's heavyweight championship at the end of ten rounds of fighting at Philadelphia.

In his Jaffe scrap, Tunney was paid at the rate of $6.67 per minute for less than nine minutes of actual scrapping, whereas ten years later he received the royal sum of $1,000 per minute for his 30-minute argument with Jack Dempsey. When Tunney defends his title, his salary will increase accordingly.

CLEAN FOOTBALL TAUGHT BY WILCE

At All Times He Is Sportsman First and Coach Second

Doctor Wilce, head coach of the Ohio State University football team, has always taught his teams to play clean football. He has been, at all times, a sportsman first and a coach second. He has tried to instill these principles into the players. At times one of them may violate the code, but if the doctor learns about it the player is for trouble. Last year one of the linemen, a fellow that has given him trouble, assigned Henry Friedman. Unfortunately for the lineman, Doctor Wilce happened to see him step on the doctor in action at his side.

Attending a dinner last winter the doctor was called on for a speech. The toastmaster indicated to the guests that Wilce would probably tell them how Ohio State happened to lose a certain game.

As the doctor arose the guests settled back to hear an oily alibi, such as

Coach Wilce.

football coaches often give. The doctor gave them a shock when he explained:

"The reason was simple. The team was better coached than ours, and they played better football."

That is the doctor all over. He is that kind of a man.

He has much for Ohio State and a great deal for football. Also he has written the best book on football that has yet been printed.

We hope, writes H. G. Salsinger in Detroit News, that one of these days the doctor receives some of the credit long due him.

Sheepskin Collects Big Toll From the Pigskin

Benny Friedman of Michigan and his running mate Flora, Capt. Chuck Kassel of Illinois, "Moon" Baker of Northwestern, Hess and Capt Marty Karow of Ohio State, are out of college football.

There are many who at the same time doffed their varsity numerals for the last time but Friedman and Kassel are the ones the others have written their names in a bold hand across football's pages.

The passing of Flora and the canny Friedman takes the heart out of Michigan's great aerial combination of the past few seasons, leaving Oosterbaan as the remaining one side of the triangle.

Hess takes All-American football out of Ohio's line. Quarterback Clark leaves the inscribed with Karow, and all told the Buckeyes lose more than a dozen of the regulars who have made a brilliant record this fall.

Michigan loses eight varsity men. Northwestern will suffer chiefly in the line. Chicago loses Captain Marks and two other backs, while Captain Harmes is one of the nine building with Illinois. Iowa's loss is Captain Smith and five or six others and Purdue loses Captain Hogan and almost a dozen more. Minnesota will miss, among others, Pepina and Captain Wheeler.

Great Polo Season

The 1927 program of the Pacific Coast Polo association, recently announced, indicates another brilliant polo season is in prospect in California. The modern knights of the mallet will assist in the opening tournament at the Midwick Country club on January 28 and competition for the Pacific coast high goal handicap championship will continue till February 13. A total of 68 days of polo will be played, divided into four 17-day series.

METALLIC TOUCH IN BLOUSES; GAY FELTS FOR SCHOOL WEAR

EVERYTHING in fashion's realm seems to glitter and scintillate with metallic splendor these days, and the blouse is no exception to the rule. Seldom does the blouse, even if it be for daytime wear, forego at least a touch of metal embroidery, if it be not made entirely of cloth of gold or silver.

A metal cloth blouse worn with a velvet skirt is a favorite theme with the stylist. For evening wear the sleeveless type is tres chic. It is an easy matter to make one at home—just two underarm and shoulder seams to sew up, lined all edges with a bias metal piping or cording. Cut two skirts

For Afternoon Occasions.

at the low waistline in front and back, with a facing. Through these, draw a folded strip of metal cloth for a belt, finishing with a rhinestone clasp or buckle. Wear a colorful shoulder flower, carry an ostrich fan and presto! one is arrayed befitting any queen of fashion.

Competing for honors with the blouse of cloth of gold or of silver, is the silkaeen embroidered crepe or satin blouse. The white satin blouse is stounding when patterned all over with silver flower stitching. Sometimes wee pearls, paillettes or rhinestones are interworked in the design. Which all goes to show that elaborateness is the keynote for the blouse for formal dress.

For afternoon occasions the two-piece frock in the picture is very charming. Its medium is silver-cored crepe de chine, with an all-over gold embroidery. The skirt is of the identical material, minus any metal.

Even the jersey jumper frock does not escape the influence of the metallic vogue this season. A recently noted red jersey two-piece dress showed bands of braided gold and metal wool at the throat, wrists and hem.

Another stunning sport model exhibited at a style time jumper party teemed all over in gold metal thread squares, worked in solid stitch, with a side plaited skirt of the plain blue jersey.

Wherever youth holds forth, at school, on the campus, the links or midst the tumultuous throng of gridiron fans, bright hued felts are sure to lend color to the scene. True, for a time the fate of the felt hat hung in the balance, but this fleeting hesitation on the part of the mode has given way to a revived enthusiasm for felts even grentor, if that be possible, than in the past. There can be no doubt in anyone's mind of the favor accorded the felt hat. For the schoolgirl the felt hat is an absolute essential to youthful and stylish appearance.

In choosing from among the latest felt arrivals young girls are confronted by two outstanding propositions distinctly different yet equally charming.

Hats for the Schoolgirl.

winner among the younger generation. Needs scarcely any trimming, a bow pom, a cravat of grosgrain ribbon—may color! Such gay and glorious shades!

These two types, however, are by no means usurping the field. There is the exquisite velours model, for instance, as shown below to the left of center whose crown is so modishly creased. Note the hat whose striped ribbons so loyally flaunt the college colors. This, by the way, is youth's pride, to trim its felts with its own college colors.

There isn't a hint of a crease or a curve in the style curtailment displayed when it comes to the felts which spell the word youth. Note the one with whipped cream or plain vanilla ice cream and garnish with a fresh berry or cherry.

Nellie Maxwell

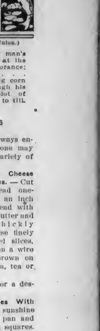
THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

There is a time in every man's education when he arrives at the conviction that envy is ignorance; that imitation is suicide that he is bound, if nourishing corn can come to him but through his toil bestowed on that plot of ground which is given him to till. —Emerson.

SOME SANDWICHES

The hot sandwiches are always enjoyed on a cold night and one may serve a variety of these.



Toastrd Cheese Sandwiches.—Cut white bread one-fourth of an inch thick, spread with mustard butter and sprinkle thickly with cheese finely grated. Cover with buttered slices, press together and toast over a wire toaster. Toast n delicate brown on both sides. Serve with cocoa, tea or, coffee.

Here is one that will do for a dessert:

Sunshine Cake Sandwiches With Marshmallow Sauce.—Bake a sunshine cake in an eight by twelve pan and when cold cut into three-inch squares. Split and spread half the squares with the following: Drain free from sirup one can of peeled apricots, press through a sieve (there should be a cupful of pulp), add one cupful of sugar, the juice of half a lemon, or one half an orange, and the white of one egg; beat all together until the mixture will stand. Roll one cupful of sugar and one-half cupful of water five minutes—in the pan stir after it begins to boil. Remove from the fire and add one-half pound of marshmallows cut into quarters and stir until melted. Serve at once with the sauce.

Turkey Sandwiches.—Melt four tablespoonfuls of butter in a saucepan. Add four tablespoonfuls of flour; stir until well blended, add a cupful each of hot milk and cream. Season with salt and pepper, celery salt, add one-half cupful of mushrooms, one-half cupful of chopped celery, and two cupfuls of minced turkey. Serve on toasted slices of bread. Cover with a thin layer of creamed turkey, season and garnish with two sticks of celery for each portion.

Marshmallow Tea Sandwiches.—Brush the sugar from the marshmallows and place them on vanilla wafers, set into a hot oven until puffy and soft, remove at once and place another wafer on top of the marshmallow, press lightly and serve at once.

Anchovy and Cottage Cheese Sandwiches.—To one cupful of cottage cheese add two teaspoonfuls of anchovy essence, one-half teaspoonful of paprika and a tablespoonful each of finely chopped olives and parsley; season to taste with salt and moisten with mayonnaise. Spread between slices of rye bread spread with the dressing. Garnish with one olive and serve with coffee.

Tasty Things to Eat.

Salads are always a welcome dish for the majority of menus.

Kidney Bean Salad.—Take one can of beans, two cupfuls each of celery and apple diced, one cupful of pickles cut into bits, two tablespoonfuls of chopped pimento with mayonnaise to moisten.

Ambrosia.—Take one cupful of diced orange, grapefruit, pineapple and raisins, cover with shredded cocoanut and dressing to moisten.

Prunes stuffed with pineapples and peanut butter, arranged on head lettuce and served with French dressing make a delightful combination.

Veal Salad.—Take two cupfuls of finely diced and seasoned cooked veal, add one cupful of finely diced celery, one or two sweet pickles finely minced, and a cupful of skinned and seeded white grapes. Mix with any good dressing and serve on lettuce.

Salad Dressing.—Take one teaspoonful of salt, one-half teaspoonful of mustard, three-fourths teaspoonful of sugar, one teaspoonful of flour, two and one-half teaspoonfuls of butter, the yolks of four eggs, two whole eggs, three-fourths of a cupful of milk and one-fourth cupful o lemon juice or vinegar. Melt the butter, and the dry ingredients well mixed together; when bubbling hot add the milk, and when well cooled add the lemon juice which has been beaten with the eggs. Cook over hot water until thick and smooth, stirring constantly. Add cream when serving the dressing.

Carrot Pudding.—One cupful of grated carrot, one cupful of grated potato, one cup, one cupful of sugar, one-half cupful of shortening, one-half cupful of raisins, two teaspoonful of soda and one cupful of flour, good measure. Steam one hour. Serve with an egg sauce.

Egg Sauce.—Heat two eggs until light, add one-half cupful of sugar and continue beating until the sugar is dissolved, add one-half cupful each of cream and milk, a pinch of salt, flavor to taste.

Peach a'la'mour.—Fill tall glasses with peach ice cream, add sufficient raspberry juice to color and run down around the cream, top with whipped cream or plain vanilla ice cream and garnish with a fresh berry or cherry.

Nellie Maxwell

Short-Lived "State"

The State of Franklin was formed at a conference at Jonesboro, Tenn., August 23, 1784. John Sevier was the first governor. Congress ignored requests to be recognized as a state and at the expiration of Sevier's term in 1788 the *State of Franklin* ended.

Mercifully Hidden

It's a good thing that the child doesn't know that he is father to the man; he might get discouraged and quit.—Boston Transcript.

Bracelets Are Wider

Many of the new bracelets are at least two and a half or three inches wide. A striking bit of jewelry is a bracelet composed of large open squares of gold held together with three semi-precious stones—a red stone between two green ones.

It's Slenderizing, Too

The diagonal line is receiving much attention from fashion designers and is featured particularly on skirts, often outlined with plaited ruffles.

Schoolgirl Millinery

Very small close-fitting hereis of felt or heavy flannel are worn by school girls with their plain little sport frocks and tailored suits. They are much smarter than the averages tam and very youthful and becoming.

Smart Wraps

Black broadcloth coats trimmed with light furs such as summer ermine, natural lynx and light-colored foxes are the very smartest wraps you can effect.

NAMES AND DOINGS INSCRIBED ON ROCK

Proud Conquistadores Left Record of Deeds.

Abruptly ending a low mountain range and jutting up into a windswept valley like a bold promontory in a gray green sea El Morro rock guards a vast, aloof region in western New Mexico. Although it is the most precious cliff historically in the United States and as a national monument is valued by the government, few people who make overland trips ever turn aside from the main highway in order to view its grandeur or to ponder upon its significance. The rock's perpendicular walls, like huge escarpments, tower 215 feet sheer from the valley's floor and extend wedgelike for hundreds of feet back until they merge into the mountain chain. Their smooth, hard surface, pinkish-yellow to color, is ideal for inscriptions. Charles F. Lummis calls the rock the "more autographic album." Upon it, more than 300 years ago, the invading Spanish conquistadores carved their names and the dates of their visits. They called it El Morro, which means the castle, but the name by which it is known now is Inscription rock. With their sword points the Spaniards carved their names, not in fun, but as a record of their advent.

Inscription rock is situated 35 miles east of the Indian pueblo of Zuni, about 50 miles southwest of Gallup, N. M., which is on the transcontinental highway, and is near the Mormon settlement of Ramah. The trail to it leads over the vast lava flow which lies like a huge snake through that region, making difficult driving for automobiles. The rock is on the historic trail which extended from Zuni to the pueblos of the Rio Grande, and the route which the conquistadores followed in their quest for the seven cities of Cibola, the fabled story of which led to the discovery of New Mexico by the Spaniards in 1580. A few hundred feet back of the wedge-shaped front of the rock a prehistoric trail, with its separate footholds worn deep in the stone, leads to the top, where the remains of two pueblos may be seen.

The autographs, inscribed in quaint Spanish difficult to decipher, are found near the base of the rock. They cover many decades in time, from the invasion of Coronado's men, the leader himself passing to the south of its location, down to the advent on September 17, 1849, of J. H. Simpson and R. H. Kern, an artist who were the first white men to penetrate to visit the rock. One of the most important of the names is that of Juan de Onate, the founder of New Mexico. On a return trip from San Gabriel, N. M., to the Gulf of California he stopped at the rock and wrote these words in Spanish: "Passed by here to Commander Don Juan de Onate from the discovery of the sea of the south on the 16th of April, 1605." This was two years before the English settled on the east coast. Onate's army consisted of two missionaries and thirty soldiers.

Just Like a Man

Frank L. Dame, president of the North American company, described what he considered the first case on record of a customer's paying a gas bill and immediately asking for a second one. The case was reported by the management of a North American subsidiary, says a news story in the New York Times.

"The bill I have just paid is rather large, and I would like a smaller one to-day," he said to my wife," explained the customer. "The reason the bill I paid is so large is because I told my wife to go away last week I cooked a breakfast for myself. Then I went away for a business trip that lasted four days and when I returned I found the gas still burning. Now I must have a small bill to show her."

Famous Cattle Herd

Only one herd now exists of the wild white cattle which roamed over Britain in Caesar's days. There are only sixty of these beautiful beasts left, and their once vast range is the park of an ex-king's estate. They have been made familiar to most of us through Landseer's paintings, but the zoologists they are known as Bos primigenius, the most important of the three otherwise extinct breeds from which our domesticated cattle have gradually developed."

The "range" is now in Chillingham park, "away up in the north of England," as we learn.—Literary Digest.

Advancement in Peru

The new institute of public works has been authorized to build in Lima, Peru, quarters for laborers and to expropriate the necessary land. The project involves the erection of 1,000 houses, to be turned over, upon completion, to the poorer class of laborers with families. The houses are to be provided with the latest sanitary and plumbing arrangements. The project also includes the building of schools, a church, plazas and playgrounds for the children.

Just Fit

The teacher had explained that an anonymous person was one who did not wish to be known. A little later in the lesson some one in the class laughed out loud and lessons were halted.

"Who laughed?" demanded the teacher.

"An anonymous person," promptly replied King Baggot, Jr.

"DESERT RAT" IS VICTOR IN FIGHT

Twenty-Year Battle of Poor Inventor Ends With Supreme Court Award.

Washington.—George Campbell Carson, "desert rat" miner, has won his long fight against a big, powerful corporation and is to receive the millions which his inventive genius has brought him.

The United States Supreme court has denied the American Smelting and Refining company a review in its action to have Carson's patent infringement claim set aside. Twenty years ago he invented a process for the reduction of copper ore.

Adopted by the big smelters, the process brought about a ten-year series of legal warfare which made Carson famous and now is to reward him with riches.

Court after court has heard the case. Time and again is favorable decision has put sums ranging from $2,000,000 to $20,000,000 within the reach of the sixty-year-old Western miner as royalties, but always a further legal conduct postponed realization of his dreams. Now, however, the clamed struggle in all probability is over with Carson assured of the fortune he has pursued with such persistence. The days of living in a sailor's lodging house on the San Francisco waterfront have drifted into the past and the one-time "desert rat" stands on the threshold of a new life. Without money or friends he waged for years a single-handed battle against corporation officials and lawyers until in the end he obtained the assistance of Rudolph Spreckels and Robert Sawyer Smith, the San Francisco capitalists, whose aid and confidence in the justness of his claims have gone far toward his victory.

And now that Carson has won, what will he do with the millions? That is a question which he has been asked before and he has answered it characteristically. For the "desert rat" millionaire through ten years of ceaseless litigation has proved himself a philosopher. Last year when the United States Circuit Court of Appeals awarded him the royalties a swarm of spectators descended upon him in his waterfront lodging.

To Work in a Laboratory.

"What am I going to do with the fortune?" he is quoted as saying. "I've been simply swamped by piles of letters from people who want to sell me everything imaginable. I suppose it happens to everybody when they come into money. What I have really always wanted is a workshop and a laboratory, and now I don't see what is to prevent me from having them. Who can say what I'll be able to do with plenty of resources for research? It is possible that out of my laboratory there will come something that will result in a benefit to humanity."

Dozens of women have proposed to the new millionaire, who, with a perfect smile, dropped their correspondence in the waste basket. "Even if I'm rich now I don't believe any woman is going to get me," he informed an interviewer. "If I ever decided to get married, though, I'd look for the domestic, settled type of woman. A man, to my way of thinking, ought to marry a woman about his own age. A young woman admires the clever and interesting for an old husband. What do I think of the flapper? There never was a jazz-mad flapper who didn't have her wings burned in the long run."

Perhaps his time spent in the lonely desert has made Carson yearn for the sight of greenery. At all events he has said that he would like to attempt something along the lines of tree culture.

"I want to see the barren areas of California put into trees and farms," is the way he phrases it. "So, very possibly, I shall settle at that a while."

Chemistry, however, still is, as it always has been, a hobby with him, and for some time he has been engaged on experiments for the manufacture of sulphuric acid—the original invention which brought him into face overnight by a court award of a fortune in royalties, practically revolutionized copper smelting. He has run away from his boyhood home in Kenton, Ohio, at fourteen. Two years later he was in Arizona working in a copper mine. The furnaces at that period were loaded from the top. As he watched the sweating, barefaced laborers charging them under heavy difficulties, the desire was born in Carson to alleviate their lot and eliminate the waste of energy necessary in the antiquated process.

The Inventor's Dream.

He would construct a smelting furnace which could be charged from the side. The dream remained with him for years while he wandered here and there in the deserts and the mining settlements, but it was not until 1900 that he was able to perfect his ideas. While working as a chemist and metallurgist in Denver he invented his famous "reverberatory furnace" for smelting copper. The next move was to get it patented, but for nine years this protection was not forthcoming. In the meantime, filled with the certainty that he had invented something that would revolutionize the process of copper reduction, he went from smelter to smelter, interviewing officials and mining engineers and pleading before them his sketches and plans.

Carson was frank about the investigation, for which no patent had yet been granted, although his application was in Washington. He told its inquisitors secrets and explained its workings. And still he was turned away from the smelters, unable to interest anyone in purchasing his rights. He was beginning to learn the lesson of patience that was to stand him in such good stead during the later and even more bitter years.

His Patent Granted.

In 1915 his patent was finally granted and a short time afterward Carson found himself in New York attending a meeting of the American Society of Mining Engineers. There his fortunes took an upward turn. Some one was reading a paper on a new process for the reduction of copper ore. Carson stirred in his seat on the instant, all his interest aroused. The process described as already in operation in the big smelters was the invention which he had perfected and unsuccessfully tried to sell for years. The dawn of the great legal fight was on.

The moneyless, friendless inventor went out and found that everywhere his furnace was being used. The companies refused to recognize his claim for patent infringements. A court in Tacoma ruled against him when he brought suit for royalties. Carson only smiled quietly and prepared for the next battle.

In the meantime, as he tells it, he had gone to the offices of one company and had been permitted to see an official, who shook his head when Carson explained the motive for his call.

"Your patent is absolutely worthless," he says he was told. The official, however, offered him $1,000 for it, says Carson, who turned down the offer with promptness, as well as subsequent bids of $2,000 and later $3,000.

"No," said Carson. "It would be blackmail for me to accept your money if my patent is without value. We might settle the worth of it in the courts. I intend to prove to you and the world that my process is all that I have dreamed it to be."

There, in a word, is the inside story of Carson's long fight. He was struggling for the ideal, the dream of an inventor, and he meant that nothing should check him. He picked up a bankbile living in San Francisco as a mining and metallurgical engineer while still he carried his battle through the courts. In San Francisco he met Spreckels and Smith. When they heard his story, they announced that they would stand back of his with the financial aid that was so necessary to a protracted legal conduct. John H. Miller, his attorney, will receive a third of Carson's fortune in royalties and Spreckels and Smith will now be repaid for their confidence in the quiet inventor who never lost faith or courage.

Failed to Shake Him.

The universe decided in Carson was the first blow at Carson's hopes, but it failed to shake him. There came the day when the United States Circuit Court of Appeals awarded him $2,000,000 in royalties on his patent, with possibly $15,000,000 more to follow. The "desert rat" and his story appeared on the front pages of the newspapers. Callers flocked to his lodging and such a welter of mail descended on him that he was unable to read it. All the luxuries of the world were laid before him. Then abruptly they were thrust over the horizon once more for the company petitioned for a retrial of the case. Carson stayed on in the sailors' lodging house.

When the news came to Carson that the petition for a retrial had been denied by the circuit court he was lying on his back in a hospital. It was the best medicine for him, and to the innumerable questions that came soon showered on him he returned cheery answers. Was he thinking of putting the money into charitable works?

"It would only create an army of grafters," he answered succinctly.

"Then what are you going to do?"

"I've never been very good at making plans," he returned. "I believe in letting tomorrow take care of itself. I guess it will from now on."

Before his process was put in operation in the smelters it was possible to treat only 200 tons of copper ore in a top-loading furnace. By the Carson process in a side-charging furnace, 700 tons of ore can be treated.

It is typical of the man that he has taken his defeats and victories with equanimity. "I'm not surprised," has been his invariable answer each time he has been defeated in the fight. And he has crystallized his entire philosophy in that sentence with which he met congratulations:

"Most of all I want to prove to myself and to the world that my dreams were real."

Knew Son's Weakness

An example of humor, conscious or unconscious, is afforded by the will of an old Scotsman whose son was a doctor. "I bequeath," he wrote, "my two worst watches to my son, for I know that he will dissect them."

Cup of Trembling, Cup of Bliss

By REV. GEO. E. GUILLE
Extension Department, Moody Bible Institute, Chicago.

TEXT—The cup which my Father hath given me, shall I not drink it?—John 18:11.

"The cup" is a symbol. In modern English one would say, "my portion" or "my fate." The cup which the Savior drank was apportioned to Him from the foundation of the world, for central in councils of God and the central fact of history is the cross. To it all forces agos pointed, and from it all subsequent ones take their shape. At the cross and by it was the age-long controversy, begun in the Garden of Eden, to be forever settled.

Rev. G. E. Guille.

What It Means.

That cup was the divine wrath against sin and God's judgment upon it. Sin, the most obvious, the most universal, the most awful fact of human experience, must be put away. It never could (God's creation by the beginning and brought darkness where light had been. It ruined the creatures of His love, made in the likeness of His image. It polluted the whole stream, of human history and corrupted all the powers of man's three-fold being—spirit and soul and body. It is the terrible curse of God's heartache, every groan and every falling tear. It separated man from God and he remains alienated from Him. an enemy in his mind by wicked works, lost, ruined and undone. Story, in all its hideous manifestations, it was a revolt against Him and an assault upon His very throne, its penalty, demanded by His righteousness, must be met. God alone could find a remedy for the ruin. God alone could declare a method of saving the human sin. He said: "I have found a ransom." It was in that cup which the Savior drained to its terrible dregs.

The Father Gave It.

Gave It to His Beloved! Held it to those lips from which no guile had been poured! He is a Savior-God and herein is shown how His heart was involved in the salvation of men. Let the tenderest, most loving, most faithfully heart in all the world be taken, the cost to him! Subject of all His counsels, object of His supreme delight, Darling of His heart, in whom He is so well pleased—to Him He gave that cup. Here are other expressions of it: "For God so loved the world, that He gave His only-begotten Son, that whosoever believeth on Him should not perish, but have everlasting life." "He that spared not His own Son, but delivered Him up for us all." "It pleased the Father to bruise Him."

Never until the eternal morning, with its perfect light, can we fathom the depths. Never till then can we know what it meant to our Father-lover as a Son—a beloved Son—to see that He might on righteous grounds treat us sinners like sons. "The cup which my Father hath given?"

The Son Willingly Received It.

"Shall I not drink it?" Who would not draw back from such a bitter cup? Who would not shrink from such a death of shame, not from its merely physical anguish but from taking the place of sinners! But no shrinking in that devoted heart! When in agony and bloody sweat He cried: "If it be possible, let this cup pass," He was pleading for deliverance from the death that Satan was there in the garden attempting to inflict in order to destroy Him. But the cup of Satan would take His life beforehand to prevent Him being offered as an atoning sacrifice for men, and in settlement of the infinite debt of sin, to Satan's accusing lions and the accusing of God's righteous claims. His prayer was heard and He was strengthened by an angel to go on and cross toward which His face had been set like a flint. Yes, He will drink it! If the Father gave His Son, the Son gave Himself. "Who gave Himself for us to God which by the eternal Spirit offered Himself."

And when He had awful hour He drank the cup to its last bitter drop, He forever exhausted the divine penalty for the sin of His own. He met It can never be exacted again from any that believe on Him. Of the rejection of Christ it is written: "The same shall drink of the wine of the wrath of God which is poured out without mixture into the cup of His indignation!" But never for Him, believer in Jesus! He drank it to save thee from it!

"For the joy that was set before Him, He endured the cross," and one element of that joy was this: That He, by enduring it, that each bitterness would change it into a cup of bliss for you to drink, filled evermore with the wine of heaven, and therein He would find His own joy. "Rejoice with me, for I have found my sheep which was lost."

"He brought me into His banqueting house and His banner over me is love." Eat, O friends, yea, drink abundantly, my beloved."

Electric Cords

Don't let the electric cord rub unnecessarily. By rubbing in meant friction with the sharp tops or legs, the corner of woodwork and stoves—anything which will abrade the insulation fabric. Unnecessary rubbing in second only to unnecessary kinking as a cause of appliance cord trouble, and, like the latter, is in large measure preventable.

THE THEATRE

"Joanna"—Say, little girl!

Suppose you received a notice from a bank that there was a million dollars deposited to your credit in the vaults. Suppose that you found the money actually to be there, and at your disposal to spend as you pleased.

What would you do? Buy clothes? auto? home? give to charity? Or would you throw it away on extravagant diversions, supporting fair-weather friends who would desert you the moment you spent your last cent?

This fascinating question forms the central motif of "Joanna," a new Edwin Carewe-First National picture, featuring Dorothy Mackaill and Jack Mulhall, which comes next Wednesday-Thursday to the Palace theatre.

Joanna, a poor dressed model, is the recipient of the million. How she gets rid of it is the story of the picture.

In the supporting cast are George Fawcett, Paul Nicholson, Lillian Langdon, John T. Murray, Edwards Davis and Dolores del Rio. Rita Carewe, daughter of the producer, makes her film debut in this picture.

"Fascinating Youth" — Sixteen new faces. Plus just as many famous ones. Such is the unusual cast of "Fascinating Youth," a Paramount picture which comes to the Palace theatre on Saturday and Sunday.

The Paramount Junior Stars provide the new talent. These students of the Paramount Picture School were selected from 40,000 applicants before being allowed to take an eight month course at the school in Astoria, Long Island.

Their graduation—guaranteeing an "all-star" cast—as Ralph Lewis, James Bradbury, Sr., Joseph Burke and other well known actors and actresses. Part of Byron Morgan's story is laid inside a big motion picture studio and one sees just how movies are made.

Other scenes take place in Greenwich Village, the Bohemian center of New York City, and in a winter resort where ice-boating, skiing, tobogganing and other sports are in full swing. An ice-boat race serves as a thrilling climax. Great interest and provides some unique thrills for movie-goers. Director Sam Wood may well be congratulated on his work.

WANT COLUMN

WANTED—A teacher for High Island. A. C. Bedley, Commissioner of Schools, Charlevoix, Mich.

WANTED—First-class old school baker to go to Gaylord. Must be sober. Sister Construction Co., Pontiac, Mich. 36-3t

FOR SALE CHEAP—Ten acres of land in mile city limits. Charlevoix State Savings Bank. 39-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARNEY-MEECH CO.
Charlevoix, Mich.

FOR SALE—3800 foot frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA 440 Pearl St., Boyne City, Phone 334. 11-tf

...Pre-Inventory Sale...
Commencing Monday, Jan. 3, 1927
Special reductions and low prices will be made on practically all goods in stock such as Overcoats, Sheeplined Coats, Leather and Rain Coats, Fleeced Lined Underwear and 100 per cent Wool Underwear, Blazers, Shirts, Pants, Overalls, Boys' Clothing, etc.
Come and see what your dollar will buy.
G. W. LUSK. 306 Bridge St.

MUSICAL PROGRAM GIVEN LAST SUNDAY

The Christmas services at the Congregational church last Sunday were of uncommon interest. A fine musical program was rendered in the morning —Mr. Raymond Faulkner, pianist, assisted by organist, Mrs. Stelter, with the voluntary and offertory. An anthem was sung by Mrs. Ira A. Adams, Mrs. Jack Superneau, Mr. Richard Salmonstall, Mr. Gilbert Saltonstall; and Mrs. Superneau also sang as a solo "Glory to Heaven's Eternal King."

A short talk on "The Art of Living" by Bernard G. Mattson Jr., preceded the sermon by the pastor, whose subject was "The Crowning of the Year."

The vesper service at 4:15 opened with the processional hymn, "O Come All Ye Faithful" by Cathedral Candle Bearers and choir. Then Mrs. Ira A. Adams sang "Tis the Night of the Dear Savior's Birth", very effectively.

A pageant of the Nativity called "The Gift of Love" was presented after the pastor had spoken on the subject of Religious Pageantry.

The closing number was "The Promise of Peace" which was very beautifully given by Miss Helen Manon representing the Angel of Star.

The participants were as follows:—Organist, Mrs. Stelter; Pianist, Mrs. Swinton; Reader, Rev. B. G. Mattson; Light Operator, Mr.Ted Cooper; Isaiah, Mr. Archie Livingston; Mary, Mrs. Bertha Livingston; Joseph, Mr. Frazier Mattson; Shepherds; Messrs. Vincent Madison, Louis O'Neill, Clayton Saunders; Wisemen, Messrs. R. E. Fowler, R. B. Saltonstall, G. B. Saltonstall; Angel of the Star, Miss Helen Manon; Other Angels—Lois Fessenden, Claire Hardy, Gwen Miller, Hilda Ogden, Mary Parker, Olive Radie, Angie Scott, Eloise Tillotson.

Candle Bearers—Jessie Allen, Gwen Genett, Lucie Higman, Bonnie Higman, Marie Hardy, Anne Jardine, Georgia Kelderhouse, Cora Kelderhouse, Irene Mitchell, Myrtle O'Neill, Virginia Parker, Doris Solomon.

Choir—Meadames Adams, Kelderhouse, Mattson, Stelter, Taylor, Misses Dorothy Dean, Elizabeth Higman, Isabel Mitchell, Messrs. B. G. Mattson Jr., Dr. Frank Wilkinson.

Swiss Citizen's Sword His Passport at Polls

Glaris, Switzerland.—The family sword which he brings with him to the polls is proof a citizen of the cantons of Glaris, Oppenzell, Unterwald and Lalmenz is entitled to vote. Where the family sword has been lost, the voter appears with a bayonet. His vote is never challenged.

On election days inhabitants of these cantons meet in the open air and discuss the event. Bearing the swords their fathers, grandfathers or earlier ancestors used in defense of their country, the gathering resembles a mobilization for war much more than a political meeting.

A republic for more than a thousand years, Switzerland is a country of ancient traditions. The electors of these four cantons assembling to discuss a proposal to abolish the sale of wines and beer do so with all the warlike setting of their forefathers.

Helium Valuable

Washington.—Helium, which enables airships to go up safely, also helps divers to go down further safely. Mixed with their oxygen it prevents the "bends." The bureau of mines discovered this new utility of the rare gas.

CHURCHES

Congregational Church
Rev. B.G. Mattson, D.D., Minister

Special services for New Year's Sunday are announced as follows:

"At 10:30 o'clock morning worship with sermon on the theme, "How to Make the New Year, Also Doubly Blessed, Out of Our Lord, 1927." This service should call all members of the church all who have in any way affiliated with this church to signalize their sincere interest in keeping the Christian religion alive in the world by attending this New Year service.

At 4.15 there will be a musical vesper service at which the choir, assisted by other local singers and by a group of musicians from Petoskey, will render the Christmas cantata, "The Holy Night," by E. L. Ashford.

A hearty invitation is extended to the public generally to be present and enjoy this inspiring musical service.

The services of Christmas observance last Sunday and the Christmas program for the Sunday School Dec. 24th were largely attended and very enjoyable, Thursday afternoon being especially praised for its reverent and artistic impression.

The pastor expects to hold service at Ironton promptly at 2:30 p. m.

The C. E. meeting at 6 p. m. will be led by Miss Virginia Parker.

The Ladies Aid Society will meet on Wednesday afternoon With Mrs. Edward O'Neill.

Methodist Church.
C. E. Pollock, Pastor.

HAPPY NEW YEAR!

Watch Night services Friday evening beginning at 8:30 with a great Inspirational preaching service, followed at 9:30 with a fine musical and literary program, followed in turn at 10:30 by an hour of consecration and refreshments —at 11:30 Holy Communion under the lighted cross. At 12:00 morning Happy New Year will be in order. This is an annual event in Methodism and the public is cordially invited to "Watch the Old Year out and the New Year in." Something doing every minute, and the joy of the church around it all.

Sermons next Sunday—
"The Greatest Migrant"—10:30.
"Facing Forward"—7:00.

Moving pictures for about forty minutes will feature the Sunday evening service next Sunday evening at seven o'clock. Great educational films, "How the other fellow lives and what he sees" will be used. This will be an evening of unusual educational interest and inspiration. The public is cordially invited to enjoy this evening of worship and enlarged vision. A free will silver offering is expected to care for all the expenses.

Sunday School at twelve. The lesson next Sunday, "A follower of Jesus." Watch our school grow by helping it to grow.

The men will meet next Monday evening at seven for supper and program. These are great Monday evenings for men.

The home talent people are making great plans for January 11th. Keep the date in mind.

Baptist Church
Rev. Herman Burns, D. D.,
—) Pastor (—

With the festivities of the holiday season over, we can begin again to think of the more serious things of life.

Fathers have their individual responsibilities and happy the ones whose children will not rise up some day to curse them for their bad example and faulty teaching. Mothers with their devotion to their children should note that real love is the sweetest emotion that the human heart is capable. Neighbors owe more than respectful treatment. To be a good neighbor is to consider all fairly. Citizens owe need, and seek to supply that need. These are some of the things we would have you revert to in the remaining winter months.

"The Price of Life" will be the morning sermon. "Lessons for Living Learn from the Experience of Others" will be the evening theme, next Sunday.

At noon the Bible School will begin a series of studies in the Christian Life.

The Kirby family are delighting us with their musical programs. You are cordially invited to come and hear them —once each Sunday.

Church of God
Rev. Paul L. Jane, Pastor

Services held at the Chapel on West Harbor Avenue:
Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.

"God's Way" will be the subject for Sunday morning. May we expect a good service—it depends on one's interest and cooperation. Come let us make it a profitable day well spent for the New Year, Also Doubly Blessed Out of Our Lord, 1927." This service should call all members of the church all who have in any way affiliated with this church to signalize their sincere interest in keeping the Christian religion alive in the world by attending this New Year service.

Human Tooth Found In 50,000,000 Years Old

Billings, Mont.—Discovery of a human tooth deep in the coal beds of the Bear Creek field south of here has led a group of local hunters to believe that a primitive race roamed this territory before the time of the Number that and the pithecanthropus or Java man of the Pleistocene period.

The tooth was found by Dr. J. C. Siegfredt, head of a party that has been collecting fossils for the University of Iowa and other institutions. It was identified by dentists here as the second lower molar. The specimen also turned to carbon and the line of the roots is free.

Fossils previously taken from the Bear Creek field have been estimated by scientists as Miocenezyk. The coal bed being mined is believed to be the same as that in which the teeth was imbedded, was secured by Dr. Siegfredt, who announced that he would conduct a minute examination of the field in the hope of discovering further proof that man inhabited this continent at a time when it is commonly supposed only animal life existed.

3 Years' Good-By Kisses Cost Boarder $3,000

Milwaukee, Wis.—Clandestine love affairs cluttered up Otto Trnerfeg for 13-four years old, of 1482 Fruitey street, and Casimira Nieuczky are worth $3,000 to Joseph Nieuczky, Casimira's husband, according to a jury verdict in Judge August E. Bruncr Circuit court.

The jury, voted that sum to Joseph after he had told a story of numerous kissing episodes between Otto and Casimira and of Otto's "good-by" kiss when he left for work each morning. Joseph started suit for $10,000 for alienation of his wife's affections.

Three years ago Otto was taken into the Nieuczky home as a boarder. Joseph testified. Shortly after, trouble started in the home and Otto was reprimanded by Joseph for alleged attentions to Mrs. Nieuczyk. The couple had been living peacefully during their 35 years of married life, Joseph testified, until Otto came into the house.

Otto denied Nieuczyk's story, saying that they were making but arguments in the home. Joseph is a cigar salesman and is fifty-eight. His wife is sixty.

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Jan. 1-2

"Fascinating Youth." A Paramount picture with The Junior Stars of 1926. You have them here—budding artists—each one on the threshold of fame —in a zippy, up-to-the-minute comedy—romance. Bewitching maidens in gorgeous costumes, skiing, tobogganing and a nerve-tingling ice-boat race. Want to get into the movies? Want to see how those girls and boys who did get in through the Paramount School can look and act? Want to see some new faces? Then don't miss this one! Also a Fox comedy, "Mad Racer."

Wednesday-Thursday, Jan. 5-6.

"Joanna." She"s got a million in looks and a million in cash; and she wants to spend it; and get the biggest kick out of it—and she does! And her big kick is your big thrill because Joanna sure can step, and when she does—don't miss it. With Dorothy Mackaill and Jack Mulhall. Also Fox News and "Felix The Cat."

—) PERSONALS (—

Home talent entertainment at M. E. church, Jan. 11. 34-3t

William T. Driggett spent the early part of this week at St. James.

Born to Mr. and Mrs. Jack Jardine, a son, Donald Douglas—Christmas day.

Albert Staley and brother Ernest were business visitors in this city last Monday.

Loren Hart, of Cedar Rapids, Ia., is spending the week with his mother, Mrs. Cassie Hart.

The Congregational Ladies Aid Society meets next Wednesday afternoon with Mrs. Edward O'Neill.

Motion pictures that have a message Sunday evening, Jan. 2, at the M. E. Church commencing at 7 o'clock.

Richard Saltonstall, who spent the Christmas period at the family home, returned to Olivet today and resumed his student work.

Dr. Charles McCann and wife, of Grayling, spent Christmas and the week end with Captain and Mrs. John McCann, 102 E. Huribut avenue.

John Nordrum went to Davenport, Iowa, early this week with the intention of entering the Davenport School of Chiropractics as a student.

Miss Phil Armstrong, who has been with her parents through the holiday season returns to Ann Arbor next Monday to continue her studies at the U. of M.

Miss Elizabeth Harris, of Oak Park, Ill., is spending a few days with Charlevoix friends. She arrived Monday and will remain until after New Years days.

Alex Bolton, for some weeks past in charge of the construction work at the Kenyon residence, corner of Michigan and Dixon avenues, returned to his home in Bellaire last Friday.

Dr. and Mrs. B. G. Mattson were most agreeably surprised last Thursday night, when their son, Bernard Jr., arrived from Evanston, Ill., to spend Christmas at the family home.

Mr. T. J. Brady, for several days past seriously ill at his residence, 509 Sheridan-st., is reported as being some better today with everything favorable for his complete recovery.

Irving Leventon, of Oak Park, Ill., arrived Saturday morning to spend Christmas with his family here. He returned to Oak Park Monday, accompanied by Mrs. Leventon, who will remain for a week.

Mrs. Arthur June and son Lloyd, mother and brother respectively of Rev. Paul L. June, returned to their home in Oak Park Monday, accompanied by Mrs. Leventon, who will remain for a week.

Mrs. Carrie Farrar, of Cadillac, is spending holiday week with her aunt, Mrs. R. N. Faulkner.

Miss Helen Armstrong returns to Chicago Saturday after spending a few days with her parents in the city.

Mrs. R. D. Agess returned to her home, Traverse City, last Monday after spending Christmas with her sister, Mrs. John Robinson.

Mr. R. F. Sloan Sr., and son Paul, motored up from Muskegon and spent Christmas day in Charlevoix, returning to Muskegon early this week.

Mr. and Mrs. John Bacot, of Grand Rapids, are spending the holiday season with their mother, Mrs. Catherine Bacot, other relatives and friends.

Mr. and Mrs. Harold Jacobs came up from Flint last week to spend part of the holiday season with their parents, Mr. and Mrs. H. B. Jacobs, 208 Clinton street.

Gilbert Saltonstall and Vincent S. Madison are spending a few days this week on a hunting excursion at some point south of Charlevoix, principally along the Intermediate valley region.

Dr. R. B. Armstrong drove to Petoskey to meet his daughter, Miss Helen, Pere Cheney, who came up on the Ann Arbor railroad train Friday morning to spend the holiday season in Charlevoix.

George W. Lusk announces a ten days special pre-inventory sale commencing with January 3rd. Low prices on woolen and heavy goods as well as all other lines will be made in order to reduce stock.

Captain John McCann made a trip to St. James Sunday with the tug Venus, taking over mail for Beaver Island residents, a few passengers and a miscellaneous freight cargo, returning to Charlevoix Monday.

Miss Lena Walker, daughter of Mr. and Mrs. John Walker, residing near Barnard, was taken to the hospital last Monday night suffering with an attack of acute appendicitis, where she was operated on with satisfactory results, as she is rapidly recovering at this time.

Mr. and Mrs. Harry W. Widdifield made the trip to Petoskey, by motor, last Friday morning, when they met their sons Albert and Kenneth who arrived on the early morning train from Petoskey to spend the Christmas holidays with their parents.

Recent communications from Dr. W. W. Mitchell gives information to his friends that he has opened a suite of offices, in which to practice his profession, and that his family are nicely located in appartments at Miami Beach, where all are enjoying the beauties of that southern climate.

County Clerk elect, George A. Rodebrick, of Boyne City, was a Charlevoix visitor Tuesday, spending part of the day here making arrangements preparatory to locating here and assuming the duties incident to his official position on and after the beginning of the New Year.

For some days prior to Christmas, in fact all of last week, passenger trains on this division of the Pere Marquette railroad system have been unable to maintain their regular schedule due to the heavy passenger traffic and the enormous amount of mail and express carried incident to the holiday season. With the holiday feature eliminated the trains are again running on regular time.

Notice to Automobile Owners!

George A. Rodebrick, County Clerk, will receive at his office in the County Court House, applications for automobile licenses for the year 1927, for forwarding to the branch Secretary of State office, 104 S. Park-st., Boyne City, from which place the licenses and plates will be issued.

No licenses will be issued before Jan. 1st. The use of 1926 license plates will be allowed until Jan. 15th. Payment in cash, money order, or certified check will be received in payment of the fee. No personal uncertified checks allowed.

CHAS. T. McCUTCHEON,
Chamber of Commerce Office,
104 S. Park-st., Boyne City, Mich.

"Sissy" Names Make No Hit With Modern Boy

"Curious thing about names," remarked the professor as he rose to give a lecture. "The names that today we regard as 'sissy' are really the names of heroes of other days. How, then, why should our combination of letters convey a different impression from others?

"Most boys repent being called Albert, though Bert or Al will always pass muster with the gang. Edward is strictly taboo in the big younger set. Even the small children seem to sense this state of affairs, as I find every day more among the medium of a four-year-old friend of mine, who hates to be called Willie.

"One day the next door neighbor, holding a piece of candy in her hand called 'Willie, Willie, Willie,' over and over again but although the little fellow was close by, he did not answer. Finally I said:

"'Why don't you answer Mrs. Hutchings? She has some candy for you.'

"'I know it,' blubbered Willie, with tears in his eyes, 'but my name's Billy, an' I won't come when anyone calls me Willie, even if they has a whole bag of candy.'"—Los Angeles Times.

Swimmer Had Choice of Death or Agony

To be attacked by a shark is, to my mind, one of the most terrifying ordeals imaginable, says a writer in a South African paper. And of all the shark stories I have heard, this grim adventure on the coast of North Queensland is among the most dramatic.

A newcomer swam out from the beach during lost weather to an iron buoy about a hundred yards from the shore. He found that the buoy was too low to hold, and turned back to the shore—turned and saw a shark eating shark a few yards away. On to the burning buoy he scrambled, dancing to agony as a hot rope on the hot surface. The shark swam round, eyeing him.

After a minute on the buoy, he jumped into the water to cool himself. In a moment the shark was darting towards him. He returned to the buoy.

This ghastly business was repeated a dozen times until some one on the beach came out with a boat and rescued the swimmer.

The Buttered Side

Doris uneasily had eaten two slices of bread, the first with butter on it, when her instructions had been given to "put lots of butter on, so's it'll taste good." She had been even more explicit about the second slice.

"I want some bread and butter; put some jelly on, too, and put the butter on top."

When Doris' little face appeared at the dining room door, her mother saw that her dessert was brief and to the point. "I want the butter on top this time."

Might Want It

The Jones family were on holiday, and it had rained every day for a week. They were all very gloomy as they sat in the front room of the boarding house.

Little Jimmy was looking through the window at the downpour when he exclaimed, suddenly, "Pa, look! There's a man carrying a lot of fish. What's he going to do?"

Mr. Jones looked up from his paper. "I suppose he's going to build an ark!" he said.

Finding a Mare's Nest

A "mare's nest" is something which seems wonderful upon discovery, but which upon examination turns out to be unimportant or a hoax. As one writer puts it, "to find a mare's nest is to make what you suppose a great discovery, but which turns out to be all nonsense." "Mare's nest" is also applied to what is preposterously absurd although believed by the credulous. The true origin of the phrase "mare's nest" is unknown.—Pathfinder Magazine.

FRESH FLORIDA ORANGES
Fresh Sweet Florida Oranges $3 per box of three hundred large size. Sound fruit and satisfaction guaranteed, or money back. We pay express charges. A few of these makes an appreciated Christmas gift.
Remit with Order.
Acme Farms,
GAINSVILLE, - FLORIDA

Sugar Imitation of Glass

Edible glass has entered into the market, but for no unusual purpose. The glass is made of pure sugar candy and was developed for use as window panes when a scientific called for the hurling of a character through a glass plate. It appears the sugar glass but does not have the same cutting and scratching effects.

Earth's Thickness

Every day the sun sends to the earth enough heat to melt a cake of ice 5,000 feet thick and as large as the state of Massachusetts.

Definition of a Citizen

The truest definition of a complete citizen that can be given is precisely this: that he shares in the judicial and executive part of the government.—Aristotle.

Ancient "Lucifers"

In the old Seventeenth century house at Wivenhoe, near Colchester, England, undergoing restoration, some old matches, four inches long by one-half inch wide, tipped with sulphur at each end, were found in a cupboard close to the fireplace.

A Clear Sweet Skin Will Help You Use Cuticura Soap Every Day

1926—Jinx for Champions What of 1927?

By ELMO SCOTT WATSON

I WAS Mr. W. R. Hedley—he of the "Invictus" verse—who once wrote something to the effect that "into the night go one and all." That was a great many years ago, but he might have been talking about American sport champions and 1926. For the past year has seen more crowns jarred off athletic brows than has been the case in many a year. One by one the hitherto-invincibles went down in defeat and the dawn of the new year finds a whole flock of new champions bowing to the populace. And at the same time they're casting apprehensive glances over their shoulders to see what formidable contenders for their honors are toiling up the slope to push them from their positions of eminence during the next twelve months.

Look over the record presented in another column and it will be seen that in nearly every branch of sport, the title changed hands once and in some cases more than once.

Baseball is proverbially the national game and it saw a new champion acclaimed in one of the most thrilling World series ever played in this country. The Pittsburgh Pirates of the National league, 1925 champions, lost out in the flag race to the St. Louis Cardinals who had never before won first honors. The Washington Senators of the American league, 1924 champions and contestants in 1925, lost out to the New York Yankees, who have been league champions three times and who held the title of world champions as lately as 1923. For that reason they went into the series with Pittsburgh in the Cardinals favorites. But Manager Rogers Hornsby and his men won a thrilling eleventh-hour victory which gave St. Louis her first championship in many years and a chance to stage a celebration by her citizens which was strongly reminiscent of the scenes of wild joy which prevailed all over the country on November 11, 1918.

Even though Rogers Hornsby did lead his Cards to a team championship he lost an individual title. He has been presented Tiffany plaques in baseball for many years, but in 1926, he had to hand over his crown to Bubbles Hargrave of the Cincinnati Reds. In the American league a similar change took place, Harry Heilmann of the Detroit Tigers lost his title of batting champion at the close of the season, but, at least, he had the satisfaction of seeing it remain in Detroit, for he was defeated by Henkie Manush, of the Tigers.

In boxing more than in any other sport was the toppling of thrones and the falling of crowns in evidence. Every surely settled title in the ring fell the prize ring saw a steady procession of old champions stepping down and new ones stepping up. It began when Harry Greb, the middleweight champion, was beaten by Tiger Flowers, defeated in a return match, got it back and lost it in another defeat. In the welterweight class Mickey Walker had held the title for three years. Jack Shade aspired to the title but Mickey disposed of him. Then along came Pete Latzo, when Walker had grown too heavy. When their second bout ended, the welter crown was on Pete's head and not on Mickey's.

Rocky Kansas held the lightweight championship which Benny Leonard had vacated the year before, but before Rocky could enjoy it long, Sammy Mandell took it away from him. The same thing happened in the light heavyweight division when Jack Delaney outpointed Paul Berlenbach. In the featherweight class, 1923 saw the abdication of Kid Kaplan, the champion, because he was growing too heavy to make the required weight and Charley (Phil) Rosenberg lost his hard-earned right crown when he was suspended from fighting in the state of New York and his title declared vacant in Illinois after a dispute with the boxing authorities.

So as 1925 came to a close there was only one boxing title held undisputed by a champion of 1924. That was in the heavyweight division where Jack Dempsey still reigned supreme. Jack—no those not especially friendly to him said —because he was shy about going into the ring with a contender. But finally the jingle of Tex Rickard's dollars brought him into action against Gene Tunney, the ex-marine, and on September 23 Gene won the decision over the Manassa Mauler and the title of all titles in boxing.

Dempsey's defeat was probably the biggest sporting upset of the year, but golf and tennis furnished two others and saw the dethroning of two champions almost as universally known as Jack Dempsey. They were Big Bill Tilden and Bobby Jones. In golf Bobby Jones, the Atlanta (Ga.) youngster, had won a distinction never before attained by an exponent of the game. He held three championships, the British Open, the American Open and the American Amateur. To win the first he had dethroned Long Jim Barnes, to take the second he had beaten Willie MacFarlane and when he came to defend his title in the third, everything seemed favorable for his continuing to enjoy the unique distinction of triple champion. But on the field at Belmont George Von Elm of Los Angeles played superior golf and, when he finished 2 up and 1 to play, Bobby's reign was over.

Just as Bobby Jones, the outstanding figure among men golfers, went down in defeat, so did Glenna Collett, the premier woman golfer, bow to another. Miss Collett had been amateur national women's champion since 1922 and had held all sorts of sectional championships. Then along came Miss Virginia Wilson, a twenty-year-old girl from Chicago, to "bump off" Glenna in the third round of the national play 2 up and 2 to play. And there Mrs. G. Henry Stetson defeated Miss Wilson and won the title.

In tennis the fall of Big Bill Tilden was almost as dramatic as that of Bobby Jones or Jack Dempsey. Up until this year he seemed supreme in his field. The 1926 line of champions got in its work on him early. He lost the indoor national championship to Vincent Richards in January. Then Vincent Richards beat him in preliminary tournaments and in the Davis Cup matches La Coste won each victory over Tilden. Then came the supreme test—the national amateur matches and in the semi-finals Big Bill was forced to bow to another Frenchman, Henri Cochet.

When 1926 opened Suzanne Lenglen was undisputed tennis champion of the world and she retained the title by defeating Helen Wills at Cannes early in the year. She continued her victorious march through the Wimbledon matches (for appendicitis has prevented "Little Poker Face" from another attempt to wrest the title from Suzanne) up] then voluntarily abdicated her amateur title by turning professional when C. C. Pyle, who first sprung in the sport limelight by remorselessly "managing" Red Grange, "the Galloping Ghost," persuaded her that many American dollars swatted her upper-cuts in this country.

In wrestling the major title changed hands with considerable rapidity. As the New Year of 1926 dawned Wayne Munn, the big Nebraskan, wore the crown because he had tossed Strangler Lewis out of the ring and defeated him. Then the Strangler staged a come-back with his celebrated headlock and beat Munn. But before he could get the crown firmly adjusted, Joe Stecher of town came along and lifted it from his head and hurled to a mirror to take a look at himself in his new chapeau. Ivan Podubion, the European champion, came to our shores and made an attempt to adjust the same millinery to his head but Joe wasn't ready to give it up yet and he still wears it.

In 1925 Paavo Nurmi, the "Flying Finn," was the sensation of the running track and was hailed as the world's greatest distance runner. But 1926 brought an end to his victories. He was beaten by another Finn, F. Lievenlahi and Edvin Wide, a German, has threatened his general supremacy. Doctor Peltzer, another German, not only beat Nurmi in the 1,500 meter run in record time but he also took another title when he beat Douglas Lowe, an Englishman, to the tape and Lowe had beaten the best of the American middle distance runners.

In motor boat racing, in horse racing, in skating, old champions gave way to new. But if these new kings and queens of sport look back over the athletic trail of 1926 and are mindful of its lessons, they probably will not face 1927 with such confidence that the new year will be any less a jinx than the old one was for a champion in sports. For, as Mr. Henley remarked, "in to the night go one and all."

HERE'S THE 1926 CASUALTY LIST

BOXING

Jack Dempsey, world's heavyweight champion, beaten by Gene Tunney.

Paul Berlenbach, world's light heavyweight champion, beaten by Jack Delaney.

Harry Greb, world's middleweight champion, beaten by Tiger Flowers.

Mickey Walker, world's welterweight champion, beaten by Steve Latzo.

Benny Leonard, world's lightweight champion, beaten by Sammy Mandell.

Kid Kaplan, world's featherweight champion, resigned title.

Charley (Phil) Rosenberg, world's bantamweight champion, title declared vacated.

GOLF

Robert T. Jones, national amateur champion, beaten by George Von Elm.

Willie MacFarlane, national open champion, beaten by Robert T. Jones.

Jim Barnes, British open champion, beaten by Robert T. Jones.

R. Harris, British amateur champion, beaten by Jess Sweetser.

Glenna Collett, national women's champion, beaten by Virginia Wilson.

Championship won by Mrs. G. Henry Stetson.)

TENNIS

William T. Tilden, II., national amateur champion, beaten by Henri Cochet. (Championship won by Helen La Coste.)

Suzanne Lenglen, world's amateur women champion, turned professional.

Helen Wills, world's amateur national champion, defaulted. (Championship won by Mrs. Molla Mallory.)

BASEBALL

Pittsburgh Pirates, National league champions, and 1925 world series champions, lost to St. Louis Cardinals.

Rogers Hornsby, National league batting champion, lost to Bubbles Hargrave, Cincinnati Reds.

Harry Heilman, American league batting champion, lost to Henkie Manush, Detroit Americans.

WRESTLING

Wayne Munn, world's heavyweight champion, beaten by Strangler Lewis.

Strangler Lewis, world's heavyweight champion, beaten by Joe Stecher.

Ivan Podubno, European champion, beaten by Joe Stecher.

BILLIARDS

Willie Hoppe, world's champion 18.1 balkline, beaten by Jake Schaefer.

Jake Schaefer, world's champion 18.2 balkline, beaten by Eric Hagenlacher.

Francis B. Appleby, national amateur 18.2 balkline, beaten by J. A. Clinton, Jr.

Bob Cannefax, three-cushion champion, suspended from competition.

Frank Taliaferro, pocket champion, title declared vacated.

TRACK

Paavo Nurmi, world's distance running champion, beaten by various runners several times.

Douglas Lowe, world's middle distance running champion, beaten by Doctor Peltzer.

SWIMMING

Johnny Weissmuller, record holder in various distances, records broken by Arne Borg and Eric Rademacher.

Helen Wainwright, women's national champion, turned professional.

MISCELLANEOUS

Paul Costello, national rowing champion, beaten by Walter Hosier.

Clio Thunberg, world's amateur skating champion, broken several times.

American Class, champion jumping horse, won no important races.

Exception, champion two-year-old running horse, set aside because of injury.

Ingomar Boulogne, motor boat speed champion, beaten by Greenwich Folly.

Not Written for the Gentler Sex

Admiral Sir Harry Keppel, the sailor who made over the British navy, was exceedingly fond of his fellow-Britain fund of anecdote, and experienced difficulty in producing his memoirs because his "lady typist" refused flatly to take down his best stories. Harry Furniss, the caricaturist, recalls one tale of the admiral:

When visiting the royal yacht at Cowes, the prince of Wales informed Queen Victoria that "the little admiral," as Sir Harry was called, was about to publish his reminiscences. Her majesty called him before her and said:

"I hear, Sir Harry, you are going to publish your recollections. I shall be glad to read them."

"No, your majesty," he said, "I fear they will not be fit reading for a lady."

The admiral was exceedingly fond of shooting, but was a careless shot. On one occasion he wrote his tenants:

"I have had an excellent day's sport. I have shot two woodcock, ten pheasants, a rabbit and your son."—Exchange.

Oh, Doctor!

While doctors are accustomed to colds in the wee small hours of the night, one of the bright and shining lights of the medical profession who is a little surprised recently to answer the door at 2 a. m. and find his next-door neighbor there.

"Why, what's the matter?" he asked excitedly. "The baby is sick and I want to call the doctor."

Pertinent Question

Her Father—I do not require that the man who marries my daughter shall be rich. All I ask is that he be able to keep out of debt.

Suitor—Would you consider a man in debt who borrows money from his father-in-law?

ORCHARD GLEANINGS

DISCUSSIONS OF BERRY DISEASES

The Department of Agriculture has just issued a report on "Diseases of Raspberries and Blackberries," of which E. O. Dodge, pathologist, and R. H. Wilcox, assistant pathologist, office of fruit diseases, bureau of plant industry, are the authors.

The report includes discussions of mosaic and related disease of raspberries, fungous diseases of raspberries and dewberries, and suggestions for preparing bordeaux mixture and lime-sulphur solution.

The text of the introductory paragraph follows:

Most of the diseases of raspberries and blackberries are caused by fungi. The usual symptoms by which each disease may be recognized are fairly well marked.

Certain other diseases, such as mosaic and leaf curl, though they are of an infectious nature, are not known to be caused by fungi or other organisms. They occur throughout the range of the raspberries and are becoming so serious in some places as to necessitate the replacement of susceptible varieties with other sorts of berries which are more resistant.

The more important fungous and virus diseases of raspberries and blackberries of the United States are described and illustrated in this bulletin, and practical methods for their control, when known, are given.

Raspberries, blackberries, and their relatives, representing different species of the genera Rubus, differ as to their habits of growth. On this account alone their horticultural varieties might differ widely with regard to their susceptibility to a particular disease. These berries are grown as garden crops throughout the United States and commercially in many favorable localities.

It is clear that methods worked out for controlling a disease of raspberries in Michigan would not necessarily prove satisfactory in controlling the same disease on dewberries as grown in Georgia. It is proposed to discuss the diseases of raspberries and blackberries separately, although in some cases their horticultural varieties may all be subject to certain of the diseases to be considered.

Prune Grapes Properly to Secure Finest Fruit

"Grapes must be pruned to produce the best fruit," says Prof. Joseph Ossmer of the New York State College of Agriculture at Ithaca. "This pruning is done mainly during the winter; some of the principles involved are that a comparatively few canes of the most amateur growth should be left; that a mature grapevine should not carry more than thirty or forty buds; that older canes should have their excessive spurred near the trunk in order to keep from developing long arms of old wood.

"At planting time, and the year after, young grapevines should be cut back to two buds and tied to stakes for support. The second summer each vine should send out a cane long enough to be tied to the top wire of a trellis. This trellis, if a Kniffen system of training is used, should have two wires, one at a height of five feet and the other three feet from the ground. Number nine or ten wire is generally used and may rest on posts set 25 feet apart.

"In the summer after the third pruning, canes will develop from the one tall trunk left, and all of these should be trained to the upper pruning except two at the top wire and two at the lower wire; these four canes should be tied to the wires to the right and left at right angles to the upright trunk, and should be cut back to four buds each."

Good Plan to Propagate Various Kinds of Plants

It is an easy matter to propagate many kinds of plants. During the winter take cuttings of currants, gooseberries, grapes and various kinds of flowering shrubs. These cuttings should be four wood that was grown the previous summer. These should be taken after some severe weather and before the sap begins to rise in the spring. Tie them in bundles, with the butts all one way. Nurserymen cover the bundles with earth, with the butts down, in no outdoor pit. A cost cellar will do just as well if you use a box that is deep enough to hold the cuttings in a vertical position. In the spring, set the cuttings in the ground in good garden soil and keep them cultivated during the summer. The next spring you will have plants to set out or to sell. Usually, all that is needed to make them grow is a fair supply of moisture.

Use Fruits in Diet

Family physicians everywhere recommend the use of fruits in the diet. They are considered friends to health and foes to diseases. They are not only healthful, but tasteful, and economize all in one. For example: It would be difficult for one to eat too many apples. Even after the heartiest meal, there is always room for another apple. Someone has said that plenty of good apples will keep the children at home and keep the doctor away.

Cost of an Orchard

An acre orchard is sufficient for one family. In fact, when the fruits come into bearing this acre should supply much more than one family can use. The home orchard should consist of about 40 trees: say, 10 apples, 9 peaches, 3 pears, 6 cherry, and 2 or 3 plum trees. The cost of good one-year-old trees will vary from about 35 cents to 50 cents each. One-year-old trees are generally more satisfactory and the grower should never plant trees more than two years old.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

Queen Elizabeth

"HOW tall is your queen?"

The red-haired old woman who asked this question of the Scottish envoy was herself a queen—one of the greatest in history. She was Elizabeth, daughter of Henry VIII of England. The sovereign about whom she was making inquiry was her kinswoman, the beautiful Mary Queen of Scots. The Scottish envoy answered cautiously:

"She is a little taller than your majesty."

"Then," declared Elizabeth, "she is a little too tall for perfect beauty."

This anecdote illustrates one of the countless phases of Elizabeth's amazing character. Vain of the beauty she did not possess, modest regarding the genius she did possess, unjust and capricious as a woman, just and wise as a queen, firm, yet often irresolute, strong yet sometimes pitifully weak, honest and open in policy, yet crafty and hypocritical in exceptional cases, a believer in the people's rights, yet personally a cruel tyrant; highly educated, yet with the shrewish vocabulary of a fishwoman—these are but a few of the countless inconsistencies and paradoxes in this most remarkable of rulers.

Henry VIII (son of the Henry who overcame and superseded Richard III) had ruled England in a somewhat selfish, eccentric fashion, yet, on the whole, wisely, raising the country from a third-rate power to the level of Europe's foremost nations. He had six wives, a fact less remarkable in those days when men married "early and often."

Henry left three children—a son, who, as Edward VI, succeeded him, and two daughters, Mary and Elizabeth. Edward died after a very brief reign, bequeathing the crown to his cousin, lady Jane Gray. Mary's adherents executed Lady Jane and Mary came to the throne. She was married to Philip II of Spain, and so successfully introduced Spanish cruelty and inquisitorial methods into England as to earn the nickname "Bloody Mary." Incidentally she threw Elizabeth into prison for alleged conspiracy and on suspicion of heresy. After five years of miserable misrule Mary died childless, and in 1558 Elizabeth inherited the crown at the age of twenty-five. She ruled forty-five years.

Her first step was to rid the country of all Spanish influence and to reform religious and governmental affairs. In the matter of religion she erred as cruelly on the side of Protestantism as had Mary and the Spaniards in behalf of Catholicism.

Elizabeth surrounded herself with the wisest ministers and counselors, and was guided by them in all matters save one. The one exception was the subject of marriage. A score of suitors, from Philip II to the son of Henry II of France, sought her hand. She coquetted with each, and at last, when weary of the amusement, dismissed them in turn, announcing to parliament that she was resolved to live and die unwed. This high-sounded resolution did not prevent her from having a long series of court favorites, on whom she lavished gifts and advancements, to the envy of her subjects and the scandal of Europe. Among these favorites were the earls of Leicester and Essex and Sir Walter Raleigh.

Mary, the young queen of Scotland, had been married to Francis II, son of Henry II of France. On Francis' death Mary had returned to Scotland, where her notoriously bad life and worse rule aroused the Scotch to such a pitch of resentment that Mary fled to Elizabeth for protection. Elizabeth promptly put her in prison, kept her there nineteen years and then had her beheaded. Philip II of Spain denounced Elizabeth as a murderess and, under pretext of avenging Mary Queen of Scots, raised a mighty fleet known as the "Invincible Armada" and prepared to invade England. He was at that time also opposing the Netherlands, with which nation Elizabeth had formed a religious alliance. She hinted that she would abandon her Dutch allies if Philip would give up the plan of invasion. He refused. The Armada set sail, but was destroyed by a storm.

Elizabeth was a patron of all the arts, and her reign was the Golden Age of English literature. Shakespeare, Spenser, Bacon and countless other writers flourished under her protection, winning favor by poetical rhapsodies of her beauty and charm. It was also the Golden Age of discovery and exploration. Raleigh and Drake and a dozen other adventurers won for this queen vast possessions.

In person Elizabeth was tall and lean with a hooked nose, thin lips, small black beady eyes and teeth blackened by tobacco and decay. Her chief cause of hatred against Mary Queen of Scots apparently rose from the fact that Mary was young and beautiful and, while she lived, herself was only old, ugly and wicked. The chief ostensible pretext, however, was that Mary was a Catholic and, as next kin to Elizabeth, might make England once more a Catholic nation.

Yet, when dying, Elizabeth named Mary's son (King James VI of Scotland) as her successor, and on her death, in 1603, he united England under the title of James I.

Elizabeth was the first constitutional monarch of England.

Reason for Cold Weather

The naval observatory says while it is true that in the northern hemisphere the maximum difference between the heat lost at night and that gained by day occurs about December 21, it is also true that there is more lost at night than gained by day for some time after that. "In other words one might say that the northern hemisphere cools off most rapidly about December 21, but still continues to cool after that time, though more slowly.

Prickly Pear Dress

Women's organizations of Australia are asking the government to grant a perpetual lease of 500 acres and a subsidy of $125,000 to establish a textile industry to make materials from waste products of the country. Mme. McCracken of Dublin was the leader of the delegation appearing before the minister of labor and industry at Sydney and showed garments made in her own textile plant from prickly pears, root of the pineapple, paddy's incense, banana skins and other waste products.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. "In a wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

MAID ASTOUNDS MEN OF SCIENCE

Rumanian Peasant Girl Is Said to Be Possessed of the Devil.

London.—"The devil has come with me to London, but I am afraid it very pleased to come to London, for he hopes to find plenty to do here."

Ardent reformers and religious propagandists have before now expressed the idea that the devil is a regular resident in London (and most other big cities), but the one referred to above by fifteen-year-old Eleonore Zugun would seem to be in illustration itself, and, so far, London's morals do not seem to have suffered greatly from the invasion.

But this Rumanian devil is greatly exercising students of physical research and a special committee of doctors and scientists will keep Eleonore under close observation for the next month or so, in order to study its manifestations, classify the phenomenon and, if possible, banish the devil to the underworld.

For Eleonore, who is an ignorant peasant girl, looking much younger than her thirteen years and having the mentality of a child of eight, has been a puzzle to the scientists and psychic experts of Europe for over a year. The girl believes she is devil-possessed, and the "possession" takes two distinct forms—that of "poltergeist" (a noisy devil), in which article defies fly about the room in which she happens to be, and disappear and reappear in bewildering fashion, and that of "stigmatic" origin, in which sacred words, blisse, bruises and scratches appear on her skin without apparent cause.

Studied by Scientists.

It was Countess Zoe Wassiliec-Sereckl, well-known psychic enthusiast, who brought Eleonore to London after studying her in Rumania and in Vienna, and in the scene of the proposed month's survey is the National Laboratory of Psychical Research, South Kensington. It should be said at once that the National Laboratory of Psychical Research is under the direction of Harry Price, an amateur conjuring expert, who is not at all likely to be deceived by any ordinary "magical" effects, for he knows how they are done.

"I think I know most of the 'tricks of the trade,'" said Price, referring, of course, only to the conjuring art, "but here at the National Laboratory of Psychical Research we have no bins on the way or the other. Our object is to study these phenomena and discover, if possible, their cause. We are not spiritualists, neither have we any prejudice against spiritualism. Like other scientists we want to find out the laws that govern these things.

"As regards Eleonore Zugun, while she is here she will be kept under strict observation and we shall merely report what we see and learn. I have already kept the girl under observation for three days at Vienna, and the most extraordinary thing which happened was this: A stiletto flew across the room and stuck itself with a thud into the door. I was in the room and Countess Wassiliec-Sereckl and Eleonore were standing together trying to fit the two halves of a broken bolt together. The stiletto came from a table on the other side of the room, but although I searched the room thoroughly I could find no trace of the phenomenon."

Since her arrival at the South Kensington laboratory, Eleonore has been freely visited by newspaper reporters, but very little has happened.

Display Adds to Phenomena.

Some of the phenomena put down to Eleonore's "poltergeist" influence, and vouched for by Countess Wassiliec-Sereckl as having occurred in Vienna are:

Needles stick themselves into the girl's hands and face, and her neck and cheeks become smeared with ruby blood from red and blue pencils without visible agency.

Inscriptions in unknown tongue appear in the palms of her hands.

Her necklace broke suddenly at two points one day, and the coral beads were scattered over the room. While the girl was gathering these in one corner of the room, more beads fell if another corner.

A skein of blue yarn disappeared through the lid of a workbox, remained there ten minutes and then, after another ten minutes, disappeared once more.

Meanwhile Eleonore's most noticeable trait is her enormous appetite. She eats three times as much as the ordinary girl of her age, or physique. She thinks nothing of eating half a loaf of bread with a substantial breakfast.

She, herself, puts down the phenomenon to her "dracu" (or devil), as she calls him in Rumanian. She is a simple-minded child, whose mantle delight is—toys.

Witches Being Sought in German Community

Leipzig, Germany.—Belief in witchcraft and sorcery still persists in some parts of rural Germany. A wave of the old superstition has been sweeping the little hamlet of Wrenschendorf, near Gunnersheim, and while there have been no hangings at the stake, life has been made miserable for several unfortunate suspects, both men and women.

An automobile was wrecked near the house of a supposed witch, and it was excitedly charged that the witch had caused the accident by enjoining on the roadway just before the car passed. When a young girl of Unkeu ill it was averred she had been bewitched and she was shut in a dark room for three days while incantations were chanted periodically to exorcise the evil spirits. Outside the house door armed men stationed themselves with the hope of catching the evil ones, but it is not recorded that any were caught.

Bottle Yields Sailor's Farewell 40 Years Ago

Halifax, N. S.—A farewell message from John Lee, master mariner, to his sweetheart mother, believed to have floated around the world in a bottle for nearly forty years, has been received here.

The bottle was picked up in the Baltic Sea at the island of Borkum by a young German cabin engineer and forwarded to the Premier of Nova Scotia. It read: "To whom it may concern: Tell mother I died fighting. John Lee, Master Mariner, Halifax." It was dated "May 17, ——."

The paper was faded gray and the writing very dim, but Premier Lee died 35 years ago. The fate of her son's ship, which sailed from this port, was unknown.

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the
County of Charlevoix.

IN CHANCERY.

Walter S. Ilsley, Plaintiff,
vs.
Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham; Harry L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Robert Bridge, Defendants.

At a session of said court held at the court house in the City of Charlevoix in said county on the 23rd day of December A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff.

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Guardian of the estate of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff.

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State

Chronology OF THE Year—1926

* * *

Compiled by EDW. WEBSTER

INTERNATIONAL

Jan. 5—United States protested against retroactive features of Mexico's new petroleum and land laws.

Jan. 7—Dr. Hiram Bingham, American explorer, made chairman of International commission to settle Tacna-Arica difficulty in Chile.

Maj. Gen. William Lassiter named to succeed General Pershing as president of Tacna-Arica plebiscite commission.

Jan. 15—Locarno treaties signed and put into force.

Jan. 16—Allies evacuated the first zone of occupation in the Rhineland.

Jan. 17—United States formally notified Great Britain that it does not intend to be bound by the Geneva protocol.

March 3—Abd-el-Krim launched big attack on French in the Riff.

March 4—Number of deputies ratified Locarno pacts.

March 5—Germany's admission to League of Nation's postponed indefinitely.

March 9—Special session of League of Nations opened with Viscount Ishii in the chair. Deadlocked over new members. Spain threatened to resign.

March 9—League of Nations received German application for entrance.

March 16—Chile, former premier of Peru and Ecuadorean minister special session of League of Nations.

April 6—Secretary Kellogg submitted to Chile and Peru new plan to settle Tacna-Arica disputes without plebiscite.

April 7—France and Germany signed air pact.

April 19—United States formally declined to participate in League of Nations conference on American arbitration treaties.

Chile rejects Kellogg's plan, demanded Tacna-Arica plebiscite on May 27 as scheduled.

April 21—Italian debt settlement signed by Mellon and Volpi in Rome.

April 22—Ambassador Herrick made new offer for settlement of French war debt to United States.

April 24—Germany and Russia signed treaty of friendship and neutrality.

April 26—United States senate ratified Italian debt settlement.

April 27—Debt funding agreements with Latvia, Estonia and Rumania ratified by United States senate.

April 28—United States senate ratified Czechoslovakian debt settlement.

April 29—Funding arrangement of French debt to America signed in Washington, providing for payment by France of grand total of $4,025,617,000.

May 1—Agreement on Yugo-Slavia debt to United States reached in Washington.

May 7—French and Spanish opened offensive against Riffians.

May 18—International preliminary conference on reduction of armaments opened in Geneva.

May 27—French captured Targuist, headquarters of Abd-el-Krim, but the latter escaped.

May 28—Abd-el-Krim surrendered to the French.

June 1—Crisis in relations between Great Britain and Egypt due to acquittal of British officials charged with murders.

June 4—French senate ratified the Locarno treaties, 172 to 114.

American ingation at Montevideo, Uruguay, bombed by radical sympathizers.

March Soccer and Vaughn convicted of murder in Massachusetts.

June 5—Great Britain and Turkey signed the Mosul treaty.

June 8—Council of League of Nations closed session.

June 12—Brazil gave two years' notice of her withdrawal from League of Nations.

June 14—Tacna-Arica plebiscitary commission formally dissolved by Chilean and Peruvian delegates.

June 16—Britain concluded agreement with General Andreva to bulk Russian trade in London. Soviet Russia and Great Britain signed arbitration treaty, and Russia and France signed treaty of amity.

Aug. 25—British, French and German governments signed protocol of entry of Germany into League of Nations, with Spain and Poland to be given permanent seats in council.

Aug. 26—Spain's demand that international status of Tangier be assured to the Spanish zone of Morocco formally refused by League of Nations.

Aug. 30—Spain withdrew from the League of Nations against Mexico, alleging Calles aided revolutionists.

Sept. 16—Great Britain refused Spain's invitation to reconsider withdrawal.

Sept. 4—Spain rejected League of Nations offer of semi-permanent seat in council.

Sept. 7—League of Nations assembly met with Spain and Brazil absent.

Sept. 7—Spain resigned from League of Nations.

Sept. 8—Germany elected a member of League of Nations council for permanent seat in council.

Sept. 10—German delegation took its seats in League of Nations assembly.

Sept. 11—Turkey applied for membership in League of Nations, declaring it must be given seat in the council.

Sept. 14—Locarno treaties filed with League of Nations, and Germany demanded evacuation of Rhineland by Allies.

Sept. 21—French cabinet gave Briand free hand in working out accord with Germany.

Committee report on American reservations to protocol of World court jurisdiction committee, and its interpretation of fifth reservation declared not acceptable by President Coolidge.

Sept. 22—Withdrawal of French troops from Ruhr completed.

Sept. 23—Locarno treaties adopted reply to American reservations accepting them with one modification.

Sept. 24—League of Nations decided on a conference on reduction of armaments should be held before September, 1927.

Oct. 1—Removal of tariff barriers and other restrictions upon European trade recommended by a group of leading international bankers in a signed statement issued in London, Paris and in New York and European capitals.

Oct. 30—United States government served notice on Mexico that diplomatic relations would be severed if Mexico carried out plan to confiscate by decree under the terms of the new Mexican land and oil laws effective January 1.

Nov. 2—Foreign Ministers Tchitcherin of Soviet Russia and Ismet Bey of Turkey met to formulate treaty of alliance.

Nov. 17—Nicaragua asked United States to help in stopping Mexican aid to rebels.

Nov. 18—Nicaraguan rebels asked by United States to lay down their arms.

Nov. 19—President Coolidge notified Nicaragua the United States would take a good offices to bring about peace there.

Nov. 25—Pope Pius denounced persecution of Catholic Church in Mexico.

Nov. 29—Joint engineering commission of United States and Canada recommended development of the St. Lawrence waterway.

Nov. 30—Italy and Albania signed treaty of amity and co-operation.

Nov. 30—Report of Anglo-American international commission said powers must retain existing territorial rights in China until chaos there was ended.

Dec. 1—Mexican congress met. It would nationalize all special rights on land expiration.

Dec. 5—League of Nations council met.

Dec. 10—Nobel peace prize for 1925 awarded to Charles G. Dawes and Sir Austen Chamberlain, the latter for the Locarno treaties.

Dec. 12—Allies agreed to transfer control of German armaments to League of Nations committee on February 1.

DOMESTIC

Jan. 4—House passed post office-treasury appropriation bill carrying $967,490,900.

Jan. 12—House passed interior department bill appropriating $274,500,000.

Jan. 13—Senate by vote of 41 to 39 seated Gerald P. Nye of North Dakota. Phillip S. Tetter of California appointed to succeed Shortridge.

Jan. 15—Daniel Cadenhead, slave of $2,000 to cause hostilities with Mexico.

Jan. 19—Army board of review approved conviction of Col. William Mitchell.

Jan. 26—Senate adopted Swanson resolutions to world court resolution.

Haugen co-operative marketing bill passed by house.

Jan. 27—Senate by vote of 76 to 17 passed resolution for American aid defense to world court.

Jan. 28—Senate adopted corn sugar amendment to pure food laws.

Feb. 5—Senate adopted repeal of publicity provision of revenue law.

Feb. 10—Senate voted to repeal all taxes on admissions, cabaret and roof garden and estate, sailing receipts of $100,000,000 more.

Feb. 11—Rhode Island passed, in inquiry excluded Countess of Caltcart from Newport Bailey when she admitted having been a bootleg party.

Feb. 12—Senate passed the tax bill, reducing federal revenue $164,000,000.

Feb. 13—Senate and house adopted resolutions for making inaugural date in January and convening of congress on January 10 after 1928.

Feb. 15—House passed omnibus public buildings bill carrying $145,000,000.

Feb. 16—Army and navy bills, with total of $665,500,000, passed by house and senate, respectively.

Feb. 17—Senate and house conferees agreed on tax bill with cut of $387,811,000.

Feb. 23—House accepted conference report on tax bill, 214 to 23.

Feb. 24—Henry S. Oregon resigned from shipping board.

Feb. 25—Senate approved new tax bill by 41 to 12.

March 1—United States Supreme court decided Wisconsin's gift tax law unconstitutional.

March 2—Senate passed Warner-Parker bill abolishing railroad labor board and providing means for settlement of railway labor disputes by conference.

March 3—Senate passed Jones special session of Congress bill.

March 4—Treasury offered for public subscription $500,000,000 in 10-year notes at 3½ per cent interest. Offering at rate since first Liberty bonds were floated.

March 5—Seattle, Wash., elected Mrs. Bertha K. Landes mayor.

Air secretaries in three departments recommended by E. W. Morrow, chairman of aviation board, in report to President Coolidge. Senate and house passed bill for Alaskan railroad.

March 6—Senate passed McFadden banking bill.

March 8—House passed Johnson bill making great changes in World War veterans' bureau.

March 9—Congressman W. S. Vare, running on wet platform, won Republican primaries for senatorship in Pennsylvania, defeating Senator Pepper and Governor Sproul. Vare was later nominated W. B. Wilson.

S. S. Kresge gave $12,000,000 to foundation for education and various public welfare purposes.

March 10—Senate passed bill prohibiting transportation of pistols and other deadly weapons in the mails.

Senate ordered inquiry into primary campaign expenditures.

March 11—Treasury department announced that Secretary Coolidge had issued executive order authorizing appointment of state, county and municipal officers as prohibition officers at nominal salaries.

House rejected Haugen farm relief bill, 147 to 69.

President Stetson nominated bishop of Protestant Episcopal diocese of Rhode Island.

March 13—President Coolidge delivered Memorial Day address at Arlington, urging world disarmament.

Intergovernmental radium opened in Philadelphia.

March 15—Senate passed army air service bill.

June 3—Senate passed naval air program bill.

Indiana Democratic convention nominated Senator Watson for re-election, favoring wet and short selection terms, respectively.

Senate passed rivers and harbors bill passed by house.

June 4—Mrs. Brookhart nominated for senate by Iowa Democrats, defeating Senator A. B. Cummins. Party platform adopted was opposed by the Democrats.

June 5—Senate passed house bill carrying $75,000,000 for federal aid to highways.

June 8—Senate passed senate's corn sugar bill.

June 25—Twenty-eighth international eucharistic congress opened in Chicago.

June 26—Presidents' conference on hearing on Volstead act mostly wet. Delegation of 1,000 from Republican started from New York for Washington.

June 29—Spokesmen for American Federation of Labor at senate hearing opposed Couzens bill for $1,000 annual pension for veterans.

July 2—Senate passed Curtis-Capper bill prohibiting shipment of intoxicating liquor into dry states.

July 3—Senate passed Swing-Johnson boulder dam bill.

July 6—Senate passed Jones-Reed bill abolishing railroad labor board and providing means for settlement of railway labor disputes by conference.

July 7—Senate passed Norris-Sinclair bill authorizing government operation of Muscle Shoals plant.

July 8—Senate passed Capper-Tincher bill, 187 to 54, to amend packers and stockyards act.

July 9—Senate passed Jones special session of Congress bill.

July 10—Senate passed Jones-Reed bill, 187 to 54, to amend packers and stockyards act.

July 12—Senate passed Jones-Reed bill, 187 to 54, to amend packers and stockyards act.

July 13—National convention of the Ku Klux Klan opened in Chicago.

Northwest Soo Canadian Pacific world's largest grain elevator, to give surplus wealth for benefit of the community.

Kansas City Star and Times sold to present management for $11,000,000.

July 14—Senate passed Jones special session of Congress bill.

July 15—Senate passed Jones bill to limit appropriations to $4,000,000,000 in five Mellons to plan renewal of fight for farm relief.

July 26—Senate slush fund committee reported that Mellon had not violated federal revenue $16,000,000.

July 30—A. F. Myers of Iowa appointed member of federal trade commission.

July 4—Iowa Republicans nominated R. B. Howell to fill unexpired term of Senator Cummins. Democrats made no nomination.

Aug. 5—William P. MacCracken, Chicago, appointed assistant secretary of commerce in charge of aviation activities.

August 6—Knights of Pythias opened biennial convention in Chicago.

Ohio Republicans renominated Senator Frank B. Willis, and named M. J. Pettibone assistant treasurer of treasury. Atlanta Democrats renominated Senator Alva Simmons for senate and re-elected Governor Clifford Walker.

Aug. 7—Federal authorities near San Diego, Cal., arrested 149 men charged with plot to revolt under General Estrada, and seized quantity of arms.

Aug. 16—President Coolidge decided that Mississippi flood relief was unwarranted.

Aug. 22—Dan Moody defeated Miriam A. Ferguson in run-off primary for nomination for governor of Texas.

Aug. 24—Senate by vote of 48 to 41 confirmed Col. Clarence Edwards, California Republican and John R. Elliott, named by Democrats.

Sept. 7—Senator Lenroot of Wisconsin, Republican, renominated over Judge John J. Blaine. Blaine Senator Moses of New Hampshire, Governor Boyle of Nevada re-elected.

Sept. 13—Maine election won by Republicans, Senator Gould and Governor Brewster.

Sept. 19—President and Mrs. Coolidge attended celebration at Washington.

Sept. 20—Sixtieth annual convention of Catholic Church Extension Society opened.

Sept. 22—Maryland Democrats refused to indorse Governor Ritchie on wet platform.

Sept. 24—Walsh of Milwaukee elected commander in chief of the G. A. R. at Portland, Ore. New York Republicans nominated Congressman Ogden L. Mills for senate and Governor Smith for governor. Democrats renominated Smith for governor and Senator Wagner for senate. Teapot Dome lease held invalid by supreme court of appeals at District of Columbia.

Sept. 29—Investigating committee of senate and house charged corrupt use in Indiana by D. C. Stephenson, Ku Klux Klan dictator, of campaign fund collected by President Coolidge appointee, Charles Latshaw, as collector of internal revenue. Permanent Court of International Justice at The Hague to hear case of Lotus.

Oct. 11—Jury in Daugherty-Miller case disagreed and was discharged.

Oct. 12—Pan American commercial Lacajon opened in Philadelphia.

Oct. 13—Senate committee voted to hold 1927 convention in France.

Oct. 14—Bishop Joseph J. Savage of Chicago elected commander in chief of Knights of Pythias.

Oct. 15—Governor Harris of Georgia landed at New York and went to Washington.

Oct. 18—Queen Marie entertained at dinner by President Coolidge.

Oct. 19—Senate committee investigating campaign expenditures of Frank L. Smith, Illinois Republican senatorial candidate, defeated in 1924, began hearing on Volstead act modification.

Oct. 20—Senate committee opened hearing on Volstead act modification. Delegation started from New York for Washington.

Oct. 21—Spokesmen for American Federation of Labor at senate hearing opposed Couzens bill for $1,000 annual pension for veterans.

Oct. 22—Senate committee opened twelve-day hearing on Volstead act modification. Delegation started from New York for Washington.

Oct. 23—Spokesmen for American Federation of Labor at senate hearing opposed Couzens bill for $1,000 annual pension for veterans.

Oct. 25—Senate committee opened twelve-day hearing on Volstead act modification. Delegation started from New York for Washington.

Oct. 26—Spokesmen for American Federation of Labor at senate hearing opposed Couzens bill for $1,000 annual pension for veterans.

Oct. 27—Senate committee opened twelve-day hearing on Volstead act modification. Delegation started from New York for Washington.

Thirty Drowned in Hudson River Boat Disaster

Thirty men were drowned in the Hudson river at New York when a motor boat struck an ice floe and was capsized. Thirty others were rescued by tugs. This picture, transmitted by wire, shows bodies of the dead being drawn onto a raft.

Russians Pay Honor to Leonid Krassin in Death

When a circus elephant escaped at Garnett, Kans., and roamed over the adjacent country for several days the farmers engaged in an exciting and unusual hunt. Finally the pachyderm, with many shot wounds and with fences, ears and toes, was caught, chained and led back peacefully to his owners.

ALL AROUND THE GLOBE

Turkey is taking to electric refrigerators.

Paper can be made from practically anything that can be pounded into pulp.

The famous Wieliczka salt mines in Galicia contain 65 miles of galleries of salt rock.

Boys played marbles even in the early days of the Indian mound builders.

It is earliest stages, tuberculosis can be cured in practically 100 per cent of cases, specialists say.

A telegraph-typewriter has been invented which delivers messages at the receiving end in complete typewritten form.

Esperanto will be adopted as an auxiliary language, especially in the transmission of important news, it is predicted.

Brahman-Cross Steers Favored

Especially Adapted to Hot Climate, Droughts and Cattle Pests.

(Prepared by the United States Department of Agriculture.)

For a number of years cattlemen of the Gulf coast region have been using Brahman—the so-called sacred cattle of India—to cross with the common beef breeds of this country. Brahmans are especially adapted to a country having a hot climate, droughts, and where cattle pests are common. Native cattle carrying as little as one-eighth Brahman blood exhibit these same characteristics to a large degree and are in many ways more suitable for the conditions of the Gulf coast region in Texas than native cattle. Brahman-crossbred cattle are becoming quite widely distributed in this section.

Experiment With Cross.

The United States Department of Agriculture is experimenting with Brahman crosses to determine how they compare with other beef breeds in the Gulf coast region. "Breeders producing Brahman crosses are meeting with success. This is particularly true of the young stock which weighs from at the same age and sells as high as calves of the ordinary beef breeding which is standard. They are in good demand for veal in the markets serving this region.

Good Feeders.

While considerable number of Brahman-cross cattle are marketed in Texas, shipments occasionally reach northern markets. Twenty-four head of Brahman-Hereford steers averaging one-eighth to one-quarter Brahman blood were sold on the Chicago stock yards market where they not only created considerable curiosity but were well received by packers who introduce them to the packers. According to reports of the department 24 head dressed an average of 50.17 per cent, which is considered as very satisfactory. They also received second cake on grass pasture throughout the summer and fall.

Find Poor Lettuce Seed Expensive at Any Price

The importance of good lettuce seed cannot be overestimated. Poor seed is expensive at any price and the grower is not justified in buying it in order to save a small difference in cost.

Poor, unsatisfactory lettuce growers to be able to cut only 50 per cent or less of their crop. This, to a large extent, is due to many plants going to seed before developing a head. Much of the failure to head can be traced directly to bad seed. Growing conditions and cultural methods are as important in the growing of lettuce as in growing other vegetables, but will not overcome a poor crop of lettuce unless the best of seed is planted. For the last two seasons good lettuce seed has been scarce as a result, a lot of seed of inferior quality has been sold. A large percentage of some strains of seed being offered to the growers will not produce firm heads except under the most favorable growing conditions. Some of these strains contain a large percentage of seed which will produce nothing but "seeders" under my conditions.

Kerosene and Soap Used to Kill Lice on Cows

The following mixture will kill lice on cows satisfactorily: Kerosene two gallons, common or whale oil soap one pound, and soft water one gallon.

Dissolve the soap in the water and add solution boiling hot to the kerosene, then churn mixture from five to ten minutes, or until it is white and creamy-like and no free oil can be seen. Dilute with twenty parts water and apply to the animal with a brush or sponge. After the application keep animal indoors until the blanketed and kept in a warm barn until dry to avoid taking cold.

FARM NOTES

The cheapest way to get nitrogen is to let the legumes gather it.

Crop rotation is the beginning of organized or business farming.

Alfalfa will grow on sand. That has been demonstrated through many successful years of growth.

If manure is hauled out and spread daily during the winter months, it saves double work in the spring.

As a pasture crop and as a soil enricher sweet clover, without doubt, heads the list of leguminous plants.

Thoroughly cleaned clover and alfalfa seed means not only fewer weeds, but luscious likelihood of parasitic plant diseases.

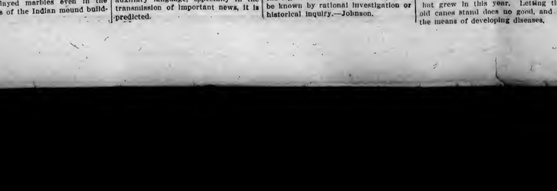
The importance of legumes is far greater than is commonly supposed. Several thousand species have been identified, ranging from the tiniest of plants to the largest of trees.

It is not possible nor advisable to harvest all the corn with hogs on most farms. But in soft-corn years this has been one way of reducing a loss and saving crib space as well.

In saving seeds for next year's crop, remember that "dry seeds are safe." They do not freeze or mold or heat. See that all grain seeds are properly dried before you put them in winter storage.

The most efficient remedy for corn root rot found by workers of the North Carolina experiment station is to apply potash to the soil in the form of muriate or kainit when the crop is planted.

Arctic Explorers, Old and New



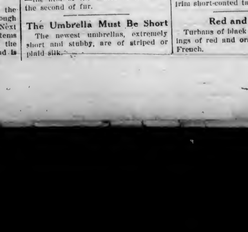
Scene in the Red Square, Moscow, when thousands of Russians paid tribute to Leonid Krassin's memory as his funeral cortege passed. He was the Soviet representative in England and one of Russia's best diplomats.

End of an Elephant Hunt in Kansas

HONOR DEAN CLARK

Thomas Arkle Clark, who originated the office of dean of men in American universities and who has served in that capacity at the University of Illinois for twenty-five years, will be honor guest at a dinner party January 31, to be attended by some 300 colleagues and friends, from various parts of the country.

AWARD FOR BRAVERY



Two famous explorers of the Arctic wastes met at the National Geographical society's Washington auditorium to receive medals for the Flyer plorers, and Dr. Knud Rasmussen, a famous explorer and authority on Eskimo rethes who has recently returned from a 20,000 mile trip in the North by dog sled and on foot.

W. W. Clemenja of Boston, Mass., who has been given the general medal and an award of $1,000 for attempting to save a woman from drowning at Miami Beach, Fla.

Orchard Information

COST SHOWN FOR GROWING PEACHES

A comparative study of peach costs in all important areas of the United States was made in the fall of 1927 by the United States Department of Agriculture. The work in California was carried on in co-operation with the State Agricultural college. Its results are now available showing the cost of producing peaches for the Fallbasin and Tuolumi districts.

Estimates were secured covering three years necessary to bring an orchard to bearing. In the Fallbasin area peaches were set 160 trees to the acre on land worth $300 per acre. They were given clean cultivation during the three years. A total of 195 man hours and 160 horse hours were used per acre in the three years.

The labor cost was $167; trees and necessary replanting, $47; spray material, $4.60; taxes, $30; water, $45; tithes, $21, $11, ditching, $100; making a cost of $351 per acre. At the end of the three-year period the orchard showed a total investment of $651, including the original land value of $300 and costs of care.

At Tuolmi the trees were set somewhat farther apart, 17½ by 17½ feet, giving 140 trees per acre. Here all costs per acre for the three-year period totaled $312. Land was listed at $250 per acre, making a total investment of $562. In the peach orchard at the end of three years.

Growers reported that these costs could be reduced in some cases by planting crops between the rows the first two years—E. Hardin, Associate Economist, Colorado Agricultural College.

Pruning Grapevines While Dormant Is Right Plan

By pruning the grape when the laterals are dormant, danger of injury from bleeding is avoided.

Young plants set out last spring are trimmed to one vine each and this shortened to two or three buds. The best-developed cane of the next two years age is pruned just long enough to reach and be tied to a wire about 30 inches from the ground. After the third seed is a vigorous cane coming from just below this wire is selected for a continuation of the trunk and is cut off slightly above the upper wire, 36 inches high. Two other canes are also chosen, tied to the right and left and cut back to six or eight buds each. At the fourth season's pruning two canes of the previous season's growth are tied to the top wire, one on each side of the trunk, and cut back to eight or ten buds.

The grape bears on wood produced the previous year. Depending on the variety, 30 to 50 vigorous buds will usually produce a ton of fruit and new wood which the average vine should be allowed to bear. In order to maintain the desired number of buds, four fruiting canes are usually left each year and all canes bearing fruit are removed except a few spurs or stubs of one or two buds each near the trunk to produce the fruiting canes for the following year.—J. S. Shoemaker, Ohio Experiment Station.

Oat Straw Favored as Mulch for Strawberries

Generally speaking, oat straw which has been cleaned of chaff is considered the best material for mulching strawberries. By removing the chaff the grains and weed seeds are pretty largely removed. Next best, in all probability, would be the barnyard manure, and barnyard manure with plenty of straw in it, if available, which is at the same time free from weed seed and grain. There is no question but what the extra fertility coupled with the mulch would be very desirable indeed. The trouble is that manure of this sort has a good deal of weed seed in it as a rule. Leaves usually mat down and become packed by spring, and for that reason their use is generally objectionable.

Horticultural Notes

Gardening keeps down the cost of living on the farm. It's no longer just a job.

• • •

No acre on the farm will pay better up-produce in fertility than that acre devoted to the home orchard.

• • •

Must home orchardists of apples and pears will need a dormant spray to control San José scale.

• • •

A real dry basement will not keep apples, potatoes and other roots as well. They shrivel up. To remedy this, sprinkle the floor occasionally.

• • •

Farmers generally have not yet come to know the value of a sharp pencil in making the various lines of farming profitable.

• • •

Farmers should learn to tie knots appropriate to the task at hand. Good knots are those which can be easily tied, are secure, and easily undone.

• • •

A prominent man, comments that you won't go wrong if you judge a farm by its improvements. If the improvements are good, he says, the soil is also likely to be pretty good.

• • •

Pruning of the young tree in the dormant should begin at the close of the first season's growth. It may be done in the late fall after most of the leaves have fallen, or in the winter or very early spring.

• • •

As soon as the leaves fall from the raspberries it is time to go through and take out all of the old canes. Next year the fruit will grow on the stems last grew in this year. Letting the old canes stand does no good, and is the means of developing diseases.

CLOTH GOWNS GAYLY TRIMMED; LUXURIES FOR EVENING MODE

A DRESS of navy twill, strictly tailored, is all right for practical wear, and a frock of navy twill glorified with red and gold embroidery enlivening cunningly contrived sleeves and collar is a different story—a story of an intriguing gown, handsome as handsome can be for smart afternoon occasion. Look at this picture and decide for yourself as to the effectiveness of just such a navy cloth dress for informal daytime wear.

What is true of this model is true of hosts of other cloth frocks this season—embroidery is "the touch that tells" their chic and charm. Thus through the medium of fanciful sleeve and discreet touches of gay stitchery

Embroidery Effectively Used.

the erstwhile humble cloth frock assumes a position of importance among "classy" daytime attire.

The decorative note for all costumes this season bespeaks metallic splendor. The glitter here and glitter there and the daytime dress is no exception to the rule.

In this ornate trimming class a new item has appeared—sponge braiding. The favorite is peach or flesh tint, though metal effects are also good. A black or navy blue dress of flat crepe with a simple finish of the new pink sponge banding at the throat and the inverted border of the sleeves is quite handsomely.

As to embroidery for the cloth daytime frock designers show a disposition to concentrate most needlework decoration on the fronting coat for the following year.—J. S. Shoemaker, Ohio Experiment Station.

Double Cuffs

Fur cuffs are now worn on coats in a distinctly novel manner. Instead of the fur being fastened over the sleeve as heretofore, it now emerges from a huge cuff so that you have two cuffs, one placed above the other at the second of fur.

The Umbrella Must Be Short

The newest umbrellas, extremely short and stubby, are of striped or plaid silk.

Red and Orange

Turbans of black velvet with swathings of red and orange are distinctly French.

Pussycat Bow Scarfs

Among many novelties of women's wear are long and narrow scarves, to be tucked round the neck and tied in a flyaway "pussycat" bow under the chin. Made in heavier, nubbish or some other close-haired felt, the tie is suitable for winter with the new trim short-cornered tailor suits.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

Life is a challenge and its laws
Are right ones and stern;
The splendid joy of real applause
Each one must nobly earn.
It makes us win in peace and war,
But gives us pause, if we're unfair.
—Grace Noll Crowell.

EVERYDAY GOOD THINGS

When one has a small family and a recipe makes too much for someone

before spoiling, think doughnut recipe will be welcome!

Doughnuts.—Cream two tablespoonfuls of shortening with one-half cupful of sugar, add one beaten egg, three cupfuls of flour sifted with three teaspoonfuls of baking powder and one-half cupful of milk. Set on to chill, then roll one-half inch thick and cut with a large cutter.

Banana Cream Cheese.—Cut peeled bananas into two-inch lengths, roll in beaten egg, then in grated cheese and fry in deep fat. These are delicious served with broiled bacon or baked ham.

Mock Mince Pie.—Take one cupful of bread crumbs, one cupful of raisins, one cupful of sugar, one cupful of cranberries cut into halves, one unit spoonful each of cinnamon, cloves, allspice and nutmeg, one cupful of hot water, one-half cupful of vinegar, and one tablespoonful of butter. Turn into a pie lined with flaky crust and bake with a top crust.

Pumpkin Pie.—Beat two eggs, add one-half cupful of sugar, a cupful of rich milk, a well-covered cupful of stiff cold pumpkin, one-half teaspoonful each of soda, one teaspoonful of baking powder, one cupful of raisins and one-half cupful of boiling water. Makes two dozen large cookies. Drop from a teaspoon on buttered sheet.

Apple, Raisin Roly Poly.—Roll out a rich pastry very thin. Add two well-beaten eggs dropped, one-half cupful of raisins and roll up. Place in a deep baking dish and add cupful of brown sugar, two tablespoonfuls of butter and one cupful of boiling water. Bake in a moderate oven one hour.

Nellie Maxwell

Want Only to Be Read

One of the amusements of idleness is reading without the fatigue of close attention, and the world, therefore swarms with writers whose wish is to be studied but to be read.—Johnson.

Both Have Virtues

"Spinach is good for the nerves," says a splunch fanatic, "good for the digestion, good for the teeth and good for the complexion." And pie is good to eat.—Detroit News.

EVERY SECTION BENEFITS FROM BELL EXPANSION

Nearly $28,000,000 Will Be Expended on Telephone Plant Additions In State This Year

5-YEAR TOTAL MAY REACH $100,000,000

Michigan Company Planning Enormous Activity at Scores of Points

One hundred million dollars will be added to the Michigan Bell Telephone Company's plant during the next five years, it is indicated by President Baron Parker's announcement of the company's expansion program for 1926 and that projected for 1927. Gross additions will bring the telephone plant for this state during 1926, totalled $21,161,000. The company's 1927 expansion program is expected to total almost $28,000,000.

Approximately 46,000 telephones were added to the plant during 1925, compared with a total of 45,000 in 1924, and probably a similar increase the coming twelve months.

This year the Michigan Bell plans to spend about $4,500,000 on construction of buildings and purchase of sites; $7,372,000 for central office equipment; $4,912,000 for subscribers' telephone equipment; $5,060,000 on exchange lines and $3,395,000 on additions to toll circuits. Purchases of material will include 2,500,000,000 conductor feet of copper wire in cable, 1,750,000 pounds of bare copper wire, 532,000 pounds of galvanized iron wire, 72,070,000 conductor feet of insulated copper wire, 1,886,150 feet of clay conduit, 47,000 crossarms and 46,000 poles.

Plant investment per telephone in service is increasing steadily, Mr. Parker observes, being $190.04 at present, compared with $155.89 in 1920. Indications are that it will reach $250.81 per telephone by 1931.

Many Exchanges Benefit

Many towns will benefit from the Michigan Bell's expansion program during 1927. New telephone plants will be provided at a number of points, larger ones at others, type of equipment will be changed at still others and more central offices will be added at some exchanges.

The Michigan Bell now has 1,691,006 miles of wire in service with the probability that its lines will be increased to more than 2,000,000 miles in 1927. More than half a million miles of wire has been added to the state's telephone plant since 1924.

Over the five-year period—1927-1931 inclusive—major expenditures for outside plant work will be made at many cities and towns, including Grand Rapids, Detroit, Kalamazoo, Allegan, Ann Arbor, Battle Creek, Niles, Flint, Pontiac, Birmingham, Saginaw, Bay City, Algonac, Big Rapids, Charlotte, Eaton Rapids, Fenton, Harbor Springs, Howell, Iron River, Ishpeming, Mackinac City, Oxford, Rochester, St. Clair, Wayne, Benton Harbor, Grand Haven, Menominee, Mt. Clemens, Royal Oak, St. Joseph, Traverse City and Bay City.

Many New Buildings

During 1926, the Michigan Bell Telephone Company placed in service new buildings and additions to central offices at a number of points, structures, sites and equipment, costing as follows: Iron Mountain, $155,000; Kalamazoo, $94,000; Niles, $145,000; Birmingham, $29,000; Ironwood, $41,000; Detroit, $3,589,000; Redford, $247,000; Roseville, $116,000; Plymouth, $132,000; Trenton, $53,000; Wyandotte, $197,000; Ypsilanti, $146,000. The following projects were started in 1926, with the indicated expenditures: Saginaw, $41,000; Battle Creek, $184,000; Pontiac, $106,000; Royal Oak, $172,000. The figures quoted above do not include amounts spent for cable and line construction. Telephone buildings erected the past two years or now under construction and contemplated for the immediate future, represent an investment, exclusive of equipment and outside plant of $3,000,000, with consequent large employment of local labor and materials at many points.

Building sites and central office equipment expenditures in 1927 will make a heavy total and will include: Ann Arbor, $152,000; Battle Creek, $768,000; Detroit, $7,264,000; Flint, $607,000; Grand Rapids, $493,000; Holland, $36,000; Ishpeming, $31,000; Jackson, $594,000; Kalamazoo, $67,000; Mt. Clemens, $58,000; Pontiac, $305,000; Port Huron, $85,000; Royal Oak, $460,000; Saginaw, $148,000; St. Joseph, $65,000; Traverse City, $154,000; Center Line, $78,000. The work at a majority of these points will call for large additional expenditures during 1928 and later.

New central offices will be placed in service the coming year at Battle Creek, Belding, Buchanan, Royal Oak, and Detroit. Other work is planned for the coming twelve months at Benton Harbor, Houghton, Escanaba, Iron River, Sault Ste. Marie, Menominee, St. Ignace and Reed City.

699,000 Telephones in State

The Michigan Bell Telephone Company now serves approximately 540,000 telephones. In addition, 269 local connecting companies that connect with the Bell lines, serve 159,000 stations, all of which can be reached from any Bell telephone, a total of 699,000 telephones for the state.

Daily telephone calls in Michigan total approximately 3,000,000 of which 1,800,000 are made each 24 hours in Detroit exchange.

Something of the enormity of the telephone company's task can be sensed from the estimate that to make the expected net gain of telephones in this state the coming year it will be necessary to make gross additions of 140,000, besides approximately 99,000 disconnections. In addition, change of address, will be made by upwards of 62,000 of the company's customers, each change involving a disconnection and a new connection.

There now are 16.1 telephones in Michigan per 100 inhabitants, an increase from 12.7 in 1920. The figure it is anticipated, will grow to 20.8 per 100 by the end of 1931, or more than one telephone for each five men, women and children in the state.

Long Distance Program Heavy

It is expected that the 1927 toll and long distance construction program of the Michigan Bell will be 50 per cent larger than the 1926 program, and will cost $3,395,000, an aggregate of $13,580,000 to be expended between now and the end of 1931.

Some of the larger toll cable projects scheduled for 1927 are: Detroit-Ann Arbor, $163,000; Detroit-Pontiac, $184,000; Detroit-Toledo, $82,000; Wyandotte-Trenton, $60,000; Plymouth-Northville, $40,000; Kalamazoo-Grand Rapids, $293,000; Niles-Kalamazoo, $22,000; Ann Arbor-Jackson, $448,000; Flint-Saginaw, $287,000; Detroit-Port Huron, $70,000; Owosso-Junction-Port Huron, $35,000; Port Huron-Bad Axe, $10,000; Bainesville-Bay City, $192,000; additional toll circuits outside of cable, $753,000; pole work, $373,000 of $1,730,000 estimated for the five-year period. Late in 1927, the Detroit-Ann Arbor cable will be extended as far as Jackson and will go on to Lansing in 1928, probably reaching Kalamazoo by 1930, on its way across the state.

Building of a second Pontiac-Detroit toll cable, underground most of the way, is one of the most important construction projects on the 1927 telephone program. Early in the year it is planned to push the Detroit-Pontiac-Flint cable on from its present northernmost point, Mt. Morris, to Saginaw. It is expected to reach Bay City before the end of the year. Between now and 1931 other new cables will be built to connect Grand Rapids with Grand Haven, Benton Harbor with Coloma, Coloma with South Haven, Wyandotte with Trenton, Lansing with Owosso, Owosso with Flint, Niles with Kalamazoo and Kalamazoo with Grand Rapids.

Routing the toll and long distance lines through cable means almost complete protection against storm damage and interference with the service.

Additional open wire toll circuits will be placed the coming year between Ann Arbor and Kalamazoo, Lansing and Grand Rapids, Kalamazoo and Benton Harbor, Jackson and Hudson, Bay City and Alpena, Port Huron and Bad Axe, Port Huron and Flint, Mt. Clemens and Emmet Junction, Petoskey and Mackinaw City, Marquette and Houghton and Menominee and Marquette.

To telephone people, the rapidly increasing use of the long distance wires by business in change is modern business activity that its lines will be increased to more than 2,000,000 miles in 1927. More than half a million miles of wire has been added to the state's telephone plant since 1924.

Over the five-year period—1927-1931 inclusive—major expenditures for outside plant work will be made at many cities and towns, including Grand Rapids, Detroit, Kalamazoo, Allegan, Ann Arbor, Battle Creek, Niles, Flint, Pontiac, Birmingham, Saginaw, Bay City, Algonac, Big Rapids, Charlotte, Eaton Rapids, Fenton, Harbor Springs, Howell, Iron River, Ishpeming, Mackinac City, Oxford, Rochester, St. Clair, Wayne, Benton Harbor, Grand Haven, Menominee, Mt. Clemens, Royal Oak, St. Joseph, Traverse City and Bay City.

Many New Buildings

During 1926, the Michigan Bell Telephone Company placed in service new buildings and additions to central offices at a number of points, structures, sites and equipment, costing as follows: Iron Mountain, $155,000; Kalamazoo, $94,000; Niles, $145,000; Birmingham, $29,000; Ironwood, $41,000; Detroit, $3,589,000; Redford, $247,000; Roseville, $116,000; Plymouth, $132,000; Trenton, $53,000; Wyandotte, $197,000; Ypsilanti, $146,000. The following projects were started in 1926, with the indicated expenditures: Saginaw, $41,000; Battle Creek, $184,000; Pontiac, $106,000; Royal Oak, $172,000. The figures quoted above do not include amounts spent for cable and line construction. Telephone buildings erected the past two years or now under construction and contemplated for the immediate future, represent an investment, exclusive of equipment and outside plant of $3,000,000, with consequent large employment of local labor and materials at many points.

THE THEATRE

"Blue Boy"—A curious circumstance, which, in the absence of authentic evidence can be accepted as fact, came to light during the weeks of research work conducted by Arthur Maude, director of "The Blue Boy," the two-reel Educational Romance Production in natural color, which will be one of the outstanding features at the Palace theatre Saturday and Sunday, Jan. 8-9.

Mr. Maude, in search of data on the famous painting, "The Blue Boy," found the painting is not, as popularly supposed the portrait of a boy of noble birth. On the contrary, a son of an English ironmonger posed as the model for the original, his research revealed. This in itself is not surprising as many famous paintings have been made from humbler subjects.

However, from the fact he uncovered out during his research, Mr. Maude advances the theory that "The Blue Boy" was conceived by the artist years before he started the famous painting. Mr. Maude bases this statement on the fact that the painting was finished in 1792, while the costume worn by the boy was that of fifty years earlier. It is therefore reasonable to assume that the idea had been conceived by Gainsborough many years before the painting was begun.

"High Stepper"—Mary Astor and Lloyd Hughes play the featured roles in "High Steppers," an Edwin Carewe production for First National. It comes to the Palace theatre next Wednesday and Thursday, Jan. 12-13. The film is based on the popular Sir Philip Gibbs' novel, "Heirs Apparent." Edwin Carewe directed. Mary Astor is cast in the role of a modern maid, who learns that stepping with her feet on the ground is more enjoyable than high stepping. Lloyd Hughes, the leading man, appears as a boy, who is swept up in the jazz-mad maelstrom of present day living until he meets the right girl.

A new "vamp" comes to the screen in this picture in the person of Dolores del Rio, Castilian beauty, who is remembered for the distinction of her acting in "Joanna," a reputedly released First National picture. She is considered one of the best movie "finds" of the year. Carewe introduced her to the screen. She is one of the Wealthiest girls in Mexico and belongs to one of the most aristocratic families.

Others in the cast of "High Steppers" are Alex Frances, Rita Carewe, John T. Murray, Edwards Davis, Charles Sellon, Clarissa Seymour, Emily Fitzroy and John Steppling.

"Eagle of the Sea"—Frank Lloyd just can't help being modest. Notwithstanding the fact that he has made what is acknowledged one of the mightiest productions ever brought to the screen, "The Eagle of the Sea," which comes to the Palace theatre Saturday and Sunday, Jan. 8-9, the board director refuses to accept any glory for its success.

On the day cutting and editing had been completed, the picture was received by B. P. Schulberg, associate Paramount producer, in a projection room at Famous Players-Lasky Corporation's West Coast Studio. So enthusiastic was Mr. Schulberg over the photoplay that he immediately wired Lloyd, congratulating him on his work.

"The Eagle of the Sea" was adapted from "Captain Salvarac," a novel by Chas. Tenney Jackson.

Judge Suspends Fine to Allow Honeymoon

New York.—Because he was arrested for speeding, James Patrano failed to enjoy his honeymoon after his marriage to Miss Anna Penzo, he told Magistrate Glutzmayer in Traffic court.

Patrano was arrested by Patrolman Fischer. He pleaded with Fischer not to give him a summons, explaining he was spending because of his desire to give out invitations for his wedding.

Magistrate Glutzmayer asked Patrano if he had married and received an affirmative reply.

"Where did you go for your honeymoon?" asked the magistrate.

"Well, judge, I was so worried about this case that I didn't dare take a honeymoon. We stayed home and saved money for the time."

"How much did you save?"

"I've got $50 in my pocket now," Patrano answered. "If it's more I'll have to go to jail."

Whereupon the magistrate suspended sentence and told Patrano to use the $50 for his belated honeymoon.

At Least, Not Hypocrites

They are called lower animals, but you never see one shaking hands with another—he doesn't like.—Exchange.

Primitive Bookkeeping

The old Acadians, or Cajuns, of southwestern Louisiana were a primitive people. Their customs, if quaint, were often ingenious. In those early days the salt furnished from the outside world were the commercial travelers. They saw some curious things.

One of them, making the round of the prairie in his buggy, stopped at a boutique, or small Cajun store. The proprietor could neither read nor write. Nevertheless, he had a card index system of credit of his own. This he kept upon pieces of plank, putting down first the mark peculiar to each debtor. Afterward he added a picture of each article that was bought and charged. An admirable system.—Adventure Magazine.

Plaster of Paris

Plaster of paris is derived from a mineral called gypsum. Burned first to dry off the superfluous water, the gypsum yields a fine chalky powder which, when moistened again into a paste, and poured into a mold, hardens into a perfect replica of its model, so making it useful material for cheap statues and the like.

Gypsum is found in many parts of the world, but as large part of Paris happens to be built over whole beds of it, that city became the first to discover this particular way of using it. Hence models and statuettes so fashionable were spoken of as being made of plaster of paris.

Old Babylonian City

Harran as a city of note is often mentioned in Babylonian inscriptions, and had many historical connections, though the excavator has not gone far with his investigation of its ruins yet. Nabodine, the last Assyrian king of Babylon, for instance, speaks of being inspired by the god to rebuild the temple Ehulhul (or House of Joy), while Esarhaddon is mentioned when rebuilding Harran, and describes in joyful fancy, honestly, honorably.—Spirit.

Flyers Feel Cold

Aircraft pilots who fly over the lonely mountains between Salt Lake City and Cheyenne have only two months—July and August—of summer. During these months they wear a thick horsehide-lined flying suit and gather a little heavy clothing in the alliance, attached to the motor, going full blast. In other regions the pilots put their regular flying suits on and turn off their engine heaters from May to September.

Notice to Automobile Owners!

George A. Roderick, County Clerk, will receive at his office in the County Court House, applications for automobile license number 1927, for forwarding to the branch Secretary of State office, 104 S. Park-st., Boyne City, from which place the licenses and plates will be issued.

No licenses will be issued before Jan. 1st. The use of 1926 licenses will not be allowed until Jan. 15th. Payment in cash, money order, or certified check will be received by August 1927, for the No personal uncertified checks allowed.

WANT COLUMN

WANTED—A teacher for High Island. A. C. Belding, Commissioner of Schools, Charlevoix, Mich.

WANTED—First-class old school boiler maker—steady job to right man. Sister Construction Co., Pontiac, Mich. 36-3t

FOR SALE CHEAP—Ten acres of land inside the city limits. Charlevoix State Savings Bank. 50-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARRY-REECH CO.
Charlevoix, Mich.

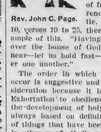
FOR SALE—300 foot frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA, 440 Pearl St., Boyne City. Phone 224. 11-tf

An Affirmation and an Exhortation

By REV. JOHN C. PAGE
Superintendent of Bon. Moody Bible Institute, Chicago.

TEXT—Seeing then that we have a great High Priest that has passed into the heavens, Jesus Son of God, let us hold fast our profession.—Heb. 4:14.

There are two brief phrases in this Scripture verse which give the key to



Rev. John C. Page.

the message of the epistle. Both these phrases consist of two words. The first phrase is "We have" and the second "Let us." The first may be regarded as an affirmation, and the second as an exhortation. The two phrases are of frequent occurrence in this epistle. In Chapter 10, verses 19 to 25, there is a fine example of this. "Having a high priest over the house of God, let us draw near—let us hold fast—let us consider one another."

The order in which these phrases occur is suggestive and calls for consideration because it is God's order. Exhortation to obedience of life and the development of holy character, is always based on definite affirmation of things that have been done for us. The question may be asked, "What is His work as our representative?" and the reply is, "He ever liveth to make intercession for all that come unto God by Him." Because of this He is able to save to the uttermost, that is right on to the end. And again it is written, "If any man sin, we have an advocate with the Father, Jesus Christ the righteous." His work for the cousins largely in these two things, intercession and advocacy.

In the fourth place the greatness of our High Priest is seen in the fact of His manifestation. As the High Priest of Israel, after representing the people in the Holy Place, returned in manifestation to them, so our great High Priest will come one day be manifested to His people. The writer of this epistle declares that "Christ was once offered to bear the sins of many and unto them that look for Him, He shall appear the second time, without sin unto salvation."

Following this affirmation that "we have a great High Priest," there comes the exhortation "let us draw near—let us hold fast—let us consider one another." In view of what God has provided in the person and work of His Son, the heart of the redeemed man and woman responds to the threefold appeal, both to God in his duty to man and to his fellow men.

Mean Fling at Texans

Mark Twain has a story about a man who consulted a brain specialist, because he suffered from severe headaches. The doctor suggested he should leave his brain, as it required exercising. When the man called a few days later, the doctor inquired if he had missed his brain very much. "Not very much," he replied. "I am an operatic tenor!"

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Home Affairs Veeper Service next Sunday.

We live in Charlevoix. Anything that has to do with the wellbeing of Charlevoix people is of vital concern to the church. The church has an obligation as well as right to let the community look at itself. Features of this service will be:

Talk, "Public School Equipment for Tomorrow," Mr. A. C. Belding, School Commissioner.

Talk, "The Possibility of a new School Building in Charlevoix," Mrs. Brayton Saltonstall.

Talk, "The Religious Element in Education," Rev. C. E. Pollock.

Motion pictures, "Ourselves as others see us," consisting of the faces of familiar scenes in a certain locality in Charlevoix county will be shown. Perhaps many of us will be in the picture. Come and calmy think about our home city and our home county. The hour is four fifteen—public hour.

Morning worship with preaching at ten thirty.

Men's meeting with supper at seven sharp next Monday evening. Mr. B. C. Mellencamp, of Boyne City, County Farm Agent, will be the speaker and will show two reels of pictures and speak concerning the work of his office.

The newly elected church school officers will enter upon their duties next Sunday at the school hour of twelve.

Epworth League meets for its devotional and study hour next Sunday at six p. m. The topic will be "Zones of Silence" with Miss Helen Richardson in charge.

The first of a series of Thursday evening lectures by the pastor will be given at seven thirty this Thursday evening. The subject this week will be "The Prophet of Moral Law."

Official Board meets this Thursday evening at eight thirty.

Father and Son banquet February twenty-eighth.

Dr. R. B. Armstong gave a very interesting talk to the men on the subject "Glands" last Monday evening. A fine company of men was present.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At the morning service, 10:30 the New Year Communion will be observed. The pastor will preach on the topic "The Lease of Life on Shares."

The Sunday School meets at 12 noon.

The Young Peoples' meeting will be held at six p. m. for both Senior and Junior societies.

At seven o'clock there will be a sacred concert by the Charlevoix Band held in this church to which the general public is heartily invited, under the leadership of the band leader, Hubert Herew, with about eighteen piece.

The pastor did not go to Ironton last week because of bad roads, but expects to hold services there next Sunday, Jan. 9th, if possible.

The forty-fifth annual meeting of the Charlevoix Church will be held in the dining room of the church Tuesday evening at 7:30, Jan. 11th, for reports of the church for the past year; election of officers and the discussion of plans and prospects for the church for the coming year. All friends interested in the work of the work of the church are heartily invited. At the close of the business session refreshments will be served and and an hour of good fellowship enjoyed.

Church of God

Rev. Paul L. Juno, Pastor

Services held at the Chapel on West Hurlbut Avenue:

Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.

The Sewing Circle will meet with Mrs. A. B. Chew Thursday p.m., 1:30.

Subject for Sunday morning "Why We Need The Holy Spirit's Anointing and What It Will Do for Us."

Christ when He trod the stone frosts of Galilee spoke to those who were in need of help, consolation, peace and happiness. He is the greatest ideal of moral man. The injunction, "Follow Me" goes out to the whole world. He is still our only spiritual example. His words are our only consolation and help. May his spirit still dwell within our earthly tabernacles of clay that we may be more like Him day by day.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Atonement."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesday and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:30 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelo.

Ten-Year Spaghetti Pals Die Together

New York.—Through the last ten of their destitute years, Citro Scarpati, seventy-four years old, and Frank Ferraro, sixty years old, slept in the same room, rested their aging legs under the same board while they ate spaghetti together, and drew their living from a common source as they worked together in a cigarette factory.

Recently the two old pals visited friends and at night went to bed in their little two-room apartment at 301 East Seventy-sixth street. Mr. Scarpati in his cot on one side of the room, with his beloved banjo on the wall above his head, and Mr. Ferraro on a twin cot on the opposite side of the narrow room.

In the morning it was learned that death had visited the room in which the two old men had lived for ten years and had taken them as they had lived—together.

When Joseph Scarpati, son of the older man, broke in the door, the room reeked with gas that continued to flow from a stove that many times had warmed the two aged companions.

Father Abandons Baby After Its Mother Dies

Camden, N. J.—"Sarah Jane" two son, two weeks' old baby, who was deserted by her father a few hours after her mother died in the West Jersey Homeopathic hospital, is measured at home. Four families have offered to adopt the baby, hospital officials say.

The mother, Mrs. Martha Wilson, died in the West Jersey Homeopathic hospital a few hours after the baby was born. A few hours later her husband, Charles, left the hospital and told he would return for the baby. He made arrangements to remove the body.

Since that time nothing has been heard from him. It was later learned by Probation Officer Penn, who is investigating the case, that the husband is in California.

Dickens' Son Finds Name Has Handicap

London.—Bearing the name of an honorable celebrity is sometimes a handicap. When celebrating his golden wedding, Sir Henry F. Dickens, son of the novelist, said the name he bore had been an advantage to him in some ways, but in others it had been a disadvantage because people had expected so much of him.

In making a presentation, Sir R. Marshall Hall said Sir Henry combined in himself all the lovable qualities of the many lovable characters created by Charles Dickens, his father.

Eskimo Snow Huts

Although there are no windows in the snow hut houses of the Eskimos, the ventilation is not so bad as might be expected, for the cold in the snow itself full of air, but, being porous, it permits fresh air to penetrate through it, so that, when one blows his hand near the wall, he can tell against which side the wind is blowing. This circulation of air, without seriously diminishing the temperature within, serves the purpose of preventing the hut from melting away. The Eskimos live in warmth in these snow huts even if the houses are not particularly comfortable. One of the unhandy features is the mode of entrance, which is through a long, low tunnel or hole in the floor of the hut, and this tunnel also that the smoke from the fire in the center of the hut finds egress.—London Tit-Bits.

Looks Count

The psychology of looks, contrary to a trite saying, is sometimes more than skin deep. It is rooted in one's very mind and in many instances one could be directly traced to the day the individual discovered he or she was losing hold, because of unprepossessing appearances. I have been given too many confidences to discredit the flippant statement that "looks don't count." Looks do count. Looks are the most outstanding factor whether or not we acknowledge it to ourselves.—Beauty Culture.

Always a Pioneer

The beaten track may be the best; but some one must leave himself for the first time.—The Outlook.

Lodge Door Lock Plays Trick on Card Players

Milwaukee.—"Honestly, m'gun, I went to lodge last night."

This was the cry of seven members of the Merry Park camp of Modern Woodmen when they tried to explain to their respective wives just how it was that they got home so early in the morning.

The seven, Harry Lumley, George Stagg, Martin Weyer, Alexander Richter, Julius Romasan, William Koch and Charles Bolton, gathered in a back room of the meeting hall on Nineteenth and Wells streets after the regular lodge session for a game of skat. They forgot to take their axes with them and so, when they found that the janitor had locked them in, it took some time before they could force their way to a telephone and appeal for aid.

New Light on History

Julius Caesar and his friend Cassius were walking in the forum one day when they met a couple of pretty slave girls. "What a wise old soul they were, a glad hello as he passed along.

"Well, was them gals?" asked Cassius.

"I don't know," said Julius, "but I'm forum."

It was at that moment that Cassius decided that his relationship must be done to free Rome of this monster.—Detroit News.

The Michigan Bell Telephone Company

CALLS attention to the two general classifications of Long Distance Telephone Service and rates:

1—*Particular Person Calls*—To be used when you must talk to a particular person.

Rates on Particular Person calls are the same, day and night.

2—*Anyone Calls*—To be used when you can talk with anyone who answers your call.

There are Day, Evening and Night rates on Anyone calls, as follows:

Day Rate, 4:30 a. m. to 7 p. m.—This rate is considerably lower than the Particular Person rate.

Evening Rate, 7 p. m. to 8:30 p. m.—Approximately 35 per cent lower than the Day rate.

Night Rate, 8:30 p. m. to 4:30 a. m.—Approximately 50 per cent lower than the Day rate.

THERE IS NO CHANGE OF RATES AT MIDNIGHT

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Jan. 8-9

"The Eagle of the Sea," with Florence Vidor and Richards Cartez. Swashbucklers, thrills, sea fights, old lace, crinoline, Napoleon, quaint New Orleans, the Spanish Main, the cross-bones, mid-night revels, love in moonlit gardens, mashed balls, wooden-legged pirates, chivalry, plank, walking-pieces of eight—that's "The Eagle of the Sea." A big special better than "The Black Pirate" Also "The Blue Boy,"suggested by Sir Thomas Gainsborough's famous painting. The story of a mothers' undying love and its reward. Exquisitely told in natural colors. It's another Romance production more beautiful than "The Vision." A double program—no advance in prices.

Wednesday-Thursday, Jan. 12-13.

"High Steppers" with Mary Astor and Lloyd Hughes—they're playing the anthem of riotous youth! High Steppers! Fancy Steppers! Fast Steppers! The whole whirling cakewalk of modern young society, jazzing past all danger signals while the bill mounts for a final reckoning. Also Fox News and "The Lodge Police."

Coming—"Varsity."

—PERSONALS—

Home talent entertainment at M. E. church, Jan. 11. 34-3t

Attorney E. N. Clink, of East Jordan, was a Charlevoix visitor last Saturday.

Members of the local W. C. T. U. are making plans for the observance of Victory Day on Jan. 16th.

Dean and Vaughan Ogden returned to M. S. C. to continue their student work, early this week.

Murray Glascow returned to Notre Dame early this week, following a visit here of two weeks with his parents.

Hear the colored gentlemen sing old southern songs at the home talent entertainment, M. E. Church, January 11.

Cecile Louise Pollock and Freda McMullin returned to their respective schools Monday, Albion and Ann Arbor.

Harold McMulkin, a student at M. S. C., after spending a short vacation here, returned to East Lansing last Sunday.

Raymond Faulkner returned to Ann Arbor early this week where he will continue his course of study at the U. of M.

Forrest Brown returned to the Michigan State College early this week following a visit here during the vacation period.

Mrs. Greensky, in indian costume, will sing indian ballads at the home talent entertainment at M. E. Church, January 11.

Margaret Fitch after spending her holiday vacation with her parents, returned to Western State College, Kalamazoo, last Sunday.

Val Scruggie, a guest of his grandparents, Mr. and Mrs. Wm. Scruggie, during the holiday season, returned to Detroit last Sunday.

Miss Joice Mayne spent the holidays with relatives here, returning to Kalamazoo last Sunday to resume her school work at the Western State College.

Mr. and Mrs. A. E. Jacobs, of Grand Rapids, spent the week-end with their parents, Mr. and Mrs. H. B. Jacobs, returning to Grand Rapids Monday.

Miss Marjorie M. Myers returned to Ann Arbor last Monday to resume, her studies at the U. of M. after spending about two weeks with her parents, Mr. and Mrs. F. S. Myers.

Gilbert Saltonstall, after spending the holidays with his parents, Mr. and Mrs. Brayton Saltonstall, returned to Ann Arbor last Sunday to continue his student work at the U. of M.

Mrs. C. E. Bailey contemplates spending the next few weeks in California. With this in view she started from Charlevoix on her westbound trip last Tuesday expecting to arrive in Los Angeles within a few days.

All lovers of band music are heartily invited to attend the special band service at the Congregational Church next Sunday evening at 7:00 p. m. We are looking for a crowded house and offer a welcome to all who come.

Mrs. W. S. Richardson according to present plans, will leave California next Monday with Anaheim as her first objective where she will visit relatives for a short time before proceeding to Long Beach where she contemplates making an extended visit.

Mr. James Gaskiw who a few days ago suffered a sudden and serious illness which was very alarming to relatives and friends is making rapid improvement at this writing and will soon be as well as usual, according to information received by Relatives and friends, a large number of them, were splendidly entertained by Mr. and Mrs. Olaf Nordrum at their home, 105 Park-av., last Friday night. Games, music, refreshments, and a general good time was the order of the evening and in these the evening was pronounced a huge success by the large number of guests.

Fire that was confined in the main to the kitchen at the P. R. Ross residence necessitated action on the part of the fire department last Monday. The damage which is for a nominal amount, was due to some considerable extent to the smoking up of the interior of the dwelling with a moderate proportion on account of actual burning damage.

ARE YOU GUILTY?

A FARMER, carrying an express package from a big mail-order house was accosted by a local dealer.

"Why didn't you buy that bill of goods from me? I could have saved you the expense, and besides you would have been patronizing a home store, which helps pay the taxes and builds up this locality."

The farmer looked at the merchant a moment and then said:

"Why don't you patronize your home paper and advertise? I read it and didn't know that you had the stuff I have here."

MORAL—ADVERTISE

James R. Furman, of Boyne City, has been appointed a member of the state board of dental examiners by Governor Green.

Mr. T. J. Fotters was a business visitor in Charlevoix last Thursday afternoon, making the trip from Harbor Springs via the motor route.

Dr. and Mrs. A. Lawson Baxter and daughters, Misses Alice and Charlotte, of Central Lake, were business visitors in Charlevoix last Monday.

Miss Phila Armstrong returned to Ann Arbor last Monday after spending her holiday vacation with her parents, Dr. and Mrs. R. B. Armstrong.

Miss Dorothy Dean, a teacher in the schools at Cadillac, spent the vacation period with relatives in Charlevoix, returning to her school duties last Sunday.

Miss Catherine McCann, student at the U. of M., returned to Ann Arbor last Monday after spending the holiday season with her parents, Captain and Mrs. John McCann.

Messrs. John Boen and Alford Ward spent several days on a business trip visiting several places north of the straits, returning to Charlevoix during the early part of this week.

Miss Hilda Ilyers went to Detroit last Saturday and will enter Harper Hospital where she will spend the next three months, with the intention and expectation of graduating as a trained nurse.

Mr. A. E. Mason entered the hospital Wednesday suffering with an acute attack of appendicitis, where he was operated successfully. Mr. Mason is resting comfortably today and there is every reason to believe that he will speedily recover from his recent experience.

Mrs. Lou Allard entered the Charlevoix hospital a few days ago for a major

Touring World on Skates

A Scotsman, one Robert McCrae, is attempting to tour the world on roller skates. He has left Shanghai into China, after starting from London about a year ago. Incidentally he has already worn out ten pairs of skates.

A pessimist is a man who believes that every chestnut has a worm in it.

Garfield Tea

Was Your Grandmother A Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements (recalled under Master Jaggins' name, Master Jaggins vouches for you. That is sufficient for me. What say you, Colden?

"Quite sufficient," agreed the surveyor general. "Do you wish me to remain, sir?"

"Certainly. Glad to have you. Now, Master Ormerod, do you tell us as fully as you may what you know of Murray. Master Juggins hath stated you for a prominent part. I respect his judgment, but none than our immediate fortune hinges upon the issue of what we do, and I must know all."

I recounted the circumstances of my meeting with Juggins, the bearing before the Board of Trade and the incidents of the voyage, not forgetting Tom's assault upon me and the strange bargain I had made with Murray.

"Then are you safe from denunciation," broke in the governor. "We think little of Hanoverian or Jacobite in New York. Here, Master Ormerod, you will find only Englishmen laboring to wrest a living from the wilderness and to extend their country's power and richness. What you were matters little. 'Tis what you are we pledge you by.

The bargain was typical of Murray. He is no ordinary villain. Already he hath persuaded the discontented elements in the province that I would take the bread from their mouths by stopping the furs. He hath done well that I would leap upon the excuse to lay him by the heels, and he will see to it that no suspicion of your past escapes."

"He threatened me with the Red Death this morning," I said. "Can you tell me what he meant by it?"

"'Tis a saying of the frontier," explained the governor. "They call redheaded bleeding and Murray's negro, Tom, the Red and the Black Death, for Murray is charged with having used them to remove from his path those persons he considers dangerous or whom he honors with his dislike."

"In the crowd I also heard talk of the Doom Trail," I continued.

Governor Burnet smiled grimly.

"That is the popular name for the route by which Murray smuggles his trade goods to Canada. 'Tis said to be the stealing of a man's doom if he seeks the trail or any information concerning it."

"Has the traffic been suspended during Murray's absence?" I asked.

"No," replied the governor. "Rolling and Black Robe have kept it in motion."

"And who is Black Robe?"

The governor laughed outright.

"You are red-hot for, dangerous information, Master Ormerod. Black Robe is the Indian's name for one Pere Lyacinthe, a Gallic missionary, who, according to some of the tales our agents bring, shares with Murray the credit for conception of the conspiracy we are detailing.

"But where Murray plots for the overthrow of English rule in America in order to bring back the Jacobites and enrich himself, Black Robe's ambition is to establish France as the supreme temporal power in the world and to extend the influence of the pope by making his religion universal on this continent as it is in South America."

"Where do Black Robe and Murray make their headquarters?" I inquired.

"Murray spends part of his time in New York or in Albany, but most of the year he is absent. He says he is on trading expeditions—and we may not disprove it. But we think he stays at a station which is said to form a depot for the stores smuggled over the Doom Trail. Black Robe is reported to have a chapel there."

"The called La Vierge du Bois," added Colden.

"And where is it?"

PRECEDING CHAPTERS

Harry Ormerod, proscribed traitor to King George as a Stuart partisan, returns to France to locate Juggins, secret agent of Roman Robert Juggins from assassination. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Juggins feels himself indebted. Ormerod tells Juggins he has abandoned the Stuart cause. Juggins informs him of a Jacobite plot in the American colonies to weaken England by forwarding French interests. At its head is Andrew Murray, a Scotsman, and a Frenchman, De Vesle, deadly enemy of Ormerod. The two are in London furthering their schemes. Anticipating the plotters' return to America, Juggins arranges for Ormerod to go there with letters to Governor Burnet, friend of Juggins, and work to foil Murray's plans. Ormerod and Juggins' servant, Ormerod takes passage to America on a ship in which Murray, a girl, Murray's daughter, and Jacobite, who believes the girl loyal to the Stuarts. De Vesle recognizes Ormerod and exposes him. Taken by surprise, Ormerod is thrown overboard by the negro, Tom, but regains the deck in safety. He accuses Murray of complicity in the attempt on his life, but of course has no proof. All parties agree on a truce until they reach New York. There Ormerod saves the Indian chief, Ta-wan-ne-ars, from insult, and introduces himself to Governor Burnet, in council.

CHAPTER V—Continued
—10—

There was a murmur of assent as the meeting broke up.

"One moment, your excellency," I interposed. "I have also a letter from Master Juggins for the honorable Cadwallader Colden of your council—if he is here."

"Indeed, he is," assented the governor. "A moment, if you please, Colden."

A thin, bustling man, with very bright black eyes and a ruddy complexion detached himself from the exedus and resumed his chair. His nervous fingers quickly tore loose the envelope of the letter I handed him, and he began devouring its contents, regardless of the confusion around him.

"Until tomorrow, gentlemen?"

The governor bowed the council out, and shut the door upon the last of them. He beckoned me forward.

"Sit here beside us, Master Ormerod —for so I see you are rightly named, although you traveled under Master Juggins' name. Master Juggins vouches for you. That is sufficient for me. What say you, Colden?

"Quite sufficient," agreed the surveyor general. "Do you wish me to remain, sir?"

"Certainly. Glad to have you. Now, Master Ormerod, do you tell us as fully as you may what you know of Murray. Master Juggins hath stated you for a prominent part. I respect his judgment, but none than our immediate fortune hinges upon the issue of what we do, and I must know all."

I recounted the circumstances of my meeting with Juggins, the bearing before the Board of Trade and the incidents of the voyage, not forgetting Tom's assault upon me and the strange bargain I had made with Murray.

"Then are you safe from denunciation," broke in the governor. "We think little of Hanoverian or Jacobite in New York. Here, Master Ormerod, you will find only Englishmen laboring to wrest a living from the wilderness and to extend their country's power and richness. What you were matters little. 'Tis what you are we pledge you by.

The bargain was typical of Murray. He is no ordinary villain. Already he hath persuaded the discontented elements in the province that I would take the bread from their mouths by stopping the furs. He hath done well that I would leap upon the excuse to lay him by the heels, and he will see to it that no suspicion of your past escapes."

"He threatened me with the Red Death this morning," I said. "Can you tell me what he meant by it?"

"'Tis a saying of the frontier," explained the governor. "They call redheaded bleeding and Murray's negro, Tom, the Red and the Black Death, for Murray is charged with having used them to remove from his path those persons he considers dangerous or whom he honors with his dislike."

"In the crowd I also heard talk of the Doom Trail," I continued.

Governor Burnet smiled grimly.

"That is the popular name for the route by which Murray smuggles his trade goods to Canada. 'Tis said to be the stealing of a man's doom if he seeks the trail or any information concerning it."

"Has the traffic been suspended during Murray's absence?" I asked.

"No," replied the governor. "Rolling and Black Robe have kept it in motion."

"And who is Black Robe?"

The governor laughed outright.

"You are red-hot for, dangerous information, Master Ormerod. Black Robe is the Indian's name for one Pere Lyacinthe, a Gallic missionary, who, according to some of the tales our agents bring, shares with Murray the credit for conception of the conspiracy we are detailing.

"But where Murray plots for the overthrow of English rule in America in order to bring back the Jacobites and enrich himself, Black Robe's ambition is to establish France as the supreme temporal power in the world and to extend the influence of the pope by making his religion universal on this continent as it is in South America."

"Where do Black Robe and Murray make their headquarters?" I inquired.

"Murray spends part of his time in New York or in Albany, but most of the year he is absent. He says he is on trading expeditions—and we may not disprove it. But we think he stays at a station which is said to form a depot for the stores smuggled over the Doom Trail. Black Robe is reported to have a chapel there."

"The called La Vierge du Bois," added Colden.

"And where is it?"

"If I knew, I should order a levy of the militia and burn it down at risk of my head," retorted the governor.

"But you must have some idea where it is?" I pressed incredulously.

Governor Burnet put down his pipe and unrolled a large scroll map which lay amongst the papers on the table.

"This is New York, Master Ormerod. Our settlements are confined to the coast districts, the island of Nasau (Long Island)"—he motioned toward the window—"and the valley of Hudson's river. We have barely begun the task of colonization. There is room here for every soul in England—and to spare."

With his pipe-stem he pointed to the upper left corner.

"All this country is virgin forest. On the north and northwest 'tis bounded by the inland sea which we call Lake Cadaraqui (Lake Ontario); to the southeast stretch the Adirondack mountains. Somewhere between these boundaries runs the Doom Trail. There are thousands of square miles of wilderness to search for it."

"And the Keepers of the Trail by guard its mystery," put in Colden.

"Who are they?" I questioned, as anxious as a small boy for further details.

"The Ho-un-ne-gugn-ne-yuh," he repeated. "The Indians are a superstitious people, and they have come, to believe that there is some supernatural agency behind the Keepers of the Trail. In plain English, they fear the Trail is haunted. They tell me by the False Faces, a race of demons from the underworld, to whom Murray has sold his soul, and that the demons have rallied to his aid."

"At every turn we run against the shrewdness and wit of this fellow Murray," observed the governor. "'Tis at once a tribute to his ability, and perhaps an index to our inferiority, that we have never been able to secure certain information of his operations."

"'Tis evident, your excellency," I ventured, "that the lords of trade will accept only positive evidence that he hath evaded the law."

"That means legal proof of smuggling," reflected the governor.

"And now that the lords of trade have suspended our law, his operations are no longer illegal, strictly speaking," said Colden. "But I make no doubt he will continue to handle the bulk of his goods over the Doom Trail, for his will not care to have his dupes the Indians realize the enormous tribute they pay France through him."

Governor Burnet absently bit down upon the table with a thud.

"Gadslife!" he swore. "There is naught for it but war! We must be after the dog! We must run him down! Tut we must move unofficially. What say you, Colden?"

"We can do nothing with official support," rejoined the surveyor general, "and 'tis probable we shall receive the instructions of the lords of trade to suspend the law by the next Bristol packet."

"There can be no question of that," agreed the governor. "Well, the law shall be suspended. I will have the suspension publicly proclaimed. Then under cover we must concert the measures to be taken. That will be for Master Ormerod. Do you still crave the opportunity, knowing now the full measure of its perils, sir?"

"I am more anxious, if possible, sir," I answered, "I speak French sufficiently well to pass on the frontier for a Frenchman. As for danger—why, your excellency, the man who has ruined his life can have no fear for it. He has all to gain and nothing to lose."

"True," assented the governor. "But you know nothing of woodcraft or the life amongst the savages."

"Master Juggins gave me a letter to one Peter Corlaer, s—"

Colden sat suddenly erect.

"Peter came this morning with the Seneca chief, if your excellency will remember."

"So he did. We will have him in."

Colden went out, and returned at once with two companions. One I recognized, to my amazement, as the Indian I had befriended an hour or two earlier. He greeted me with a faint smile. To the governor he rendered the splendid arm-high salute, and his deep voice boomed out—

"Qua, Ga-en-gwa-ra-go!" ("Hail, Great Swift Arrow"—the Indians' name for the governor of New York, who ever he might be.)

The other man was more like a tavern keeper than a woodsman. At first glance he seemed all paunch, but when you studied him closely you saw that his fat was firm and hard and formed a sheathing for the most powerful set of muscles any man ever had. His face was tremendous, with little, insignificant features; but his eyes, behind the rolls of fat which almost masked them, twinkled with constant interest and animation, belying the air of stolid stupidity he affected.

"This is Corlaer, Master Ormerod," said the governor. "And with him is come a friend of ours, one of the two war-chiefs of the Six Nations, Peter. Master Ormerod hath a letter for you from Master Juggins in London."

"Ja," he said vacantly.

I handed him the letter. He turned it over and over in his hand and picked at the seal. Then he handed it to the Indian.

"You read it," he said.

I looked from one to the other with astonishment; but 'twas the governor who intervened.

"Your pardon, Peter," he said good-naturedly enough, "but that letter happens to deal with a most confidential subject."

"Oh, ja," said Corlaer indifferently. "Ihut I do not read."

"Take the letter, Ga-en-gwa-ra-go," said the Indian. "Ta-wan-ne-ars does not speak your secrets. But you need have no fears. This young Englishman is Ta-wan-ne-ars' friend."

And in his sonorous English, with a slightly guttural intonation, he recounted how I had rescued him from his childish persecutors.

The incident recalled my promise, and I broke in impetuously upon his closing words.

"Ayes, your excellency, but he hath forgotten to add that I pledged myself to beseech you to make it illegal to sell rum or Indians in the city streets."

"An excellent thought," approved Colden. "We have trouble enough winning the friendship of the tribes without subjecting the visiting chiefs to humiliations in our midst."

"It shall be done at once," declared the governor.

He drew forward a fresh sheet of paper and hurriedly scrawled upon it the necessary instructions, then returned his attention to the Indian.

"Ta-wan-ne-ars," he continued, "I need your friendship. I need the friendship of every one of your people for my King."

The Seneca drew himself erect.

Hatred in the heart of the Indian, caused by the knowledge of an unavenged wrong, is to furnish Germany a valuable ally in the work he has come to America to do.

(TO BE CONTINUED.)

Poisoned Grain Not Harmful to Birds

The assumption that game birds may be killed by grain poisoned with strychnine and distributed to kill rodents and predatory birds found to be without foundation. Feeding tests have shown conclusively that the gallinaceous birds as a group, including quail, the prairie hen, sharp-tailed grouse and sage grouse, possess a certain immunity from strychnine poisoning.

A striking test made several years ago in California definitely proved that barley, poisoned according to the bureau's standard ground squirrel formula is use in that state, had no effect on the abundance of the valley quail. These birds were plentiful, and remained so in areas which were heavily poisoned. Not a single dead quail was found, nor were any observed showing symptoms of strychnine poisoning. Quail subsequently shot showed that they had been eating the barley to a limited extent. Some of the birds were captured and fed a poisoned mixture of barley. One adult quail ate 125 kernels of this poisoned barley in 24 hours with no sign of ill effects. This grain would have killed 12 young squirrels.—Veterinary Medicine.

Be Careful With Mirrors

A very common belief is that the breaking of a mirror will bring seven years of bad luck. This belief is said to have come from the use of mirrors by magicians in former times. If the magician broke the mirror those who consulted him could get no replies to their questions. But the nature of the ill-luck sometimes depends upon who breaks it. If a maiden breaks a mirror superstition has her that she will never marry. On the other hand, if a married woman breaks it, the "ages" is death.—Exchange.

Seal the Bargain

The young plumber had proposed to the girl that evening and had been accepted. Several hours later they parted and he went home.

At three o'clock in the morning a loud ringing of the front door bell of the girl's abode was heard. Her father, roused from slumber, went to a window and, sticking out his head, inquired who was there.

"It's John," said a voice, from below; "I asked Agnes to marry me and she said she would, but I forgot to kiss her."

Shaved With Fire

The Indian method of shaving was to burn off the hair by means of a greased stick, lighted in a fire.

BOXING CROWD MARK TO STAY

Another Turnout of 130,000 Not Probable.

Gene Tunney and Jack Dempsey established a record for gate receipts and attendance for boxing which will stand for many years to come. Chances are none of the 130,000 spectators who witnessed the championship fight in Philadelphia will live to see this mark surpassed.

The Tunney-Dempsey fight was what boxing promoters call a natural. Dempsey for ten years had been one of the most colorful and spectacular fighters the heavyweight division ever boasted. He battled his way to the top by knocking out his opponents in short order, and with the exception of Tommy Gibbons bowled over all challengers after he ascended the throne.

Tunney, on the other hand, was a boxing product of the A. E. F. He first became interested in boxing while serving with the United States marines in France. Gene displayed natural aptitude for the fistic sport and with the advice of athletic directors launched upon a professional career. He only aplotch on his pugilistic escutcheon.

Philadelphia, celebrating its Sesquicentennial exposition, proved an ideal setting for the championship battle. News of the fighters' training. Tunney's chances and speculation on Dempsey's condition was further augmented by legal entanglements which threatened to stop the contest.

Threats of Jack Kearns, B. O. Clements and Paddy Mullins to prevent the fight served to give the affair added publicity, with the result that the public paid $1,800,000 to witness the struggle, to say nothing of spending another $1,000,000 in railroad fare and hotel expenses.

With Dempsey passing from the picture there is not another fighter on the heavyweight horizon capable of duplicating the Philadelphia gate with Tunney.

"Rabbit" Maranville Is to Join Rochester Club

"Rabbit" Maranville, former major league star, has been signed by the Rochester club, of the International league, to play second base next season.

Maranville will return to the manager who had much to do in making the "Rabbit" a star. It was under George Stallings, manager of the Rochester club, that Maranville broke into the major leagues. The "Rabbit" was with the Braves in 1914 when they won the National league pennant.

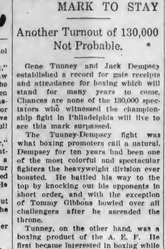
Maranville's last major league club was Brooklyn, which obtained him from the Chicago Cubs last winter through waivers. He is thirty-four years old.

To Consider Important Changes in Race Rules

Important changes in the rules governing harness racing will be considered at the meeting of Grand Circuit stewards to be held at Lexington, Ky., August 16, when eligibility rules and classify horses on the basis of their winnings, instead of by time records, a system in vogue.

Some members consider it likely that Detroit and Grand Rapids will return to the circuit next year, in which event the big league of harness racing will be restored to its former scope. Cleveland, Toledo, Syracuse, Kalamazoo, Mich., Indianapolis and Lexington are the other members that are practically assured.

Heilmann Misses Classic



Harry Heilmann, Detroit outfielder, is one of the few premier hitters having got to participate in a world series.

Heilmann came to the Tigers in 1914, or five years after Detroit had won the gonfalon for the third time in a row. Since the big fellow joined the club Detroit has got as much as second, but there it stopped.

Kentucky Derby in 1927

Next year's Kentucky derby will be run Saturday, May 14, Col. Matt Winn of the Kentucky Jockey club said. Colonel Winn plans to open Churchill Downs May 7. This preparatory step was taken, Colonel Winn said, because of the record-breaking attendance expected at the race. The entrance of "The Satrap," William Dupont's recently purchased two-year-old champion of England, adds an international aspect to the derby, which has always proved a big drawing car.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

The Huguenots

AN INSANE man, foaming at the mouth and muttering incoherent prayers to the saints, crouched in the embrasure of one of the upper windows of the palace of the Louvre, at Paris, on the night of August 24, 1572. He was gripping a gold-chased musket which he fired at intervals into the throng of panic-stricken men and women who rushed screaming along the dark street below. The madman was King Charles IX of France, son of that Henry II who had slain William the Silent of a plan to massacre all the Huguenots in France. A series of strange events had led up to this midnight scene of wholesale murder.

The Protestant creed (started many years before in Germany by Martin Luther) had spread into France. But there it had, to a great extent, lost its religious significance. The French Protestants (or "Huguenots," as they were called) became largely a political party. The so-called religious wars, massacres, etc., in France during the Sixteenth and Seventeenth centuries had far more political than pious significance.

Henry II had married, for political reasons, an Italian woman, Catherine de Medici, daughter of the magnificent lord, of Florence, Henry neglected her, and in his illtimes she was of little consequence. But on his death she came to the front as the most powerful, most dangerous power of her time. Among other Italian customs she introduced into France were assassination by poison. She had four sons—Francis II (who married Mary Queen of Scots), Charles, Henry and Francois. All died childless, and three of them (Francis II, Charles IX and Henry III) were successively kings of France.

The Lorraine family, whose head was the duke of Guise, were all-powerful at court. When Francis II died and Catherine became regent for her young son, Charles IX, she sought to curb the growing influence of Guise by favoring the Huguenots. The leaders of the Huguenot party were Louis, prince of Conde, young Henry, prince of Bearn (afterwards king of Navarre and still later King Henry IV of France), and Admiral Coligny. Henry was head of the Bourbon family, as Charles IX was of the Valois family. In 1562 civil war broke out between Guise's followers and the Huguenots. Conde was captured and killed, Guise was murdered. His son, who succeeded to the dukedom, declared that Admiral Coligny was his father's assassin and swore blood vengeance on him.

At last the Huguenots grew so powerful that Catherine feared them as much as she had once feared the Guises, and she threw her influence with the latter. Charles IX had meantime come to manhood and was strongly in favor of the Huguenots. He loved Coligny and regarded Henry of Navarre as his own brother. Catherine viewed with alarm this attitude of her son. Then she and Guise concocted a plot that has made both their names odious.

They arranged a marriage between Charles' sister, Margaret, and Henry of Navarre, and invited all the Huguenots in France to come to Paris for the ceremony. The wedding occurred August 18, 1572. While the festivities were in progress Catherine hastened to Charles with the false news that Coligny and other Huguenots were conspiring against his life. Charles was weak, credulous, and, moreover, was subject to fits of temporary insanity. By working on his fears Catherine and Guise persuaded him that he must plan a massacre of the Huguenots, under Coligny's orders, were planning a massacre of Catholics showing any willingness to murder himself and those dear to him. Insane with fear, he cried:

"Kill Coligny! Kill every Huguenot! Let none be left alive to reproach me!"

Guise had beforehand laid his plans. He was the idol of the populace. Through his agents he instructed the townsfolk and rabble to assemble at midnight on August 24 (St. Bartholomew's day), and at a given begin a wholesale slaughter of Huguenots. The Huguenots, taken wholly by surprise, died like sheep under their butchers' weapons.

Guise, full of his old-time vengeance against Coligny, hurried to the hotel where the admiral lay ill in bed. The defenseless old man was stabbed a dozen times and his body hurled into the courtyard below.

The wave of massacre spread through all France.

Henry of Navarre, the young bridegroom whose marriage celebration had been the trap to lure so many thousands of his followers to their doom, was captured in the Louvre before he could escape or defend himself. Being less scrupulous—or fonder of life—than his unfortunate co-religionists, Henry promptly renounced Protestantism, declared himself an ardent Catholic, and thus appeased the royal wrath and saved his own skin.

Atrocious and utterly unpardonable as was the massacre of St. Bartholomew, yet it was not without lasting benefit of a sort. For, owing to it and to subsequent religious persecution, fully 50,000 Huguenots left France and a large number of these eventually settled in America, helping to form the social and religious backbone of our present nation.

Immense Wisteria Vine

At Sierra Madre, Calif., there is a wisteria vine, more than 320 feet long. When it was covered with buds and blossoms this spring, thousands of tourists from all parts of the West went to see it. It was planted some 30 years ago by Mrs. A. C. Brugman, now living in East Pasadena. The original plant was a small seedling of the Chinese variety, which is darker than the Japanese wisteria. This vine is said to be the largest in the world.—Pathfinder Magazine.

DODD'S PILLS

Standard for Generations

Funchal Is One Spot Untouched by War

Funchal, on the island of Madeira, historically is one of the most peaceful spots in the world. It has had uninterrupted peace since its discovery by Zarco in 1418. Three times it has been captured by British fleets, but each time returned to Portugal on conclusion of peace. Men have been free to plant and decorate and build there, unscourged by wars, according to Warren H. Miller's "All Around the Mediterranean." They brought grapes from Crete in 1420 and sugar cane from Sicily in 1452, and have been most industrious with them ever since. The result has been sunny miles of terraces for vines and great plantations inland for sugar cane. Many generations have devoted their efforts to beautifying these lands without molestation. Continued freedom from wars in Funchal has given the people so much time for work that even the cobbled streets are laid in patterns interlined with geometric designs in white stones.

"DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Druggists and general stores sell bottles of "Dandelion" for 35 cents.—Adv.

Priceless Bible Found

Paris of a hand-written Hebrew Bible, said to be more than 1,000 years old, have been discovered in the Jewish synagogue of Barbaire, a town in the Russian province of Georgia, according to reports from Leningrad. The discovery was made by the famous Russian scientist Lurin. The sheets were found imbedded in the walls of a synagogue, as if they had been hidden for safe keeping. All of them were carried at once to Leningrad, where they will be studied by a committee headed by Professor Krokowzeff.

Orchids in Canada

Discovery of a rare species of orchid is reported at Port Arthur, Ont., by two men who had been fishing in the vicinity and returned with specimens. Experts state the plants are worth $100 a bulb. The finders relate that they saw other orchids, the value of which they did not know, growing in the neighborhood, and have returned to collect specimens.

Argument Wasted

As Lowell said, there is no good in arguing with the inevitable; the only argument available with an east wind is to put on your overcoat.—Pittsburgh Post.

All Grebe sets are licensed under patents granted and pending.

Gay-Feathered Birds Make Best Warriors

Gay birds are the hardy athletes of the feathered world, according to a theory advanced by C. H. Henshaw, a London naturalist.

Male birds are forced to be dashingly beautiful in order to attract the more sober-colored females, Mr. Henshaw explains. But a bird that wears scarlet, blue or orange feathers, and that sings loudly and otherwise makes himself conspicuous, must be sturdy and alert if he is to survive long enough to establish a home and raise a family. He is as much a target for his enemies as the warrior who used to dash into battle wearing a red coat and riding a white horse.

How and this illustrates the old principle of the survival of the fittest is shown by Mr. Henshaw, who says:

"The better mate an animal can get, the more chance its descendents will have of survival, and it is obvious that a male that has to face more danger and yet manages to survive has in all probability a greater capacity for keeping alive than one which lives through less danger. Therefore the female is choosing a mate with a dangerous habit or structure chooses what is, aside from the dangerous part, a better and more fit mate."

This tends to raise the vitality of the bird species, he says, because the male bird's vitality is inherited by both sexes of his family, although his hazardous beauty is handed on only to his male descendants.—Science Service.

Excess of Gratitude

Not a Common Fault

Gratitude, in many people, is only a sense and secret desire for further favors. I believe it was Goethe who said: "He who is not grateful for a favor may be likened to one who muddies the spring from which his thirst was quenched."

When gratitude, I heard another say, has become a matter of encouraging, there are many ways of escaping its bonds. This is only another manner of saying that he who expects gratitude is a merchant, not a benefactor. Gratitude, which the scots always painted in the brightest colors, is one's duty, but it is not an indispensable right one is at liberty to evict. Honore de Balzac, in probably one of his less lucid moments, wrote that gratitude was a foolish word; that, though appearing in the dictionary, it could never be found in the hearts.—Frank Hanson, in Los Angeles Times.

Agreed With the Jury

A slightly deaf old man who had been arrested for whisky all his life was finally picked up and arraigned under the drastic Colorado dill possession law. The jury, without leaving the box, returned a verdict of guilty.

"Old man," said the lawyer, "the jury says you are guilty."

"Hey?"

"The jury says you are guilty," he repeated, loudly in his ear.

"In what degree?"

"There is no degree in a still case."

"Guilty all over, then?"

"Yes."

"Hey?"

"Yes," shouted the lawyer.

"Well, that's what I told you in the first place, but you said you could clear me. Wish now I'd got that judge to defend me. Get him next time."—Everybody's Magazine.

"By and Large"

This expression has about the same meaning as comprehensively, on the whole, or everything considered. For instance, Mark Twain says in "Old Times": "Taking you by and large, you do seem to be more different kinds of an ass than any creature I ever saw before."—Pathfinder Magazine.

Disciples and Apostles

The 12 disciples were the original apostles. Later this term was used to designate those who promoted the doctrine of the Gospel of Jesus Christ. There were a great many later apostles, the most prominent of whom was the Apostle Paul.

Canal Under Land

What is said to be the longest subterranean canal in the world has been constructed near Marseilles, France, as part of a ship passage to link that port with a smaller one inland. For four miles the canal runs under a chain of hills.

Mileage of Engines

The average passenger engine, if traveling on good roads, covers approximately 35,000 miles in one year. The average distance which a freight engine travels in a year is approximately 25,000 miles on short routes.

Early Suffrage Parade

A woman suffrage demonstration was held in New York on October 23, 1915. The demonstration was one of protest, and an approximate estimate sets the number who paraded at 25,000.

Sahara Once Forested

Dense forests once grew on the Sahara desert and a race of people who subsisted by hunting only tilling the soil lived there, says the Dearborn Independent, quoting a Chicago professor.

Ancient Leaven

The leaven spoken of in the Bible used by the Jews is a simple form of yeast probably made from the wild yeast common in hot countries. It is in no way different in its action from the commercial yeast of today.

Day of Opportunity

In this age, opportunity not only knocks at your door but is playing an anvil chorus on every man's door, and then lays for the owner around the corner with a club.—Elbert Hubbard.

Unfailing Love Test

The Short column editor of the Atchison Globe thus describes true love: "If a man reads to his wife after they have been married ten years, it is still a love affair."

Good and Evil

He who imitates what is evil always goes beyond the example that is set; on the contrary, he who imitates what is good always falls short.—Guicciardini.

Begin Early

The earlier the child's training in self-reliance begins, the better prepared he will be to meet the demands of school life.—Children.

At Last, a Place to Park!

Parking space has been discovered at last. Afghanistan has one motor car for every 1,200,000 inhabitants.—Wichita Eagle.

Made Candy of Clay

After the Civil war, when the price of cane sugar rose to great heights, candy makers tried the experiment of using clay in place of sugar.

Of Course That's Different

What's the Matter?

Many people depend on library books for important knowledge. Is not diligure them.—Washington Star.

Path of Least Resistance

We would all like to be heroes, but, alas, it is so much easier to be seroes. —Boston Transcript.

Added to Vocabulary by Systematic Effort

What, asks the Monitor, is the ratio of the words you use to those that are your birthright? Are you rich or poor in verbal currency? If you are the average American, making your wealth of language your drawing account on the dictionary is not more than 5,000 out of 400,000 words. Shakespeare's plays contain 15,000 different words. Milton's works half that number. These were not strings of synthetic thought and phrase, yet even they did not make large draft upon the store of nouns, pronouns, verbs, adverbs and adjectives in the English language. For there are a hundred thousand of them in all.

Some of the authors whose choice and variety of words we most admire—Browning, Stevenson, Benjamin Franklin—made a systematic business of adding to their fund, and there are interesting stories as to their methods of doing this.

"It. L. S.," who became a supreme artificer in the exercise of words, began as a boy to enlarge his vocabulary by deliberate means. Wherever he went he carried in his pocket two books, "one to read and one to write in. . . As I walked my mind was busy fitting what I saw with appropriate words; when I sat by the roadside I would either read or a pencil and a penny book would be in my hand to note down the features of the scene or contemplate some lolling stamma. Thus I lived with words. And what I wrote was an alleviter mor; it was written consciously for practice."

Robert Browning's novitiate as a poet was spent in "reading and digesting the whole of Johnson's dictionary." Coleridge's system, if more systematic, always painted in the brightest colors, is one's duty, but it is not an inalienable right one is at liberty to eject. Honore de Balzac, in probably one of his less lucid moments, wrote that gratitude was a foolish word; that, though appearing in the dictionary, it could never be found in the hearts.—Frank Hanson, in Los Angeles Times.

Famous Gutenberg Bible

Gutenberg produced his first book at Mainz between the years 1452 and 1456—while the Turks were shelling Constantinople, and the Wars of the Roses were beginning in England—barely 40 years before Columbus had sighted America.

The book itself is a splendid folio, without title page or date, and contains 641 printed leaves. So that Gutenberg paid for his copy at the rate of near $350 for each leaf.

Ten complete copies on vellum are known to exist, and 22 complete copies on paper. It is often called the "Gutenberg Bible," or the "Mazarin Bible"—because the copy of it which first attracted the notice of scholars was in the library of the famous Cardinal Mazarin.

Crabs as Prospectors

Acre enough to climb several trees, the land crabs inhabiting the Cocos Island of Utilla, off the coast of Honduras, were formerly looked upon as a nuisance. But recently the sixteen-year-old son of one of the inhabitants made a remarkable discovery by their aid.

Near one of the cruter holes, which they burrow in the ground like rabbits, he noticed some black, strong-smelling mud excavated by the crabs.

Experts examined this substance and pronounced it to be high-grade petroleum. A company was formed to erect that oil existed on the island, but this was the first "strike."

Skalds Iceland Poets

The Skalds were the poets of ancient Iceland and composed odes for public occasions.

Time isn't money when it is at that a woman spends in a store.

LEGAL NOTICES

STATE OF MICHIGAN.
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Walter S. Baer, as Trustee, Plaintiff,
vs.
Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham; Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors or their unknown heirs, devisees, legatees and assigns, Defendants.
County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county, on the 25th day of October, A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff:

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors or their unknown heirs, devisees, legatees and assigns be entered in this cause within three months from the date of this order, and that in case of her or their appearance that she or they cause her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiff within fifteen days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants, Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of the minor children, Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, the next of kin of the said minors, to-wit: Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., all of whom are under fourteen years of age, shall nominate some person to act as guardian ad litem for said minors and such nomination shall have been made within twenty day after service of process on them or within twenty days after this order shall have been published once in each week for six successive weeks as hereinafter provided; the court will appoint some suitable person to act as guardian ad litem for said minor children.

And it is further ordered that within forty days the said plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said County of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiff cause a copy of this order to be personally served on the said Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors, at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and countersigned by me,
CHARLES H. EMREY, Clerk.
LISLE SHANAHAN,
Attorney for Plaintiff.
Business address, 108 Clinton Street, Charlevoix, Michigan.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by William Stough and wife Clara L. Stough, of Ellsworth, Michigan, unto the First State Bank of Central Lake, Michigan, a Banking Corporation, dated June 15th, 1920, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 18th day June, 1920, in liber forty of mortgages, on page 396, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Rose Stough of Ellsworth, Michigan, by assignment of mortgage dated November 17th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, November 20th, 1925, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described at public auction, to the highest bidder therefor, at the front door of the court house in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the circuit court for the County of Charlevoix is held) on Saturday the 19th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northeast fractional quarter of the northwest quarter all in section seven township thirty-two North of Range seven west.

Dated November 15, 1926.
ROSE SLOUGH,
Assignee of Mortgage.
LISLE SHANAHAN,
Attorney for Assignee of Mortgagee.
108 Clinton Street,
Charlevoix, Michigan. 31-13t

NOTICE OF MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described as the non-payment of the three annuitant installments of forty-eight and 75-100 ($48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen and 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy-and 76-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1927, in Liber 62 of mortgagen on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at public auction to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E½NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 ($1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK OF SAINT PAUL, Mortgagee.
Dated, Dec. 27, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney for the Mortgagee.
36-13t Mr. Pleasant, Michigan.

Time isn't money when it is at that a woman spends in a store.

LEGAL NOTICES

STATE OF MICHIGAN.
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Walter S. Baer, as Trustee, Plaintiff,
vs.
Estate of Harry L. Oldham, deceased; Grace L. Oldham, Executrix of said estate; Grace L. Oldham; Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors or their unknown heirs, devisees, legatees and assigns, Defendants.
County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county, on the 25th day of October, A. D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are not residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff:

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors or their unknown heirs, devisees, legatees and assigns be entered in this cause within three months from the date of this order, and that in case of her or their appearance that she or they cause her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiff within fifteen days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants, Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of the minor children, Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, the next of kin of the said minors, to-wit: Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., all of whom are under fourteen years of age, shall nominate some person to act as guardian ad litem for said minors and such nomination shall have been made within twenty day after service of process on them or within twenty days after this order shall have been published once in each week for six successive weeks as hereinafter provided; the court will appoint some suitable person to act as guardian ad litem for said minor children.

And it is further ordered that within forty days the said plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said County of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiff cause a copy of this order to be personally served on the said Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors, at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and countersigned by me,
CHARLES H. EMREY, Clerk.
LISLE SHANAHAN,
Attorney for Plaintiff.
Business address, 108 Clinton Street, Charlevoix, Michigan.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by William Stough and wife Clara L. Stough, of Ellsworth, Michigan, unto the First State Bank of Central Lake, Michigan, a Banking Corporation, dated June 15th, 1920, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 18th day June, 1920, in liber forty of mortgages, on page 396, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Rose Slough of Ellsworth, Michigan, by assignment of mortgage dated November 17th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, November 20th, 1925, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described at public auction, to the highest bidder therefor, at the front door of the court house in the City of Charlevoix, Charlevoix, County, Michigan, (that being the place where the circuit court for the County of Charlevoix is held) on Saturday the 19th day of February, 1927, at two o'clock in the afternoon on that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northeast fractional quarter of the northwest quarter all in section seven township thirty-two North of Range seven west.

Dated November 15, 1926.
ROSE SLOUGH,
Assignee of Mortgagee.
LISLE SHANAHAN,
Attorney for Assignee of Mortgagee.
108 Clinton Street,
Charlevoix, Michigan. 31-13t

NOTICE OF MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described as the non-payment of the three annuitant installments of forty-eight and 75-100 ($48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen and 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy-and 76-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1927, in Liber 62 of mortgagen on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at public auction to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E½NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 ($1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK OF SAINT PAUL, Mortgagee.
Dated, Dec. 27, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney for the Mortgagee.
36-13t Mr. Pleasant, Michigan.

A Butterfly Holdup

A year or two ago on especially dry winter in southern California roamed many of the mountain plants to wither and die. So the butterflies of the hills had not enough food supply and came down in clouds to the valleys. They were beautiful, principally of a splendid red variety. They flittered in glowing swarms along the roads and filled the automobiles passing motor cars, causing overheating of the engines. When drivers went slowly within reach brushing off the butterflies, the motors were often badly damaged. The only thing to do was to stop and sweep them out and off. It was a regular butterfly holdup.—Girls' World.

Judge the Whole by One

A corporation may spread itself over the whole world and may employ its one hundred thousand men, but the average person will usually form his judgment of it through his contact with one individual. If this person is rude or inefficient, it will take a lot of kindness and efficiency to overcome the bad impression. Every member of an organization who in any capacity comes in contact with the public is a salesman and the impression he makes is an advertisement, good or bad.—Standard Data Digest.

Treat Diseases of Aged

That the ills of the old need as much attention as those of the very young was the opinion of the Czech medical faculty at Prague, where a clinic that treats exclusively the diseases of old age has recently been opened, according to advices received by the Austrian Medical Association. Prof. B. Tisch of the medical faculty of the University of Prague, who is in charge of the clinic, stated in his introductory lecture that two groups of diseases would be studied, those that are peculiar to the old and those that present a different aspect when occurring during old age. The clinic is of particular interest to the republic of Czechoslovakia because of the system of old-age and invalidity insurance in effect July 1.

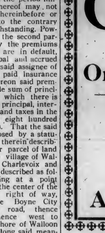
Moving Pictures Long Ago

Moving pictures are not so very new. English Life, London, Ralph Thoresby, writing as long ago as 1670, says: "I called to see the moving pictures, in a curious piece of art; the landscape looks as an ordinary picture till the clockwork behind the curtain be set at work, and then the ships move and sail distinctly upon the sea till out of sight; a coach comes out of the town; the motions of the horses and wheels are very distinct, and a gentleman in the coach salutes the company; also a hunter and his dogs in a due course until out of sight."—New York Times.

Opportunity for Science

Nots have been designed so that advertors may capture for entomologists strange insects which infest the upper strata of the atmosphere. What a debt will be owed to science if experiments in luter-breeding with earthbound pests produce a hybrid that inherits an instinct for the rarified altitudes.

HOMER SHEFFIELD



After a national contest, Homer Sheffield, sixteen, of Crosby, Texas, has been declared the outstanding boys' agricultural club worker in the United States. He joined the Crosby club one year ago and since then has won every possible honor and scholarship in Texas. He is astute in business, and vows cotton would bring only $50 per bale during a slump, he contracted with a merchant to exchange $100 worth of mattresses from a bale for $100, selling them at $25 each. Thus he made a good profit while others lost.

Posthumous Letters to Son

When J. S. Stevenson, of Vineland, N. J., died recently he left in the custody of an unknown person a collection of letters to be mailed one each year to his son who will receive it on his birthday. The little boy is now five years old and it is planned that he will receive these letters written by his father until the year he marries. Each letter contains advice suitable to the age of the boy the year he receives it. In the first letter the boy is told that his father has gone to see "Sinale Ann," a baby sister who died some time ago. "Some day," the father wrote, "you will come to see both of us." "Daddy is proud of his Dickie boy," the letter continued, "and knows that he will be good to his mother and take care of her always."—Exchange.

THE CHARLEVOIX SENTINEL

Volume 57 — Charlevoix, Michigan, Thursday, January 13, 1927 — Number 38

PUPILS' HONESTY IS PUT TO TEST

Rich Children More Prone to Steal Than Poor.

New York.—Studies of honesty among school children in cities and towns of the East indicate that children of wealth are most prone to steal money, that girls more often cheat in the class room and boys in games and that honesty is in direct proportion to intelligence.

The tests are being made by psychologists engaged in a "character education inquiry" at the Columbia university.

A majority of the pupils were reported as lying, when questioned as to which they felt an affirmative answer should be given. For instance, to "do you read the Bible every day?" Ninety per cent said they did, according to Dr. Mark A. May, one of the psychologists.

Doctor May is on a three-year leave of absence from the Syracuse university faculty.

Ingenious tests were devised to measure such abstract quantities as truthfulness, lying and cheating tendencies. Children were asked to solve a puzzle which involved the use of 10 cents in various coins. The object was to see how many would take the money.

Among the 250 Jewish orphans of New York's East side only ten disappointed. When the same test was given to children of the rich in an exclusive school it was found 18 per cent took money. When one coin disappeared, box and all, and in another a pupil hid a 25-cent piece claimed an error and asked for a second, which also disappeared.

COMPLEX COURT CASE, DESERTION

Will Soon be Heard in Circuit Court, Now Held in County Jail

George Shanquit, of East Jordan, is a guest of Sheriff Vaughan, held under a charge of alleged wife desertion, consequently awaiting trial, his stay with the sheriff being due to the fact that bonds has not been furnished assuring the people of the State of Michigan that he will appear for trial.

Mrs. Shanquit is at Bay Shore, at least expressed her intention of going to Bay Shore a few days ago. Then too, there is a third person in the family, an infant that the mother recently delivered to Sheriff Vaughan with the request that it be turned over to the father at the county jail for care and attention, making for a complex and unusual situation. A few hours after the arrival in custody Mrs. Shanquit that it was her duty as a mother to take charge of the infant. Shanquit's case which is now a less complex—probably more than less—will be up for hearing before the court in the near future, unless his domestic affairs are properly ironed out to the satisfaction of officials in charge of the legal proceedings, which at this time does not appear likely as another factor—lovers eternal triangle—has an important position in the case as a whole.

Miserly Mother Kills Son's Wife

Shoots Young Woman for Having Heir to Fortune She Hoarded.

New York.—Almost on the very day that Mrs. Frances Stevens Hall, gray-haired, wealthy and socially prominent, appeared before a jury in Somerville, N. J., charged with the killing of her husband, Mme. Guillaume Lefebvre, gray-haired, a millionaire and a member of one of the most prominent families in northern France, appeared before the Assize court in the City of Dunal, charged with the murder of her young and beautiful daughter-in-law, says the New York World.

The trials were conducted simultaneously for some days—and while in this country a puzzled public was following the grim details of the Hall-Mills murder mystery, all France was stirred by the most sensational "affaire celebre" since Marthia, of Landru, the French "Bluebeard," five years ago.

The parallel between the two cases is impressive. In both instances the principals were women of state, who, because of the dignity of their age and the prestige of the large fortunes they commanded, secured secure against any misadventure with the law. Both were charged with a capital crime against one of their kin by marriage. And in both trials there was the presence of two men, brothers in the case of Mrs. Hall, husband and son in the case of Mme. Lefebvre, defending their women kin against the accusation of a heinous and indefensible crime.

Both cases presented a baffling mystery; the Hall case a mystery of fact, in which the issue was the identity of the murderer; the Lefebvre case a psychological mystery, in which the motive for the French woman's confessed crime baffled the best legal brains of France.

An Amazing Character.

But here the parallel between the Hall-Lefebvre cases ends. For when, finally the aged Frenchwoman's motive was unraveled there was revealed to the world an amazing psychopathic character such as only a Balzac could have created. The Lefebvre murder could have been committed only in a Latin country.

And the Hall trial, unified in the silence of the defendants, was a dull show indeed compared with the Lefebvre trial, enlivened continually by Latin emotionalism, Latin outbursts of passion in both the principals and the audience and repeated and frantic efforts by the judges to control the uncontrollable exhibitions of French temperament throughout the trial.

Exactly one year ago, in the fall of 1924, Mme. Guillaume Lefebvre learned from her son, Andre Lefebvre, that he had kept for five months that his wife, Antoinette Mulle Lefebvre, was soon to give birth to an heir to the combined Lefebvre-Mulle fortunes. On that very day Mme. Lefebvre bought a revolver and, soon after, writing to her son, asked him to call on her, bring his wife with him and take them both for a drive in the car.

The son, obedient to his mother's wishes, appeared several days later at the paternal home with his young wife, and the three set out for a drive. Andre Lefebvre accepted the invitation of his wife and his mother sat together in the rear. When they passed through the city gates and emerged into the suburbs, Mme. Lefebvre requested that her son drive along the path known as "Solitude road." Andre, without inquiring into the reasons for this strange wish, still in his manhood as pliant before the commanding will of his mother as he was when a child, complied.

But when he had reached "Solitude road" and the car was humming along the deserted lane, he suddenly heard an outcry from his mother. Andre turned, and what he saw made him bring the car to a quick halt. His wife, immobile, lay in her seat, a thin stream of crimson trickling down her cheek from a wound in her temple. His mother, her hands paralyzed in her lap, one of them holding a revolver, regarded him silently. The young man could only ask his agonized question with his eyes.

"I have killed her," the mother said quietly.

Without a further word, Andre Lefebvre swung the car around and dashed madly toward the city and a hospital.

Son's Conduct Shows Motive.

Arrived at the hospital, the young woman was at once hurried to the operating room, but it was too late. She was dead. Mme. Lefebvre, making no effort to shield herself, was arrested and her son, Andre, his wife dead and his mother a prisoner, stopped long enough at the hospital to claim his wife's purse, examine its contents to see that they were intact and inquire whether the ring she wore when she had left home was still on her finger.

Questioned again later in the day, Mme. Lefebvre declared she had killed her daughter-in-law because she was "driving her son to ruin." In reporting the tragedy the following morning, the French newspapers described it as a crime of mother love, another "crime passionel."

As usual, the case was tried in the French press long before it came to the courts and presently, though still recognizing a crime of passion, the newspapers became aware that they were dealing with something more than a mother's love for her son, a passion left as old, but in Mme. Lefebvre overshadowing any feeling she had for her offspring.

The star reporters assigned to the case got their first cue to the real motive for the crime in Andre Lefebvre's conduct at the hospital, when he showed such concern about his dead wife's purse and her jewels. Their inquiry took a definite direction when it was estimated that the entire outfit of clothing worn by the millionaire at the time of her arrest could not have exceeded in cost more than $15.

And when it was learned that the young couple had been quite happy and altogether devoted to each other, and that, if anything, they had been living beneath their means, Mme. Lefebvre's bitter charge that Antoinette Mulle was "driving her son to ruin" specifically revealed the nature of the passion which had driven her to consult murder.

Bit by bit, in the press and legal investigations and during the trial, there emerged the portrait of an amazing creature, a female Harpagon, such a monster of greed as neither Moliere nor Balzac would have dared to portray lest they tax too heavily the credence of their publics.

A Love Match.

The marriage of Andre Lefebvre and Antoinette Mulle was, to all appearances, a love match, but Mme. Lefebvre made it plain to her son that she considered it a mesalliance, because the Mulle fortune, though considerable, was not quite equal to their own.

Shortly before the wedding, Andre announced to his mother that he was to leave on a short honeymoon after the ceremony. Mme. Lefebvre threw up her arms in horror. Honeymoons were a waste and a needless expense, she told him. Who had put such nonsense into his head? Probably that awful girl, who already was filling his head with extravagant notions.

However, Andre insisted that it was only decent for people in their position to have a honeymoon and, on the following day, he went on a travel lecture and arranged for the trip. It was perhaps the first time in his life that the young man, thoroughly under his mother's thumb, had ever asserted himself, and Mme. Lefebvre sensed that this alien woman not only was leading her son to extravagance but was threatening her own authority. The resentment she nurtured increased.

She yielded to her son's wishes, but when she learned that he had procured first class tickets for his travels, she immediately repaired to the tourist bureau and had them changed to second class. It did not appear at all grotesque to her that a young couple representing two of the most substantial families in northern France should travel second class on their honeymoon!

The newlyweds had been gone only four or five days when Mme. Lefebvre wrote to her son that it was time he was home.

"You seem to think you are rolling in gold. If your wife won't come with you, come home alone." . . . And this in the second week of the honeymoon.

Madame Grows Panicky.

By now Mme. Lefebvre was growing decidedly panicky. Not only was she incensed that her son had married a "wasteful and improvident" woman, but she began to entertain fears for the security of their own possessions, the Lefebvre fortune, a monument to her greed which she had built, stone by stone, franc by franc, over a period of half a century.

When her son had married, "though it was beneath him," she saw the beginnings of a new fortune which, by saving and self-denial, would excel the Lefebvre heritage to even more impressive magnitude. And here he was traveling, spending freely, "rolling in gold," and perhaps destined soon to make demands upon her to maintain the swift and destructive pace his spendthrift wife was setting. If the shadow of Mme. Lefebvre clouded the young couple's honeymoon, it completely overcast their home life after they had returned. Andre's mother was a frequent visitor, casting up the household budget and lauding it excessive, urging retrenchment and saying, warning her son that he would land in the poorhouse. She was shocked beyond words when she found that Antoinette laid a fresh white tablecloth for each meal.

"But it is scandalous," she whined to her son. "Think of the laundry bill! White linen soils so quickly. We have always used red tablecloths and napkins at home. They last a long time without washing."

She was stunned when she discovered that her "stylish" gift of "antique" furniture had been consigned by Antoinette to the attic and that the house was tastefully furnished with new and expensive equipment. The discovery led to a bitter quarrel between the women, one of the first of many to follow.

Mme. Lefebvre was not appeased when Antoinette explained that she could not have used the worthless junk her mother-in-law had given her without making herself and her husband the laughing stock of their set. She was not appeased when the young woman explained that she was spending largely out of her own pocket that her people were well-to-do, and that she had been brought up to live according to her ample means.

Mme. Lefebvre emerged from each of these quarrels with the conviction that her son had married into a family of spendthrifts and wasters and that his wife would lead him inevitably to his ruin. Yet it was brought out at the trial that the wealthy young couple's total expenditures did not exceed $4,000 a year.

Her Hatred Grows.

In the heart of Mme. Lefebvre there gathered a consuming hatred for her daughter-in-law and for the whole Mulle family which was soon to come to a head. It was hatred which grew as she realized she was alone in her desperate struggle to save the Lefebvre fortune. Her aged husband, seventy-six and long retired from business, was a mere pale, rotten copy of herself, echoing her protests and resentments but helpless and relying entirely on his wife to fight the menace to their wealth. He had been cowed too long by this dominant woman to show any fight now. He was just a whining old man.

Her son, Andre, a war hero many times decorated, was a spineless creature in her presence, his will broken from infancy to respond to her imperious will.

Then one day Andre Lefebvre announced to his mother that an heir was expected. It was the spark that kindled Mme. Lefebvre's hatred to a consuming flame. This alien woman, who was bringing her son to ruin, who was wasting instead of building a fortune, was about to bring into the world another Mulle—another waster.

She bought a revolver and killed the young woman whose condition offered a new menace to her greed.

The Lefebvre trial lasted only four days, but into that short time there was packed more drama than in a whole month of the Hall-Mills trial.

The jury was out only ten minutes, returning with a verdict of guilty. The audience broke into cheers as the judge pronounced the sentence, "To have her head cut off in a public square of the city"—the first woman to die at the guillotine in France in many years.

Says He Has Found How to Square Circle

Beauvais, France. — Solutions of problems which have baffled mathematicians for centuries, including the squaring of the circle, are claimed by Emilevic Lepere, an amateur mathematician, who offers to give a demonstration before a competent commission.

Lepere says he has solved the problems of trisection of angles, multisection of a straight line, division of the circumference of a circle and an angle into equal parts; squaring the circumference of a circle, direct superficial quadrature of a circle, development of a circumference into a straight line of equal length, and, conversely, the changing of a circumference of equal length to that of a given straight line.

In addition he says he has solved the problems of duplication, triplication, quintuplication and septuplication of the cube and its reduction to one-fourth, one-half and three-fourths.

New York.—A determined fight to exterminate fake advertisements of "antifat" remedies, patent medicines for incurable diseases, beauty lotions, creams, soaps, and other cosmetics, "health belts" and industrial schools practicing fraud, will be waged by the federal trade commission, W. E. Humphrey, member of the board, in telling of the commission's plans at the convention of the Subscription Book Publishers' association, estimated that such fraudulent advertisers obtain more than $500,000,000 annually from the public, a greater part of it coming from the poorer classes.

Best Seed Will Increase Yield

Clean and Healthy Sweet Potatoes Are Only Kind to Plant.

(Prepared by the United States Department of Agriculture.)

Clean and healthy sweet potatoes of strains resistant to disease and most productive for the soil where they are to be grown are the only kind to use for seed, says R. V. Poole, sweet potato specialist of the New Jersey agricultural experiment station.

"When buying Yellow Jersey sweet potato seed, the grower should demand certified seed or its equivalent. Certified seed sweet potatoes are obtained from fields that show very slight infection of scurf and stem rot, or none at all. These two diseases are transmitted in the plant-bed from diseased potatoes to sprouts, and are carried in the field on the latter.

Diseases Cause Loss.

"Severely diseased seed potatoes may result in 50 to 100 per cent of diseased sprouts. In case of stem rot, a high percentage of the plants die soon after, they are reset in the field, as well as during the summer. When scurf-infected sprouts are set, black, scurfed potatoes are generally harvested.

"Some strains of Jersey varieties which are more resistant to stem rot than others produce 25 to 100 bushels per acre more than the very susceptible ones.

Difference in Production.

"On the same soil there is a difference in the production of Red Jersey, Vineless Yellow Jersey, Gold Skin, and other Jersey strains. That is, the Red Jersey sometimes produces better than the Yellow Jersey strains on low sandy loam areas, while the Yellow Jersey strains sometimes give the best production on high "sassafras" sandy ness, was a mere pale, rotten copy of herself, echoing her protests and resentments but helpless and relying entirely on his wife to fight the menace to their wealth. He had been cowed too long by this dominant woman to show any fight now. He was just a whining old man.

Her son, Andre, a war hero many times decorated, was a spineless creature in her presence, his will broken from infancy to respond to her imperious will.

Experiments Prove That Milk Flow Is Continuous

For many years it has been thought that milk is manufactured during the process of milking and not collected in the udder. This was effectually disproved by the simple experiment of post-mortem milking at the federal dairy experiment farm, Beltsville, Md. The udders of two cows were removed immediately after slaughter and found to contain 11 and 20 quarts respectively. This represented practically 85 per cent of their normal milk production.

"These experiments prove quite conclusively that milk secretion is a continuous process," says George H. Glover, Colorado Agricultural college. "A large proportion of the milk secured at any milking is collected and stored within the mammary gland before milking is commenced. Furthermore, the liberation of milk from the udder does not depend upon a nervous or mechanical stimulation, or internal muscular contractions. It is thus apparent that a phonograph is no longer necessary to produce a larger milk secretion in the dairy herd."

Cod Liver Oil Increases Winter Egg Production

Experiments with the feeding of cod liver oil added to mash for poultry have shown that it is very beneficial during the winter months. It acts to a considerable extent as a substitute for sunlight. The effects are to increase egg production, thicken the shell and decrease the danger from colds and other sicknesses. There is also evidence that the hatchability of eggs is increased by feeding cod liver oil.

The most important function performed by cod liver oil is to increase the assimilation of minerals, and it is to be explained that at the same time it makes better production of shell on the eggs. It also strengthens the growth of bone in the body.

Guineas Are Peculiar

There are many mysterious things about our domesticated animals and birds which give them a fascinating interest of their own. Thus in the poultry world there are the guineas, as strange in disposition and ways as they are in form and shape. Although they have been domesticated for ages, they have a strange, wild instinct which has not been bred out of them. They insist on a larger freedom and the retention of their peculiarities.

WARN WORKERS IN TEXAS OIL FIELDS AGAINST DANGER OF GAS

Constant Precaution Urged by Bureau of Mines and Use of Gas Masks Recommended.

Washington.—Workers in Texas oil fields face untold dangers which necessitate the exercise of constant precautions, according to the bureau of mines, which has just completed an investigation of conditions in the Lone Star state's oil industry.

Investigations by the bureau took in the Panhandle district, the Biglake field of Reagan county, and the McCamey field of Upton county.

Hydrogen sulphide in petroleum vapors, the bureau found, is the most poisonous gas associated with the crude oil industry and frequently gives workers serious cases of conjunctivitis, known as "gas eyes."

Conjunctivitis is usually contracted in derrick cellars, where the gas collects. In the derrick cellar of one well in the Panhandle district 31 men were overcome while putting on the brandishead.

Around many wells investigators of the bureau found dead rabbits and birds. Dead animals are usually found after a still, oppressive night, when there is little or no air movement. One man collected a pile of more than one hundred dead animals.

In one place visited by bureau investigators it was found that the presence of hydrogen sulphide in excessive quantities caused pronounced darkening of white lead paint on houses, of brass valves and fittings and of silver money.

The bureau stressed the necessity of workmen using gas masks while engaged in derrick cellars and whenever it is believed gases are in the air.

White elephants were known more than 3,000 years ago.

History Reveals Florida Had Its Own Pocahontas

Bradentown, Fla.—Pocahontas, the Indian princess, who enacted a bit of drama years ago in the role of the rescuer, was about a hundred years behind a sister of her race who played a like part.

This developed here when Dr. Hale Ezra Byrd, president of the Florida Audubon society, dug up a musty copy of "Fairbanks' History of Florida." Fairbanks recorded that in 1528 Juan Ortiz of Narvaez' expeditionary forces fell into the hands of Indians. Chief Uceta, head of a tribe whose camp was near the present site of Tampa, enraged over Narvaez' ill treatment of his mother, ordered that Ortiz, an eighteen-year-old youth, be roasted to death.

Uletah, Uceta's daughter, begged on her knees that Ortiz' life be spared, and her wish was granted. Ortiz, badly burned, was nursed back to health by the girl. Twice again he was condemned to die, but each time Uletah saved him.

FARM NOTES

The good farmer never stops learning how to farm. That's why he is a good farmer.

* * *

It is not advisable to plant alfalfa back on alfalfa land without a few years between crops.

* * *

Paint is suggested as a preventive of disease because disease germs will not flourish in a clean, well-kept place.

* * *

If there is a waste corner in the chicken house, the litter will pack there, for lack of scratching feet to kick it out.

* * *

The kind of crop grown for green manure will affect both the amount of organic matter added, and the amount of available plant food.

* * *

Most all soils, with the exception of the muck soils, would be greatly benefited by turning under a good crop of green manure every few years.

FIGHTING OVER HER

Jones—"The conceited thing!"

Barefaced Mendacity

"A gentleman called me handsome yesterday," said a rather elderly lady to her minister. "Do you think it is sinful of me to feel a little proud of the compliment?"

"Not at all, ma'am," replied the minister, "it's the gentleman who is the sinner, not you."

Smith—"What now?" Jones—"She says two fellows have a room above her and they're always fighting over her."

Finesse of Business Partners

"What do partners do in a business like ours?"

"Well, we try to help each other in the selling end and blister each other in the buying."

A Rounder

Farmer's Wife—I seen to recognize your face. Didn't I give you a meal three days ago?

Tramp—Heaven, lady, I believes yer did, I musta been walkin' in a circle.

NOW SIXES AND SEVENS

Mrs. Blabb—"I never saw such happy people as those two were when they were made one." Mrs. Stubb—"And now they are at sixes and sevens I hear."

Getting By

Fred Newhouse, "biggest man in Stanford," is back from college with an added score to his rep. It seems that in the chemistry class, the professor asked him to name the ingredients of lip rouge.

"I don't know, sir," said Fred, "but it tastes like honey."

No Great Reformer

"We want somebody to reform the world," said Mr. Rafferty.

"We do," replied Mr. Dolan. "Why don't you take the job?"

"Me! I'm thankful if I kin git past the cop when he throws the traffic signal!"

Tragic

"Heard about the big accident?"

"No. What?"

"We don't just run over a peanut and crushed two kernels."

See Who Judged Them

At a recent baby show in Kansas one of the judges was an old maid, another was a bachelor and the third judge after 40 years of married life had never known what it was to rear a child. So the town's editor rises to inquire, "just what are the requirements of a person to be the judge of a baby contest?"—Capper's Weekly.

Some Rent

"I suppose they ask a lot for a place like this?" "Yes, every day from the first to the fifteenth."

Miserly Mother Kills Son's Wife

Shoots Young Woman for Having Heir to Fortune She Hoarded.

New York.—Almost on the very day that Mrs. Frances Stevens Hall, gray-haired, wealthy and socially prominent, appeared before a jury in Somerville, N. J., charged with the killing of her husband, Mine. Guillaume Lefebvre, gray-haired, wealthy and socially prominent, appeared before a jury in Somerville, N. J., charged with the killing of her husband, Mine. Guillaume Lefebvre, gray-haired, a millionaire and a member of one of the most prominent families in northern France, appeared before the Assize court in the City of Dinul, charged with the murder of her young and beautiful daughter-in-law, says the New York World.

The trials were conducted simultaneously for some days, and while in this country a puzzled public was following the grim details of the Hall-Mills murder mystery, all France was stirred by the most sensational "affaire celebre" since the trial of Landru, the French "Bluebeard," five years ago.

The parallel between the two cases is impressive. In both instances the principals were women of wealth, and became of the dignity of their age and the prestige of the large fortunes they commanded. Secure against any misadventure with the law, both were charged with capital crime against one of their kin by murderous deed. And in both cases there was the spectacle of two men, brothers in the case of Mrs. Hall, husband and son in the case of Lefebvre, defending their women kin against the accusation of a heinous and indefensible crime.

Both cases presented a baffling mystery: The Hall case a mystery of fact, in which the issue was the identity of the murderer; the Lefebvre case a psychological mystery, in which the motive for the French woman's confessed crime baffled the best legal brains of France.

An Amazing Character.

But here, the parallel between the Hall-Lefebvre cases ends. For when, finally the aged Frenchwoman's motive was unraveled there was revealed to the world an amazing psychopathic character such as only France could have created. The Lefebvre murder could have been committed only in a Latin country.

And the Hall trial, muffled in the silence of the defendant, was a dull show indeed compared with the Lefebvre trial, suffused continually by Latin emotionalism, Latin outbursts of passion in both the principals and the audience and repeated and frantic efforts by the judges to control the uncontrollable exhibitions of French temperament throughout the trial.

Plenty one can say, in the fall of 1924 Mme. Guillaume Lefebvre feared for her son's future. Her husband had kept for five months; that his wife, Antoinette Mulle Lefebvre, was soon to give birth to a child. Then, one thirty day May, Lefebvre bought a revolver and, soon after, writing to her son, asked him to call on her, bring the wife with him, and have them both for a drive in his car.

The son, obedient to his mother's wishes, appeared several days later at the paternal home with his young wife, and the three set out for a drive. Andre Lefebvre occupied the front seat alone. His wife and his mother sat together in the rear. When they passed through the city gates and emerged into the suburbs, Mme. Lefebvre requested that her son drive along the path known as "Solitude road." Andre, without inquiring into the reasons for this strange whim, still in his manhood as pliant before the commanding will of his mother as he was when a child, complied.

But when he had reached "Solitude road" and the car was humming along the deserted lane, he suddenly heard an outcry from his mother. Andre turned, and saw his mother standing in the car to a quick halt. His wife tumble, lay back in her seat, a thin stream of crimson trickling down her cheek from a wound in her temple. His mother, still standing, paralyzed in her lap, one of them holding a revolver, regarded him absently. The young man could only ask his agonized question with his eyes.

"I have killed her," the mother said slightly.

Without a further word, Andre Lefebvre, swung the car around, and dashed madly toward the city and a hospital.

Son's Conduct Shows Motive.

Arrived at the hospital, the young woman was at once hurried to the operating room, but it was too late. She was dead. Mme. Lefebvre, making no effort to shield herself, was arrested and her son, Andre, his wife dead and his mother a prisoner, stopped long enough at the hospital to claim his wife's purse, examine its contents to see that they were intact and inquire whether the ring she wore when she had left home was still on her finger.

Questioned again later in the day, Mme. Lefebvre declared she had killed her daughter-in-law because she was "driving her son to ruin." In reporting the tragedy the following morning, the French newspapers described it as a crime of mother love, another "crime passionel."

As usual, the case was tried in the French press long before it came to the courts and presently, though still recognizing a crime of passion, the newspapers became aware that they were dealing with something more than a motherly love for her son, a passion just as old, but in Mme. Lefebvre overshadowing any feeling she had for her offspring.

The star reporters assigned to the case got their first cue to the real motive for the crime in Andre Lefebvre's conduct at the hospital, when he showed such concern about his dead wife's purse and her jewels. Their inquiry took a definite direction when it was estimated that the entire output of clothing worn by the multi-hearse at the time of her arrest could not have exceeded in cost more than $15.

And when it was learned that the young couple had been quite happy and altogether devoted to each other and that, if anything, they had been living beneath their means, Mme. Lefebvre's bitter charge that Antoinette Mulle was "driving her son to ruin" specifically revealed the nature of the passion which had driven her to commit murder.

Bit by bit, in the press and legal investigations and during the trial, there emerged the portrait of an amazing creature, a female Harpagon, such a monster of greed as neither Moliere nor Balzac would have dared to portray lest they tax too heavily the credulity of their publics.

A Love Match.

The marriage of Andre Lefebvre and Antoinette Mulle was, to all appearances, a love match, but Mme. Lefebvre made it plain to her son that she considered it a mesalliance, because the Mulle family, though considerable, was not quite equal to their own.

Shortly before the wedding, Andre announced to his mother that he was in love with a short honeymoon after the ceremony. Mme. Lefebvre threw up her arms in horror. Honeymoons were a waste and a needless expense, she told him. Who had put such nonsense into his head? Probably that girl, for she had already begun to wind herself with extravagant notions.

However, Andre insisted that it was only decent for people in their position to have a honeymoon and, on the following day, he went to a travel bureau and arranged for the trip. It was perhaps the first time in his life that the young man, thoroughly under his mother's thumb, had ever asserted himself, and Mme. Lefebvre sensed that this alien woman not only was leading her son to extravagance but was threatening her authority over him. The resentment she nurtured increased.

She yielded to her son's wishes, but when she learned that he had procured first class tickets for his travels, she immediately repaired to the travel bureau and had them changed to second class. It did not appear at all grotesque to her that a young couple representing two of the most aristocratic families in northern France should travel second class on the honeymoon!

The newlyweds had been gone only four or five days when Mme. Lefebvre wrote to her son that it was time he was home.

"You seem to think you are rolling in gold. If your wife were content with you, come home alone," she said in the second week of the honeymoon.

Madame Grows Panicky.

By now Mme. Lefebvre was growing decidedly panicky. Not only was she incensed that her son had married a "wasteful and improvident" woman, but she began to entertain fears for the security of their own possessions, the Lefebvre fortune, a monument to her greed which she had built, stone by stone, from her frugal, over a period of half a century.

When her son had married, though it was beneath him," she says the fulminations of a new fortune which, by saving and self-denial, would start the Lefebvre heritage to even more impressive magnitude. And here he was traveling, spending freely, "toiling in gold," and perhaps destined soon to make demands upon her to maintain the swift and destructive pace his spendthrift wife was setting.

If the shades of Mme. Lefebvre clouded the young couple's honeymoon, it completely overcast their home life after they had returned. Andre's mother was a frequent visitor, casting up the household budget and finding it excessive, urging retrenchment and saving, warning her son that he would land in the poorhouse. She was shocked beyond words when she found that Antoinette laid a fresh white tablecloth for each meal.

"But it is scandalous," she whined to her son. "Think of the laundry bill. While linen sells so quickly, we have always used red tablecloths and napkins at home. They last a long time without washing."

She was stunned when she discovered that her "bride-in-law" had antique" furniture had been consigned by Antoinette to the attic and that the home was tastefully furnished with new and expensive equipment. The discovery led to a bitter quarrel between the women, one of the first of many to follow.

Mme. Lefebvre was not appeased when Antoinette explained that she could not have used the worthless junk which had been given her without making herself and her husband the laughing stock of their set. She was not appeased when the young woman explained that she was spending largely out of her own funds, that her people were well-to-do, and that she had been brought up to live according to her ample means.

Mme. Lefebvre emerged from each of these quarrels with the conviction that her son had married into a family of spendthrifts and wasters and that his wife would lead him inevitably to his ruin. Yet it was brought home to her that the seventy young couple's total expenditures did not exceed $4,000 a year.

Her Hatred Grows.

In the heart of Mme. Lefebvre there gathered a consuming hatred for her daughter-in-law and for the whole hidden family which was soon to come to a head. It was hatred which grew as she realized she was alone in her struggle to save the fortune for the Lefebvre fortune. Her aged husband, a servant-girl and long-retired from business, was a mere pale, carbon copy of herself, echoing her protests and remonstrances but lacking any originality entirely on his wife to fight the menace to their wealth. He had long since vowed too long by this dominant woman to show any fight now. He was just a spineless old man.

Her son, Andre, a war hero many times decorated, was a spineless creature in her presence, his will broken from infancy to respond to her imperious will.

Then one day Andre Lefebvre announced that a child was coming and that was expected. It was the spark that kindled Mme. Lefebvre's hatred to a consuming flame. This alien woman, who was bringing her son to ruin, who was wasting instead of building up a fortune, was about to bring into the world another Mulle—another waster. She bought a revolver and killed the young woman whose condition offered a new menace to her greed.

The Lefebvre trial lasted only four days, but into that short time there was packed more drama than in a whole month of the Hall-Mills trial.

The jury was out only ten minutes, returning with a verdict of guilty. The audience broke into cheers as the judge pronounced the sentence, "to have her head cut off in a public square of the city"—the first woman to die at the guillotine in France in many years.

Says He Has Found How to Square Circle

Beauvais, France.—Solutions of problems which have baffled mathematicians for centuries, including the squaring of the circle, are claimed by Ludovic Leopere, an amateur mathematician, who says he has found a demonstration before a competent commission.

Lapere says he has solved the problems of trisection of angles, multiplication of a straight line, division of the circumference of a circle and an angle into equal parts; squaring the circumference of a circle, determination of the quadrature of a circle, development of a circumference into a straight line of equal length, and, conversely, the changing of a circumference of equal length to that of a given straight line.

In addition he says he has solved the problems of duplication, trisection, quintuplication and septuplication of the cube and its reduction to one-fourth, one-half and three-fourths.

U. S. After Fakers Who Get $500,000,000 a Year

New York.—A determined fight to exterminate fake advertisements of "antifat" remedies, patent medicines for incurable diseases, beauty lotions, creams, soaps, and other cosmetics, "health belts" and industrial schools for practicing fraud, will be waged by the federal trade commission. W. E. Humphrey, member of the board, in telling of the commission's plans at the convention of the Subscription Book Publishers' association, estimated that such fraudulent advertisers obtain more than $500,000,000 annually from the public, a greater part of it coming from the poorer classes.

Best Seed Will Increase Yield

Clean and Healthy Sweet Potatoes Are Only Kind to Plant.

(Prepared by the United States Department of Agriculture.)

Clean and healthy sweet potatoes of strains resistant to disease and most productive for the soil where they are to be grown, are the only kind to use for seed, says H. F. Poole, sweet potato specialist of the New Jersey agricultural experiment station.

"When buying Yellow Jersey sweet potato seed, the grower should demand certified seed or its equivalent. Certified seed sweet potatoes are obtained from fields that show very slight infection of scurf and stem rot, or none at all. These two diseases are transmitted in the plant-bed from diseased potatoes to sprouts, and are carried to the field on the latter.

Diseases Cause Loss.

Severely diseased seed potatoes may result in 50 to 100 per cent of diseased sprouts. In case of stem rot, a high percentage of the plants die soon after or they are reset in the field, as well as during the summer. When scurf-infected sprouts are set, black, scurfed potatoes are generally harvested.

"Some strains of Jersey varieties which are more resistant to stem rot than others produce 25 to 100 bushels per acre more than the very susceptible ones.

Difference in Production.

"On the same soil there is a difference in the production of Red Jersey, Yiddess Yellow Jersey, Gold Skin, and other Jersey strains. That is, the Red Jersey sometimes produces better than the Yellow Jersey strains or low sandy loam areas, while the Yellow Jersey strains sometimes give the best production on high "sassafrass" soils. The proper use of the Jersey varieties and strains will do much to improve the quality of the crop, as well as bring the production up to a profitable point, through the reduction of losses from disease."

The first time to procure a sufficient supply of good sweet potato seed is at the digging season. Growers who failed to do this, and have not yet laid in their stock, are advised to obtain a good supply now, and not wait until bedding time, when they may have to take any kind of seed they can get.

Experiments Prove That Milk Flow Is Continuous

For many years it has been thought that milk is manufactured during the process of milking and not collected in the udder. This was officially disproved by the simple experiment of post-mortem milking at the federal bureau of animal industry, Beltsville, Md. The udders of two cows were removed immediately after slaughter and found to contain 11 and 20 quarts respectively. This is approximately 85 per cent of their normal milk production.

"These experiments prove quite conclusively that milk secretion is a continuous process," says George H. Glover, Colorado Agricultural college, "A large proportion of the milk secreted at any milking is collected and stored within the mammary gland before milking is commenced. Furthermore, the liberation of milk from the udder does not depend upon a nervous or conditioned stimulation, or interval muscular contractions. It is thus apparent that a phonograph is no longer necessary to produce a large milk secretion in the dairy herd."

Cod Liver Oil Increases Winter Egg Production

Experiments with the feeding of cod liver oil added to mash for poultry have shown that it is very beneficial during the winter months. It acts to a considerable extent as a substitute for sunlight. The effects are to increase egg production, thicken the shell and decrease the danger from colds and other sicknesses. There is also evidence that the hatchability of eggs is increased by feeding cod liver oil.

The most important function performed by cod liver oil is to increase the assimilation of minerals, and it is to be explained that at the same time it makes better production of shell on the eggs. It also strengthens the growth of bone in the body.

Guineas Are Peculiar

There are many mysterious things about our domesticated animals and birds which give them a fascinating interest of their own. Thus in the poultry world there are the guineas, as strange in disposition and ways as they are in form and shape. Although they have been domesticated for ages, they have a strange, wild instinct which has not been bred out of them. They insist on a larger freedom and the retention of their peculiarities.

FARM NOTES

The good farmer never stops learning how to farm. That's why he is a good farmer.

* * *

It is not advisable to plant alfalfa back on alfalfa land without a few years between crops.

* * *

Paint is suggested as a preventive of disease because disease germs will not flourish in a clean, well-kept place.

* * *

If there is a dark corner in the chicken house, the litter will pack there, for lack of scratching feet to kick it out.

* * *

The kind of crop grown for green manure will affect both the amount of organic matter added, and the amount of available plant food.

* * *

Most all soils, with the exception of the muck soils, would be greatly benefited by turning under a good crop of green manure every few years.

WARN WORKERS IN TEXAS OIL FIELDS AGAINST DANGER OF GAS

Constant Precaution Urged by Bureau of Mines and Use of Gas Masks Recommended.

Washington.—Workers in Texas oil fields face unfair dangers which necessitate the exercise of constant precautions, according to the bureau of mines, which has just completed an investigation of conditions in the Lone Star state's oil industry.

Investigations by the bureau took in the Panhandle district, the Ranger field of Eastern county, and the Mc-Camey field of Upton county.

Hydrogen sulphide in petroleum vapors, the bureau found, is the most poisonous gas associated with the crude oil industry and frequently given workers serious cases of conjunctivitis, known as "gas eyes."

Conjunctivitis is usually contracted in derrick cellars, where the gas collects. In the derrick cellar of one well in the Panhandle district 31 men were overcome while puffing on the brand washed.

Around many wells investigators of the bureau found dead rabbits and birds. Dead animals found around one well after a still, oppressive night, when there is little or no air movement. One man collected 9 and one rancher more than one hundred dead animals.

In one place visited by bureau investigators it was found that the presence of hydrogen sulphide in excessive quantities caused pronounced darkening of white lead paint on houses, of brass valves and fittings and of silver money.

The bureau stressed the necessity of workmen using gas masks while engaged in derrick cellars and whenever it is believed gases are in the air.

White elephants were known more than 2,000 years ago.

History Reveals Florida Had Its Own Pocahontas

Bradentown, Fla.—Pocahontas, the Indian princess, who enacted a bit of drama years ago in the role of the rescuer, was about a hundred years behind a sister of her race who played a like part.

This developed here when Dr. Hiram Byrd, president of the Florida Audubon society, dug up a musty copy of "Fairbanks' History of Florida." Fairbanks recorded that in 1528 Dona Orita of Narvaez' expeditionary forces fell into the hands of Indians. Chief Ucita, head of a tribe whose town was near the present site of Tampa, was near the present site of Tampa, was near the present site of Tampa,

One Death That Would Have Pleased Actor

There is one theater effect that never changes with the years, writes Fay Templeton, in the Pictorial Review. John Barrymore, muttering audible maledictions at the coughing accompaniment to his "Hamlet," in a metropolitan theater, is merely repeating the history of the hundred barnstormer. A bronchial cough repeated several times during an impressive speech—a nicely planned reverse during a sentimental ballad—and only a most pachydermatous Thespian can keep his self-control.

One night we were giving "Lucrezia Borgia" in Texarkana, Texas. Lucrezia's poison-party had reached its dramatic climax. As, one by one, the friends of her son, Genaro, succumbed to the fatal drink, crying: "Genaro, avenge me!" a child's voice in the audience piped up: "Oh, papa, look, he's dead!" Again: "Oh, papa, now they're all dead!" At this my father, who was playing Genaro, could stand it no longer. Posed up-stage in an attitude of great agony, he hissed through his teeth, "I wish to God you were!"

Campaign That Gave Vast Area to Whites

But for the success of Col. George Wright and his soldiers at the battle of Spokane Plains, a few years before the Civil war, development of the entire Northwest might have been indefinitely deferred. It was this battle that climaxed the campaign that resulted in crushing Indian resistance throughout a region as large as the present state of Oregon and made possible the settlement of the inland empire by white Americans, giving a new impulse to economic development. Earlier forces that had attempted to rout the Indians had been armed with defective, short range weapons. Similarly, Colonel Wright's men were equipped with the first high-power rifles and howitzers employing explosive shells that ever had been used against the natives. The trip north from Walla Walla, Wash., was a triumphal march, terminating in the total defeat of the Indians near Spokane.—Portland Oregonian.

Good Food Neglected

It was contended for many years that no country could produce so excellent a macaroni as Italy, because of the species of hard wheat grown there, which is necessary to its making. This wheat has a horny grain and contains a large amount of gluten.

However, the hard, flinty wheats of Algeria, of Tangarod Russia, of Argentine and of the United States, especially the Dakotas, are as rich in the element needed as the best variety of the Italian farms. Durum wheat, therefore, is the pride of the Dakotas—the farmers have almost a monopoly of it.

An expert observer, speaking 30 years ago, said: "It is to be regretted that macaroni, spaghetti and vermicelli do not enter more largely into the dietary of the working classes of America, not less because of their cheapness and the ease with which they may be prepared than because of their nourishing qualities."

Historic French Tomb

Le Mans, one of the old towns of northern France, was unfamiliar to Americans until its strategic position made it a military base for the American during the World war. Normally the lines of travel in Europe do not cross Le Mans, so it is rarely seen by visitors. Among the things of interest there is the tomb of Berengaria, the woman whom Richard the Lion-Hearted loved, and because of whom he broke with the house of France, repudiating the sister of the king. Why she comes to lie there while he is at Fontrevault, I do not know. But there she lies, three weeks' march northward from her father's land, the queen and the mother of the greatest man of her time.—Hilaire Belloc, in the Independent.

Old English Almshouses

Trinity almshouses, in the Mile-End road, constitute in their entirety one of the most picturesque bits of old London still extant. The 30 little houses and their surroundings have been left to all intents and purposes as they were when first erected 200 years ago by the Corporation of the Trinity House for "decayed masters and commanders of ships, mates and pilots and their wives or widows." Even the models of ships, characteristic of the period, that decorate the roofs, though renovated from time to time, remain intact and so does the chapel. On the green is a statue of Capt. Robert Sanders, a generous benefactor to the institution, who died in 1721.—London Daily Mail.

Her Quaintness

"My Aunt Hetty, who has been dead these twenty years, was in some ways a remarkable woman and in other ways a thundering remarkable one," stated old Roswell P. Basp. "For one thing, she didn't believe that the average old woman knew more about medicine than a doctor who had made it his life's study. For another thing she didn't believe that the boys were all going to the gallows and the girls were all flighty whoppers. And, lastly, she did not think the millinery of her day was any crazier looking than that of 1872. But, as I say, she has been gone to her reward twenty years."—Kansas City Times.

Substantial Basis for Most Common Beliefs

It is a fact proved by actual count that a large number of persons prefer the risk of being run over through having stepped from a sidewalk into the road, than to continue on the curb if by so doing they are compelled to pass under some ladder which has been erected against the side of a building.

This superstition that it is unlucky to pass beneath a ladder dates back to the time when the hanging of transgressors was a very common occurrence. The nearest tree was usually chosen, but when towns sprung up and trees were less available, a ladder propped against the wall made the gibbet.

The phrase "not worth a cuss" which is often applied to some person or article, was formerly "not worth a cress," writes Mr. Charles Platt in Popular Superstitions. The expression, he says, related to watercress, which were a nuisance to gardeners because of their habit of scattering seeds all over the place.

The belief that May is an unlucky month for marriage is due, he thinks, to the fact that the Romans dedicated that month to old people, which flimsily suggests that young lovers had better take a back seat for a time.

Rest Not Advisable in Nervous Weakness

Rest cures are going out of fashion and physicians are prescribing work as cures instead, says Dr. George J. Wright in Hygeia Magazine. Prolonged nervous weakness is usually considered the result of some dark mental condition, such as a physical defect that reduces the body's reserve strength or impairs the process of regular so that ordinary physical or mental activity is no longer possible. Infections may produce the same effect of nervous weakness.

Emotional disturbances are particularly depressing and exhausting. Various physical ills, such as headaches, stomach distress, a neck pain or a choking feeling are often due to emotional or nervous strain, but not to overwork. Work and worry may be very exhausting, but work by itself is not harmful.

People vary in their inherent mental and nervous strength as they do in physical strength. Persons leading a quiet, tranquil life may never discover that they are weak mentally or nervously. However, sudden crises, such as a war, force them to exert themselves beyond their strength and a breakdown follows.

Great Engineering Feat

The construction of 600 miles of the Canadian Pacific railway through the Rocky mountains in British Columbia constituted an exceedingly difficult engineering feat. The syndicate building the road actually constructed the line from Montreal to Calgary, 100 miles from the mountains, before an available route through the ranges was discovered. The men who overcame the multitudinous engineering problems of those 600 miles of mountain construction erected a monument to themselves for all time. Before the work was started, the syndicate was granted terms considered ever-generous by political opponents of the government and there was much opposition to the project. One statesman predicted that the road never would earn enough to pay for axle grease.—Dearborn Independent.

Worship Monkey God

In many of the central Indian states the jethwa, on succession, have their foreheads marked in blood from the thumb or toe of a Bhil, or bowman. They believe this is a token of their allegiance, but it more probably is a relic of days when the tribe was in power in India, says a bulletin from the National Geographic society. They have binding oaths, the most sacred being that sworn by a dog, the Bhil regarding that the curse of a dog may fall upon him who breaks his word. For centuries Hanuman, the monkey god, has been the chief divinity of these people. Offerings also are made to the much-feared goddess of small-pox and some worship is still found among them.

Short but Merry Life

The gentleman bee is the world's greatest loafer. He sings and plays all summer long. So long as the sun shines and the honey is coming in plentifully, the ladies of the hive who do the work, let him have all he wants to eat and let him live in the hive. But when winter comes and he is over. The workers don't waste their stingers killing him, they just shove him out of the hive with orders to stay out. With free board and lodging cut off he dies in a few hours. So says Mrs. Hamilton, bee woman, who knows more about bees than most of us know about humans.—Casper's Weekly.

Given String of Names

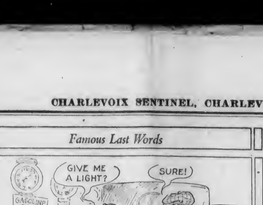
The longest name yet wished on a defenseless infant has been bestowed on a daughter of Arthur Pepper, Liverpool (Eng.) laundryman. The child's initials exhaust the alphabet. Taking the letters in order, omitting x, which is provided by Pepper, the child was christened Anna Bertha Cecilia Diana Emily Fanny Gertrude Hypatia Inez Jane Kate Louise Maud Nora Ophelia Penelope Rebecca Starkey Teresa Ursula Venus Winifred Xenophon Yetty Zona Pepper. She is sometimes called Miss Alphabet Pepper for short.

Obvious Name

Africa's Khartoum section sends us a "shoebill stork." Every food page will understand the name. The relation between the stork and the shoe bill is glaring in its obviousness.

And Sooner?

"To think," exclaimed the enthusiastic young husband, "that by the time we get, all this furniture paid for we shall have genuine antiques!"—Detroit News.



Famous Last Words

THE THEATRE

"Chip of The Flying U"—When "Chip of the Flying U," the latest Universal production, starring Hoot Gibson, opens at the Palace theater Wednesday and Thursday motion picture fans here will have an opportunity to see a screen version of one of the most popular western novels ever written, "Chip of the Flying U" was written about fifteen years ago by B. M. Bower. It is a semi-humorous story, set on a western cattle ranch with "Chip" Bennet, a cowboy and amateur detective, as the hero.

The book proved to be one of the most popular stories of this type ever written. Hundreds of thousands of copies of it were sold, and it has been re-printed many times since its original publication. Screen rights to the popular story were purchased by Universal about two years ago, with the plan of making it a starring vehicle for Hoot Gibson.

Filming of it was postponed, for various reasons, after the original announcement of its purchase had been made. So many Gibson fans, who had read of the plans for the book, wrote to the offices of Universal urging that the story be filmed immediately, so it was moved up on the production schedule by order of Carl Laemmle, president of the company.

"Chip of the Flying U" was adapted to the screen by Harry Dittmar and Lynn Reynolds, and directed by Reynolds. In addition to the star, the large cast includes Virginia Brown Faire, Philo McCullough, DeWitt Jennings, Harry Todd, Mark Hamilton, Gilbert "Pee Wee" Holmes and others.

"The Unguarded Hour"—An airplane accident in which Doris Kenyon crashes to earth amid tangled wires, broken propeller blades and smashed wings, furnishes one of biggest thrills of "The Unguarded Hour," which comes to the Temple theatre next Saturday and Sunday. Milton Sills appears in the stellar role with Miss Kenyon as the featured feminine player.

"The Unguarded Hour" is the story of an American girl who goes to Italy, where she by her modern American methods stirs the heart of a woman hating Italian duke (Milton Sills). The picture abounds in comedy and heart interest drama. Among the exciting scenes is a fight between Sills and Charles Boyer, in which Sills with his bare hands takes a sword from Boyer and forces him to his death over a balcony rail, from which he falls to the rocks below. Then there is a thrilling rescue scene in which Sills swims a hundred yards from shore and saves Miss Kenyon, who unknown to him, feigns drowning.

German Said to Be Father of 84 Living Children

Berlin.—The story of a man who twice married and became the father of 87 children, 84 of whom are living, is reported by a Vienna medical association journal.

Bernard Schelenberg, living near the German border, had 49 children by his first wife, who died at the age of fifty-six, the journal says. Not one was a single birth. There were four quadruplets, seven triplets and sixteen twins. Sixty-seven of the children are living, but he admits having lost count of the grandchildren. Schelenberg's second marriage at the age of fifty-seven was blessed with 18 children, including two sets of triplets. His second wife is still living.

Can You Answer This?

Man is not the only animal engaged in harvesting. For example, Nature Magazine asks how many of the following actually store food for future use so far as you can determine during October: Woodchucks, chipmunks, red squirrels, deer, muskrats, meadow mice, deer mice, skunks, dogs, cats, cows, horses, sheep and others?

Hand Organ Routs Wolves

Julius Goldman, a wandering Jewish musician in Latvia, found himself surrounded by wolves in the vicinity of the village Nitau. He first began to pray, but the hungry wolves advanced. He then betwought himself of his hand organ and began to play. By the time he had played several melodies the wolves had all retired.

Passing of the Clog

Many work people of Europe have long worn clogs instead of shoes, but the fashion is changing. Originally clogs were made entirely of wood. In Holland tanneries used to make clogs by hand, doing all the work with knives. Before the World war a pair of clogs could be purchased in Holland for about 11 cents. Welsh and English working folk, especially in Lancashire and Yorkshire, wore clogs, but they are now using leather "uppers" and employing wood only for soles.

Notice of Primary Election and Filing of Petitions

To the Qualified Electors of the City of Charlevoix:

Notice is hereby given, that the annual primary election will be held at the Central Polling Place, in said city, on Monday the 7th day of March, A. D. 1927, for the purpose of placing in nomination candidates for the following city offices:

Mayor, City Clerk, City Treasurer, Justice of the Peace, Park Commissioner, One Alderman from each of the three wards, One Supervisor from each of the three wards, One Constable from each of the three wards.

You are further notified, that under Section 14, of Act No. 351 of the Public Acts of 1925, no nomination petition shall be received after four o'clock standard time in the afternoon of Tuesday, February the first.

CHARLES H. LAMPHEAR,
City Clerk.

By—
D. S. PAYTON, Deputy.

NOTICE!

The annual meeting of the Charlevoix Masonic Building Association will be held in the Masonic Temple, Tuesday evening, January 18th. Supper at 6:30. business meeting immediately after. A cordial invitation is extended to all Masons and their families.

D. S. Payton, Secretary.

Use Airplane to Reforest Burned Area in Hawaii

Honolulu, Hawaii.—New practical uses for airplanes appear on the horizon every day. This time a plane has been pressed into service to help reforest a burned-over area of several thousand acres.

Seeds of the mighty fallen, Eucalyptus, Koa and other native trees will be dropped from the air by the machine, which will fly low over the area. Experts say that the seeds will germinate in the ashes and that the young trees will have a good start.

Actor Has Silent Role in Play 15 Years

Los Angeles, Cal.—There is a man at San Gabriel who for 15 long years has sat silently amidst one of the funniest dramas of the past, his long white hair gleaming like a halo, and who has watched the tides of passion ebb and flow; has seen the dead in the heyday of its glory, has watched it crumble and fade—and yet, despite the fact that he has a very vital part of it all—he has said no word, made no complaint for 15 years.

He is not dumb, yet he never talks.

He is Frank Gueliar, one of the Mission Play performers who has no lines to say, and who has no ambition to be other than he is—a silent patriarch.

He is said to be the only actor known who has been cast for such a mute, a silent performer.

He has been with John Steven McGroarty since the Mission play's beginning and he is happy to remain right there, for he is a native of old California and he loves the play.

WANT COLUMN

WANTED—A teacher for High Island. A. C. Bolling, Commissioner of Schools, Charlevoix, Mich.

WANTED—First-class old school boiler maker—steady job. Apply to Sinclair Sister Construction Co., Pontiac, Mich. 36-3t

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 39-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.

BARRY-MEECH CO.
Charlevoix, Mich.

FOR SALE—3800 foot frontage on Walloon Lake. About 190 acres of land—will sell as a whole or subdivide. E. J. GLAZA, 440 Pearl St., Boyne City, Phone 324. 11-tf

The Falling of the Trusted

By REV. H. OSTROM, D. D.
Extension Department, Moody Bible Institute, Chicago.

TEXT—How are the mighty fallen. II Sam. 1:19, 25, 27.

Only by comparison can man be pronounced mighty. His evident and persistent weakness establishes that. One, only one is Almighty. But Saul and Jonathan have been reported dead and David's lamentation contains the three repeated phrases: "How are the mighty fallen." Yet Saul's death was shrouded in disgrace, so much

Rev. H. Ostrom, D. D.

so that the account reads, "So Saul died for his transgression which he committed against the Lord, even against the Word of the Lord, which he kept not, and also for asking counsel of one that had a familiar spirit, to inquire of it and inquired not of the Lord." Thus there had fallen disgracefully a man who from the days when he sought his father's stray asses, on until the end, had performed many deeds of valor, and as one short interval he was recognizing the prophets. Now this man of distinction has been laid low, the crown is lost.

The mighty fallen? History is ever busily forth this exclamation. Sooner or later man's weakness and foolishness and sin shows itself. Observed only by the few at first or at length the mask is lifted. Our hero worship turns to lamentation. Man at his best is altogether vanity. His wisdom is foolishness. His strength is weakness. His life is a dying. His glory is a shame. This is man, the sinner. Classify him where he belongs.

The sadness and confusion that result when the trusted and revered go down is largely due to the fact that we refuse to leur the Word of God and to see in "Come from man whose breath is in his nostrils." We fail to see that we can find a standard for man only as we find it in Christ.

We know man then for what he really is, but as to his greatness or his reliability or the value of his deeds we know that only in the grace of our God could they be of worth. We have looked beyond and above man as he is: we cannot be so cheated with whatever he may do or become; our confidence is in another and He is perfect. In it set one of the greatest evidences of the divine origin of the Bible that when once it has stated that man became a sinner it never apologizes for stating him where he belongs and never covers over or explains away the sin of any saint. In the Mayo laboratory at Rochester, Minn., recounted the discoveries of the past five years go which boosted bodies at once as the great goiter center. Dr. Kendall in the disease. Dr. Henry S. Plummer, Rochester, Minn., recounted the discoveries in the Mayo laboratory at Rochester that account for combating the method advanced for combating the

CHURCHES

Methodist Church.
C. E. Pollock, Pastor.

Worship hours next Sunday with sermons as follows:
10:30 a. m.—"Time."
7:30 p. m.—"Meeting Mexico."
There will be educational views shown in the evening service. This will be a very instructive hour. The public is invited.
Church school meets at 12 o'clock.
The Epworth League topic for six o'clock next Sunday is "Shallow of Deep."
"The Advancing Church" is the text book for mission study class beginning January 23 in Epworth League.
Each Monday evening at 6:30 the young peoples' prayer meeting meets for a full hour. All young people are invited. The pastor has charge of this service.
C. J. Kruse, from Petoskey, a former chaplain of Ionia state prison, will be the speaker at the men's meeting next Monday evening. Mr. Kruse's subject will be, "Facts, fancy and fun behind the prison bars." He is an accomplished and eloquent speaker, and the evening promises big. Supper at 7 o'clock sharp.
The book committee are planning a great entertainment evening in the church for February 11th—watch for the detailed program.
The County Fair shown in motion pictures was of great interest and entertainment to a church of people. Home affairs are of vital interest to people and of right should be. The presentation of the "Possibilities for a new school building", by Mrs. Saltonstall, and "The equipment of the School of the Future" by Mr. Belding, were highly acceptable and instructive and pleased the many people who came to the "Home Affair Vesper Service."
The orchestra selections also so neatly and expeditiously removed the old ceiling on the auditorium of the church. Several donated time and labor for this task. The work is well done and makes the church safe.

Congregational Church
Rev. B.G. Matson, D.D., Minister

At the First Congregational Church, Sunday morning the pastor will preach on "The Spirit of Moral Adventure," a study of one of the noblest characters in history.
There will be a Union Vesper Service at 4:15 in this church under the auspices of the W. C. T. U. in observance of the anniversary of the adoption of the eighteenth amendment to the Constitution of the United States. The public is heartily invited. The program for the service is unusually fine.
Young Peoples' meeting at 6 p. m. The evening service will be omitted.
The pastor expects to hold services at Ironton at 2:30 unless prevented by severe weather.

Church of God
Rev. Paul L. Jane, Pastor

Services held at the Chapel on West Hurlbut Avenue:
Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.
The Sewing Circle will meet with Mrs. Wm. Bird. Arrangements have been made to accommodate those who desire to go Thursday morning.
The word of God never changes and it should never grow old, stale and irksome to any of God's human beings. We should take time, yes, make time to read it while at home. The old family Altar is being forsaken by all but a few who remember what God's word speaks concerning those who forget that there is a God. May we take time and go to worship him when that day come. Maybe you will have to take time but then it will be too late. Act now by being present.

Christian Science Society
Sunday service, 10:45 a.m., Subject, "Life."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturays, 2 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church
Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelo.

Varieties of Bread

Generally speaking, the difference between white-wheat bread and graham bread is that there is less coarse bran in the so-called whole-wheat bread than in graham bread. True graham bread is made from graham flour. Dr. Alexander Graham was the first to advocate milling the entire wheat, adding nothing and subtracting nothing. In some mills the whole-wheat flour is a product of the whole wheat grain; in others only a part of the coarsest bran. Bakeries' graham bread is made from a mixture of whole graham flour and white flour, proportions varying—sometimes being half and half.

Goiter to Disappear by 1937, Is Promise

Cleveland, Ohio.—Iodine, the enemy of goiter, will soon be overcome that disease and by 1937 it is plausible that goiter will have totally disappeared, physicians attending the annual convention of the interstate postgraduate medical assembly, were told.

Feeding of iodine to school children in the form of salts was the method advanced for combating the disease. Dr. Henry S. Plummer, Rochester, Minn., recounted the discoveries in the Mayo laboratory at Rochester that account for combating the disease.

Dr. Plummer said that in his experience it is declaring that God can give man grace and glory. Still, the supreme one of biggest thrills of "The Unguarded Hour," which comes to the Temple theatre next Saturday and Sunday, Milton Sills appears in the stellar role with Miss Kenyon as the featured feminine player.

"The Unguarded Hour" is the story of an American girl who goes to Italy, where she by her modern American methods stirs the heart of a woman hating Italian duke (Milton Sills). The picture abounds in comedy and heart interest drama. Among the exciting scenes is a fight between Sills and Charles Boyer, in which Sills with his bare hands takes a sword from Boyer and forces him to his death over a balcony rail, from which he falls to the rocks below. Then there is a thrilling rescue scene in which Sills swims a hundred yards from shore and saves Miss Kenyon, who unknown to him, feigns drowning.

—) PERSONALS (—

Charles Novak went to Chicago on a business trip early this week.

Sheriff David Vaughan left for Chicago last Monday on a short business trip.

The Y.P.S.C.E. of the Congregational Church announce a social for Friday evening, February 21st.

John Robinson spent the week end with friends in Traverse City, returning to Charlevoix Monday.

Captain Arnold McCann goes to Ely City today on a business trip and will keep him away for several days.

Mrs. A. H. Reinhart went to Perrington, Mich., last Friday, where she will visit friends for a few weeks.

Mr. T. J. Brady, who was seriously ill for some time, is now about down town Wednesday for the first time in about one month.

Mrs. Harvey Campbell, of Jackson, is spending a few days with her parents, Mr. and Mrs. Frank Cook, 307, Mason-st., and other relatives.

Thomas Bacet who was called to Detroit on account of the death of his brother-in-law, Albert J. Hummel, returned to Charlevoix Tuesday.

Ladies of the M. E. Society will serve an oyster supper at the church Wednesday, January 26th, at 5:30 p. m. for which a charge will be made of 50 cents per plate.

Captain John McCann made a trip to St. James with the tug Venus Tuesday, with coal for the light house, after making an exceptional trip for this season of the year.

Miss Monica Smith entered the Charlevoix hospital last Monday suffering with an attack of appendicitis and was successfully following an operation to relieve her of the offending appendix.

Lee Allard left for Detroit Monday for the purpose of consulting an eye specialist and will receive treatment for an eye trouble that has caused great annoyance for some time past.

Mrs. W. S. Richardson is on her way to the West Coast, leaving here for Anaheim, California, last Tuesday, where according to present plans Mr. Richardson will join her within a few weeks.

The Honor Class of the Congregational S. S. was invited to the Coulter home for the January business meeting which was held last Monday evening. Mrs. Coulter served a delicious three course lunch at 6:30 o'clock. Miss Lucile Jarlier, Traverse City, spent last week here where she represented one of the litigants in an important legal case at a special term of circuit court, the case being heard by Judge Parm C. Gilbert.

Members of the Missionary Society of the M. E. Church meet with the president, Mrs. Adah Beeman, 202 Park Ave., Wednesday afternoon of last week at which time a pot-luck lunch was served. This was followed by a regular program which was attended by a goodly number of workers. All in all a most pleasant afternoon was fully enjoyed and the meeting the first for the new year was pronounced a decided success.

Dr. and Mrs. A. Lawson Baxter, of Central Lake, were business visitors in Charlevoix last Tuesday.

A. F. Young came up from Detroit last Tuesday to look after some business matters of a personal nature.

Dr. R. B. Armstrong made a business trip to Grand Rapids last Thursday, returning a day or two later.

Vayne Smith motored up from Flint last Sunday and is spending a few days vacation with his parents, Mr. and Mrs. George W. Smith.

W. S. Richardson went to Kalkaska last Tuesday to attend a meeting of bank directors in the local bank in which he is interested.

Mr. and Mrs. Perry Smith went to Chicago last Saturday and will probably spend Sunday there, returning to their home at Cross Village.

Mr. and Mrs. H. S. Harsha have arranged to leave for Birmingham, Alabama, next Monday where they will spend some time with their daughter Amy.

Richard Whitehead, of South Haven, is "supplying", and acting as manager at the Western Union office during the temporary absence of the regular manager, Miss Allen.

Mr. Russell Gore, representative of the Detroit News, spent several days in this region, particularly at St. James and Charlevoix recently taking a series of pictures, some of individuals and securing material for "a story" for the publication represented.

Miss Olive Allen, manager of the local Western Union Telegraph office, was called to Grand Rapids Wednesday on account of the serious illness of her father. If his health will permit making the trip the father will go to California for the winter in which case Miss Allen will accompany him to the west coast, remaining with him through the winter.

Tuesday, February 1st is the date settled upon for holding the next Community Banquet, which will be given under the auspices of the local W. C. T. U. organization at the First Congregational Church with Rev. Herman Burns, D. D., as principal speaker. Reserve the evening and attend for a splendid entertainment will be arranged for this meeting. Time, seven o'clock p. m.

The Rev. Paul L. Jane, pastor of the Church of God, Chapel on West Hurlbut Avenue, announces the following services for next Sunday:
Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.

Clarence Wood, Charlevoix; Chester W. Naylor, Boyne City, and Otto Hassler of Boyne Falls, have been drawn as Traverse Jurors, in Federal Court at Grand Rapids, their duties as such commencing on the 19th inst.

Attorney Thomas D. Meggison, of Traverse City, spent several days here last week where he represented one of the litigants in an important legal case at a special term of circuit court, the case being heard by Judge Parm C. Gilbert.

Members of the Missionary Society of the M. E. Church meet with the president, Mrs. Adah Beeman, 202 Park Ave., Wednesday afternoon of last week at which time a pot-luck lunch was served. This was followed by a regular program which was attended by a goodly number of workers. All in all a most pleasant afternoon was fully enjoyed and the meeting the first for the new year was pronounced a decided success.

Father Better Teacher

The boy learns with more conviction from his father than from his master.—P. R. Dale.

W. C. T. U. MEETING.

A pleasant and profitable meeting of the W. C. T. U. was held last Thursday with Mrs. George Russell.

Mrs. Jolliffe had charge of the devotional and prayer service, using the subject "Go Forward."

Mr. Jacobs read a fine paper on "The Lord's Prayer."

Miss Eva Adams, accompanied by Mrs. Stelter, rendered two beautiful solos.

The flower committee gave an interesting report of the remembrance at Christmas time of many who were sick and shut in.

The social half hour with which the meeting closed was enlivened by the introduction of a game which was much enjoyed by all.

During the business session arrangements were made for financing the S. T. I. Essay Contest, for sending "The Young Crusader" to the grade schools, and for joining other woman's organizations in an effort to preserve the timber along the highway between Harbor Springs and Cross Village which was reported for sale and liable to be cut.

Announcements for future activities of the Union are as follows:

January 16th—Union Vesper service at 4:15 p. m.

January 23th—Group meetings in six neighborhoods.

February 1st—Community Banquet.

February 11th—Monthly meeting at Mrs. McMillan's.

Praise Indeed!

"I have nothing to say against her, although she is my mother-in-law," a woman told the Willsden (Eng.) magistrate.

The Michigan Bell Telephone Company

Suggests the use of Long Distance Telephone Service as the most intimate way of keeping in touch with your boy or girl away at school. Encourage them to call home frequently at the low Evening and Night rates.

Evening and Night Rates

Reduced Evening rates are in effect from 7 p. m. to 8:30 p. m. on "Anyone" calls. Night rates, which are still lower, are effective from 8:30 p. m. to 4:30 a. m.

There is no further reduction at midnight

Solving Problem of Fuel Supply

Fuel supply is a problem that is being solved in many ways. Some of the most interesting are those that are being worked out in the Scandinavian countries. Sweden has no coal, but has large forests. Norway has coal, but has large forests. Both countries have large water power resources. Both countries are using their water power to generate electricity for industrial purposes, and are using their forests to produce charcoal for domestic purposes. Both countries are also using their forests to produce wood pulp for paper making, and are using their water power to produce electricity for the paper mills.

Cheap Fuel Needed

Cheap fuel is needed for the production of electricity. Sweden has no coal, but has large forests. Norway has coal, but has large forests. Both countries have large water power resources. Both countries are using their water power to generate electricity for industrial purposes, and are using their forests to produce charcoal for domestic purposes. Both countries are also using their forests to produce wood pulp for paper making, and are using their water power to produce electricity for the paper mills.

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Jan. 15-16

Milton Sills in "The Unguarded Hour" with Doris Kenyon. He had fought off love—now he is fighting for it—for the kisses of a maiden maid. It's calling you, the hour when lovers sometimes forget. The mystic hour when each tick of the golden clock sounds a romantic heartbeat. Only once in a long time does a great screen drama get a great combination like Milton Sills and Doris Kenyon. See it—It's Big! Also a Fox comedy "A Polar Baron."

Wednesday-Thursday, Jan. 19-20.

Hoot Gibson in "Chip of the Flying U." Hoot is a shy cowboy artist afraid of women. She is a woman doctor on a visit to the ranch. Then —a series of thrilling scenes—daring stunts—wild horsemanship and Hoot falls for the girl—the girl falls for Hoot and—but you'll want to see it for yourself because it's Hoot's greatest picture. From the famous novel by B. M. Bowers. Also Fox News and "Felix the Cat".
Coming—Gloria Swanson in "Fine Manners."
Coming—"Variety."
Coming—"Man of the Forest."

37,000 TONS ADDED TO EARTH YEARLY

French Scientist Says Shooting Stars Not Dangerous.

Paris.—In a recent article in Le Petit Journal, Abbe Th. Moreaux, director of the Observatory of Bruges, discussed the annual fall visitation of shooting stars, particularly noticeable in France. He said:

"Every year readers of Le Petit Journal write to us about the appearance in the sky of luminous meteors which sometimes burst in the air and light up the landscape. When these stones reach the earth they constitute what scientists call aerolites. Their metallic character is now well recognized and there are many varieties of them to be seen in the beautiful collection of the Paris Museum of Natural History.

"Astronomers still discuss their origin, but all admit that the aerolites are the remnants of comets. Between the shooting stars, which weigh hardly a centigram, and the aerolites, which may weigh several tons, there would be perfect identity, if they were of the same weight.

Dangers Are Exaggerated.

"Formerly people attributed to these bodies all sorts of dangers. But today we possess better information about them and are in a position to say that the dangers from a fall of aerolites are greatly exaggerated.

"Only once, so far a general bombardment? I don't think so. The interplanetary spaces are being emptied more and more of the materials which contributed to the formation of the sun and the comets, and there is no reason in nature to foresee alterfifty recurrences of meteors. Undoubtedly certain years, like 1833 and 1926, show incontestable maxima. But year in and year out our planet receives on an average only 37,000 tons of foreign material.

"The small pilot receives a base pay of between $2,000 and $3,000, depending on length of service, and is paid in addition by the sale-by-flying service.

"For daylight-flying, he receives a 5-cent rate between Cheyenne and Reno, and 7 cents between New York and Cleveland, and between Reno and San Francisco. For night flying the mileage rate is doubled.

The hazards of mail piloting are said by postal officials to justify the pay.

Begging Pays

Philadelphia.—A wheel-chair beggar has been found to have a bank account of $75,000, an automobile and real estate, said to be paying $4 a day at a hotel.

Quit Tickling

Toronto.—Many adults are stern inexers become motherless tickle baby's toes to bring that cherubic smile, according to Dr. W. T. Bunn.

Turning of the Worm

—"In a few words—" began the Tiresome Talker. "You find the letters X and Z," snapped his intended victim as he took a chance and dashed across the street.—Cincinnati Enquirer.

Cultivate Moderation

Moderation is the silken string running through the pearl chain of all virtues.—Joseph Hall, English bishop and author.

Ears Become Attuned to Familiar Noises

That both women and men of this generation are more subject than their forebears to nervous breakdowns is the claim of most experts. On the other hand, it is denied by a few whose opinions carry weight.

The effect of the noise of modern life is being very carefully studied by the Institute of Industrial Psychology, and Doctor Miles, a member of the staff, has reached the conclusion that the bad effect of noise on human nerves is far less than it has been supposed to be.

Investigation seems to indicate that one can adjust to the increasing noises of modern cities with great rapidity and ease and that little or no harm is done.

Typists placed at work for hours in the most infernal uproar—steam whistles, crashing tin-ware, pistol shots and intermittent groans and screams were troubled only until the novelty wears off. Then nerves quiet down and the noises cease to be impressed.

The woman who is easily annoyed by noise should be examined by a physician, for there usually is something of serious importance given rise to the "nerves."—Kansas City Star.

Look With Suspicion On Too-Good Youth

Poor little good boy! Nobody believes in him; everybody distrusts him. All the wise educators and psychologists peer at him suspiciously and solemnly announce that he can't possibly be normal of. If he is tractable and obedient they shake their heads dolorously and prophesy that it won't last; that he'll do something dreadful later in life to make up for it and he'll make better by getting his allowance of original sin out of his system while he's young, ingrowing sin being a serious complaint. Well, maybe. But somehow, we can't help wondering if it's quite as bad as all that. We always had a sneaking idea that the boys and girls who did as they were told and who no serious mischief grew up to be the dependable, conscientious, industrious men and women who do the bulk of the world's work and do it quietly and efficiently, without ringing any bells or blowing any horns to call attention to themselves and that one or two of them may even have become presidents of banks or railroads or something. Probably we're wrong, but it's a comfortable theory, anyway.—Cleveland Plain Dealer.

The Big Thrill

It was the ninth inning with a nothing to nothing score. There were two outs against the home team and the umpire had called two strikes and three balls against the redoubtable Canavan. The pitcher calculated his distance, drew back his arm, and hurled—his favorite in-curve. Canavan measured its approach with a keen eye and swung, putting all his weight behind it. Right on the nose. It sped toward the left field fence. The left fielder was running backward. It would be unlike it would to make it? The grandstand watched with open eyes and mouths.

Thud. The ball crashed her escort's arm and pointed a trembling finger. It had struck and purple hat!"—Exchange.

Put Faith in Image to Frighten Smalloax

Motoring along a country road in India, the attention of tourists was called to a curious-looking object by the chauffeur. It was a roughly carved little image, mounted on a small stool, with three legs.

The image betrayed no signs of expert workmanship, mud was quite clearly the handiwork of some rough village carpenter. Many eyes and mouth were roughly carved, and vermillion paint brought these into prominence. The little creature had also two wooden arms.

Stopping the car, the tourists waited until some villager came along the road, and questioned him as to the reason why this image had been left by the roadside. He pointed out that it had been placed a few yards over the boundary line of the village, and that it had been there since the early hours of the morning.

It was an image of the goddess of the village temple, so common in south India, and represented the deity who controls smallpox. The scourge had broken out recently, and had cost a number of people, and it was felt that unless the goddess could be persuaded to transfer the evil more would fall sick.

So the little image was made and removed outside the bounds of the village. Naturally the people in the village did not appreciate this attention, and the custom is to move it from village to village. Then sometimes it is possible to get a modern medan, for a small fee, to destroy it completely.

Thus does the Indian villager deal with the troublesome disease.

Trachoma Blamed on Faulty Food Habits

Trachoma, that dangerous disease which so often ends in blindness, may be caused by hunger, diet, filth, scurvy, rickets and similar deficiency diseases, according to a statement from the National Committee for the Prevention of Blindness. While trachoma is spread all over the world, the highest incidence is among people who have faulty food habits.

The apparent contagiousness of trachoma may be due to another cycle disease that is associated with it. On Ellis Island, where there is always some trachoma and where hundreds of cases of it are handled each year, no doctor, nurse or orderly has ever contracted the disease. Similarly, among steerage tribes from eastern Mediterranean ports, passengers with trachoma never caused outbreaks of this disease during the voyage, although the conditions for the transmission of a contagious disease were most favorable.—Hygeia Magazine.

Explaining Military Salute

There have been several ideas advanced as to the origin of the military salute. It was supposed to have been the practice in Rome at the time of Julius Caesar for inferiors to raise the right hand to shield the front of their caps in order to show that it contained

Mrs. Blabb—"I never saw such happy people as those two were when they were made one." Mrs. Stabb—"And now they are at sixes and sevens I hear.

Getting By

Fred Newhouse, "Biggest man in Stanford," is back from college with an added score to his rep. It seems that in the chemistry class, the professor asked him to name the ingredients of lip rouge.

"I don't know, sir," said Fred, "but it tastes like honey."

No Great Reformer

"We want somebody to reform the world!" said Mr. Rafferty.

"We do," replied Mr. Dolan. "Why don't you take the job?"

"Me! I'm thankful if I kin git past the cop when he throws the traffic signal!"

Tragic

"Heard about the big accident?"

"No. What?"

"Car just ran over a peanut and crushed two kernels."

America Discovers Itself

BALBOA DISCOVERS THE PACIFIC OCEAN

THE ENGLISH'S PICTURE OF THE LANDING OF COLUMBUS
Art Pictures from "Pageant of America", Yale University Press

BREAKING THE HINDENBERG LINE

By ELMO SCOTT WATSON

WHETHER Columbus, the Italian sailing under colors of Spain in the Santa Maria, or some Norseman in his high-prowed Viking ship discovered America, is a point upon which historians are not yet agreed. But this matter is relatively unimportant when compared to the fact that 1926 found America in its books, magazines and newspapers "discovering" itself. It seems particularly appropriate that there should have been reached during the sesquicentennial year a high point in the renaissance of interest in American history, which has been going on for several years, and that Americans should in this year realize more than ever before that there is no more engrossing story than that of the growth of their nation.

One of the most significant events connected with the renaissance was the action taken by the American Historical association early in the year when it set out to raise an endowment fund of $1,000,000 "to keep the nation's historians continuously on the job of promoting American history and history in America." A general committee, with former Senator Albert J. Beveridge of Indiana as chairman, was organized to direct the campaign and an advisory committee of 120 prominent men in all parts of the country was formed to assist in the movement. Among these were such national figures as Vice-President Dawes, Elihu Root, Herbert Hoover, Senator Borah, William Allen White and Charles E. Hughes who heads the committee in New York city where the endowment headquarters have been established at Columbia university.

As a part of the campaign, state and district committees were organized, one week in November was designated as "History Week" and the principal effort to raise the $1,000,000 fund was concentrated in that week. The success of the drive was reported upon at the annual meeting of the American Historical association in Rochester, N. Y., recently and plans for the use of the fund were discussed. Among the proposals which the historians assembled there were called upon to consider was the assistance of individual research in all fields of history; the establishment of a "history house" at Washington to serve as a national center for history and historians; a thorough inventory of non-archival manuscript materials in various repositories and in private hands so as to make them known to scholars and to insure their preservation; the publication of a series of studies embodying the results of cooperative and individual research; the compilation of guides to and calendars of important materials in foreign archives; a study of state, local and special historical agencies to promote and correlate their work and the advancement of public interest in history by supplying the press with news about historical activities and by publishing a popular magazine of history.

To Save National Archives

Most important of all the projects, perhaps, is that calling for the formation of a publication policy for the national archives. No such policy in relation to the great mass of historical material in the government archives has been adopted, according to the historians. As a result, material of the greatest interest remains unpublished and under present conditions is in constant danger of destruction. Many priceless documents are tucked away in the dusty files of the various federal departments, few of which are fireproof. So the historians desire not only to end what they call "the disgraceful condition of the national archives at Washington" but to make the facts about American history, which some of these documents would reveal, better known to the American people.

Because of the evident revival of interest in the history of our country during the past years, the work of this organization will be welcomed by all American citizens. This revival has been manifested in many ways. Not only have the events of the Revolutionary war been memorialized in states along the Atlantic seaboard by patriotic gatherings of their citizens, by pageants, and by other special ceremonies, but in every part of the country there have been evidences of the desire by Americans to turn back the pages of history and recall the men and deeds of long ago. In fact there is scarcely a state in the Union which cannot point to some monument or marker that has been erected on some historic spot, or to pilgrimages of one sort or another as proof of the fact that its citizens are keenly interested in the events which made their commonwealths.

Our colleges and universities have been doing their part, too, in promoting this interest by their publications as well as by the activities of their faculty members in state historical societies or in such organizations as the American Historical association. Research by their departments of history has resulted in not only making available much invaluable information upon the growth of the nation but also in establishing a type of scientific historical writing which interprets as well as informs. Perhaps one of the most outstanding of these institutions which has been engaged in interpreting America to itself is one of our oldest centers of learning—Yale university.

"The Pageant of America"

Notable among the productions of the Yale University press was the illustrated history of the United States, a fifteen volume series, five volumes of which were issued last year and which, it is expected, will be completed during 1927. Under the name of "The Pageant of America" this series presents a pictorial record of the development of the nation from those events in the Eleventh century, which were the necessary preliminaries to the discovery of America, down to a present-day, and it does it in such a striking and comprehensive manner as to make the issuing of this series an outstanding achievement in the realm of book publishing not to mention its importance as a patriotic enterprise at this time of the renaissance of interest in American history.

Its importance as such was quickly recognized when the first volumes appeared. One of the leading literary critics of the country, the late Stuart Sherman, pointed out the fact that, while as pictures are "the most potent form of instruction, as well as the swiftest," the meaning of such books as these is "so plain that a child just beginning to read or a European peasant with only a few words of English at his command will respond to a greater part of it."

"One of the avowed objects of the series is to stimulate the highest and best sense of patriotism and this the series accomplishes, by easily and delightfully conveying an impression that America, seen under the changing lights of four centuries, is inexhaustibly interesting," he added. For the reasons given in these words, the value of such an aid in any so-called "Americanization" plan for our immigrants is obvious.

Doctor Sherman also paid his compliments to "those despoilers of history—the grim documentary historians who have fallen in love with deeds and charters and statistics and who talk to us grimly of 'facts' and the necessity of removing 'literary embellishments' and dramatic arrangements" in this lyrical postscript to his review: "I hope all professional historians will attend the show, especially those in universities, and go home, wiser, happier and livelier men."

In these statements the critic clearly reveals the importance of "The Pageant of America" and the value of the work that Yale university through its publications is doing. For Yale is particularly worthy of mention among the institutions which are meeting this increased interest in American history because the Yale council's committee on publications has wisely adopted a policy of issuing historical works which, while sacrificing nothing of accuracy and sound historical scholarship demanded by the professional historian, at the same time are understandable and appealing to the average American citizen.

Notable as is "The Pageant of America," this series is not the first interpretation of American history as a whole which Yale has undertaken. Some time ago it issued a series of 50 volumes under the name of "The Chronicles of America" which at that time was as much an advance over the usual type of American histories as the present "Pageant" has been over any which have preceded it. To 37 distinguished historical writers, each an authority in his field, was assigned the task of writing a complete political and social history of America. The result was a series of vivid narratives which has been characterized as "an extraordinary contribution to history and to American literature."

In keeping with the Yale policy of having some regard for the popular appeal the writers of these books included such persons as Mary Johnston, Ralph D. Paine, Stewart Edward White and Emerson Hough, all of whom are known throughout the country as writers of the highest type of historical novels. Mary Johnston's contribution was "Pioneers of the Old South: A Chronicle of English Colonial Beginnings"; Stewart Edward White wrote "The Forty-Niners: A Chronicle of the California Trail and El Dorado"; Emerson Hough contributed "The Passing of the Frontier: A Chronicle of the Old West," and Ralph D. Paine wrote both "The Fight for a Free Sea: A Chronicle of the War of 1812" and "The Old Merchant Marine: A Chronicle of American Ships and Sailors."

Mention of "The Chronicles" is made in this article because the reception of this series by the public is striking evidence of the revival of interest in this country's history previously mentioned. Arthur H. Brook of the Yale University press is authority for the statement that "these books are not only used by something like 200 universities and colleges as texts and by several thousands of schools for collateral reading, but perhaps of even greater importance is the fact that many thousands of citizens who have formerly believed that our history is a dull, drab and uninteresting subject, are now reading and enjoying American history for the first time through "The Chronicles." It is amazing how many men of affairs write to us that they always put a volume or two of these books in their bags when traveling as they find the books delightful to read on the train or steamer."

Fiction on the Wane

Interesting corroboration of the fact that the average American is turning more to history for his reading is shown by the increasing number of volumes of biography and history which appear in the announcements of the leading publishers of the country each year. Many of them have rated as "best sellers" week after week and some of them, especially the biographies which are insubstantial in tone, have more than once received almost as much attention in the news columns of our newspapers as in the book review sections. If further corroboration is needed it can be found in the statement made recently by Carl H. Milam, secretary of the American Library association, that fiction is on the wane and that American readers want their facts written in fiction style, a style they can "get" without the aid of the dictionary.

They are finding reading of that character in American history in such books as the volumes which comprise "The Chronicles of America," where writers with a strong sense of the dramatic breathe life into the dull facts of history and in their vivid narratives of things which really happened prove anew that "truth is stranger than fiction," and folly as interesting. It may be mentioned in passing that a new edition of "The Chronicles" is to be issued this year and appropriately enough the announcement comes this month, at a time when newspapers all over the country are celebrating the birthday of their "patron saint," that the Yale University press will call it the Benjamin Franklin edition. The issuing of this new edition of a work which has done much to popularize American history may well be regarded as one of the signs that the renaissance of interest in the story of America's growth, which reached a high mark in 1926, may attain an even greater peak in 1927.

East India Widow Lives an Outcast

The fat of the widow in India is a difficult one, according to Rosita Forbes, famous woman world-traveler. "By some remote tradition, the Hindu widow is held responsible for her husband's death, however much older she may be," Miss Forbes writes in an article in Liberty, explaining that for centuries it has been the Hindu custom for the widow to redeem her supposed fault by performing "suttee"—being burned to death—on her husband's funeral pyre. "However, the British government forbade suttee," the writer goes on, "and now widows linger in a disgraceful servitude till nature, or their own wit, provides a way out.

"Of course, among the more modern families," Miss Forbes continues, "remarriage, especially of children, is common, and in others the father buys back his daughter at the price of a heifer or some goats. But still, among the orthodox and old-fashioned, a widow is cursed with her husband's death. She is the slave of his relations and her life is without prospect, pleasure or adornment."

Now They're American

Sardines used to come from Sardinia. Some of them still do, others come from Brittany and from Norway, but the great majority of them now come from the coast of New England and from the Pacific coast. Sardine fishing is a four months' industry in Atlantic waters, and lasts six months in the Pacific. It is rapidly growing to be one of the most sizable phases of the canning industry.

Hallelujah Victory

The Hallelujah victory was that gained by the Britons over the combined Picts and Scots at Mold, in Flintshire, England, March 30, 450. It is so named from the war cry adopted by the Britons.

6822 DEATHS FROM WHOOPING COUGH

Whooping cough is the most neglected of children's diseases, and one of the most dangerous. There are 6,422 deaths reported in a single year in the United States from this disease. There is no cure for whooping cough, it usually runs its course, but relief can be given and its duration shortened. A few drops of Dr. Bonko's Oleocen will relieve the most violent paroxysms of coughing, and given regularly it will lessen the severity of the attacks and bring quicker recovery. Endorsed by physicians and sold by druggists on guarantee of results—satisfaction, else by all dealers everywhere.—Adv.

Fun is fun when it's fresh; when it turns sour, it's ironic.

Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a stomach alterative which makes the blood richer. It clears the skin, beautifies it, pimples and eruptions vanish quickly. This Discovery of Dr. Pierce's puts you in fine condition. All dealers have it in liquid or tablets.

Send 10 cents for trial pkg. of tablets to Dr. Pierce, Buffalo, N. Y., and write for free advice.

Wages of sin is death and foolishness is about as well paid.

To School on Skis

Ski-running is becoming popular with school children of the mountain districts of Bohemia. Formerly children were often obliged to stay at home on snowy days; now, on skis, they can cover the ground easily.

Students Own Cows

At Texas Technological college Lubbock, Texas, the new students are bringing their cows to school. Last year 17 students brought their cows and milking stools with them. The animals had to pass an entrance examination of tuberculosis, butterfat, and so forth, to prove that they are college cows. The milk is sold in Lubbock and the profits help pay the expenses of the owners and milkers.

Sunday School at Eighty-Eight

The oldest members of Welsh Sunday schools, who qualified last year for the Gee Memorial medals presented annually, include one woman of eighty-eight years of age, with eighty-five years' attendance, and three other women, each eighty-seven years old, with eighty-four years' attendance.

Class by Themselves

Members of congress are the only persons holding office under the government of the United States who receive their appointment directly from the people.

When Winter Comes

Good Elimination Is Essential

HABITS of life change with the changing seasons. Winter brings us more indoors; we are apt to get less fresh air and exercise, to eat heavier food and to be less active generally. These winter-time habits impose heavier burdens upon our hard-working kidneys.

Sluggish kidney function permits retention of poisonous waste in the blood and makes one an easier victim of winter's colds and chills. Presence of these unfiltered toxins makes itself felt in many unpleasant ways. One is apt to feel tired, achy and listless — to have drowsy headaches, dizziness and perhaps a dull, "toxic" backache. That the kidneys are not functioning as they should is often shown by scanty or burning secretions.

At such times the use of a stimulant diuretic* to the kidneys is indicated. Doan's Pills act on the kidneys only. Grateful users the country over recommend them. Ask your neighbor!

*Diuretics are agents which increase the secretion of the kidneys—Encyclopaedia Britannica.

Doan's Pills

Stimulant Diuretic to the Kidneys

The Low Rumble of the Kettle Drum —the Synchrophase brings in all such illusive sounds

EVERY inflection of a speaker's voice, the delicate overtones which give musical beauty, are faithfully reproduced because of the Grebe "Colortone"—perhaps the greatest recent contribution to radio reception. This gives you absolute control over sound quality, irrespective of the loud speaker's characteristics. You can vary it to suit your own taste and do away with the artificiality which has heretofore interfered with radio enjoyment.

Ask for a demonstration and then compare Grebe reception with that of other sets

The GREBE SYNCHROPHASE "Radio Centers the World" All Grebe apparatus is covered by patents granted and pending.

Withers Variety Store.

Jefferson Bible One of Nation's Treasures

The so-called Jefferson Bible is a compilation made by Thomas Jefferson, consisting of passages from the four Gospels cut out and pasted in a volume according to a scheme of his own. He began the work about 1804, during his Presidency, when he bought two English Testaments and compiled a work of 46 pages. Two evenings were spent at this interesting task, at the conclusion of which the President remarked: "A more precious morsel of ethics was never seen." He intended this first abridgment for the use of the Indians. From the work which he wrote to a friend it is learned that he was in the habit of reading from the volume every night before going to bed. About 1819 Jefferson completed the work by doing the same thing with Testaments in Greek, Latin and French. He entitled the work, "The Life and Morals of Jesus of Nazareth." The book contains no notes except the section of the Roman law under which Jesus was supposed to have been brought to trial. The list of passages, the title pages and the references to passages are in the handwriting of Jefferson. Two maps, one of Palestine and another of the ancient world, are pasted in from the original work in the National museum, Washington.—Pathfinder Magazine.

Thoughts of Worth

Call for Expression

These two forms of silence—the silence of communism and the silence of repression—spring from beautiful and sterling foundations. But in themselves they are incomplete, and individual lives, though enriched, are never fulfilled through them. Mysticism and martyrdom must be related to living issues through expression, or they degenerate the one into introspective solitude, the other into narrowness of judgment, says a writer in the North American. Lives become sterile when might-have-been remains had experience been translated into utterance.

The misinterpretation of words is indeed a blessed ministry. Because there are so many idle words, so many harmful words, so many insincere and bitter and malicious ones, we must not stumble into the mistake of believing that silence of itself has golden merit. There is the silence of indifference or self-consciousness, of carelessness or weariness; there is the lazy silence, the silence which grows from a sense of futility, or from contempt and pride. Silence, no less than inaction, may be a form of selfishness. As the laws of harmony exist without music, so may all that is fundamentally beautiful in human life exist without words.

Birds That Live Long

There is yet no reliable method by which to determine the length of natural life among the wild animals and birds, says Pathfinder Magazine. Most estimates of bird longevity are based entirely on birds kept in captivity. It is supposed that vultures, eagles, hawks, crows and parrots live the longest among birds. There are many records of parrots which lived over 80 years, and a few lived over 100. There is doubtful evidence of one macaw parrot in Italy living to be 200 years old. A white-headed vulture in the zoological gardens at Vienna, Austria, lived 118 years. Eagles, hawks, and crows are popularly supposed to live a century, but there is no substantial evidence to prove the supposition. Elder ducks are also believed to pass the century mark.

Like 'Em and Tease 'Em

At twenty-one a man is a musical instrument given to the other sex, but it is not as instruments learned at school, for wives she sits down to it she cannot tell what tune she is about to play. That is because she has no notion of what the instrument is capable. Bobbie's kind-heartedness, modesty, her coquetry, her moments of sadness, boil here a stitch in time, and Gavin was still trembling under their touch. Even in being unkind to task by her there was a charm, for every pout of her mouth, every shake of her head, said: "You like me, and therefore you have given me the right to tease you." Men sign those agreements without reading them. But indeed, man is a stupid animal at the best, and thinks all his life that he did not propose until he blurted out: "I love you."—J. M. Barrie.

The Wedding Fee

Wedding fees are to a minister's family what peanuts are to a monkey. Only the monkey translates the peanuts into energy, while the rector's family translates wedding fees into the most joyous and exciting things! Charities for the poor, porch swings, ice cream for Sunday dinner, a real new hat for mother and a pair of silk stockings for the family, a new tire for the auto, not on one occasion but twice, so long needed, for the rector himself.

All They Wanted

In an Edinburgh shop two young women asked to be shown a selection of tartan cloths, and the assistant turned out bale after bale, naming each tartan as he went along.

"Of course we don't want to buy any tartan," they explained honestly enough, in the end, "but we're going to buy a pack of playing cards with tartan backs, and we're just wanting to find out which was the prettiest."

Veteran on "Hike"

Walter Marrett, seventy-six, came all the way from Alaska to attend the fiftieth reunion of his class at Boston, relates the Boston Globe. When his train reached the White mountain region he began to think about a hike but took one day half a century ago from Mount Washington to Portland, covering about 100 miles in 24 hours. So at the next stop he hopped off and set forth. For 18 hours he hiked over the road, occasionally stopping to chat with automobile parties curious to know why he was walking. He walked 72 miles, and then, after a brief rest, added 10 more miles for good measure. "Might have made it 100, but a man doesn't want to be foolish, even if he does feel well," said he.

The Poor Mouth

Senator Harrison said in a war debt argument in Washington:

"Italy and France are prosperous and happy. No unemployment, no want. When they make a poor mouth I think of little Mabel.

"little Mabel stalked into the sitting room where her mother sat at work, and began to sob and cry horribly.

"'Why, what's the matter?' said her mother.

"'I failed yesterday,' sobbed Mabel.

"'But that was yesterday,' said her mother, 'why are you crying today?'

"'Because,' Mabel sobbed, 'you wasn't home yesterday to give me a piece of pie to comfort me.'"

How It Works

When there's a gasoline war you can burn a nickel's worth of gas and reach a place where you can save a nickel on five gallons.—Washington Post.

How It's Done

A real politician is a man who can by the addition of a little saliva make a platitude sound like an idea.—Arkansas Democrat.

Still Able to Take the Air

The accordion is one hundred years old—and is still being pushed to and fro.—Milwaukee Journal.

Great Writers Often in Financial Straits

When Oliver Goldsmith was threatened with arrest for nonpayment of rent, Samuel Johnson hastened to him and asked if he had any manuscript upon which he might realize some money. Goldsmith produced his "Vicar of Wakefield," and Johnston, who, upon glancing through it, saw its merits, tucked it under his arm and hurried to Francis Newberry, the famous old bookseller. Newberry was rather indifferent about its worth, but paid Johnson the equivalent of $300 for it.

To Goldsmith, the sum was the price of liberty, as well as shelter and food, and he welcomed it as one would a small fortune. Newberry kept the manuscript for two years, until Goldsmith's "Traveler" having appeared and proved successful, he thought he might risk its publication. It was published March, 1766, and in a month was in its second edition.

Goldsmith, however, was not the only author who suffered from impecuniosity. Dickens, Johnson, Thackeray, Addison and Speed were at various times so pressed for money that they did not know from where their next dollar was coming.—Market for Exchange.

Kanakas Left Record of Engineering Skill

In bygone days the natives of New Caledonia displayed an astonishing knowledge of engineering.

Because the valleys where they lived were too narrow to support a thriving population, they carved the sides of the hills into great terraces. These were carefully graded so that mountain streams could be made to flow smoothly along each terrace and down to the next in zigzags, each half a mile or so long, says a writer in Adventure Magazine. If there was no spring on the hillside, they brought water from neighboring slopes along ditches built of hollowed-out tree-trunks. They gauged levels with a nicety modern engineers might envy.

Few of these terraced hillsides are cultivated today. The white man has changed all that.

The native population is decreasing. the survivors are apathetic and indolent; they work on plantations or cattle ranches, and on Sundays they get drunk when they are not attending church.

Depicts Desert Tragedy

A grim little memento of a tragedy of the desert has been given to the University of Pennsylvania by Fred. John W. Harshberger of the botany department. It consists of the dried and mummified body of a horned toad, entangled among the curved spines of a small cactus. The skin of the luckless little animal was not punctured in any place, but its hind legs were pierced by the fish-hook-shaped thorns, and it had apparently died a slow death of hunger and thirst. The cactus appears to be much tougher than its animal victim, for though it had been torn from its roots for several weeks it showed no signs of distress, and Professor Harshberger stated that such plants are able to live without a drop of water for several years, lying on a laboratory shelf.

And Don't Come Back

There is a rule at Monte Carlo that if a player beggars himself at the gaming tables the establishment will reimburse him sufficiently to insure his return to his home place. Then he may never play there again until the loan is paid.

In the "Starting Forties" in this city is a restaurant which has a rule somewhat similar. The place is noted for its steaks and chops and its proprietor swears by them. Such, indeed, is the pride that he patron who is served and complains about the quality of the food is permitted to pay for it. The check for his repast is destroyed before his face. Then he is courteously asked never to darken the door of the establishment again.—New York World.

Family of Statesmen

Ohio once had a representative in congress who was the son of a President and the father of a President. He was John Scott Harrison, born at Terre Haute, Ind., at the time when his father, Gen. William Henry Harrison, was governor of Indiana. His son was Benjamin Harrison. John Scott Harrison served only two terms in congress, then retired to the ancestral farm near North Bend, Ohio, where he devoted the rest of his life to agriculture, art and literature. He was first elected in 1852 to the Thirty-second congress. His second term was in the Thirty-fourth congress. He died at North Bend, May 26, 1878.

Travel for Travel's Sake

For my part, I travel not to go anywhere, but to go. I travel for travel's sake. The great affair is to move; to feel the needs and blisters of our life more early; to come down off this feathered civilization, and find the globe granite under foot and strewn with cutting flints. Alas, as we get up in life, and are more preoccupied with our affairs, even a holiday is a thing that must be worked for. To hold a pack upon packeandle against a gale out of the freezing North is no high industry, but it is one that serves to occupy and compose the mind. And now the present is so exacting who can annoy himself about the future?—Robert Louis Stevenson.

Keep Down to Facts

Stay out of the clouds. Keep hard down on the commonplace, matter-of-fact earth, and reckon with what is just before you.—Dr. J. H. Shaw.

Utopian Idea

Ah, how happy would many lives be if individuals troubled themselves as little about other people's affairs as about their own.—Lichtenberg.

Few Have Ever Found Humming Birds' Nest

Comparatively few people ever have the pleasure of peeping into a humming bird's nest; to behold two tiny eggs like round white beans, or to see two birdlets which somewhat resemble little beetles.

In the first place, the nest is so small and so resembles the surrounding shrubbery that it is easily overlooked. Then, too, it is so cleverly hidden by its wise builders and so disguised in its construction as to require an experienced eye to discover it.

Built of soft, pliant bulrs and adorned with bits of moss and feathers, it forms a downy, cuddlesome, cuddled home. The fairy hummer of Cuba, the smallest of all the humming birds, builds a nest so tiny that it can be covered completely with a copper cent. Its eggs look like two little pearls.

The humming bird, more than 500 species of which have been classified, is distinctly American. In this, as in its a tropical bird, as fewer than 20 species are found in the United States.

The one known to residents of states east of the Mississippi is the beautiful ruby throat. Audubon called humming birds "glittering fragments of the rainbow," so gorgeous are they in color.

Ample Coal in Colombia for World 500 Years

Chicago.—When American coal supplies are exhausted, the world may look to the republic of Colombia for fuel, Dr. Alfredo Barnes, native of Colombia, said here, in planning for the welcome in Colombia to be extended the Illinois manufacturers and merchants who visit his country in February.

"Colombia," Doctor Bennides said, "has enough coal to furnish the world its supply for the next five centuries."

Leaving Chicago, February 1, a group of 75 Illinois manufacturers and merchants will embark on a goodwill cruise to trade promotion purposes, touching at Cuba, Panama, Jamaica and Colombia's principal city of Colombia—Barranquilla and Puerto Colombia.

"This treasure land of promise," Doctor Beanvides said, "is nearer to the United States than any other South American country.

"Gold is found in almost a free state in every river of the country. Every mineral known to mankind is found in Colombia in abundance. There is one part where the platinum of the world is produced."

Bullocks' Are His Pride

Bob Breed of Waigett, N. S. W., owns a team of 26 bullocks and says he treats gentlemanly at all times. He has never been heard to swear at any of them, though in conversation he frequently uses profanity. When working his team he never carries a whip and seldom, if ever, has to speak to them. Instead he uses an ordinary cane. His team is the envy of carriers within 100 miles of Waigett.

Bat Chases Mosquitoes

Canberra residents in Australia have found a substitute for mosquito lotions and nets which usually are regarded as being essential to one's peace and comfort in many portions of that state. It is the common bat, a small variety of bat which the campers take along with them and which spends the day sleeping on the ridgepole of the tent.

LEGAL NOTICES

Order for Publication—Final Administration Account

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 8th day of January A D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Anna Mcnaughton, deceased.

Margaret Waddifield having filed in said court her final administration account and her petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.

It is Ordered, That the 3rd day of February, A.D. 1927, at ten o'clock in the forenoon, at said Probate office, be and is hereby appointed for hearing said account and hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
38-3t Judge of Probate.

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.

IN CHANCERY.

Walter S. Baer, as Trustee, Plaintiff, vs.

Estate of Harry L. Oldham, deceased; Grace L. Oldham; Executrix of said estate; Grace L. Oldham; Grace L. Oldham, Trustee under the will of said Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors; Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Robert Bridge, Defendants. County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county, on the 25th day of October, A D. 1926.

Present, Honorable Guy E. Smith, Circuit Judge, presiding.

In this cause it appearing by affidavit on file that the defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors are residents of this State, but that they reside in Jacksonville, Florida.

On motion of Lisle Shanahan, Attorney for the Plaintiff.

It is ordered that the appearance of the said defendants Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors be entered in this cause within three months from the date of this order, and that in case of her or their appearance that she or they cause her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiff within fifteen days after service on her or them or her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants, Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham; and Grace L. Oldham, Guardian of the estate of the minor children, Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., and that the said Grace L. Oldham, the next of kin of the said minors, to wit: Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., all of whom are under fourteen years of age, shall nominate some person to act as guardian ad litem for said minors; and if nomination shall have been made within twenty day after service of process on them or within twenty days after this order shall have been published once in each week for six successive weeks as hereinafter provided; the court will appoint some suitable person to act as guardian ad litem for said minor children.

And it is further ordered that within forty days the said plaintiff cause this order to be published in the Charlevoix Sentinel a newspaper printed, published and circulating in the said County of Charlevoix, and that such publication be continued therein in each week for six weeks in succession, or that the said plaintiff cause a copy of this order to be personally served on the said Grace L. Oldham; Grace L. Oldham, Trustee under the will of Harry L. Oldham, deceased; Grace L. Oldham, Guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors at least twenty days before the time prescribed for their appearance.

GUY E. SMITH,
Circuit Judge, Presiding.

Examined, entered and a true copy countersigned by me.

CHARLES H. EMREY, Clerk.
LISLE SHANAHAN,
Attorney for Plaintiff.
Business address, 108 Clinton Street, Charlevoix, Michigan.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Wilsworth Smith and Clara L. Smith, of Ellsworth, Michigan, unto the First National Bank of Lake Odessa, Michigan, a Michigan Corporation, dated June 15th, 1926, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 16th day June, 1926, in Liber 62 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,307.75, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the terms of said mortgage, or any suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the laws required in such cases to be paid on said mortgage were paid by the mortgagee, and no proceedings now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided in such case, the said will be closed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefore, at the front door of the court house in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the circuit court for the County of Charlevoix is held), on the 2nd day the 19th day of February, 1927, at two o'clock in the afternoon on that date. The premises described in said mortgage being the lands, premises and property situate in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest ffactional quarter of the northwest fractional quarter and the northwest fractional quarter of the northwest quarter in section seven, township thirty-two North and Range seven west.

Dated November 15, 1926.

FIRST NATIONAL BANK,
Assignee of Mortgagee.
LISLE SHANAHAN,
Attorney for Assignee of Mortgagee.
108 Clinton Street,
Charlevoix, Michigan. 31-13t

NOTICE OF MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described by the non-payment of the three annuation installments of forty-eight and 75-100 ($48.75) dollars each, due December 15, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 26, 1926, in the sum of one hundred sixteen an 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy and 76-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1927, in Liber 62 of mortgages on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at Public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government plat thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 ($1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK OF SAINT PAUL, Mortgagee.
Dated, Dec. 27, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney for the Mortgagee.
36-13t Mt. Pleasant, Michigan.

David's Great Lament, "Tell It Not in Gath"

In spite of its tragic origin, this is probably one of the commonest catchphrases in the world. If a golfer, for instance, were to foozle his drive or miles an easy putt, he might say, "Tell it not in Gath!" meaning, "Don't tell the other fellows!". If an actor, temporarily out of a job, were to be discovered by an old friend basking on the beach, he would say, "Tell it not in Gath!" meaning, "Don't breathe it in Maiden Lane!"

The saying is Biblical in its origin, the first to utter it being David in his lament on the death of Saul and Jonathan at the battle of Gilboa. Saul had been jealous of David for years, although Jonathan, his son and heir, was David's most devoted friend. David, being a fugitive, had settled with a handful of faithful followers at Ziklag, a small town in the country of the Philistines.

It was here that the news was brought to him that Saul had fallen upon his own sword, after being wounded by the Philistines, and that Jonathan was dead also. He broke out into one of the finest requiems ever uttered:

How are the mighty fallen!
Tell it not in Gath,
Publish it not in the streets of Askalon,
Lest the daughters of the Philistines rejoice.

Askalon was a seaport of the Philistines, and Gath was an inland city of some importance in the same power of Palestine.—London Tit-Bits.

Pulitzer Would Have Had Royal Birds Shot

Pitkroy Gardner, in his book, "More Reminiscences of an Old Bohemian," tells this story about Joseph Pulitzer: "On one occasion, having to stay one night in London, he was forced to purchase his rest would be disturbed by street traffic, he instructed his London representative to obtain at any cost the use of some private house where no traffic could be heard. One of the mansions in Kensington palace furnished for a night's rest for the purpose of a night's occupation. Pulitzer was quite satisfied with this arrangement until in the early morning of the morning, he was awakened by the piercing shrieks, not many yards away, of peacocks from Kensington palace. He rang for his valet, gave him a revolver—Pulitzer generally had one—and told him to go out and shoot the birds. The valet, not daring to disobey his master, did some desultory firing; the neighborhood was alarmed; police rushed to the spot, and Pulitzer was seriously inconvenienced by the enforced temporary absence of his servant."

Left-Handed Cigars

It is not always because a cigar is badly made that the wrapper curls up and works off. It is often because a right-handed man is smoking a left-handed cigar. A left-handed cigar is one rolled by the maker's left hand, for all cigar makers must be ambidextrous.

A leaf of tobacco for the wrapper is cut on the bias and is rolled from left to right on the filler. The other piece, for example, is rolled from right to left, and must be rolled the opposite way by the workman's left hand.

The smoker, if he holds one of these left-handed cigars in his right hand, is sure to rub the wrapper the wrong way and loosen it. But the cigar is not a bad one—it is a left-handed one.

Ants Fight to Death

Extermination of red-meat ants, one of the most common pests in Australia, frequently is effected by starting a war between these nuts and warlike soldier ants. The war between the two varieties of ants is started by placing a large uncooked nuts near a colony occupied by the red ants, and when they begin feeding, the bone is removed gradually from the nest of soldier ants, a writer in the Sydney Bulletin tells us. When the two armies meet while attempting to obtain food from the same bone, open warfare follows, during which casualties become exceedingly heavy on both sides. Usually the battle ends in the complete extermination of one of the armies.

Even if One Really Was

There is gratification in the simple fact that the eyelids of the frog were made to match. It makes one feel that one never was a tadpole.

SERVICE

The undoubted strength and safety of this bank are but two reasons for its continued growth.

A third reason, and a very important one, is the service it gives to its customers. Here is a friendly, helpful atmosphere that makes every customer feel at home—free to ask for advice and those little courtesies that mean so much.

MAKE THIS BANK your financial home, and you will quickly appreciate why our depositors prefer this bank to any other bank.

The Bank of Complete Service!

BARE ATTEMPT TO ROB QUEEN MARIE

Police Get Man Believed to Have Sought Gems.

New York.—An attempt to rob Queen Marie was disclosed by police detectives.

A man who claims to be a professional tea taster, but who is accused by police of having attempted to steal gems from the Rumanian queen when she was visiting here, was arrested for the robbery of nearly $2,200 in jewels from Samuel Frothingham.

He gave his name as John Alderson and his age as twenty-seven. Apparently he is well educated, and police describe him as a "gentleman burglar" of the Raffles type. He was arrested as he was leaving the area way of a building in the fashionable section of the upper East side, where Frothingham has his apartment on the ground floor.

Police list a $1,500 bracelet, set with 50 diamonds, a diamond ring, a gold cigarette case, gold watch case, and a gold bar pin as having been recovered from him. They claim he has a police record in England as well as this country.

Detectives said that when Queen Marie was visiting the United States Alderson attempted to enter the house of a family she visited for the purpose of stealing the royal jewels, but was prevented by the heavy guard assigned to protect her.

The neighborhood in which he was captured has been under observation for some time because of burglaries in the vicinity and from fashionable clubs and hotels further downtown. Police claim that a man of Alderson's appearance recently followed a member of the family of John D. Rockefeller, Jr., into a Fifth avenue restaurant, apparently lured by a display of gems, but got nothing.

Police allege that Alderson often displays a preference for antiques.

Buffaloes in Canadian Park Show Big Increase

Edmonton, Alta.—Quadruple in the government herd at Wainwright Park, Alta., have increased from 700 to 12,-000 head since 1922, according to a report issued by J. B. Harkin, commissioner of Canadian national parks.

"Nineteen years ago buffalo were practically extinct in North America," says Mr. Harkin in his report. "Of countless millions that roamed the plains in pioneer days, only a few hundred remained. These, by the mercy of Providence, were sheltered in the mountain fastnesses of Montana, who sold his herd to the Canadian government when the buffalo preserve at Wainwright was established in 1907.

"Future of the buffalo is now assured. The herd is increasing at the rate of 1,500 head a year. Shortage of pasture near the park, due to the rapid development of farming, has made it necessary to ship 4,000 young bison north to the wild buffalo preserve on Slave river in the last two years. Wainwright park can normally support 8,000 of these animals.

"From time to time a number of these bison are slaughtered and commercial utilization made of the meat and hides. Flesh of a young well-nourished buffalo is considered by gourmets better flavored than beef. Buffalo hide makes excellent leather for shoes, golf bags, and articles requiring strength and flexibility."

Notable Exception

It is often said that the works of art never attain the perfection of the works of nature, but there are exceptions to all rules and we like a mechanical lead speaker better than a human one, if only because we can shut it off when we wait to.—Olin Star Journal.

CHARLEVOIX HIGH SCHOOL RECOGNIZED

Continues on the Accredited List of University for Three Years

The following letter is self-explanatory and should convince skeptical persons that the Charlevoix High School is on the only accredited list at the University of Michigan and will so continue until June 30, 1930:

UNIVERSITY OF MICHIGAN
Ann Arbor, Mich.
Committee on Accredited Schools

Mr. George H. Coverdale,
Superintendent of Schools,
Charlevoix, Michigan.

My Dear Sir:

At a recent meeting of the University Committee on Accredited Schools, the report on your high school was submitted. I was instructed to notify you that the committee had voted to continue your school on the accredited list of this University for three years, which is the longest term of accreditling. This term of accreditling will expire June 30, 1930.

In re-accrediting your school the committee takes into consideration the importance of the erection of a more commodious school building, and hopes that this building may be completed before the next inspection by the University.

Very truly yours,
J. B. EDMONSON,
Secretary, University Committee on Accredited Schools.

SOCIAL FUNCTION TUESDAY NIGHT

Masonic Supper Was Success Being Attended by the Masons and Families

Members of the Masonic fraternity with their families to the number of about one hundred and fifty were present at a 6:30 supper in the Masonic Temple last Tuesday making for a Masonic social function superior and out of the usual order in this city, and probably in numerical numbers larger than was anticipated by the committee in charge of the program, but regardless of this the committee had made ample provisions for service which was most prompt, nor was there any shortage in the quantity of delicious viands.

The crowd assembled was altogether too numerous for the spacious dining room for all to be served at the same time, but at that the attendance was of such magnitude that those served later were not lonesome or lacking in good company.

It was a nice social function, well arranged and splendidly carried out, eminently satisfactory to those having the affair in charge and pleasing to the entire assemblage of guests.

Following the supper the entertainment consisted of games, music and dancing, the latter in the dance hall which was a source of enjoyment to the company.

PRIVILEGES IN THE SENATE

We Cannot Escape Feeling That the Sacred Right Is Being Abused

The privileges of the Senate should be preserved. The right of members in the Senate, when the public good demands it, to speak freely and without fear of restraint, is a most sacred right. But when, as recently as Senator Heflin of Alabama used the Senate floor and its privileges for the purpose of uttering in public, charges of murder and robbery against his fellow-citizens, and in such a way that they were shielded by the opportunity of equal access to the public attention, one cannot escape the feeling that the sacred right is being abused. In the speech in question which he recently delivered, he charged that one Jess Smith, a friend and associate of Attorney General Daugherty, was murdered in Washington because of a fear that he might tell what he knew. He also made the charge that the slush fund which was contributed by Mellon to the Republican National campaign fund, and that a similar plan of reimbursement was set up.

Crediting Senator Heflin with a desire to see that justice is done, he surely must have know that if he had information of this sort so well founded, that he felt justified in broadcasting from the floor of the Senate, that for real action his statements and supporting affidavits should have been filed also at least with the law officers of the nation. The Senator surely appreciates that genuine indictments which result in criminal prosecutions are procurable in jury rooms and we have yet to find a criminal indictment made effective by a Senate speech.

Famous Hen Dies After Laying Her 1,174th Egg

Fontana, Calif.—Queen of Fontana, record-breaking hen, was found dead recently under an orange tree in her private courtyard at the poultry plant of the Fontana Farms company here shortly after she had laid her 1,174th egg. Death was due to natural causes. Two weeks ago, the Queen completed her fifth year of egg production with a new world's mark of 1,167 eggs, compared with the average production of a hen in the two years of its laying of 270 eggs. All of the Queen's eggs were used for hatching, her owners declaring that she paid 12 per cent on an investment of $10,000 during her lifetime.

Climbing

His first surprise was to find the skies, not as he expected, within his reach, but still as far off as before; his amazement increased when he saw a wide extended region lying on the opposite side of the mountain; but it rose to the astonishment when he beheld a country at a distance, more beautiful and inviting than even that he had just left behind.—Goldsmith, "The Citizen of the World."

Missionary Supt.	Mrs. George Russell
Temperance Supt.	Mrs. Edwart Stewart

Own Domestic Affairs Baffle Puzzle Expert

London.—Alfred Harry Mutton used to be butler at Hanover square, in which fashionable quarter his wife exercised her talents as a cook. With the changing times, however, a change came in the Muttons' scheme of life. The ex-butler developed recently into a "competition solutionist"—a profession the pursuit of which resulted in a serious rift in the formerly well ordered Mutton household.

When Mr. Justice Hill, before whom the Muttons appeared to thrash out their difficulties, inquired what a "competition solutionist" might be, Mr. Mutton explained that he solved crossword puzzles and other newspaper prize puzzles for the benefit of a large circle of paying clients.

"I win prizes for other people," stated the competition solutionist, perhaps with a mean look in the direction of the errant Mrs. Mutton.

MRS. LYDIA ALCOX PASSES SUNDAY

At the Charlevoix Hospital Following an Illness of Several Months

Mrs. Lydia Alcox passed away at the Charlevoix hospital last Sunday just before the noon hour, her death following an illness of several months duration which was caused by a throat ailment of a cancerous nature and of a malignant type such as local physicians and specialists were unable to successfully cope.

Mrs. Alcox has been an esteemed resident of Charlevoix for about forty years. She was born in Goodwood, Ontario, Canada, October 26, 1865, her maiden name being Miss Lydia Shaver and one of a family of thirteen sisters and four brothers, being the eighth, all of whom are residents of Canada at this time.

She was a member of the fraternal orders O. E. S. and L. O. T. M. and a past Worthy Matron of the first mentioned and past Lady Commander of the latter.

November 13, 1883 she was united in marriage with Mr. Archie Alcox of this city, by whom she is survived and also by one daughter Mrs. Clarence J. Wilbur, of Charlevoix, and one son Harry G. Alcox, of Chicago, all of whom were with her during the last few weeks of her lifetime.

Funeral service was held at the family residence, 702 Bridge-st., Tuesday afternoon, with Pastor Herman Hamp O. D., of the local baptist society officiating at the funeral rites.

MASONIC BUILDING ASSOCIATION

Held Their Annual Meeting Tuesday Night, Elected Officers, at Temple

The annual meeting of the Charlevoix Masonic Building Association was held at the Masonic Temple last Tuesday night at which time the members received the financial report of the Association and elected officers for the ensuing terms consisting of president, audiator and three members of the board.

In accordance with the actions approved Mr. Old Mutton will be president of the committee for a one year term; A. L. Livingston, auditor for three years; Messrs. W. H. Miller, S. M. Rose and John Ackert members of the board for a three year term, each succeeding themselves to the position by re-election.

The financial report shows that the Association is in a healthy prosperous condition and that the Association's indebtedness was reduced by a goodly percentage during the past year. One note of $1,000 being paid in full and some reduction made on other outstanding obligations, besides having several hundred dollars more in treasury than on January 1st, 1926 when the fund reported was $53.00 on hand.

Receipts for the year 1926 amounted to $3,203.07 and total disbursements $2,941.60, leaving a balance on hand January 1st, 1927 of $605.60. A few years ago the indebtedness of the Association was something over $20,000, a considerable proportion being carried by individual members. This has been gradually reduced and from the report of the treasurer there is at this time but $7,000 outstanding and owing by the Association, all of which will be paid in full within a moderate space of time.

It All Happened Over Saving Two Dogs

Two automobiles were damaged to some considerable extent a few days ago on Bridge street, when the driver of one of the machines made an effort, and succeeded, to avoid running down a dog or two that were in his path. In making a quick dodge his car skidded and struck the second machine which was parked at the curb, crumpling the fenders, wrecking the running board and putting a dent in the door of the parked coupe. The damage caused will, it has been estimated, amount to something like one hundred dollars. The dogs which probably were of little value escaped injury.

Power of Thought

Thoughts are forces, in that they have form and quality and substance and power, that they are the silent, unseen, but subtle agents at work, that they are daily and hourly producing and determining, and with almost absolute precision, the conditions in our lives.

Prison Ends Toll of Amazing Fraud

Seven Years Meted Out to $20,000,000 Swindler of Toronto Bankers.

Toronto, Ont.—Found guilty on 15 counts of forgery, Percy H. Ham, one of the socially elect of Toronto, was sentenced to seven years in the penitentiary. So closes one of the most amazing frauds in the history of finance in Canada.

Ham, a quiet, unassuming young gentleman of artistic tastes, was a junior clerk in a government office. With this modest background and with no financial capital, he launched a scheme of operations of staggering proportions. In a period of about two years he negotiated sales and purchases of bonds amounting, according to the court records, to more than $20,000,000.

Ham, according to his counsel, came out of the mass of purchases and sales without a 5-cent piece for himself, although losses sustained by brokers and friends as far as they were traced, amounted to $618,000.

Ham had been a precocious child. To satisfy an adventurous longing, counsel said, the young clerk had launched out in the hope of demonstrating that he was not the insignificant clerk he in reality was.

Credulity of Victims Amazing.

The credulity with which his campaign was accepted by a hard-headed financial world was one of the most amazing features of the case. Bonds purchased as they did late millions a month, must inevitably attract attention in a market as small as this one. Instead of being regarded with suspicion, Ham commanded respect. Brokers fell fetlock deep in, extolling him with being the agent of governments and of financial syndicates planning far-reaching coups.

Ham began his operations on a small and evidently experimental basis. His first purchase was of only a few thousand dollars of government bonds—practically all his transactions were in government bonds. His capital did not exceed a few thousand cents, but he negotiated the purchase this way: Ham said he was acting for an out-of-town friend, and gave his personal check to be held by the brokers until the bonds were delivered to his friend, who would immediately advance payment. Though bonds are sold "cash on delivery," Ham's proposal was accepted. The credit of his check for the few days requested was accepted by brokers who knew him, or his father, or his friends. Ham covered the transaction within the time specified by reselling the bonds through another firm.

Financial Pyramid Erected.

The operation was repeated over and over again on an ever-increasing scale.

After each transaction Ham came to be regarded as an even more desirable client. But there was never any profit for Ham. Every transaction showed a loss of at least the two commissions for buying and selling, and often a fractional loss in addition to the market price, the weight of the offerings being sufficient to depress the price on a narrow market.

There is no evidence that Ham at any time attempted to use his credit or the securities which were temporarily in his possession for speculating purposes. Playing the market for an advance or a decline did not seem to fall within his scheme of things. Neither is there any evidence that he planned at any time to abscond, although in the later phases of his adventure he must have been in possession at times of enormous quantities of negotiable securities.

Difficulties developed for Ham as his operations expanded and the total of his losses mounted. The credit of his personal checks was no longer sufficient to finance his hare-brained strategy.

Resorts to Forgery.

These difficulties he met by forgery, selecting two prominent citizens—one John Gleeson, an Ottawa capitalist, and Rev. William Beattie, a London clergyman with wealthy relatives—and attaching their names to a series of notes, which he used as collateral. He stated that these gentlemen had selected him as their confidential agent. Beattie, he said, was under special obligation to him for having saved his young son from drowning. He insisted that the nature of their plans was such that the men must remain in the background and that they could not be communicated with directly. In one case, under pressure, he produced a letter, with Gleeson's name forged, to substantiate the note.

Five notes, totaling $500,000, purporting to have been signed by Gleeson and Beattie, were produced and used by Ham. These he used in two ways. He deposited them with brokers as collateral. But the cruelest feature of his operations was when he used these notes to secure advances of cash and securities from private individuals. The individuals were friends of his or of his family. In case of one lady, a widow, he secured advances amounting to $250,000, which represented most of her capital.

Exposure of the Fraud.

Exposure came when one broker communicated directly with Gleeson, the supposed backer of huge transactions. Like a bombshell it developed that Gleeson knew nothing of Ham and had signed no note.

Ham was summoned to the office of one of the largest bond houses in Toronto and given the third degree. He still insisted that he could make good his commitments and was given a few hours to do so. That afternoon he was discovered in the kitchen of his home, with the gas turned on and suffering from asphyxiation, which a short sojourn in the hospital cleared up.

Where the $648,000 that was lost went to was not satisfactorily divulged by the trial. A substantial sum went to brokers in commissions.

800-Year-Old Gate Served Oxford Again

London.—An ancient gate of oak, which was set up nearly 800 years ago at the entrance to Balliol college, Oxford, before it changed its location, has been found and restored to its old place.

The gate was made and hung in 1294, and it was already a venerable antique when in 1531 Ridley and Latimer were burned at the stake only a few yards in front of it, after they had been convicted as Protestant heretics. Toward the end of the Eighteenth century, when the front quadrangle of the college was demolished and rebuilt, the gate was taken down.

Dr. Harding Newman, a fellow of Magdalen college, Oxford, acquired it and hung it at the entrance of his private garden at Nelmes, in Essex. Ivy grew over it and after Doctor Newman's death the gate was forgotten.

But eighteen months ago J. Ingelbe Thomas of the Georgian gallery, St. James, London, discovered the ancient gate and bought it.

More than 100 cents of paint were scraped away and the old oak planks and struts found in a perfect state of preservation.

382 New Rural Mail Routes Serving 635,000

Washington—More than 635,000 persons in rural districts received their mail at their front doors for the first time during the last year. They were served, the Post-Office department announced, by the 382 new rural mail routes established during 1926. The department reported that 45,318 rural routes, supplying 6,616,000 families, estimated at 30,435,500 persons, and covering 1,240,978 miles, were in operation during the year. The rural carriers covered 377,045,703 miles in their deliveries.

John D. on Florida Links Again

John D. Rockefeller, Sr., has returned to his winter home at Ormond Beach, Fla., and is there seen about to make his first drive on his private golf course. He still shoots a good game.

AMERICANS PAY MILLIONS FOR RARE ART TRESURES

Celebrated Portrait, "Pinkie," Painted by Lawrence in 1795, Brings $370,000 at Auction.

New York.—More than a million dollars' worth of British art treasures, knocked down under the hammer in two days, is destined to hang in American homes and museums.

The celebrated portrait known as "Pinkie," painted by Sir Thomas Lawrence in 1795, has been bought by Joseph Duveen of New York for about $370,000 at the auction of the Michetham collection in London.

This is said here to be the highest price ever paid anywhere for a picture. The previous record was $360,000 paid last year for Romney's "Mrs. Davenport" at a London auction.

Not only did Joseph Duveen acquire "Pinkie," the chief prize of the auction, but he also bought the Gainsborough portrait of Miss Tatton and the Romney portrait of Lady Elizabeth Forbes, his total outlay so far at the auction being estimated at well over a million dollars.

These noted canvases are to follow Gainsborough's "Blue Boy" and other British art prizes across the Atlantic.

"Pinkie" is a full-length oil portrait of Miss Mary Monkton Barrett, of the Isle of Wight. She wears a white dress with a pink sash and long pink ribbons on her hat. Unusual cloud effects form a background for the graceful white figure. It is considered by many critics to be the masterpiece of Lawrence's early career, full of freshness and vivacity.

Kodiak Bear Weighs Ton

The Kodiak brown bear attains the greatest weight of all brutes, often weighing almost a ton, according to the Dearborn Independent.

Girl, 3, Tries Suicide to Join Grandfather

Vienna.—Even children have been affected by the suicide epidemic in Austria.

Three-year-old Heill Hamp was found behind the cupboard the other day choking. She had wrapped a rope around her neck and was seemingly about to die when discovered. Revived, her explanation was that she wanted to go to heaven to "dear grandfather."

"Dear grandfather" had committed suicide a few weeks previously, distressed because he could not aid little Heill's poverty-stricken parents.

Hunter Uses Bow and Arrow After Big Game

Corvallis, Ore.—Prof. B. G. Thompson of the Oregon Agricultural college started his archery hunting on squirrels, rabbits and other small game, now he is looking for the largest game to be found in the state, and if there were lions and tigers here he would probably set out to get one of them.

This year's bag includes a bear and a deer. He wanted to get a deer last year, he said, but was afraid he would fail, so he took along a rifle. He used the rifle and brought in two bucks. This year, however, he left his gun at home, determined to bag a buck with an arrow.

He shot at two, then brought down his third at 65 yards with his six-foot English longbow. The arrow, 28 inches long, feathered with turkey feathers and tipped with a two-inch steel blade, struck the deer's knee and glanced into its stomach, penetrating several inches. The big buck ran about 50 feet and dropped dead. The bow required about 75 pounds pull.

The hunt was even easier to beg than the deer, Thompson said, because not as active.

Thompson declares that if everybody used arrows in their hunting there would be plenty of game in the state.

Girl Must Go to High Court to Get Diploma.

Eureka.—Kathleen Ryan, who fought and won a case against the Eureka school board for her high school diploma, will have to fight the case to the highest court in Kansas. The board, at a special meeting here, decided to appeal to the state Supreme court, after losing the case in the district court.

Miss Ryan, a high school student, was charged with "cheating" in a high school examination in history and refused credit for her work. She was not allowed to graduate with her class. She denied the charges and was given another and more strict examination. This she passed with flying honors. Still the school authorities refused to give her the coveted honor.

Through her parents, Mr. and Mrs. Leo Ryan, the girl appealed to the district court. Judge Benson, before whom the case was tried, heard testimony and decided that in view of the fact that the girl passed the second examination, she was entitled to credit and her diploma.

Now the school board has voted to file an appeal.

Attention to New Rams Will Prove Profitable

A little attention to the new rams may be very profitable both from the standpoint of the individual and the attention given. A large percentage of rams which change hands during the fall go direct from the raisers and others to the farm flock owner. Sheep on the average farm are usually considered a side line, and sometimes receive very little attention.

The rams need flesh and should be purchased in good breeding condition, not overlooking the conformation and make-up. As a rule breeding animals are thin and should be avoided which should not exist.

Some breeders discriminate against a heavy fleece on the ram, and it is indeed burdensome if he lugs it around during the breeding season. Cuts difficulty, however, can easily be remedied by clipping the ram at breeding time.

Make Ready Now for Gardening

Never Too Soon to Get Equipment Ready for Growing Early Plants.

The vegetable gardening department at Cornell says that everything should be made ready to grow early plants long before the equipment is really needed. The equipment includes plenty of good soil, flats, pots, spotting boards, lest bed sash, mats to protect the frames, and manure suited for hot bed use.

Equipment Short Lived.

All of these things are exposed constantly to warmth and moisture when they are used, and so have a short life at best. Flats may need re-nailing, sash possibly should be re-glazed, and other small items of carpentry be done to good advantage.

Soil for growing plants should be well mixed and screened so that lumps, stone and trash are removed. Soil too rich tends to produce plants which are spindly and thus easily susceptible to damping-off disease. Compost consisting of well-rotted manure, loam, and sand added makes a good mixture. The sand keeps the soil from baking and crusting and will prevent puddling when the soil is watered.

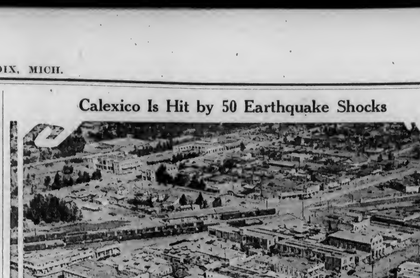
Spacing Device Helps.

A device for spacing the plants in the flats or beds is a labor saver for those planting seedlings. The state college uses spotting boards with pegs driven one inch apart by one and a half and two by two inches. This device can be made of pine lumber by any one. Get a board of the proper width and the lengths and width of your flats," says the college. "Drill five-eighths-inch holes in this board the desired distance apart (one and a half inches by two inches) and countersink the holes so that they will about project through the board. The spotting board provided all your flats are of the same size. In one operation you firm the soil and plant in the flat with a series of holes evenly spaced to receive the seedling. Even spacing in the flat gives more uniform growth of the seedlings, and the plants have room and to cultivating the seedlings."

Use of Rotted Manure for Enrichment of Soil

Rotted manure has its place in certain forms of soil enrichment but it should be considered that manure cannot rot without a distinct loss in fertility elements. A ton of rotten manure may represent anywhere from a ton and a half to two tons of fresh manure, depending on how long the rotting has been going on. The practice starting and paying ground of trucking crops farm waste in well-rotted form is commercially helpful since a few days' difference in getting the truck to market may make a great difference in the price received for it. But in the case of dairy and general farming the best place for manure to rot is under the soil. The fertility elements which the rotting releases are then taken up by plant roots or otherwise conserved. There is never any loss when manure rots underground.

Calexico Is Hit by 50 Earthquake Shocks



View of Calexico, Calif., which was the chief sufferer from the fifty earthquake shocks that rocked the Imperial valley and part of northern Mexico. The photograph was taken early in the morning after the tremblors were experienced.

Germany Constructs New Type of Airplane

Here is the latest achievement in airplane design of German engineers, the new Luft-Hansa monoplane. It is featured by the motors being directly attached to the wing beams. This may be the forerunner of a huge passenger-carrying plane designed for transatlantic flights.

Prof. Charles L. Four of Columbia university explaining to the American Association for the Advancement of Science at the Philadelphia convention that Einstein's law made a basic error in the practical application of his light deflection theory.

OF INTEREST TO EVERYBODY

Criminals Lack Education

We don't believe criminals are better educated than they used to be. At least their work doesn't show any improvement over that of the last decade. They still use the same blundering, bulldozing methods, and haven't evolved a new idea in a generation.—Philadelphia Inquirer.

Exist Without Water

The gazelle and llamn never swallow water, according to an answered question in Liberty.

With a musical "ping," Suzanne Lenglen's tangle tennis racket sent a white sphere wildling into the air at Palm Verde country near Los Angeles. The ball was annexed by Jimmie James, the mail flyer, who immediately tossed his plane into the eastern skies and nodded an acknowledgment of the farewell wave of the great French net star. Written on the ball, which ultimately will arrive at the desk of the President of France, was a cordial greeting to the French people and their chief executive, written in the characteristic impetuous hand of Mlle. Lenglen.

Early land animals that populated the earth depended chiefly on the sense of smell to guide them.

Japanese scientists are using the method of marking birds with aluminum bands to study their habits and migrations.

Alsatian grasses found growing in Colorado mountains are believed to have been originally brought by glaciers in the ice age.

It requires six years to develop an expert diamond cutter.

When snakes shed their skins, one, two or three times a year, they also shed their eyelids, and at the time they are blind.

The air-mail route from New York to Salt Lake City is now lighted all the way by beacon lights which revolve six times a minute, flashing every ten seconds.

Farm Facts

Sweet clover makes old land young again.

* * *

A one-crop country is never prosperous.

* * *

Ground corn and clover or alfalfa hay, and a little oil meal will put an excellent finish on the heifers.

* * *

Cattle pasturing in the farm wood lot is reducing hardwood areas to mere relics of the once virgin hardwood forests.

* * *

Alfalfa seed from Turkestan and Africa has been added to Italian red clover seed as unsuited to plant in most of the United States and must be dyed before being sold in this country.

* * *

Illinois farmers lose $1,387,500 annually through failure to house farm machinery. This figure is based on the fact that 10 per cent or $22,200,000 worth of farm machinery in the state is left in the open.

Stamp Lickers Need Not Fear Ill Effects

Washington.—Regardless of the sanitary question of licking of postage stamps as it might affect others, the licker has no need to fear harmful effects from the operation.

On the contrary, the Post Office department says the gum is really foodstuff material, and they are afraid to make it more palatable by adding flavoring because that might be an incentive for users to remove too much of the adhesive, and thus get the post-office people into trouble with an oversight of mail to be sent back for postage.

The gum used has been so good that many have asked for its composition. It is composed of 88 per cent cassava dextrin, a starch obtained from certain South American plants which is used in making tapioca and cassava bread. Ten per cent of corn dextrin and about 2 per cent glucose completes the mixture.

A wrist watch made into a cuff case is a recent innovation.

The DOOM TRAIL

CHAPTER VI

Into the Wilderness

"No, we will go to Murray's tavern," I said. "I will ask him if he thinks he can commit assassination here in the town as he does in the forest."

"Good," re-joined Ta-wun-ne-ars impassively. "I will accompany my brother-There."

I remembered that De Veulle lodged at Newton's, and hesitated.

"Let my brother proceed be at ease," added the Indian. "Ta-wun-ne-ars has mastered his hatred."

"I, too, hate your enemy," I said.

He was silent for as much as ten paces.

"My brother means De Veulle?" he asked.

"Yes; I once crossed swords with him."

"And he lives! Did he wound my brother?"

I recounted briefly the circumstances of the duel at the Tobacco d'Or. He made no comment until I had finished.

"I am glad my brother spared him," he said then. "For Ta-wun-ne-ars has often prayed to Ha-wen-neyu, the Great Spirit, to grant him the life of this man who lives as though he were one of the fiends of the Ga-go-sa (False Faces).

"Now that my brother is calm for Murray or the salt and the piety in the tap-room and ordinary, so without a word he escorted me to the second floor and up the upper floor. In the hall I hinted unconcernedly, considering which door to knock upon, when the puzzle was solved by the opening of the one by which we stood.

My Lady appeared, and she started back in amazement, flushed deep red, at sight of me and the stalwart, half-naked figure of the Seneca.

I bowed to her.

"Good evening, Mistress Murray," I said. "I am come with my friend for a word with your father."

"He is engaged," she answered quickly.

"That may be, but I must speak with him on a matter of much importance. I am obliged to ask your grace of the second time if he condones assassination in the forest."

Her eyes widened with horror, then darkened with stony anger.

"Sir, you are monstrous impertinent!" she exclaimed. "How dare you suggest such a thing?"

"Because it occurred at quarter-hour past."

"And because you are assailed by some footpad in a disreputable part of the town, is that a reason for you to charge Master Murray with assassination?" she demanded with high contempt.

"Oh, I have proof," I said.

My anger grew with hers. It maddened me that this girl, who I knew was lovely, should be arrayed against me, should hold for me the contempt of a fair woman for a man she deemed a traitor.

The door behind her opened, and Murray himself stood there.

"I thought I heard voices— Ah, Master Ingoldsby—"

"Ormerod," I interrupted suavely. His eyebrows expressed polite astonishment.

"To be sure. Forgive my stupidity. It hath gone so far as that already, hath it?"

"It hath gone so far as attempted assassination by footpads at quarter-hour past."

"Assassination? Tut, tut," he rebuked me, "Master Ormerod, you use strong language. And who in this little town of ours hath cause to murder a gentleman new-landed like yourself?"

Ta-wun-ne-ars stepped to the front. "Does Murray know this scalp?"

He permitted the end of the lock of Bolling's hair to show through his clinched fingers.

Murray started back in terror. Murray's face became convulsed with passion.

"Sleuth!" he swore. "If Bolling is dead by this savage's hand I shall know the wherefore of it! What? Do the Iroquois take scalps within the city?"

Ta-wun-ne-ars laughed, and slowly opened his fist to reveal the single lock of Bolling's hair.

"Ta-wun-ne-ars only takes the scalps of honorable warriors," he said in his smooth, low-pitched voice. "That the Hell Dutch escaped tonight by the width of the hair is bad news. Murray think Ga-en-gwa-ra-go would have been angry with Ta-wun-ne-ars if the townhawk had struck the tricker down?"

Murray wiped beads of perspiration from his face.

So "was Bolling!" he muttered. "Curse the knave! What hath he done?"

"No more than attempted to murder me, sir—as I have intended to tell you," I answered ironically.

Murray came forward, hands clasped in consternation.

"It isn't so! It can't be so! Tell him he lies, sir!" she pleaded with Murray.

He put her gently to one side.

"Peace, peace, my dear," he said. "You do not understand."

"But Bolling was one of your people, sir. You told me—"

"Tut, tut, my dear! Mayhap. You are new to this new world of ours. The frontier is not like Scotland. We must work with what tools we find. I say it to my sorrow"—and he said it furthermore without even the twitch of an eyelid—"I am compelled occasionally to consort with men I might prefer to do without."

He gave his attention once more to me.

"In a word, Master Ormerod, what hath happened that you approach me in so hostile a spirit?"

"In a word, Master Murray," I replied, "your man Bolling, or 'The Red Death,' as he seems to be known in these parts, tried to kill me with knife and hatchet this evening."

"I am constrained to believe you," he said with an appearance of much sorrow, "but I cannot hold myself responsible, sir. As it happens, Bolling quarrelled with me this afternoon in the presence of half a dozen well-known citizens of the town, and I dismissed him from my service."

"Pardon me," I said with a laugh, "I express some—"

"Do you step within," he responded with celerity. "I shall be glad if you will satisfy yourself by questioning witnesses of the dispute. Marjory, will you—"

"I will stay," she said positively.

He shrugged his shoulders and stood aside. I motioned to Marjory, and she re-entered first. I walked next, and the Seneca followed me, one-hand resting on his knife hilt.

Murray shut the door behind us, and I found myself in a large room, sufficiently lighted by candles. Five or six men, who had been talking at a table, looked up with interest as we came in. One of them was De Veulle, and I felt rather than saw the massive frame of Ta-wun-ne-ars gather itself together exactly as does the wildcat before he sights his quarry.

The others I did not know. Later Ta-wun-ne-ars told me they were respectable merchants identified with the faction in the province who were hostile to Governor Burnet, and all were in the habit of trade relations with Canada.

Murray turned to me, after receiving my errand, and said:

"Your companion is evidently a chief, Master Ormerod. Will you identify him?"

Before I could say anything Ta-wun-ne-ars responded for himself.

"I am Ta-wun-ne-ars, of the Clan of the Wolf, war chief of the Onondagas, and nephew to Da-ne-ho-ga-weh, the Guardian of the Western Door of the Long House."

He spoke directly to De Veulle, and

Germany Constructs New Type of Airplane

Here is the latest achievement in airplane design of German engineers, the new Luft-Hansa monoplane. It is featured by the motors being directly attached to the wing beams. This may be the forerunner of a huge passenger-carrying plane designed for transatlantic flights.

Common Phrase Once Had Distinct Meaning

"A name to conjure with" is a phrase used thus unrestricted, as conjuring was not always the term for stage or parlor tricks of the present day. Originally conjuring stood for the art of the magician—the conjurer of the dark ages being really the same personage as the wizard. His conjuring really meant a very solemn conjuct or agreement, the word itself being taken from the Latin for an oath. Part of his ritual consisted in the then popular belief that he could summon up Satan or some other spirit by the saying of some "word of power, such a word being generally mysterious-sounding. Hax, "hiracadiax," Cosmosmy, Imr, H, W, Abracadabra, were used. This name would then be known as sufficiently mighty to "conjure with," spirits hearing it being bound to obey. Today, we no longer believe in magic, and the magician of mystery and dread has turned into the harmless gentleman who produces rabbits from his hat at children's parties; but the old phrase still remains, and we refer to this and that great man as having "a name to conjure with."

Composity Rebuked

A certain man is inclined to be pompous and obstinate. A short time ago he visited a navy dockyard, and somehow managed to get aboard a vessel where visitors were at the time excluded.

An officer encountered him upon the deck and told him that he could not remain. The visitor swelled up and said that he was a taxpayer, that as such he owned part of the warship upon which he was standing, and that he had a right to be aboard and would not depart.

The officer looked at him a moment. Then he walked over to an anchor chain and with his pocketknife whipped a bit of rust from it. Returning to the visitor, he offered him the flake of rust, and said:

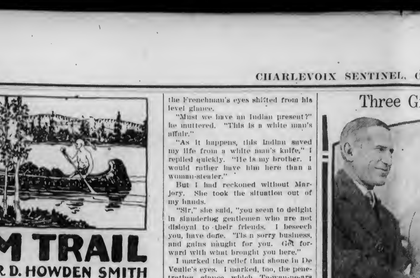
"Here's your share of this ship, sir. Take it and get out."—London Answers.

Manila Harbor

Before the American occupation large ships were forced to lie two or three miles off shore at Manila. An inclosed harbor has been built by contracting a long breakwater and dredging.

Writings of Aristotle describe the method by which the Greeks backed glass with metal foil to make mirrors.

Three Great Football Coaches



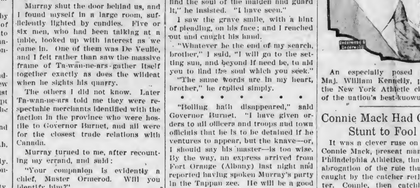
Three of the country's greatest football coaches met in Los Angeles recently, when Howard Jones (left), mentor of the University of Southern California team, greeted his brother, Ted Jones (right), Yale coach, and Glenn "Pop" Warner (center), Stanford coach, on their arrival in Los Angeles.

Gridiron Stars Playing Superb Game at Hockey

Some of the new professionalized hockey players are stars of the gridiron, banished from the game because there is no place for amateur outlaws in football in Canada.

Hugby players starring on the ice include Charlie Dinsmore, Eddie Gerard, Duncane Munro, Nelson Stewart and Hube Siebert of Montreal Maroons; Lionel Conacher, Roger Smith and Duke McCurry, of Pittsburgh; Billy Bryden, Jess Spring, Lee Duggatt and Bill Carson, of Toronto St. Patricks; Billy Boucher and Aurel Joliat, of Montreal Canadiens; Billy Burch and Charlie Langlors, of New York Americans; Georges Georges Boucher, Alex Smith and Hobley Smith, of Ottawa Senators; Hube Dye, of Chicago, and Frank Boucher, of the New York Rangers. Dye has some talent in hockey's off season when he cavorts as an International Bogey baseball star, while Conacher is being tried out by Toronto Leafs.

Prominent Sportsman



An especially posed portrait of Maj. William J. Kenedy, president of the New York Athletic club and one of the nation's best-known sportsmen.

Connie Mack Had Clever Stunt to Fool Umpires

It was a clever ruse on the part of Connie Mack, proud manager of the Philadelphia Athletics, that caused the abrogation of the rule that a foul tip by the catcher retired the batter. Connie, then catching for the Washington team of the National league, was just as canny as a catcher as he since has proven himself to be as a manager.

It got to be a regular practice on the part of Connie, who thought it all out himself, to snap the fingers of his right hand against the tip of his catcher's mitt as the batter would swing at a ball, making it sound to the umpire for all the world like a foul tip. For awhile even the batter himself was deceived, and invariably he would be declared out by the umpire. Once this deception was discovered, however, a rule was incorporated that a foul must go at least ten feet in the air or ten feet away from the batter's box before the catch of the foul would retire the batter. After that Connie's cleverness at baiting a foul tip was of no avail.

Kenan Gives $275,000 for a Tarheel Stadium

A gift of $275,000 for the construction of a football stadium at the University of North Carolina, has been made by William Rand Kenan, Jr., of New York, president of the Florida East Coast railway, Jr., H. W. Chase, president of the university, announces. The stadium will seat 24,000 persons and construction will begin immediately. The plans call for its completion in time for the opening of the football season next year.

The gift is in memory of the late Mary Hargrove and William Rand Kenan, mother and father of the donor, and it will be known as the Kenan Memorial stadium.

Sign Two Pirate Coaches

Jewel Ens and Oscar Stanage signed contracts to coach the Pittsburgh National league baseball team next season. Ens has been with the Pirates as a player and coach since 1922. Stanage, veteran big leaguer, was manager of the Evansville Three-I team last year. He was the Detroit first string catcher from 1908 until 1921. The next year he played with Sacramento, Calif., and then, after a year's lay-off, went to Toronto in 1924. In case of emergency he might be called on.

Three Americans Given Places on Oxford Teams

With the promotion of Charles F. Darlington, Jr., of Mount Kisco, N. Y., to the first rowing squad at Oxford, America now has two representatives on that group for the first time in many years.

Darlington, who rowed on the Harvard varsity crew for two years, was given a seat in Crew B of Oxford university trial eights, following a short period of preliminary work. The other American is H. T. Kingsbury, who was given a seat on Crew A some time ago.

America also added another Oxford athletic triumph to its list when W. E. Lingelbach, Jr., of Philadelphia, Rhodes scholar from Pennsylvania, captured the University freshman's tennis championship.

Lingelbach's victory came only after a gruelling match, stretching into four sets, with L. W. Mendley, an English student from University college.

Fernandina, Fla., has the only natural ocean front golf course in America, the beautiful sand dunes forming fairways, bunkers and traps, the greens and grass having been planted on the government reservation immediately adjacent.

Horticultural News

APPLE OUTLOOK FOR THE FUTURE

From a long time viewpoint apple growers appear to have turned the corner, even though the present price situation is not particularly satisfactory. With the decrease in bearing trees as shown by the last census figures, growers can expect marketing conditions to be reasonably satisfactory during the next 10 or 15 years. In the Eastern and Central states, it appears that if the commercial producing acreage is held at the present level reasonably satisfactory returns may be expected over a period of years. In the Northwest, where trees reach bearing age more quickly, there seems to be little reason for increasing the bearing acreage at present, though apples probably will continue to be profitable in most sections now yielding adequate returns.

In considering the present situation, it should be remembered that profits from apples since 1919 have not been sufficiently great to stimulate plantings. The number of bearing trees is actually decreasing, the 1925 bearing apple producing states showing a decrease of 6,500,000 trees, or approximately 5 per cent, during the past five years, according to preliminary census figures, says the Michigan Farmer. In Eastern and Central states, most of the decrease has been in unpruned orchards that are either outside of the main commercial sections or are too small or unproductive to justify the use of efficient spraying equipment. Some unproductive orchards also have been abandoned in the looked apple states, and the tendency there is to replace the poorer varieties in the older orchards. For the country as a whole, the number of trees not yet bearing is about the same as five years ago, and is not sufficient to maintain the present number in bearing.

So far as commercial production is concerned, the decrease in the number of bearing trees in the scattered farm orchards has been more than offset by increased production in the commercial sections, however, to be slowing up, and in the looked apple states, the point of maximum production seems to have been nearly reached.

Looking ahead, it seems that the yearly increase in population will be sufficient to take care of such increase as the production of commercial apples is to be expected from the present orchards.

Suitable Varieties and Kinds of Orchard Trees

The following list of fruit trees should be very satisfactory for the home orchard: Nineteen apple—2 Yellow Transparent, 2 Duchess, 2 Wealthy, 2 Grimes Golden, 2 Jonathan, 2 Delicious, 2 Stayman, 4 Winesap; 2 Early—2 Early Harvest, 2 Red Astrachan; 2 Late—2 Rhode Island Greening, 2 Northern Spy; 2 Pear—2 Kieffer; 2 Plum—2 Burbank; 2 Cherry—2 Early Richmond, 2 Montmorency, 2 English Morello; 2 Peach—2 Greensboro, 2 Champion, 3 Elberta, 2 Crawford's Late; 2 Apricot—2 Early Garber, 1 Seckel; 3 Plum—1 Wild Goose, 1 Green Gage, 1 Shropshire Damson; 2 Grape—2 Moore's Early, 2 Concord; 2 Brighton, 2 Goethe, 2 Catawba; 12 Blackberry—2 Early Harvest, 4 Eldorado, 4 Snyder; 12 Raspberry—4 Kansas, 4 Cumberland, 4 Cardinal; 6 Gooseberry—3 Downing, 3 Houghton; 6 Currants—3 Perfection, 3 Fay; 60 Strawberry—12 Premier, 18 Dunlap, 18 Aroma, 12 Gandy. The strawberries may be planted between the rows of apple, pear, peach and plum trees, and should give very well until the trees come into bearing.

There are many other varieties of the various fruits listed above that under the conditions of the producer might be equally as good or better than some of those listed. As a rule, however, the grower should find that the varieties mentioned will give satisfaction.

Horticultural Facts

Dairymen who buy complex mineral mixtures are wasting money and may be harming their cattle as well.

* * *

A few fruit trees set out about the place will assure the owner of a fresh supply of this valuable and necessary food.

* * *

When sweet clover is sown in the spring and cut for hay in the fall of the third year the quality of the hay is practically equal to alfalfa.

* * *

Most of the pruning of peach trees should be done soon after the foliage begins to fall in October and November and before the dormant spray in March.

* * *

The home orchard should be given as much attention upon farms as the home garden. No farm is complete without it.

* * *

The quickest and cheapest method to eradicate the pocket gopher is by poisoning with grain or vegetable baits treated with strychnine.

* * *

The general index of purchasing power of farm products in terms of nonagricultural commodities continued at 87, at which point it has stood for five months.

* * *

A questionnaire shows that 95 per cent of the farmers who own radios look upon the equipment as a utility as well as a source of amusement.

* * *

The best way to get a start with blueberries is to select good wild plants that bear well of good quality fruit, and then raise plants from them.

* * *

Many mature fruit trees are carrying too much wood. The best way to prune to remedy this is a distributed thinning of the smaller branches all through the tree.

Drink Water If Back or Kidneys Hurt

Begin Taking Salts If You Feel "Backachy or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Then the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or dull backache, dizziness, the stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and also to neutralize the acids in urine, so it no longer irritates," Jad Salts is inexpensive and quick relief. Have Musterole handy for emergency use. It may prevent serious illness.

To Mothers: **Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.**

FLORIDA TRIES TO UNSCRAMBLE TITLES

Courts Are Swamped by Real Estate Cases.

Miami, Fla.—Unscrambling the tangled financial and property title mess that developed in the "Binder" period a year ago, in the refinancing and bonding period a few months later and in the deferred payment default period of the long-ten months, now is occupying practically the whole time of the courts and realty tribunals in Florida, writes Lansing Haight in the Chicago Tribune.

Solid pages of "service by publication" summonses in foreclosure proceedings are appearing in daily and weekly newspapers, in spite of the fact that a general policy had been adopted by the more substantial development concerns to extend time on deferred payments for lands for a year or two at least.

Real Estate Tangles.

Most of the actions now being instituted are not exactly what they appear to be on the face of the title, attorneys say. Complainants in a great majority of cases appear as the mining firms and corporations which sprang into being at the height of the boom and sprang out when the boom subsided. They left commitments to pay for tracts of land used for subdivision one hand, and deferred payments contracted by buyers on the other. Now the original owners of the tracts are trying to clear up titles to their property.

Suits are started against lot-buyers to foreclose because of defaulted payments in the name of the concern which sold the lots. It may be years before property titles are straightened out if the present procedure is followed, as the foreclosure actions in Dade county alone are said to be 15,000 to 20,000, though no accurate figures are available as present from the court records.

It is likely that the next legislature will be asked to pass a statute under which it will be possible to clear property titles by affidavit and notice. The exact method has not been worked out as yet, but experts are engaged in framing a simple way to avoid the growing avalanche of court proceedings.

The "service-by-publication" phase of the foreclosure will, in the opinion of Florida lawyers, work no great hardship, for they hold that practically all those suits are against buyers who purchased property with a down payment as a gamble, and who believed, to some extent at least, the salesmen who promised to resell the property within ninety days at a profit. When, at the end of ninety days the property was not resold, the buyer would merely "forget it," and take his loss, the Floridians assume.

Suit at Law Necessary.

The buyer being out of the picture, however, does not affect the validity of the nonidle cloud on the property title, and to remove it suit at law is necessary. Most one-payment buyers will never know or bother to find out what steps were taken to remove their equities, as personal service is scarcely ever attempted in these suits unless the defendant is in the county or city where action is started.

Some, however, will know it when judgments for deficiency in foreclosure proceedings are forwarded to the home town for collection.

The question of foreclosure deficiency judgments is just now the subject of much discussion through Florida, as many leading Floridians are of the opinion that enforcements of payments upon notes and contracts given during the hectic boom days will leave such a bad taste in the mouth of the northern portion of the country as to produce a financial effect here for years to come. Others, urge the right to exact the pound of flesh. Their logic is based on the theory that the boom times buyers were gambling and many have taken a profit, but it unrefinished, and therefore are in duty bound to take a loss when that has come.

Not only in land titles is the unscrambling process going on, but also in high finance circles, where much distrust has developed in recent months.

Here's a Championship

That Hasn't Been Lost

Albany.—New York, champion cabbage-growing state of the Union, raised 905,100 tons of that vegetable this year, an increase of 10,700 over 1925, said a state federal crop report issued by the department of farms and markets.

"Although the output of domestic, or early, cabbage in New York was much lighter than usual," the report says, "the late or Danish crop is enough larger to make the total production greater than in 1925, due chiefly to the increase in acreage of the Danish variety."

The amount of the latter type harvested this year is estimated at 294,300 tons, as compared with 153,900 tons last season.

Cause and Effect

"Sedentary work," said the college lecturer, "tends to lessen the endurance."

"In other words," butted in the smart student, "the more one sits, the less one can stand."

"Exactly," retorted the lecturer; "and if one has a great deal, one's standing is lost completely."—The Outlook.

ALLAYS FEAR OF QUAKE INCREASE

Director of Georgetown "U" Replies to Inquirers

Washington.—The earth is not shaking any more than it used to, but people are noticing it more.

This is the answer of Director Tondorf of the Georgetown university observatory to the flood of inquiries reaching him as to whether earthquakes are increasing in number and frequency.

Because of the precision of instruments which record tremors, the public is informed constantly through their newspapers of disturbances of the earth's crust in all parts of the globe. The lay belief that the shocks are becoming close together is a result of this publicity.

"The layman, unofficially interested in the restlessness of the earth's crust, should know the truth," says Doctor Tondorf. "The problem of computing earthquake frequency was first scientifically undertaken by Count de Montessus de Ballore, one-time director of the seismological observatory of the government of Chile.

"In 1900, after a close analysis of the then available earthquake records, 181,292 in number, he placed the annual average earthquake occurrence at 3,850, equivalent to an ear shock every two hours and twenty-seven minutes.

Four years afterward Dr. August Sieberg of the University of Jena questioned the estimate as too low. A recalculation made by him in 1923 lifted the annual average frequency to 9,000, or about one every hour.

Five thousand of these quakes he indicated as being felt sensibly on some part of the earth's surface in varying intensities. Violent quakes, classified by others as world-shaking, occur at intervals of every three and one-half days, either on the continents or on the ocean's bottom. Those on land, however, average every fifth day.

"California, the least immune of all United States territory, is visited by a shock on an average of 31 times annually. The liability of one of these shocks being heavy is about eighteentis of 1 per cent."

"Rent Party" Staves Off Collector in Harlem

New York.—Two novel easy-money schemes have grown up in Harlem, haven of the negro in New York.

The "rent party" is the most unique. When the visit of the rent collector is imminent and the family treasury is low, comes the happy, thought of turning the living quarters into an impromptu place of entertainment for a night. The box office is the kitchen door, where tickets to the "rent party" are sold to whomever among the passers-by can be importuned into the home. The price of admission is 25 cents upward, according to the "swankiness" of the household.

The motley room of guests occasionally get boisterous, leading the revelers into the toils of the law.

The other scheme, in which the rewards are uncertain except for the promoters, is a sort of lottery, known as "numbers" or the "policy game," operated with the daily figures of total stock market sales as a basis. Although contributions of as little as a dickle are solicited, considerable sums are involved.

Burglar Discusses Art as He Takes Jewelry

New York.—A burglar with a penchant for discussing art with his victims, if they happen to meet him, robbed Mrs. Adelaide O'Donohue of Brooklyn of $15,000 in jewels, Mrs. O'Donohue, police said in revealing the burglary, was awakened by a flashlight in her face just before daybreak and called out, "Who are you?"

"I'm a burglar," was the reply. "I want your money and your jewelry."

She told them they were in the bureau, but he paused to remark:

"That's a corking fine painting you have there. Is it genuine?"

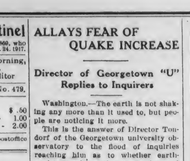
Mrs. O'Donohue assured him it was not—that it was called "Out of Chaos Comes the Dawn." The thief, glancing out of the window, remarked that sure enough it was dawning, then went to the bureau and selected gems, conversing the while.

The burglar remarked upon volumes of Byron, Shelley and Keats on a table.

Odd Quirk of Nature in Recognized Genius

The annals of literary forgery have no more pathetic instance than the so-called Rowley poems of Thomas Chatterton. When Chatterton, perhaps the most shining example of precocity to be found in literary history, was twelve years old, he conceived the idea of fabricating the literary relics of a monk to whom he gave the name Rowley and whom he ascribed to the Fifteenth century. By the time he was seventeen he had aroused some interest in the poems of Rowley but not enough to satisfy his imagination. So he wrote to Horace Walpole, inclosing some pages of manuscript and inferring he had other papers and poems. Walpole wrote, asking to see whatever documents he might have and Chatterton sent so many as to arouse Walpole's suspicion and cause him to call in the poet, Thomas Gray. They pronounced the poems a forgery. Walpole dispatched a letter of admonition to Chatterton. Three months later he returned the manuscripts, which, with the exception of one poem, never saw print until after Chatterton had taken his life in a moment of despair. He was not yet eighteen when he died. So brilliant, so versatile was he that even those contemporaries who condemned him conceded that in many respects he was a greater genius. By some queer quirk of nature he had chosen to act the imposter, where he might with every prospect of renown have produced his work as his own.—Dearborn Independent.

Events in the Lives of Little Men



THE THEATRE

"Fine Manners" — Any old job looks better than mine," H. T. Webster's famous line, now has a brand new advocate. It's Eugene O'Brien, dapper society hero of the movies. After all the years in which O'Brien has been wearing immaculate outfits, he would now like to throw aside the spats and cane for a—well, you'll never guess.

"I want to play cowboy roles," asserted O'Brien. "Why must I always be a well-dressed man? The robust, swash-buckling heroes of the open spaces are the kind of parts I'd like to do!"

Mr. O'Brien's confession came while Gloria Swanson's latest Paramount picture, "Fine Manners," was being filmed. Gloria never heard him, and smiled, just a little bit.

"Boulder, Colorado, was my home town," says Gene, "and I was a hard-riding kid. Since coming east, I haven't been on a horse. Even in 'Frivolous Sal,' I took the part of an eastern weakling."

O.Brien's role opposite Miss Swanson in "Fine Manners," which comes to the Palace theatre on Saturday-Sunday, be akmitted, is a good one, sympathetic and wholesome enough to satisfy anyone.

"But just look at those clothes," he added. "Me for a white hat, woolly chaps, and big, bad six-shooter! Jack Holt, Tom Mix and Bill Hart are the lucky lads!"

"Variety"—The greatest "make-up artist" in the world. That's what critics and fans are going to call Emil Jannings, the motion picture giant of Europe, after they see "Variety," in which he is featured with Lya de Putti.

"Variety" opens on a scene in which Jannings is shown—an old man, discouraged with life. He has been a prisoner for twenty long years and is now about to be freed. It doesn't require much imagination to describe the way he looks. Then, as he tells his story to the warden, "Flash back," and Jannings is seen as a young man—Boss, the world's greatest acrobat.

On seeing the transformation, it will be hard to believe that both are the same man. But then who one remembers his appearance in such films as "The Last Laugh," "Passion" and "Quo Vadis," the thing seems more probable. It would appear that at last, a challenger for the crown Lon Chaney has worn so long, has come out of the East.

Paramount is releasing "Variety." It was made in Germany by Director E. A. Dupont for the Ufa Company, and comes to the Palace on Wednesday-Thursday.

Finns Once Powerful

The Finns are descendants of a western branch of the great racial family of which the Mongolians are the modern representatives in the Far East. But there is evidence that the Finns, before, or closely allied race, were at a prehistoric time spread over a large area of Europe. In the course of time they mixed with other races to such an extent that most of their original characteristics have been modified or lost, while some of those of other races have become Finnish. The original stock is now represented in Europe in a good many other places than Finland. The Hungarians, the Lapps, the Suiogeds, the Esthonians, and various people of Russia may be considered among these representatives.

Plants and Light

All plants require some light. Sun light supplies the energy which causes chemical reactions to take place inside the leaves. These reactions convert the raw food elements into food products available to the plant, says Nature Magazine. Therefore, such sun-loving plants as geraniums, roses and zinnias, when set away in a dark corner, do not thrive so well as when placed in a sunny window. On the other hand, plants which, like a mild amount of sunlight, and this includes palms, asplidistra, ferns, and many of the vines, do not thrive if put in a sunny location.

Too Much Care

The human body is changed for only about 70 years anyway. Why keep it too much wrapped up in cotton wool? You won't succeed in living forever. If you are healthy use your health even to the point of wearing it out; that's what it is for, as Benjamin Shaw says, "spend all you have before you die." You cannot use your cake and have it, and the worst of all is to let it mold on the shelf. Don't outlive yourself. A master word is work.

Addendum to Proverb

"Youth will be served," but if youth doesn't watch its step a summons may be served and then time will be served—if deserved.—Boston Transcript.

Notice of Primary Election and Filing of Petitions

To the Qualified Electors of the City of Charlevoix:

Notice is hereby given, that the annual primary election will be held at the Central Polling Place, in said city, on Monday the 7th day of March, A. D. 1927, for the purpose of placing in nomination candidates for the following city offices:

Mayor, City Clerk, City Treasurer, Justice of the Peace, Park Commissioner, One Alderman from each of the three wards, One Supervisor from each of the three wards, One Constable from each of the three wards.

You are further notified, that under Section 14, of Act No. 351 of the Public Acts of 1925, no nomination petition shall be received after four o'clock standard time in the afternoon of Tuesday, February the first.

CHARLES H. LAMPHEAR,
By—, City Clerk.
D. S. PAYTON, Deputy.

Growing Bison Herds Again Problem to U. S.

Philadelphia.—The crack of the guns of buffalo hunters, resounding recently in the fastnesses of the once wild West for the first time in forty years is a reminder that the American bison has come to represent a new problem for the government to solve.

In 1871, in spite of a slaughter estimated at its high as 3,000,000 yearly, a scout reported the migration of a single wedge-shaped herd moving on a 25-mile front, with a depth of 50 miles. The number of animals were estimated at 4,000,000.

It is the almost incredible trigh that 18 years later a census of the continent of North America showed not more than 400, buffalo in a wild state and not more than 600 privately owned.

Conservationists in the United States and Canada, by heavy, and the government soon established herds on game preserves and passed protective laws.

The protected buffaloes, being among the hardiest of wild things, increased and multiplied, until today they have become a drug on the market.

Now the ten herds owned by the United States government are overcrowding their range. Most of the zoos have been supplied with specimens from these private herds have been eating their owners out of ranch and ranch house.

Seek to Make Fish "Plant" Mussel Beds

Muscatine, Iowa.—A permanent supply of animal food, the new material for manufacturers of buttons, knife handles, buckles and other ornamental articles, is promised by experiments being conducted at the United States biological station at Fairport, here by, Dr. H. M. Ellis of the University of Missouri.

Mussel beds have been built up in the past by inoculating fish with "seed" mussels, thus eliminating the objectionable stage in each species releasing these "host" fish in sections of the river most suitable for mussel shell production. The glochidia drop off and mature in three or four years on the river bed.

Doctor Ellis' experiments seek a method of chemically destroying the larva in the fish, so that the glochidia might be "planted" without the use of "host fish," thus eliminating the uncertainty as to where the mussels are to be grown. Button makers see in the process the possibility of developing privately owned and stocked mussel beds.

WANT COLUMN

WANTED—A teacher for High Island. A. C. Bridge, Commissioner of Schools, Charlevoix, Mich.

WANTED—First-class old school boiler maker—steady job to right man. Slater Construction Co., Pontiac, Mich. 36-3t

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 30-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
HARRY MERCH CO.
Charlevoix, Mich.

FOR SALE—300 foot frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA, 440 Pearl St., Boyne City. Phone 324. 11-tf

Restoring the Ancient Wells

By REV. WM. M. RUNYAN
Extension Department, Moody Bible Institute, Chicago.

TEXT—And Isaac digged again the wells of water which they had digged in the days of Abraham his father; for the Philistines had stopped them after the death of Abraham: and he called them by the names by which his father had called them.—Gen. 26:17, 18.

Rev. Wm. Runyan.

Where our caravans have rested, where we have pitched our tents, where we have chosen to tarry, if but for a night —in this I interest centers in these words!

When, to bereaved, Abraham was given the cave of Machpelah, for a burying place, civic thought they could be heard by the populace that that cave should be forever sacred. Even the price for all bitterness, how it must have seemed the lavish gift, to these important themes. The deity of Christ is made secondary to His humanity. The Holy Spirit is filling the wells. We are in a day when a passionate heart-cry is song for grace to suffer and strength to endure, for divine help to prepare the soul for its sojourning before God in judgment, with a good account, is decidedly not encouraged.

But the restoring of the ancient wells will go on and on. Isaacs there are who will not falter until refreshment is to be had in abundance from the wells of salvation that have given joy in other days. Nor are the names of the ancient wells to be forgotten. The Arab has scored over the Holy Land of the time of our Lord and hardly a beloved and familiar name is now to be found, Jerusalem, Bethlehem, Bethany, the most sacred shrines of our Master, have been called by another name. But as to those wells in the Valley of Gerar Isaac called them by the names by which his father had called them! Are more precious names to be found than Redemption, Forgiveness, Adoption, Regeneration, Sanctification, Assurance? Our fathers spoke these names with a fervor and faith that was unashamed. May they still hold for the needy world the refreshment and the life that the soul of man must find.

Gestures Tell More Than Spoken Words

It is one of the most interesting facts in the world to act a lie. Gesture is, in fact, far more revealing—and far more truthful than spoken words. Figuratively few persons possess complete control of this "language of the body." Neither a golden tongue nor a voice thrilling with passion is any match for a contradicting gesture or glance.

Scientific study of gestures has shown that they fall naturally into five characteristic groups, says Forbes-Robertson in the Atlantic Monthly. Almost every gesture of which we are capable belongs to one or other of these classes, for, in truth, the language of gesture is much simpler than the language of the lips. The natural movements of the head, hands, arms or eyelids belong to the former class, and downward movements to the latter. There are few exceptions to this, but they only prove the rule. For example, there is a way of raising the head which is expressive of pride, and often a sneer is deliberate, whereas the gobbines that are really genuine are always made without deliberation.

Got Name and Victory

Tradition says that this "Jungerbard" poem originally called "Willbill." Under the leadership of these two sons of a progressive chief "Gandara," they came into conflict with the Vandals. The leaders of the Vandals prayed to Wodan for victory while Gandara and her sons invoked Frea. Wodan promised victory to those whom he should see at sunrise. Frea directed Winnili to bring their women with their long, flowing hair faces like beards. He then turned Wodan's couch around so that when he woke at sunrise he first saw the host of the Winnili. He asked "Qui sunt Langibardi?" (Who are these long beards?" Frea replied, "As thou lost given them the name, give them also the victory." They conquered in the ensuing battle and were thenceforth known as "Langobardi."

American Idea in Germany

In Germany the American idea of establishing summer schools in the universities and colleges is taking hold, with the result that a German institute for foreigners has been established at the University of Berlin. The courses will be given in the summer months and will embrace the conventional academic studies, and in addition sociology, economy and social history. Graduates may work for their higher degrees at the institute.

Gyroscope on Railroads

During the year 1926 the gyroscope was first used in the railroad field. It is now used by railroads to bring about more comfortable riding over the rails. It being explained that in this application it "functions as the heart of an extensive recording device to measure and locate uneven spots and other irregularities in the track."

Anticipating Weather

In the headquarters offices of most electric power companies there is a switchboard. When these register the approach of storms, crews of linemen and electricians are marshaled so that possible storm damage may be remedied quickly.

Methodist Church.

C. E. Pollock, Pastor.

Sermon and worship at 10:30 a. m. next Sunday. The Juniors are all expected for their sermon and junior hour with their superintendent at this hour.

Sunday School meets at 12 o'clock, with fine enthusiasm and good teachers. Come for the lesson study.

The Epworth League which meets at 6:30 will begin its study of the "Advancing Church" next Sunday.

A great Vesper Service next Sunday at 4:15 p. m. Special features of this pleasant and instructive hour will be "a good orchestra, special vocal music, sermon, "Mohammed or Christ," rich costuming for a pageant "A Moslem Wedding." Special new slides from the Detroit Area office showing the features of Moslem life. This will be a fascinating study and worship hour for all who attend and all are welcome.

Captain John McCann made a trip to St. James with the tug Venus last Tuesday with mail and freight for residents on Beaver Island and experienced no annoyance either on the out-going or homeward bound trip on account of weather conditions.

—) PERSONALS (—

Ira A. Adams spent Friday and Saturday of last week in Bellaire.

Captain and Mrs. James H. Gallagher motored over from Boyne City and spent Saturday with friends in this city.

Mrs. A. Lawson Baxter of Central Lake, was a Charlevoix business visitor for one or two days early this week.

Attorney Rollie L. Lewis spent several days in Lansing last week attending to business of a professional character.

Mrs. E. C. Sterritt is taking a two weeks vacation and will spend the time with friends in Grand Rapids and Chicago.

H. C. Pearl moved his barber shop into the L. D. Adams building early this week where he will continue in the future.

Rev. C. E. Pollock was called to Petoskey Tuesday on the death of Mrs. Agnes Cameron held at ten o'clock a. m.

The young people of the community are invited to attend a Y. P. S. C. E. social Friday evening in the social room of the Congregational church.

William and Tomas Russell, who recently visited their sister in Stratford, Ontario, for nearly three weeks, returned to Charlevoix last Saturday.

L. H. Wheeler and grandson Harry, went to Grand Rapids last Friday and according to present plans will remain in that city for several months.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At 10:30 morning service with sermon on "Joint Heirs of the Grace of Life."

At 12 uoon Sunday School.

At 6:00 p. m. Senior and Junior Endeavor meeting.

At 7:00 p. m. evening se.vice of song and worship with some readings and comments drawn from books of the day followed by a brief gospel address on the topic "Peter's Keys."

The pastor was unable to get to Ironton last Sunday because of the storm, but hopes to hold service there the coming Sunday.

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on West Hiribut Avenue:

Morning service at 10:30.
Sunday School at 11:45.
Young Peoples meeting, 6:30 p. m.
Evening service at 7:30.
Prayer meeting Wednesday evening at 7:30.

Sewing Circle will meet at Earnest Knore's Thursday providing favorable weather. Those who care to go "be on time"—a way is provided.

Come to services, we cordially invite you one and all.

Christian Science Society

Sunday services, 10:45 a.m., Subject, "Life."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 2 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:30 a. m.

Rev. Fr. Odelo.

Miss Addie Holley acted as host at an informal bridge party last Friday evening at which time twelve ladies indulged in this favorite game. Following the serving of delicious refreshments the guests disbanded after pronouncing the evening one full of enjoyment.

The cigar and tobacco store for some time past conducted by Ed. Smith in the saleroom near the County Bank in the K. of P. building, changed ownership last week Mr. Smith retires from the business which, hereafter, will be conducted by Messrs. Clarence Bartlett and Vaughn Orvis as owners, under the firm name of Bartlett & Orvis.

W. Gordon Parker goes to Chicago today on business connected with the work of the Association of Commerce. Mr. Parker is the secretary of the Northern Michigan Tennis Association and as such will, while in Chicago, direct his efforts in furthering the interest of the Tennis Tournament scheduled for the Charlevoix courts during the coming season.

Mrs. Minnie Bonthron and Mrs. Henry Partridge entertained at a bridge party, at the Bonthron home, last Saturday evening when twenty-four guests, were present engaged in the game. Mrs. Ed. Edwards carried off first and Mrs. Harley Orlo second honors for the afternoon. Following the game delicious refreshments were served all of which made for a most pleasant and delightful evening.

Two acknowledged stars from this region will be members of the Western Normal, Kalamazoo, debating team this season. Arthur Secord a former member of the East Jordan debating team and, at present is president of the Junior class at Western Normal and James McMonagal of Petoskey. The squad of debaters of which Secord is leader have a schedule of 15 debates this season which if carried out will take them into six states.

At a meeting held last Monday by the Board of Education C. H. Emrey, M. A. Lewenson, Aileen Sweet, Mrs. Clinton Cooper and F. J. Fessenden were appointed members as an advisory board to act in conjunction with the educational board on matters pertaining to a future building program in which a number of Charlevoix citizens are directly interested in order to give Charlevoix a higher standard of buildings for educational purposes.

Card of Thanks

We desire to express our thanks and appreciation to our friends for their many acts of kindness and expressions of sympathy during our deep sorrow and bereavement.

Archie Alcox.
Mr. and Mrs. C. J. Withers.
Mr. and Mrs. Harry Alcox.

They Live on Tree Gum

How should you like to live on nothing but gum from a gum tree for a period of about six weeks? If you were in certain parts of Asia and Africa you would probably enjoy this as the natives do. This gum is from the gum arabic tree and is said to contain a goodly amount of nourishment. During the harvest season the natives eat it instead of other food.—Grit.

Fish's Odd Method of Attracting Prey

For a long time it was considered that the nearest allies of the angler fish, well known in British waters, were fish living on or near the bottom of the sea. But recent investigations show that there is another group that live in midwater at depths of from 1,000 to 5,000 feet from the surface.

This region presents conditions inhospitable to life, and as conditions must be almost uniform from season to season, by day and by night, peculiar modifications are to be expected in creatures capable of adaptation to such a strange environment.

Perhaps one of the oddest concerns the primary need for the sustenance of the species. How can a fish find its mate in these vast, trackless, gloomy spaces, where they are presumed, from living in shoals by the poverty of the food supply? It has been found that in some of the species the males are minute dwarfs living as parasites attached to the females.

Most of the fish live wholly on other fish; and, like the angler fish, obtain their prey by attracting it and then engulfing it in capacious mouths armed with sharp and flexible teeth that bend inwards towards the gullet. The fishing apparatus is developed from one of the spines of the dorsal fin, and consists of a stiff but movable basal part, the rod; a long flexible part, the line; and a fly with barbs, representing the hook. The bait is a luminous body, the outer skin being nearly transparent and containing a glandular area which elends a secretion by a pore.—Vancouver Province.

Many Luminous Plants Known to Naturalists

Glow worms are not the only living things that are luminous. Several plants and parts of plants have the power of shining in the dark.

There is, for example, a luminous fungus that can be seen in certain of among rocks and large groves by the roadside, sometimes in patches measuring six or seven feet across. The common tormentil gives off a light, too—just clear enough to read by. The roots are dug up and cleaned of soil, they will be clearly outlined to the observer by a green phosphorescence.

The light given off by decaying wood is common enough, but few people perhaps have noticed the light given off by certain fungi during the fall of the year. When beech and oak leaves start decaying they glow with much the same kind of light that comes from fresh fish.

This light is caused by tiny threads that are interwoven into the plants and are connected with their health, although often they do not start glowing until the plants are either dying or dead. If the underside of a glowing beech leaf is examined under a magnifying glass, small yellow spots will be seen. These are the centers from which the light is diffused with the point of a pin it will give more brightly for a few minutes.

Finishing Sealskin

Natural sealskin is so heavy and coarse-looking that most women and coarse-haired, that no woman would care to wear the fur until it had been properly dressed. It requires a number of operations to finish the raw skins. They are washed, dried, cleaned with oil-soaked sawdust and shived to one-third of their original thickness. The dressing requires the most sensitive touch, as the knives used are deep enough to loosen the roots of the stiff hairs but must not touch the roots of the fur itself. When the bristles are removed the skins are turned over and the bristles are rubbed out. The skins then go to the hot rooms, where the fur side is exposed to bursts of hot air. The last operation is the dyeing, which gives the fur its characteristic color. Unlike ordinary furs, sealskin is colored by being painted with coat after coat of dye, put on with a brush.

An Alibi for Ed

Two backwoodsmen in Maine knocked at the door of a house and asked for lodging for the night. They said one of them—to the farmer who came to the door—was a fugitive across the dead body of a man over there in the hollow an' we kinda wanted to hide him.

"That so? What'd he look like?" asked the farmer.

"Well, he was about your build—" "Have on a gray flannel shirt?" "Yep."
"Boots?"
"Yep."
"Was they knee boots or hip boots?"
"Let's see. Which was they, Chauncy, knee boots or hip boots? Oh, yes, they was hip boots."
"Nope," said the farmer. "Wasn't me."—Boston Transcript.

He Knew Better

Two negro cowboys were engaged in change one of the large, heavy tires used on the present-day type of motor coaches. The bolt and weight of the tire was giving them quite a little trouble and a bystander, noticing this, made an offer of a quarter to the one making the nearest correct guess of the actual weight of the tire.

The very first boy to proffer his guess very confidently said, "Dis here tire weighs 35 pounds, boss."

Whereupon the other boy hilariously doubled his reply: "Dat, sir, shows how ignorant some niggers is. At jest put 70 pounds of air in dat tire."—Porbes Magazine.

Notice to Auto Owners!

According to information from the office of Secretary of State just received, all parties are prohibited from using automobiles on the public highways unless they have purchased and properly displayed on their machines the legal 1927 license plate. This information comes from Mr. McCutcheon, manager of the branch office at Boyne City under date of January 30th.

Life's End Sometimes Welcomed as Friend

I went in where he sat groaning beside his fire on a warm spring day, and I said, "What makes you do that, grandfather."

"Do what?"

"Groan like that."

"Groan?" he said. "When did I groan?"

"Just now. For that matter, you do it dozens of times a day."

"No?" he said, and he seemed surprised. "Do I? I think you must be mistaken." Then he looked dreamily at his fire for a moment, seeming to forget both me and my question. "Oh, ho, ho, ho, ho, hum!" he said.

"There! You did it just then, grandfather. Didn't you know it?"

"I believe I did groan then," he said. "Perhaps you're right. Yes, I suppose you must be."

"Don't you feel well?"

"Well? Yes, I'm not ill."

"Then why do you groan so often?"

"It must be," he answered thoughtfully, "it must be because I'm not dead."

That startled me. "Good gracious!" I cried. "You don't want to die, do you?"

I might as well have been shocked by a starving man's wanting food. My grandfather was a gentle man and soul; but I think he may have been tempted to call me an idiot. "Don't I, though?" he said testily. "What do you imagine I want to stay like this for? Eyes almost useless, teeth gone, hearing bad, legs bad, back bent, fingers too warped and shaky to serve me—and all of me useless to any one, to myself most of all. 'Don't want to die!' What on earth do you mean?"—From "The Golden Age" by Booth Tarkington.

Beautiful Bird, but Has Bad Reputation

Mexico has a beautiful number of striking species of birds to the lower Rio Grande valley of Texas, but none more handsome, more industrious or more provocative of interest than the large green, yellow tipe and black member of the crow-jay family, says Nature Magazine. He is nearly a foot in length, his upper parts are a lovely blue-green; the crown of the head and hind-neck, a deep, rich blue. The forehead is almost white and the chin, throat, chest and eye region, black. The shoulder, rump and deeper tail are yellowish green, the four middle tail feathers being a darker, brighter green, while the outer ones are yellow.

He is an inveterate robber of the nests of wild birds as well as those of domestic fowls.

Blackened Character

The city of Pueblo, Colo., is, on account of its smelting and refining works, one of the smokiest cities in the country. One winter a traveler stepped from a train at Denver, and walking up to a policeman, asked him how he was to get to the hotel. The officer cast a scornful eye on the man who was covered with soot and grime and said: "Why, you poor fool, you don't have to go to Pueblo to get blackened up like that. Just stay right here in Denver and you'll get all you want."

Finishing Sealskin

Natural sealskin is so heavy and coarse-looking that most women and coarse-haired, that no woman would care to wear the fur until it had been properly dressed. It requires a number of operations to finish the raw skins. They are washed, dried, cleaned with oil-soaked sawdust and shived to one-third of their original thickness. The dressing requires the most sensitive touch, as the knives used are deep enough to loosen the roots of the stiff hairs but must not touch the roots of the fur itself. When the bristles are removed the skins are turned over and the bristles are rubbed out. The skins then go to the hot rooms, where the fur side is exposed to bursts of hot air. The last operation is the dyeing, which gives the fur its characteristic color. Unlike ordinary furs, sealskin is colored by being painted with coat after coat of dye, put on with a brush.

PROBATE COURT 1626

Report of the Proceedings in the Probate Court for Charlevoix County, Year Ending December 30, 1926

Determination of heirs, 10.
Testate Estates, 14.
Intestate Estates, 27.
Insane hearings five, and five persons committed to the State Hospital at Traverse City.
Guardians appointed for minors, 6.
Adult afflicted persons committed to Ann Arbor for treatment, 2.
Afflicted children sent to Ann Arbor for treatment, 6.
Children adopted into homes, 4.
In the Juvenile division of the court, forty-two dependent children have been before the court during the year. Two of these were sent to the State Public School.
Mother's pensions were granted that covered thirty-seven dependent children.
Thirty-three delinquent children have been brought before the court for disposal.
Four girls committed to the Girls' Training School at Adrian and nine boys to the Boy's Vocational School at Lansing —others have been placed on probation and are making good.
In one case where there were a large number charged with the commission of crime, the evidence was not sufficient and they were discharged.
The Inheritance Tax determined in six estates and the amount collected was $3,966.94.
The exemptions have been increased under the present Inheritance Tax law. The tax to the widow and children is not as great as formerly.

Great English Actor Vamped by Instinct

Miss Tidswell, the kindly benefactor of the youthful players from London who recite, and read Shakespeare to him. But even kindness and comfort could not ease the hectic spirit. Occasionally he would break his bonds and run away to sleep in barns, to haunt wayside inns—inflatuic lure and ayes, tumbling, dancing, reciting, and singing for his bread and butter.

That Miss Tidswell locked him in his bedroom with his accustomed mate but little difference; he would wriggle down the water pipe at his window to wander for days, restless and uncontrollable as an alley cat. Even the device of wedging an iron neck a brass collar inscribed "This boy belongs to Number 9 Leicester square. Please send him home," had no effect; covering the fetter with lipherchief he defied detection and was happy.

The poor little devil was used to shackles; when he was scarce more than a baby his reprobate father, deciding that Edmund's scandalously bowed legs should be straightened, clamped them into four braces and in this state of torture sent him to lodge with some humble acquaintance in Soho—a Mr. and Mrs. Dunean.

Playing the grand inquisitor did not greatly appeal to Mr. Duncan. He turfuet his shoulders after his "four six" at the neighborhood pub and complained: "He used to sleep with me and my wife in his irons, and they hurt us."

Live Comfortably in Canadian Sod Houses

The traveler in the Canadian provinces of Saskatchewan and Alberta is astonished at the great number of sod houses scattered throughout the prairie farming district. These do not occur in the vicinity of the towns, but are out often in miles of country. At night suppose that such rude structures were the result of poverty. On the contrary, the sod houses denote advancing prosperity.

When the homesteader takes up a section of wheat land in western Canada he plants his crop at the earliest possible moment in order that he may get subs.s harvest. Often he is compelled to settle with entire lack of agricultural operations that he neglects his dwelling house and barn. Instead he throws together a rude makeshift of sod. Even though it were desired to erect a frame house, this could be done only with great difficulty because of the scarcity of lumber. It is better to live in temporary quarters until the railroad pushes out into that territory and brings the comforts of civilization. However, these sod houses are by no means unendurable, for they are wonderfully cool in summer and correspondingly warm in winter.

St. Denis

St. Denis, the patron saint of France, especially during the centuries of the old monarchy, is known in history as Dionysius, the first bishop of Paris. In the year 270 he and his companions suffered martyrdom. The bishop's body was buried at a spot about five miles north of Paris. Somewhat later a church was built over the grave and it was a place for pilgrimages during the Fifth and Sixth centuries. In the year 630 King Dagobert built an abbey there, and later buildings of the kind still stand there. One is occupied by a school for daughters of members of the Legion of Honor, founded by Napoleon I. A town grew up about the spot, known then as now as St. Denis. Here also was held to be the military key of Paris. Today it is an industrial place with a population of 65,000.

Russia Has Most Coal

Russia's total coal deposits are estimated by the Soviet government at 250 billion tons, which is said to be the largest in the world. Or this amount 250 billion tons

Where She Was Sick

A little girl was spending her first night from home. As the darkness gathered she began to cry.

The hostess asked: "Are you homesick?"

"No," she answered, "I'm heesick."

A Gentle Hint

Reggie—You say you detest Lewis? Did he lend you that $5 you asked him for?

Clarence—Yes; but he lent me his memory course along with it.

GOOD PLACE FOR A BITE

"We might try this cafe; but the proprietor's a cur, does nothing but growl." "Ought to be a good place to get a bite then."

Hark! Hark!

"It is true, daddy, that there are women inventors, too?"

"I should think so! You will find that out at every tea party."—Dorothy barbier, Berlin.

"Do you think a man ought to vote the way he thinks?"

"Yes," answered Senator Sorghum, "but not necessarily the way he talks."—Washington Star.

HE'S PARTLY RIGHT

Prisoner—But, judge, I don't think I deserve thirty days." Judge—You don't, young man, but that's the most I'm allowed to give you for this offense."

Oh Man!

As part of the nuriculation examinations in English, the entering students were asked to write a brief definition of their conception of a self-made man. One young lady wrote as follows:

"A self-made man is like a self-made cigarette—a lot of bull wrapped in a transparent cover."

Some Excuse

"No, I don't want anything to do with you. You turned your back on me when I was down in the world."

"But, my dear fellow, I wouldn't have done it had I known you were ever going to get up again."

Coming Events

Reid—Do you believe it tod tick to put up an umbrella in the house?

Lewis—It's going to be bad luck for my landlord if he doesn't fix our roof so we won't have to.

Keep in Trim!

Good Elimination Is Essential to Good Health.

THE kidneys are the blood filters. If they fail to function properly these is apt to be a retention of toxic poisons in the blood. A dull, languid feeling and, sometimes, toxic backaches, headaches, and dizziness are symptoms of this condition. Further evidence of impring kidney function is often found in burning or scanty passage of secretions. Each year more and more people are learning the value of *Doan's Pills*, a stimulant diuretic, in this condition. Scarcely a nook or hamlet anywhere but has many enthusiastic users. *Ask your neighbor.*

Resinol

No Place at All

A colored defendant before Judge Paul V. Wetter in a recent minor trial was obviously avoiding the whole truth about the case and the court decided to take a hand in the questioning. "Now, Jesse, tell me the truth about this. Where were you on the morning that this arrest was made?" the court asked.

"Honest, Judge," answered Jesse, "I wasn't no place. That's the truth."—Indianapolis News.

The Road To Health!

Fort Wayne, Ind.—Dr. Pierce's Favorite Prescription put me on the road to health when I was nearly down. I was so completely played out that I could hardly get around to do my work. I was weak, nervous and all tired out, could not sleep, my head ached, my back hurt and I had pains thru my sides. I was miserable. But, after taking four bottles of Dr. Pierce's Favorite Prescription I was feeling fine, my nerves quieted down, I could sleep and was free from all pains and distress. 'Favorite Prescription' made me like a new woman."—Mrs. Ada Hoshaw, 607 Lasell St.

You'll be on the road to health if you take this "Prescription", in tablets or liquid. All dealers.

Electric Watch Dog

A new form of burglar alarm dispenses entirely with an elaborate network of wires or mechanical devices, which only operate if the burglar comes in contact with them. The new invention is an electrical device which sends invisible rays across the room that is to be protected. Facing the rays is a highly sensitized electrical device, which is operated directly the stream is interrupted, as would be the case if someone crossed their path.

His Choice

A certain Springfield man has a craze for antiques, and the queerer the antiques the more he delights in them.

"What do you suppose he has stored away as particularly choice?" some one who has viewed the collection asked.

"An old-fashioned cradle."

"A crystal hanging lamp."

"A pair of lambrequins."

These were some of the guesses but they were wrong.

"It is an old-fashioned hearse. Sure thing—the kind with plumes and everything—and this collector is mighty proud of it."—Springfield Union.

(© 1927, Western Newspaper Union.)

Let me lose count of all my sorrows, Lord,
And even my joys; oh, let me number not
These, nor measure out my lot,
Nor say, "Here it fell short, There it was large or small,"
Here did the mercies thick or thin appear,
Nor in which the countless heavens instead—
Unnumbered, Who reckoneth thy stars?
—Laura Spencer Porter.

FRENCH COOKING

There is much to be said for starting at least one meal a day with a good hot nourishing soup. The following are a few cutting from French cuisine:

Chestnut Soup—Put into a saucepan a cupful of shelled chestnuts. Cook on a slow fire without boiling for half an hour, then remove the brown skin. Put the chestnuts into a mortar with a slice of dry bread and pound to a paste, adding a little bouillon to soften the bread from time to time. Pass through a strainer, add bouillon and cook for another half hour. Serve with croutons.

Onion Soup—Peel six large onions, cut into thin slices. Cook lightly in butter. When partially browned add a tablespoonful of flour and continue cooking until the mixture is brown. Add water, salt and pepper and cook for a half hour or until the onions are tender. Strain if desired and serve on toast with grated cheese.

Pot au Feu—The next used is a piece of stew or shoulder of veal. Many cooks think the addition of the bones and feet of a chicken add the finest flavor. Cover with cold water and simmer for two hours, skimming once or twice. Now add vegetables such as carrots, turnips, parsnips, leeks and onions, with a sprig of thyme, a clove of garlic and two bay leaves with a stalk of celery. Cabbage and potatoes, too, may be added. Add a little kitchen bouquet to give a brown color. Serve very hot when the vegetables are cooked.

Chicken Bouillon—Take a pound of stewing meat, and an old rooster or lean pullet, cut into small pieces, cover with cold water and simmer; when it has begun to simmer add seasoning—an onion stuck with cloves, a few herbs and carrots and turnips cut into bits. Cook until the meat is very tender. Drain and serve.

Food for the Family.

For those who like the filling but do not eat pastry try the filling in cups.

Pumpkin Pie in Cups—Put a rim of pastry around custard cups after filling them with pumpkin pulp and bake as usual.

Cranberry Ice—Cook cranberries as for sauce and strain them, add an equal amount of sugar syrup and freeze. Make the syrup by boiling two cupfuls of sugar with one-half cupful of water. Cool and add to the juice. Freeze and serve in cups.

Turkey Giblet Soup—Chop the cooked giblets fine, then put through a coarse sieve. Thicken the liquor in which the giblets were cooked with a little butter and flour cooked together, then add cream to the giblets and brown stock to make the quantity desired.

Chestnut Stuffing—Blanch a pound of Italian chestnuts, boil until tender and put through the ricer. Add one cupful of bread crumbs, one-half cupful of shortening, one tablespoonful of poultry seasoning, a half cupful of rubbed sage, celery, pepper and cayenne to taste.

Cabbage Salad—Shred a firm white head of cabbage and dress with cream, add a dash of vinegar and sugar to taste with a bit of salt.

Eggs Marchesa.—Butter muffin tins and set upon the stove to warm. In the bottom of each put a teaspoonful of soft bread crumbs, add a dessert spoonful of milk; then a fresh egg carefully broken, season with salt, paprika and pepper. Over this drop a lump of butter, more bread crumbs and a little grated cheese. Bake in a moderate oven for ten minutes. They should be a golden brown and when a knife is run around the edge and they are turned out on a hot platter, they look like brown puff balls.

A hot egg sandwich is most appetizing for a quick lunch. Fry a little onion in butter until the onion is light yellow, then drop in an egg. Cook until done, put onto a piece of hot buttered bread, cover with another and serve.

Rochester Jelly Cake.—Cream two-thirds of a cupful of butter, add two cupfuls of sugar, one cupful of milk, and three cupfuls of flour and two teaspoonfuls of baking powder. Beat well, and to one-third of the batter add one tablespoonful of molasses, one cupful of chopped raisins dusted with one tablespoonful of flour, one-fourth pound of sliced citron, one-half teaspoonful each of nutmeg and allspice, and two teaspoonfuls of cinnamon. Bake the plain batter in two layers and the spiced fruit batter in one, placing the fruit layer between the two plain layers and put together with jelly or marmalade.

Nellie Maxwell

Ancient English Coin

During excavations in the old Mission abbey in the vale of Conway, a remarkably well preserved gold noble of Edward III was found in a crack at the foot of a staircase. On the reverse face is a rich cross fleurie, with lions under crowns, and the inscription "I. H. C. autem transiens p. medium illorum ibat." (But Jesus, passing through the midst of them, went his way.) These words were regarded as a talisman for safety in battle and against loss or robbery.

PLAIDED RAYON FEATURED; QUAINT FLOWING SLEEVES

IF IT be your pleasure to be initiated into the secret of "what's new" in materials for the dainty morning and frock dresses, now that spring sewing time is at hand, "rayon" is the magic key which will open the door of knowledge. Rayon is a word which, spoken to saleslolk, causes them to enthusiastically display to your admiring eyes choicest weaves, lovely in coloring and exquisitely patterned—the sort which makes the prospect of sewing become a genuine pleasure.

Among the prettiest new rayon wash fabrics are handsome plaids delicately wrought with interweavings of lustrous rayon, on soft sheer backgrounds, some in lavender, rose, mauve, the popular blues and in fact every desirable new color. Some introduce the suggestion of a Jacquard patterning like the material employed for the charming porch frock in the picture to the left.

Whether one makes one's own or buys ready-made one's daytime washable frocks, the two models here portrayed cannot but prove of interest. From the standpoint of fabric they are inspirational, for each is fashioned of rayon novelty goods, the kind which launders to perfection.

In the styling of these frocks many interesting trends of the mode are revealed. One realizes that the simple bungalow apron-frock is being displaced by dresses of careful and finished design such as may be appropriately and becomingly worn at any hour of the day.

Among style points observed in the early collection of washable daytime frocks, are such items as the blouse effect, the bolero, skirts with subtle pliallings to gain fullness, and, good news to all, short sleeves are considered as proper as long ones for the coming season.

Pliplngs of contrasting color finish many a neat made dress. The contrast theme is being exploited in the realm of wash frocks, such as a solid-color material with a print or a plaid.

Midseason and early spring frock arrivals convey the interesting style message that sleeves have again been elected to serve as a foremost interpreter of the mode. Especially is the quaint gracefully flowing sleeve being featured. Because of their unreflected simplicity the new flowing sleeves are of beguiling charm. The naive manner of seaming the lower flowing portion at the elbow, is accented in two of the frocks in this picture. In each instance flat crepe is the selected fabric for the gown. The model to the right adopts the popular redingote styling. Very girlish is the dress to the left, which is in rose-beige trimmed with ribbon ruching.

Two Smart Washable Frocks.

Of a more sophisticated styling is the afternoon dress of green and black silk velvet. In this handsome French creation Jean Magnin combines the medieval with the modern, in that the flowing sleeves are reminiscent of the Middle ages, while the scalloped and tiered skirt, also the bloused waistline, is of the present.

So much a part of the season's styling is the sleeve, that even in tailored cloth models a stylish belt effect is introduced at the wrist.

Another method of achieving novelty for the sleeve is that of adding cuffs oddly designed and conspicuous because of their bigness, some reaching more than half-way to the elbow.

When the fullness is gathered into the wristband, as it often is, then elaborate embroidery emphasizes these puff effects. Cutwork embroidery is the newest whim. It is employed for many lovely resort frocks such as are adding such zest to the mode.

Sleeves pin-tucked at the top, released at the elbow so as to allow fullness to be wrist, feature the ln-coaling soft crepe frocks.

Now that sleeve interplay encircling to the elbow are the late fad, the lowering sleeve should be welcomed, especially when left open at the forearm, for it will charmingly display this item of smart costume jewelry.

JULIA BOTTOMLEY.

(©, 1927, Western Newspaper Union.)

Sleeves Interpret the Style.

Smocking

Smocking is used in some two-piece models. In these the skirt is plaited or gathered, and the overblouse is belted loosely like a peasant's smock. Both of these designs are popular among the young women.

Rubber Aprons for Dolls

For the small girl to dress her dolls there are fancy rubber aprons, miniatures of the ones she herself wears when playlng house. These aprons come in regular doll sizes and in a variety of color combinations to meet the demands of the most imaginative child.

Surplice Front

The surplice front continues to attract the older women, though the juniors eschew it.

Plain Fabrics

Plain fabrics are far in the lead for winter wear. Prints and brocade have been going out for several weeks but too steepped in the pleasures of court to give much thought to his responsibilities. To wipe out the Huguenots Catherine arranged the massacre of St. Bartholomew within a week after Henry's marriage to her daughter Margaret. Henry, seeing his life was in danger, renounced Protestantism and became a Catholic. Three years later he escaped from Paris, where he was treated more like a prisoner than a king, and fled to Navarre, where his Huguenot adherents were awaiting him. On the way he stopped long enough to renounce Catholicism and declare himself a faithful Huguenot. For the next few years he indulged in as gay a life as his impoverished little kingdom could afford.

Meantime, on Charles IX's death, his younger brother, Henry III, had come to the throne of France. He was frivolous and weak. The Parisians worshiped the duke of Guise, who openly declared himself a claimant to the throne and who started the League, an organization semi-civil, semi-religious, made up from all classes and decoyed to the Guise family. Henry III, to check this rising revolt, had Guise assassinated. The League in fury rose to avenge the leader's death and drove the king out of Paris. The dispossessed monarch joined forces with Henry of Navarre against the League, but was himself assassinated in 1589. This left Henry of Navarre rightful king of France.

Henry boldly laid siege to Paris to enforce his claims. He beat the League's armies at Arques in 1589 and at Ivry in 1590. Henry was tired of warfare and poverty. He wanted to be a king, not a guerilla leader. So he abjured Protestantism and for the second time declared himself a true Catholic. This removed the last barrier to his success and all France gladly acclaimed him king.

So in 1593 he entered Paris in triumph, apparently in no way abashed at having twice deceived his earlier followers by such ready changes of faith. He drove the Spanish out of France, put down the League, and in 1598, by the edict of Nantes, assured privilege and religious toleration to all Protestants. Under him modern France had its birth. He ruled wisely and for the good of the people.

At the height of his career, May 14, 1610, he was murdered by Ravaillac, a fanatic, his young son, Louis XIII, succeeding him.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

Henry of Navarre

A COUNTRY boy—long rather than tall, high of forehead, with a great hooked beak of a nose, a tanned face and wiry frame—came up to Paris, against his mother's will, one day in the latter part of the Sixteenth century. He was the penniless Prince Henry of Bearn, son of stupid old Antony of Bourbon, king of Navarre. In crossing to Paris he was walking into the very jaws of death.

Catherine de Medici, widow of Henry II, was practically ruler of France in spite of the fact that her weak son, Charles IX sat on the throne. She had four sons. They were all childless. Should they chance to die without direct heirs, the royal line of Valois would end, and the crown must pass, by succession, to Henry, the king of Navarre. Catherine was an ardent Catholic, as were her sons and her adherents. Navarre, a little subsidiary province near the Spanish frontier of France, was the center of the Huguenot (Protestant) movement. The rulers of Navarre were the chiefs of the Huguenots. Hence, if the king of Navarre should inherit the throne, France would probably become a Huguenot country. So Catherine cast uneasy eyes towards the little kingdom and began to plot measures for averting such a possibility.

Jeanne d'Albret, wife of Antony de Bourbon and mother of young Henry of Navarre, was also doing some plotting, but along wholly different lines. She was one of the noblest, best women in history. Her husband had been a weak, dissipated, thick-headed fellow, and all her hopes were centered in her boy. She accordingly had Henry brought up as a rigid Protestant, sought to turn his mind to high thoughts, to honor and personal rectitude, urged him to outdoor life and exposure to toughen and strengthen him, and confided his military training to the famous Admiral Coligny.

In the midst of this course of training Jeanne was horrified to receive a request from Catherine that Henry visit the gay court at Paris. She well knew that such an invitation amounted to a royal command, and that it could not with impunity be disobeyed. Yet she foresaw the terrible influences a woman like Catherine could exert on her pleasure-loving son. Henry, delighted, is to be free from such close discipline, hurried to Paris and plunged at once into the dissolute gayety of the court. Jeanne in vain tried to retain her influence over him by writing him long letters full of advice and of news of his old home. Catherine dreaded the effect of these letters, so she sent Jeanne a pair of poisoned gloves. Jeanne wore them and died.

Every decent influence being thus removed, Henry wallowed deeper daily in the lufamies of Catherine's entrance. He was now king of Navarre, nominal head of the Huguenots, but too steeped in the pleasures of court to give much thought to his responsibilities. To wipe out the Huguenots Catherine arranged the massacre of St. Bartholomew within a week after Henry's marriage to her daughter Margaret. Henry, seeing his life was in danger, renounced Protestantism and became a Catholic. Three years later he escaped from Paris, where he was treated more like a prisoner than a king, and fled to Navarre, where his Huguenot adherents were awaiting him. On the way he stopped long enough to renounce Catholicism and declare himself a faithful Huguenot. For the next few years he indulged in as gay a life as his impoverished little kingdom could afford.

Meantime, on Charles IX's death, his younger brother, Henry III, had come to the throne of France. He was frivolous and weak. The Parisians worshiped the duke of Guise, who openly declared himself a claimant to the throne and who started the League, an organization semi-civil, semi-religious, made up from all classes and decoyed to the Guise family. Henry III, to check this rising revolt, had Guise assassinated. The League in fury rose to avenge the leader's death and drove the king out of Paris. The dispossessed monarch joined forces with Henry of Navarre against the League, but was himself assassinated in 1589. This left Henry of Navarre rightful king of France.

Henry boldly laid siege to Paris to enforce his claims. He beat the League's armies at Arques in 1589 and at Ivry in 1590. Henry was tired of warfare and poverty. He wanted to be a king, not a guerilla leader. So he abjured Protestantism and for the second time declared himself a true Catholic. This removed the last barrier to his success and all France gladly acclaimed him king.

So in 1593 he entered Paris in triumph, apparently in no way abashed at having twice deceived his earlier followers by such ready changes of faith. He drove the Spanish out of France, put down the League, and in 1598, by the edict of Nantes, assured privilege and religious toleration to all Protestants. Under him modern France had its birth. He ruled wisely and for the good of the people.

At the height of his career, May 14, 1610, he was murdered by Ravaillac, a fanatic, his young son, Louis XIII, succeeding him.

Bequest Aids Science

A special building is to be added to the University of Chicago hospital for the purpose of making intensive studies on contagious diseases. A fund provided by the will of Mrs. Harriet G. Smith, which will eventually amount to $500,000, is to defray the cost of the structure, which will be known as the Charles Gilman Smith hospital. Officials of the university have recently completed arrangements for taking over the bequest.

PLAN SESQUI SHOW FOR OLD NORTHWEST

Cahokia, Ill., to Be Scene of Brave Doings Again.

Cahokia, Ill.—The historic old Northwest territory will live again here when the Northwest Territory Sesquicentennial exhibition will be held in 1928. Plans are now under way for the sesquicentennial, following the organization of the Northwest territory commission of 100 residents of Cahokia, direct descendants of the early French settlers, and the preparation of incorporation papers by State Representative Thomas L. Fekete of East St. Louis.

Under three flags, the fleur de lis of France, the union jack of Great Britain and the stars and stripes of the United States, the destiny of the territory has been formed for more than 200 years. The states of Ohio, Indiana, Illinois, Michigan and Wisconsin now comprise what was then an unbroken wilderness, inhabited by savages, wild beasts and a few traveling missionaries and trademen.

France Was There First.

France was there first and stamped her policy and personality so firmly on the region that they were continually cropping out to harass the later American advance. Government under the French and English regimes was mainly paternal and military, but within a very short time after Gen. George Rogers Clark had won the country northwest of the Ohio, the state of Virginia, on the basis of its claim to that region, passed an act establishing the County of Illinois," for the purpose of providing a temporary form of government and affording necessary protection to the inhabitants.

On December 12, 1778, Patrick Henry, who was then governor of Virginia, appointed Col. John Todd as county lieutenant; in the spring of 1779 Todd set up his government, but difficulties arose and he left the country in the fall of 1779 or 1780.

Virginia had been forced to withdraw its support of the Northwest territory because of difficulties at home and the necessity for some sort of government for the unorganized western country also become very urgent.

Government for the territory was contained in the ordinance of 1787, passed July 13 of that year, and on October 5 Gen. Arthur St. Clair was elected the first governor of the Congress of the Confederation at the time the ordinance was passed.

Ohio Sliced Off.

Congress desired to admit Ohio to the Union as soon as possible, so in May, 1800, an act of congress sliced away that state, and all that part lying west of a line beginning at the Ohio opposite the mouth of the Kentucky river and running thence to Fort Recovery and thence north to the Canadian border was called Indiana territory. The census of that year showed only 4,875 persons, exclusive of Indians, living in the territory.

A further division occurred in 1805, when congress detached all that part of the Indian territory north and east of the southern extreme of Lake Michigan and called it the Territory of Michigan.

It was not until February 3, 1809, that the Illinois territory was set off by congress. It was an isolated strip of frontier, extending north from the Ohio to the Canadian border and stretching from the Wabash river to the Mississippi in width, with Kaskaskia as its capital and with practically all of its settlements in the southern part.

Ninian Edwards, chief justice of Kentucky, was appointed its first territorial governor, by President Madison in June of the same year.

Butter Used in 450 B. C. to Keep Hair Smooth

Sioux Falls, S. D.—Sleek hair, the pride of eastern novels was "old stuff" to the Greeks and Romans around 450 B. C., says the ancient Greeks and Romans went the moderns one better and used butter fat to do the trick, according to Prof. W. H. Condra of the dairy division of the University of Minnesota, speaking at the National Butter Makers' association annual convention here recently. "After studying the history of butter," Prof. Condra said, "I have concluded that butter substitutes must have been introduced in the year 2000 B. C., when the tribes of Eastern India, who used butter in their boiled sacrifices, used substitutes for their less holy sacrifices.

Man Uses Vicar's Phone to Place Bet on Horses

London.—Rev. George Potter, vicar of St. Chrysostom's, Peckham, who has always permitted all of his 8,000 parishioners to use his telephone, has announced that he will censor all calls in the future.

He declared youths' naughty calls to girl friends and "delayed at the office" calls cannot be permitted from his home.

"One man came in recently," he said, "and asked if he might use the phone. He called his bookmaker and asked him to put $1.25 each way on a flint horse."

Latest Fad

Pittsfield, Mass.—The latest fad for girls is to take a stroll with a hopping white rabbit held by a leash.

Worst Lie

Oxford, England.—The worst lie, in opinion of Gilbert K. Chesterton, is that an American worships money.

Rain and the Moon

Near the autumn equinox the position of the young moon never makes an angle of more than 30 degrees with the horizon, and it is generally in an even more nearly horizontal position, so that in a part of the world notorious for regions of heavy rainfall, the moon is, according to the proverb, always a "drip" one. The final absurdity of the idea that changes in the moon decree rain is the case of the crescent moon as seen from the North and South poles, where it is always what the proverb describes as "wet," for as those places the line joining the cusps of the crescent always makes an angle of less than 25 degrees to the vertical; yet the polar regions are characterized by so little precipitation in the form of rain and snow that they rank among the arid regions of the globe.

Buried Treasure

A grim statistician announces that under the sod in the cemeteries of this country a treasure estimated at $20,000,000,000 has been buried since the beginning of American history. No one can dispute these figures. No one will care to analyze them carefully.

The ancient tombs of Egypt have given up treasury of priceless value. Excavations in buried cities have shown that man has ever held to the custom of burying jewels and baubles and valuable trinkets with the dead. The sword and helmet of many a warrior have gone with him into his dark and narrow bed.—Thrift Magazine.

Award Woman Rail Clerk Bravery Medal

Philadelphia.—The directors of the Pennsylvania railroad awarded heroic service medals to eight employees in recognition of extraordinary acts of heroism and valor beyond the regular line of duty, President W. W. Atterbury presented the medals.

Miss Edna B. Drake, clerk in the Pendleton shops, Cincinnati, Ohio, was the first woman to be awarded the medal. She rescued a man from serious injury and possible death when he attempted to cross the railroad tracks in front of an approaching passenger train.

Earliest Measurements

Parts of the human body formed the first units of measurement, the inch having developed from the length of the thumb joint. The old measurement called the "finger" was the four inches across the human hand, and the span, nine inches, came from the space from the end of the thumb to the end of the extended little finger.—Exchange.

European Standard Time

Most European countries use standard time based on one of the even-hour meridians as reckoned from Greenwich. This custom is followed by all European countries, except Ireland, Holland, Russia and Greece, which base their time systems on meridians of their capitals. In Russia railways are run on Pulkowa time and in Holland on Amsterdam time.

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Fred C. Pillsbury, Plaintiff,
vs.
Lillian C. Pillsbury, Plaintiffs.

John S. Dixon and Phebe S. Dixon, Charles F. Bush, Charles A.B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa M. Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above; and Charlevoix Manufacturing Company, Defendants.

County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county on the 15th day of December A. D. 1926.

Present: Honorable Parm C. Gilbert, Circuit Judge.

In this cause it appearing by affidavit on file that the defendant, Charlevoix Manufacturing Company, a corporation, has ceased to exist and that there is no officer or agent in this State upon whom process can be served; and that the remainder of the said defendant, to-wit: John S. Dixon and Phebe S. Dixon, Charles F. Bush, Charles A. B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above named residence is not known and it is not known as to whether or not they are deceased.

On motion of Lisle Shanahan, attorney for the plaintiffs:

It is ordered that the appearance of the said defendants be entered in this cause within three months from the date of this order, and that in case of his, her or their appearance, that he, she or they cause his, her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiffs within fifteen days after service on him, her or them of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants in default.

And it is further ordered that within forty days the said plaintiffs cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiffs cause a copy of this order to be personally served on said defendants, defendant, at least twenty days before the time prescribed for their appearance.

The bill of complaint in the above entitled cause is filed for the purpose of quieting the title to Lots ten and eleven in Block twenty-six of Newman's Addition to the village (now city) of Charlevoix, Michigan, in the above named plaintiffs as tenants by the entirety.

PARM C. GILBERT,
Circuit Judge.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Empire Stites and Addie Stites, his wife, of Charlevoix, Michigan, unto the James F. McGeagh, of Charlevoix, Michigan, dated January 24th, 1914, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January 1914, in liber 39 of mortgages on page 457, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage, dated September 8th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 10th, 1915, in liber 53 of mortgages on page 356; which mortgage was afterward sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Five Hundred Thirty-Two and 82-100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan. (that being the place where the circuit court for the county of Charlevoix is held), on Saturday, the 16th day of April, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres, more or less.

Dated January 18, 1927.

Saul Peters, Plaintiff.
vs.
Maud Peters, Defendant.

Suit pending in the circuit court for the county of Charlevoix in Chancery, in the city of Charlevoix, in said county, on the 23rd day of December, A. D., 1926.

In this cause it appearing from affidavit on file, that the defendant, Maud Peters, is concealed within the State and her whereabouts cannot be ascertained.

On motion of R. L. Lewis, plaintiff's attorney, it is ordered that the said defendant, Maud Peters, cause her appearance to be entered herein, within three months from the date of this order and in case of her appearance that she cause her answer to the plaintiff's bill of complaint to be filed, and a copy thereof to be served on said plaintiff's attorney within fifteen days after service on her of a copy of said bill and notice of this order; and that in default thereof, said bill be taken as confessed by the said Maud Peters, defendant.

And It Is Further Ordered, That within forty days the said plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that such publication be continued therein once in each week for six weeks in succession, or that he cause a copy of this order to be personally served on said Maud Peters, defendant, at least twenty days before the time above prescribed for her appearance.

Yosemite Park Bears Immune to Tear Gas

Depredations of bears in Yosemite National park upon the cabins of workmen and rangers, have become so serious that the national-park service is seeking a means of curbing them without injury. In an effort to discourage the bears, or put them to flight, experiments with tear gas were recently conducted in co-operation with the chemical warfare service. A small black bear was chosen as the victim for the experiment, and a heavy concentration of the gas was given him. It apparently caused the bear no discomfort whatever. He did not even blink. It previously has been demonstrated that horses and mules are indifferent to the gas, probably because they have no tear glands. Visitors to Yosemite find the bears among the most interesting of the park's wild life, and during the travel season they are well fed at the hotel and camps, as well as by visitors. By the time the bears close the bears have become fat and lazy, and begin stealing slabs of bacon and other food, even though this may involve breaking a window or tearing a hole through the walls. With the apparent failure of tear gas, the park authorities are seeking other means of holding the bears in check without driving them out of the park.—Popular Mechanics Magazine.

Where Husbands Need to Watch Their Step

Another reason for not yielding to the temptation of living in a Serbian town called Velik Kikinda has been produced in the Italian press.

It seems that, instead of forming a sewing circle, the wives of this lighthearted community banded together in a secret association under the name of Santa Lucrezia, founded in honor of the notorious Lucrezia Borgia, and with the worthy purpose of poisoning their husbands, fiances, and suitors.

Fong across the frontier-canals which frontier the Italian paper does not say—they procure strong fetions, which are unobtrusively slipped into their husbands' food or drink.

Such is the existence of the secret society became public, many husbands and prospective husbands left town. The Italian paper advises them not to let civic pride in next year's census returns prevent them from forming a Santo Bluebeard or Santo Landru lodge and going to it. —The Living Age.

Hancock a Real Patriot

During the siege of Boston, General Washington consulted congress upon the advisability of bombarding Boston. John Hancock, a distinguished merchant, was the president of congress. When Washington's letter was read, a silence ensued, and all waited John Hancock's opinion. Naturally, he was personally interested to a great degree, for his large and valuable estate was located in the heart of Boston. John Hancock, after a moment's silence, addressed the committee in the following words: "It is true, sir; nearly all the property I have in the world is in houses and other real estate in the town of Boston, but if the expulsion of the British army from it, and the liberties of the country, require their being burnt to ashes, I have no hesitation immediately for that purpose."—The Market for Exchange.

Philippine Islands

There are 7,083 islands in the Philippine group, of which only 2,441 are named. The total area of the archipelago is 115,026 square miles. The Philippines are mountainous ranges rising out of the sea, and the islands are connected with each other and with the East Indies by submerged mountains. Part of the land is volcanic in origin and there are a dozen active volcanoes. The general trend of the mountain range is from north to south, but there are innumerable irregular spurs which cut the larger islands into many small sections. Coral reefs fringe the shores, of which there are altogether more than twice as many miles as on all the coasts of the United States. In the largest islands there are a few rivers of any length or navigable and, except near the sea, are navigable only by rafts.

Uncle Eben

"Learn to say 'no'" said Uncle Eben, "but don't start in tryin' to practice on yoh creditors."—Washington Star.

FARMERS PURCHASE TONS OF LIMESTONE

Fourteen Charlevoix County Farmers Purchase 135 Tons

(B. C. Mellencamp, County Ag'l Agent)

Growing appreciation of the value of limestone and marl in Charlevoix County is evidenced by the recent delivery of three carloads of this soil sweetner to several farmers, two bought in East Jordan and the other from Boyne City. This means that over 60 acres of land will have a covering of two tons of this lime dust and can therefore render more efficient and profitable service to it's owners. This is indeed a very small percentage of the soil in Charlevoix county that is hungering for lime and by lack of yield is constantly indicating to the farmers the necessity of its use. On the shores of Lake Charlevoix is found with the worthy purpose of poisoning their husbands, fiances, and suitors. which are unobtrusively slipped into their husbands' food or drink. Such is the existence of the secret society became public, many husbands and prospective husbands

State Highway Official Visits at Charlevoix

Mr. V. R. Burton, Chief State Highway Engineer for the State, was a Charlevoix visitor last Friday. He was making an inspection of state lines in this region, getting first-hand information as to conditions and upkeep; and from what we hear was favorably impressed by the manner in which the work is carried on. He was accompanied by Mr. Arthur W. Stace, editor and special writer on the Grand Rapids Press, who through special study of highway conditions and personal observation carries with him a fund of information unequaled by any single individual in Michigan.

FATHER AND SONS MEETING

Held at First Congregational Church Last Monday Evening

A father and sons meeting held at the First Congregational Church last Monday night was prominently a glowing success, fully of interest and most profitable from a social or intellectual point of view. With the splendid dinner, nicely served, and in the background and Pastor B. G. Matson at the head of the table acting as toastmaster the intellectual feast was opened with remarks proper for the occasion.

Dr. R. B. Armstrong was the principal speaker of the evening and in his talk which was for the benefit of the sons, gave a splendid talk simplee in good suggestions, plain, sensible and logical, all of which was concise and within the reach of easy comprehension of those for whom the talk was intended and in this he held the full attention of the entire assemblage with just the right kind of talk that would be beneficial to everyone who will follow his precepts.

The talk of Dr. Armstrong was followed by some interesting personal reflections of early years by Mr. H. R. Fowler, W. E. Parmelee and F. J. Fessenden all making for an enjoyable as well as instructive meeting.

Says Scientific Mating Would Abolish Cancer

Milwaukee. — Scientific mating, based upon a knowledge of heredity and engenics, would eliminate cancer from the human species within two generations, Dr. Maude Slyde of the University of Chicago told the convention of the Radiological Society of North America.

Banish sentiment from marriage, she said, abolish marriages of convenience, and let birth in men and women about to wed the need of placing their union upon a eugenic basis, and cancer will be vanquished.

"If any individual knows himself to be by heredity susceptible to cancer, he can, by mating with a noncancerous individual, breed cancer in his children," she asserted.

WINTER DAYS IN CHARLEVOIX ARE PACKED WITH SPORTS

BY L. R. CHASE

Right now, January 1927, Charlevoix is rich in opportunity for a vigorous, exhilarating good time. There never were summer days in Charlevoix, famed though it is as a summer resort, that offered such wide variety of exciting, hilarious, fun as those we have been enjoying these days.

For instance: You stand on the shore of Lake Charlevoix, near the Inn, at Charlevoix, and you look up the lake toward Boyne City. It's a long way—18 miles—and the hill up there is softly hazy in the distance. Yet all sheathed in ice now, that 18 miles that was a glinting, whitecapped blue when you saw it last summer. You remember the keen sport there, then—the yachts with their tall, white sails, tearing gallantly up the lake with the blue water boiling white in their wake. You remember the speedboats, too, snorting that white water far each side as they speed along, their keels half out of water, doing thirty-five, forty and forty-five. That was a thrill for the sailor or the onlooking landsman. But here is a winter thrill to match it, or even outmatch it.

The breeze is right, and here is an ice boat. You settle yourself in the cockpit, the sails are hoisted and you leap away. No speed boat could lift up such a clip as this! The runners roar and clatter over the rough spots. The ice is no worse than a blur as the boat swings around the curves. You're snug enough, though the heavy clothing you are bundled in. Before you have more than time to laugh and dash the wind tears from your eyes, the skipper is bringing the yacht about at the shore near the tannery in Boyne City. Eighteen miles—fourteen minutes!

But ice-boating is not the only sport now afforded by the smooth surface of Lake Charlevoix. Dotted here and there near Ironton and Charlevoix on the lake are the little shanties where the fishermen are hauling the Mackinaw trout through the ice. They fish in comfort, too, for each little shack has its diminutive stove, to keep it warm and snug in there. A look in one of these shanties was a revelation, one man showed us a string of six of the big boys that he had taken in the morning. They run from three to ten pounds each, and they're fighting battles before they are hoisted out on the ice.

Besides this trout fishing there is also the fishing on Round Lake. Charlevoix for the winter but maybe even more toothsome perch. Here is a sideline of fun that can be picked up any time, to while away hours between the more strenuous sports. There is a veritable little city there on the ice in Round Lake; sometimes the number of shanties runs to nearly a hundred, each with its little burner of smoke from the stovepipe to proclaim that the angler is comfortable within.

Hardly a day passes on Round Lake when the fishermen do not take fine big baskets of perch; for this is a dependable, if tranquil sport. The quiet wiled about the little fishing city, screaming and watching for a morsel to eat. A fisherman hauls in a perch, and removing the mangled bait minnow from his hook, tosses it away through the door. Immediately there is a screaming, flapping pandemonium, with hundreds of gulls diving for the alluring morsel. Kingly citizens bring table scraps down to the ice daily to feed these ravenous birds. They gather in raucous, frantic hundreds for these feedings.

Each year some few fishermen with more inside hood than those of Round Lake or Lake Charlevoix, are lured out on the ice of Lake Michigan to try for the Mackinaw trout there. This, however, may fairly be classed as seeking adventure rather than sport. It is true that if a man finds the right spot and the right day, on Lake Michigan, he makes glorious catches, but he takes a long chance in the matter, for the ice is always treacherous. Further, the big trout taken in Lake Michigan are not the gamiest fighters. Those taken in Round Lake, for instance, while smaller, make the swift and cunning red fox. The rabbit hunter will make a kill and end it in the snow, to remain there, frozen stiff, fire, brew some coffee and eat his sandwiches. The fox hunter has a sterner job. His quarry swings farther, more intent with his every step and without a pause. In pursuit, the hunter pushes the miles behind him—miles and more of them—to get a look at that red, fur-bearing creature the sights of his gun.

Each winter a few of Charlevoix summer friends come up to spend a few days when winter sports are at their height. They find a different soil a beautiful world, abounding in health and spirited sport. These days they make the drive from their city homes easily for the time-saving motor trunklines open for them—plowed clean for speed and smooth driving with the big rotary and plane speed plows. Winter sports fairly possess Charlevoix in their season; and it is a merry invasion, ended all too soon.

CHESTER MILTON SANFORD, LECTURER

Lyceum Bureau Course, To Be Here February 2nd, At Palace Theatre

A lecture telling how to choose the right vocation will be delivered by Chester Milton Sanford, Wednesday evening, February 2nd, at the Palace theatre, as one of the regular Lyceum Bureau entertainments.

"Failures of Misfits" will be the subject discussed and presented, and it will be based wholly on the lecturer's personal observations extending over a long period of time in many fields of business and professional activities. With an ample fund of information gained through personal contact with various activities it is generally conceded that Mr. Sanford is in a position to make authoritive statements and impart useful knowledge to the young men and women of today, such as willful acted upon, prove lasteful in their future life and business activities, as years of his life have been spent in the study and testing of vocations by training and in the latter he has ability to impart this knowledge in an interesting and helpful manner.

Fame's Belated Arrival

Fame is an undertaker that pays but little attention to the living but bedizens the dead, furnishes out their funerals and follows them to the grave.—Colton.

Dead and Buried, Man Returns Home

Moberly, Mo.—Returning to his home here two weeks after he was supposed to have been buried, James O'Neill, seventy-five years old, had difficulty in convincing his family that he isn't a ghost.

A man had been found dying of exhaustion on a road near Columbia, Mo. Turned over to the police, he died in jail after saying his name was O'Neill and that he lived in Moberly. O'Neill's son identified the body, recognizing his father's clothing and possessions.

O'Neill expainted to surprised relatives that his clothing had been stolen while he was away.

LUNCHEON AND BUSINESS MEETING OF W. M. S.

The annual luncheon of the Congregational Woman's Missionary Society held at the church last week Wed'nesday, with Mrs Bonthron, Mrs. Lewis and Mrs. Faulkner acting as committee on arrangements, was well attended and an unusually pleasant meeting. Following the luncheon came an inspiring devotional period in charge of Mrs. John Burns; the secretary's annual report of 1926 activities; the president's annual message; the program announcement for 1927, a solo by Mrs. Matson, accompanied by Mrs. Steiter; the presentation of the topic of the day "Hungarizing and Spiritualizing the Missionary Appeal" by Mrs. Saltonstall; and a playlet "Out Of The Waste Basket" by Mmdames Kelderhouse, Cross and Campbell (Allan) and Master Teddy Mattoor.

TRUNK LINES ARE ALL IN GOOD SHAPE

State Highway Department Make Special Effort to Keep Lines Open

Special effort on the part of the State Highway Department to keep trunk lines in condition for regular traffic during the winter months in this region has met with a high, practically perfect, degree of success, the only lapse in this respect being for two or three days prior to Christmas, when a blizzard out of the ordinary swept the entire country.

Weather conditions have in the main been exceptionally favorable during the season, but a moderate amount of snow has fallen and at present there is not great depth of white covering, however, there is a sufficient quantity to hamper normal traffic had there been no effort made by the department to improve conditions.

Road conditions at present are the best we have ever seen them during winter months. All trunk line are clear, wide and smooth and will be kept in this condition just so long as the highway department can combat the snow with their present equipment which appears to be wholly adequate for much heavier duty.

Principles Essential

Love and esteem are the first principles of friendship; it is always imperfect if either of these two is wanting.—Budgell.

Lecture Next Monday Evening, January 31

The Charlevoix schools have arranged for a lecture by Professor J. L. Brumm, of the University of Michigan Extension Department. The subject of this lecture will be "Education and Life." The people of Charlevoix have an opportunity to hear an excellent lecture on a very interesting subject. The lecture will be free, and will be given at the Methodist Church at 8:00 p. m. Monday evening, January 31st. The lecture is sponsored by the Charlevoix School and will be delivered in the auditorium of the church, following the Men's Meeting and supper which is scheduled for 7 o'clock sharp. The earlier meeting for men only, with the lecture open to the public.

COPPER COUNTRY WELL EXPLAINED

By Mr. Charles A. Gale at the Men's Meeting Last Monday Evening

A fine number of men were present at the Methodist Episcopal Church last Monday evening, when Mr. Charles A. Gale addressed the meeting, making an exceptional talk on the Copper Country, a subject with which the speaker, due to years of residence in the mining district, was thoroughly familiar, therefore his talk was one from a person versed in conditions and actual working methods used in connection with the copper industry of Northern Michigan.

Those in attendance met with no disappointment in Mr. Gale. On the contrary the address was full of interest to a point where it excelled the expectations of his listeners. Not only this but his views concerning the beauties of the northern region as he expressed them gave his audience a better idea, particularly to those who have not visited the region, a more comprehensive understanding a wider range of knowledge as to the wealth and scenic beauty of the northland than has been theirs heretofore.

It is a subject in which Mr. Gale is conversant; one that is term to discuss and one in which everyone can listen; everyone can enjoy and with intellectual profit.

Illiteracy Increasing; Paris Lays It to War

Paris.—A little known form of the war damage suffered by France is revealed in army figures which show an increasing number of illiterates among recruits. In 1923, of the men called to the colors, 6,713 were unable to read or write, while 13,055 confessed themselves illiterate in 1924.

Figures for only a part of 1925 are available, but they show an augmentation in the condition, which is ascribed by the disorganization in schooling during the war.

Spiritualization

Like bullds like and like attracts like. In the degree that thought is spiritualized does it become more subtle and powerful in its working. The spiritualizing is in accordance with law and is within the power of all.—Exchange.

Ancient Fighters Blonds

The Amorites, against whom the Israelites made conquest on their way to Palestine, are represented on Egyptian monuments as a race of blue-eyed blonds.

R. P. FOLEY PASSED AWAY

At His Home in Winter Park, Florida, Last Monday Afternoon

A message received here last Tuesday afternoon conveying the news of the death of Mr. R. P. Foley at his home, Winter Park, Florida, Monday afternoon and that funeral services would be held Wednesday afternoon at the Episcopal church in Winter Park.

Mr. Foley was a native of Pennsylvania, born at Wellsboro, where he lived for some years, coming to Michigan with his parents in 1877 and locating at Harbor Springs, later moving to St. Ignace.

Mr. Foley came to Charlevoix some twenty years later and became manager of the Belvedere, a position in which he continued for twenty-six years, retiring in 1922 after which he took control of his Winter Park business and remained in the South until his death.

During the more than a quarter of a century that Mr. Foley was connected with the Belvedere management and his residence in this city he was recognized as one of Charlevoix's substantial upright citizens and was held in the highest esteem by his business associates and the entire public. As manager of the Belvedere he was a pronounced success and at the time of retirement from that position had a host of friends throughout the United States who regretted the fact that he had severed his connection with this popular resort hotel.

In his business affairs he was pleasant, agreeable and honest, taking special pains to see that the guests were receiving proper service and

Native Sugar Mill in the Philippine Islands

Here is an interesting scene in the Philippines, which General Wood is having so much trouble governing. It is a native sugar mill in operation at Barrio Cubiaculan.

Meat of fat cattle keeps better than meat from thin animals.

The bulldog was so named because of his skill at fighting bulls in the sport of bull baiting.

The growing craze for walnut furniture is slowly denuding England of its picturesque walnut trees.

Michigan has the greatest extent of water boundary line in proportion to its area of any state in the Union.

A newly patented hydrator's suit made of rubber will support two persons in water indefinitely.

An Ohio chemist finds that we eat only one-fifth as many foods high in vitamins as we ought at the average meal.

The average length of life of negroes in this country is forty-six years, white that of white people is fifty-four years.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Gustavus Adolphus

A CONFLICT that involved nine nations, lasted for three decades, killed a king, worried an emperor to death, put a total check on all German progress and industry, and bred more barbarous cruelty than any event in many centuries—such, in a nutshell, was the famous "Thirty Years' war." Like most horrors of its sort and time, it had its origin in religious disputes. In endured from 1618 to 1648.

The war had its beginning between the Protestant states of northern Germany and Austria. Within a few years it had extended until it included, on one side, Austria, Spain, south Germany and France, and the Protestant countries of Europe on the other. In 1618 Bohemia threw off imperial authority. The North German states had formed a union, and this union took Bohemia's part. Together they drove the imperial troops from Bohemia and invaded Austria up to the very gates of Vienna. Then famine and bad weather forced them to halt and fall back.

The king of Bohemia became emperor of Germany under the title of Ferdinand II. The Bohemians hated him and asked the Elector Frederick V to rule them. Frederick was already head of the Union and was son-in-law of James I of England. Ferdinand made short work of his protestations, for he utterly routed him at Wissenberg, November 8, 1620, and at the same time annexed all Protestantism in Bohemia.

But the Union quickly recovered. With money donated by England, an army from Holland, and with King Christian IV of Denmark for ally, they again took the field. But the imperial general, Wallenstein, beat them at Dessau, in 1626; while his associate, General Tilly, overcame King Christian and drove him back to his own territory. Wallenstein continued his conquests, annexing the land of Denmark's neighboring allies, and sweeping on to the Baltic. There the coast towns held out bravely against him, and he was superseded by Tilly. The latter besieged Magdeburg, capital of Saxony, and, after seven months' fighting, took it. The most horrible butchery followed the capture of the city.

Gustavus Adolphus, king of Sweden, had won for himself the title "Protector of the North." He had raised Sweden to a world power and had revolutionized her warfare. He had successfully invaded Denmark, Poland and Russia, and his name was a terror to Sweden's foes. Now he cast his lot with the Union; and, with the avowed purpose of defending Protestantism in Germany, landed a Swedish army on the Pomeranian coast, June 24, 1630. He was not wholly disinterested in this invasion. He also desired to impede Austria's growing power and to establish Sweden's supremacy in the Baltic. In his plan to check Austria he was secretly aided by France.

No sooner had Gustavus Adolphus landed than he began to make his dominant presence felt. He defeated Tilly, near Leipzig, and, everywhere victorious, advanced on the lower Palatinate and the Rhine, where Tilly again opposed him in 1632, near the River Lech. "The Lion of the North" defeated and killed Tilly and advanced on Munich. Wallenstein, with a mighty army, threatened him near Nuremburg and succeeded in repulsing him. Gustavus retired into Saxony. Wallenstein followed him. The armies met at Lutzen, November 6, 1632, in a great battle. The Swede won a decisive victory, but at fearful cost for the gallant Gustavus Adolphus was killed.

Yet the death of this empire-changing general and king had the effect of maddening, instead of disheartening, his troops. Hot for vengeance, the Swedes moved onward, rivalling the Austrians themselves in barbarity. They laid waste all Bavaria. Wallenstein was assassinated, but the emperor sent an army against the Swedes, beating them at Nordlingen, September 6, 1634. After this setback, the German Union was quite ready for peace; but the Swedes would not hear of such a thing. They felt their sixth king was not yet avenged. They devastated Saxony and Thuringia, defeated a German army at Breitenfeld, then thrashed Christian of Denmark, who had gone over to the emperor's side. They followed up these successes by winning victories over two more imperial armies.

France and England had by this time been drawn into the war as Sweden's allies, and Saxony and Bavaria were once more successfully invaded. The allies swept all before them. Ferdinand II was dead and his successor was only too glad to make terms of peace with the all-conquering invaders.

So, in 1648, ended the Thirty Years' war, and the sorely distressed German states were exhausted and prostrate on every side. The plains people were chief sufferers. Literature, art, industry—civilization itself—were set back throughout all Germany. Barbarism, heavy as the stoppage of every refining and higher influence, devastation of entire provinces and wholesale slaughter of nothless monumentalists had been the chief features of the struggle.

Would Purchase Human Leg

How much would you take for a leg? This question was sent out by James Tatum, of Dayton, Ohio, who lost a leg in a railroad accident and sought to buy a human leg to be grafted onto the stump which now supports an artificial one. He received several offers, one man writing that he would sell Tatum a good leg for $150,000. Another wrote: "If the price is right, you'll have a leg." Surgeons, however, say the operation is impossible.

Not a Bad Idea

The latest thought in automobile traffic regulations is to have your complete record written on the license. Why not apply the same plan to marriage licenses?—Shoe & Leather Reporter.

Another Long-Felt Want

Some genius should invent a device which, when a person who is alone in the house gets into the bathtub, will automatically disconnect the telephone and doorbells.

Horticultural News

PEAR BLIGHT IS EASY TO CONTROL

Cutting out and destroying in winter, the twigs and limbs of pear trees killed by blight during the growing season will control the destructive "fire blight" and eliminate the source of infection for the following year.

"Pear blight is produced by a bacterial germ," says G. W. Fant, extension plant disease specialist at the North Carolina state college. "This disease causes much concern to growers during the growing season, although it is during the winter months only that effective control measures can be put into practice. The disease is characterized by a death of the blossoms, young twigs and, later, the larger limbs, giving rings of affected trees the appearance of having been scorched by fire. No method of control by spraying has yet been found due to the manner in which the disease works beneath the surface of the bark."

Twigs affected with fire blight can be distinguished in winter by the adhering dead leaves, and Mr. Fant states that is a good practice to go over all affected trees during the dormant season and cut out, as far as possible, all blighted twigs. The cut, he explains, must be made several inches below the lower limit of the canker in order to cut out all diseased wood. It is advisable also to disinfect the pruning implement after making each cut by dipping the implement into a solution of bichloride of mercury prepared in the proportion of one part of the material to 1,000 parts of water. This solution should be prepared in an earthen or wooden vessel. Pruning can be accomplished more easily if two sets of tools are used, keeping one set in the solution while the other is used for cutting. Pruning during the summer months has little value, states Mr. Fant.

Fire blight is not confined entirely to pears, although it is most prevalent on them. Apple trees are sometimes severely injured, however.

Prune All Fruit Trees During Dormant Season

It is best to prune fruit trees during the dormant season any time after the leaves have fallen. Pruning done then has an invigorating effect on the trees, whereas an equal amount of pruning done in the summer weakens them, because it deprives the trees of foliage before that foliage has an opportunity to contribute to the fruit growth of the tree, according to Prof. Joseph Ochsmer of the New York State College of Agriculture at Ithaca, N. Y. Ill effects from pruning when the leaves are usually coming out cannot be urged unimportant because the wood is seldom injured from it.

The way the cut is made has a direct bearing on the healing of the wound. If a stub is left, decay is likely to start before the wound heals, so branches should be cut flush. Small wounds need no protection, but larger ones should be painted with a thick white lead and oil paint. Here, too, the winter is most desirable, because during the summer the caustic action of sunlight may hinder the healing of the wound.

Many different kinds of tools are used for pruning, but the most satisfactory work is done with those that are strong and sharp, regardless of the kind.

Prevent Orchard Damage From Mice Gnawing Bark

Where the orchard has a heavy growth of grass or some crop around the trees, there is likely to be much damage during the winter from mice gnawing the bark. The first thing to do to prevent such damage is to clear away all the grass and rubbish from around the trunk of the tree. Some orchardists put a few shovelfuls of clean cinders in a circle of a foot or more around the base of the tree.

Another method of keeping down the mice in the orchard is the maintenance of poison stations which are kept baited throughout the year, and which are examined frequently.

The following special method of preparing bait for these orchard pests is suggested. Mix dry one-eighth of an ounce of powdered strychnine, one-eighth of an ounce of baking soda. Sift this mixture over one quart of rolled oats, heat oats in an oven until thoroughly warm, and pour over it six tablespoonfuls of a mixture of three parts melted beef fat and one part melted paraffin. When this mixture cools it is ready for use.

If rabbits cause much damage enclose lower part of the trunk with a piece of wire screen or wood veneer.

Fruit Testing Association

The New York Fruit Testing association has just held its thirteenth annual at the New York state experiment station at Geneva. The association was organized to test the value of varieties of fruit originated by the fruit breeders at the state experiment station and believed by them to be worthy of further test by fruit growers. A new and promising fruit may not be a profitable fruit just because it is new.

Thousand Barrels Daily

A thousand barrels of apples picked in one day was the record made in the orchards of S. H. Chute, Berwick, N. S., recently. Fifty men were engaged in the work. Mr. Chute, who is known as the apple king of Nova Scotia, has 325 acres in apple orchard from which he hopes to get from 20,000 to 25,000 barrels each year. Gravenstelas and Wagners are the varieties most in favor. There are 3,000 trees in the orange, which command the highest price in the English market.

Rather Be a Nurmi Than a President

Most every boy in Finland hopes to be a Nurmi. Childhood dreams are not confined to the presidency of the republic, but rather on world championship in athletics.

For the present, the street urchin's height of ambition is the attainment of a wrist watch, Nurmi, he figures, is successful because he likes his pace. Hence the first prerequisite for a future Nurmi is a timepiece.

MEENAN ON GAME OF BASKET BALL

Columbia Coach Lays Stress on Floor Work.

"Learn to catch a basket ball and throw it; practice floor work and basket shooting; develop wind and speed."

In those few words Dan Meenan, coach of the University of Columbia's 1920 eastern intercollegiate champions, writing in the American Boy Magazine, advises high-school teams to spend their practice hours on the fundamentals of basket ball rather than strategy and "fancy" play.

"Give me a team that knows how to pass, catch and, above all, shoot," says Meenan, who was an All-Eastern player and captain of the Columbia team in 1914, "and I think I can beat the team that knows every trick play and every bit of court strategy in the books, but is faulty in fundamentals."

Meenan couches his team in a simplified style of play. He teaches only one kind of pass—a one-handed pass without spin that travels at shoulder height.

"It stands to reason," he says, "that if you know this one pass perfectly you'll be more accurate than if you know a dozen fancy passes imperfectly.

To reduce fumbling he tells his men to catch the ball with their hands palms inward, rather than with palms to the front.

One kind of shot for the basket is enough for the Columbia team, the close, short, delivered shot and without English. A variation of it for use under the basket is the one-handed push, delivered from the chest. In all basket shooting, Meenan says, stress for rhythm and smoothness. Crouch a little, if necessary, shoot your hands out straight for the basket, and leave your feet. This gives you a continuous, graceful technique, and creates deliberate, careful shooting rather than nervous "jabs."

Columbia bases its system of play on three hard and fast rules:

On defense, always keep between your man and the basket, forcing him toward the side of the floor; and,

On offense, never catch a ball standing still; keep your opponent from intercepting it by going to meet it.

After you have completed a pass, get ready to receive the ball again.

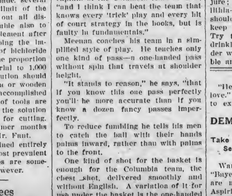
Meenan does not teach the five-man defense. The minute Columbia loses the ball every player rushes to cover his opponent and force him either to pass it or lose it. This style of defense, he admits, only works when the team is composed of five fast men who possess stamina.

Dribbling has little place in Meenan's system of play.

"Never dribble," he cautions, "unless you are coming up to the basket for a shot and there's no one in front of you." The dribbler is usually slow enough to give the other team time to get set; he destroys floor work and leaves four men idle.

The way to stop a dribbler, Meenan says, is not by trying to guard him from behind, but by running around him and placing yourself smartly in front of him. He can't charge you, and if he shifts you can move to meet him.

On offense Columbia players are cautioned always to keep the trees under the basket clear. They are instructed to pass the ball and maneuver at least fifteen feet from the basket until one man sees his opportunity to cut in under the loop for a short shot.



Captain Charles Pratt

The photograph shows Charles Pratt, basket ball star, has been elected to the captaincy of the Harvard 1927 football team.

Yanks in Right Field

Miller Huggins used more men in right field during the 1926 season than in any of the other regular positions. Six Yankees saw service in right. They were Bob Meusel, Babe Ruth, Earl Combs, Carlyle, Davis and Paschal. Meusel and Paschal were used in both center and left as well. All told, Huggins employed thirty-nine players in the various stations, and a single Yankee going through the chase without missing some time along the way.

Rather-Be a Nurmi Than a President

Most every boy in Finland hopes to be a Nurmi. Childhood dreams are not confined to the presidency of the republic, but rather on world championship in athletics.

For the present, the street urchin's height of ambition is the attainment of a wrist watch. Nurmi, he figures, is successful because he likes his pace. Hence the first prerequisite for a future Nurmi is a timepiece.

If Back Hurts Flush Kidneys

Drink Plenty of Water and Take Glass of Salts Before Breakfast Occasionally

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which helps to remove the body's urinous waste and stimulate them to their normal activity.

The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of good water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate clogged kidneys; also to neutralize the acids in the urine so they are no longer a source of irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to help keep their kidneys clean and active. Try this; also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

Maybe Not

"He says he was disappointed in love." "Did anybody ever find it up to expectations?"

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

"Possible," he assented; "but keep the Trail in the back of your mind. 'Tis this fact which concerns me now. For look you, Master Ormerod, if I secure proof the Frenchman is in league with the wolves, I'll be the first to hang the twit with strengthen by so much my case against Murray. Then might! dare indeed to stir the Iroquois to hostilities against him, as Peter suggested.

"I will do what I may," I promised.

"I'll well. And be not reluctant to accept advice from Corbier and the Indians. They are schooled in the forest's craft. Good-by, sir, and be vigilant."

He gave me a hearty clasp of the hand and bowed me out.

In the street Corbier awaited me.

"They ride presently to a wharf at the foot of Deye street, where lay the sloop Betsy, her sails furled and her lines slack. She cast off as we stepped aboard, and presently I was looking back at the lights of Montreal growing dim in the distance.

Corbier put his ear to the bottom of the boat, and a curious expression crossed his face.

"Ya," was all he said.

CHAPTER VII

Along the Great Trail

"Shall we return and face them?" asked eagerly.

Ta-wan-ne-ars permitted himself a smile of friendly sarcasm.

"If we can hear them, surely they can hear us," he said. "No, we will keep on. There is a place farther along the trail from which we can look back upon them. Come, Ormerod, you and I will run ahead. Never will follow us."

Ta-wan-ne-ars shifted his musket to his shoulders, and broke into a long, loping stride. I followed him.

Half a mile farther on we stopped.

"Walk in my tracks, brother," he said. "And be certain that you do no brush a twig."

With the utmost caution he parted the screen of underbrush on our right hand, and revealed a tunnel through the greenery into which he led the way, hesitating at each step until he had gently thrust aside the intervening foliage. Once in the tunnel, however, he chanced to meet a mossy boulder or a tree too big to be readily felled or uprooted. As I stooped over it I saw that its bottom and steeply sloping sides were hard-packed, leaden down by continual pressure, the relentless pressure of countless human feet for generations and centuries.

Ta-wan-ne-ars instantly led the way into the groove of the trail, and as if instinctively swung into an easy loping trot, I followed him and the Dutchman brought up the rear.

It was cool under the trees, for the sun seldom penetrated the foliage, dense already although it was only the fag-end of spring. And it was very silent—terribly, oppressively silent. The crack of a stick underfoot was like a musket shot. The padding of our feet on the resilient leaf-mold was like the low rolling of muffled drums. Even the ominous cawing of birds seemed to set the echoes flying.

Yet I was assured when Ta-wan-ne-ars halted abruptly to listen intently and inclined his ear toward the trail behind us.

"What is it?" I asked, and so completely had the spirit of the forest

mastered me that I whispered the words.

"Something is following us," he answered.

Corbier put his ear to the bottom of the boat, and a curious expression crossed his face.

"Ya," was all he said.

CHAPTER VII

All Nature Keenly Responsive to Truth

Laws execute themselves. They are out of time, out of space, and not subject to circumstance. Thus, in the long run there is a justice whose retributions are instant and entire. He who does a good deed is instantly ennobled. He who does a mean deed is by the action itself contracted. He who puts off impurity thereby puts on purity.

If a man discredits, deceive, he deceives himself, and the sum of acquaintance with his own being. Character is always known. Thieves never snatch; sham never hypocrisy; murder will speak out of itself. Justice, truth, sincerity, gentle—for example, the taint of vanity, any attempt to make a good impression, a favorable side exposure will instantly vitiate the effect. But speak the truth, and all things shine or there are vouchers, and the very roots of the grass underground there do seem to stir and move to bear you witness.

Moslems' Holy Stone

The black stone of Mecca is a dark-colored stone about eighteen inches long, apparently a meteorite, built into the southeast corner of the temple of the Kaaba at Mecca. The Mohammedans claim that it was given to Abraham by an angel. Pilgrims to Mecca walk around the temple seven times, then kiss the black stone. The Caaba was the temple of Mecca for ages before the time of Mohammed, and attracted pagan pilgrims in those days just as now it draws thousands of Moslems. It is a legend that the black stone was at one time white, but turned black owing to the sins of men.—Exchange.

Finish for Floors

Put one quart of turpentine in a self-sealing jar. To this add four ounces of finely cut beeswax. Adjust the lid and set in the sunshine. Shake it occasionally until beeswax is dissolved and it is the consistency of thick cream. Apply with a small rag, rubbing thoroughly into floors, and polish with soft cloth after it is dry. It is easy to apply and when once used will never be discarded. It is fine also for linoleums and painted floors.

BLOUSE FOR SPORTSWEAR; SHORT JACKET ENSEMBLE

SENTENCED to wear stripes! It is the verdict of the mode. The decree issues from the highest style courts. So it's the wearin' o' stripes for women of fashion for the coming term of spring and summer.

The newer materials, silks, cottons and woolens, all exploit stripes—stripes colorful, and of exceptional novelty. It is well, therefore, when choosing the fabric for your spring frock or blouse, to keep in mind that stripes are "in," especially those that run in a horizontal way.

The model pictured was interpreted in the spring fabric showings, is an inexhaustible one. They include

Blouse of Striped Flannel.

narrow and wide versions, definite and indefinite types, pastel or vivid tones, and the very latest is called colorful.

Effectiveness of the new striping is largely due to the artful blending or contrasting of colors. Exquisite combinations such as rose, brown, tan and mauve; periwinkle, Hudson blue, beige and old rose compete with brilliant Roman stripes and the last word in startling effects is the fearful yellows, greens, pinks and reds variously striped on a white background.

For spring the blouse of striped flannel will pose over a skirt of the same material in solid coloring. The picture shows the result of the combine of a striped and plain flannel. Tan, brown and red-striped flannel for the blouse, with plain tan flannel makes this smart sports frock. Notice that the stripes run horizontally, which is the fashionable thing for them to do. The new materials are showing stripes in two horizontal design, in that the stripes are woven across the width, instead of the usual manner.

Of outstanding interest are stripes placed in groups of three on contrasting ground in pure silk interweavings.

Striped taffetas subscribe to the new mode, and the latest gingham are also striped—which is all gone to show the prominence rice stripes are playing in the season's fashions.

Nearly every contender in Paris is exploiting the short jacket theme for midseason and early spring. For limousine wear the velvet jacket with wool checks or plaid for the skirt is the outstanding idea. So interesting have compose costumes of skirt and jacket become, Paris predicts a tremendous vogue for them with the arrival of spring.

Appropriate for the present is the velvet jacket with contrasting skirt, and for later on suits is appointed to take its place. Types such as are shown in the picture are being highlighted by Parisian stylists. Seen at Longchamp was this sports tailleur of

Two Paris Offerings.

black satin shown to the left. The jacket is cut along very soft and fondulting lines. The fact that the skirt is enriched with bands of velvet, shows how leathe is the designer to subdue this beloved fabric from the style programs. Which leads to an interesting bit of information, namely that midseason frocks of both cloth and silk retain velvet as a trimming.

Navy blue grosgrain is the standout medium for the jacket pictured to the right. Here, too, is the trend of the new fortesphere, for navy blue and red-and-white checks are also in the picture.

Molyneux carries out the jacket costume to sleeveless dress over the jumper and short on mental

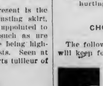
The KITCHEN CABINET

(© 1927, Western Newspaper Union.)

You ought to be fine for the sake of the folks
Who think you are fine.
If others have faults in you doubly you're bound
To stick to the line.
It's not only on you that dishonor descends;
You can't hurt yourself without hurting your friends.
—Edgar Guest.

CHOICE PUDDINGS

The following pudding is one which will keep for some time and may be



restemined:

Graham Pudding.—Sift two cupfuls of graham flour with one teaspoonful of soda, add one cupful each of sour milk and molasses, one and one-half teaspoonfuls of salt, one teaspoonful each of cinnamon and cloves and one cupful of mixed raisins and nuts chopped. Pour into a mold and steam three hours. Serve with egg sauce.

Egg Sauce.—Beat two eggs until light, add one cupful of sugar and stir until well dissolved, then add one-half cupful of hot milk with a teaspoonful of flavoring.

Hamburg Cream.—Mix together the rind and juice of two large lemons and one cupful of sugar, add the well-beaten yolks of chilled eggs. Place in a double boiler and cook three minutes, stirring until it thickens. Beat the whites of the eggs to a stiff froth, add the egg mixture when hot and stir until thoroughly mixed. Serve cold in sherbet cups.

Banana Sponge.—Soak a third of a package of gelatin in one-third of a cupful of cold water. Add boiling water (two-third cupful), one cupful of sugar, the juice of one lemon and one cupful of banana pulp. Heat to the boiling point, cool a little, and beat, then beat in the stiffly beaten whites of three eggs. Turn into a mold lined with sliced bananas. Serve with whipped cream.

Meringue Pudding.—Beat the whites of six eggs very stiff, then add six rounded tablespoonfuls of sugar and one scant tablespoonful of vinegar. Put into two layer cake pans lined with oiled paper and bake until a light brown. When cold remove from the pans and place on a chop plate or fancy plate. Have ready three-fourths of a pint of cream whipped and mixed with chopped pecans, spread over one layer, cover with the other and dot with mixed maraschino cherries.

The School Lunch.

The school lunch is a problem that daily bothers thousands of mothers, in that a few bleas n nd suggestions might be helpful.

One likes the lunch to be tempting as well as nourishing, which means a thought and planning.

Baked apples, jellies and fruits of various kinds are always most satisfactory lunch basket foods.

Custards, when well baked, make most desirable food. With a sandwich and a few nuts and an apple, this will prove a most satisfying meal.

Peanut butter is enjoyed occasionally as a sandwich filling. There are so many kinds of sandwich fillings that there need never be one used too often to tire of it.

Brown bread spread with butter and well-seasoned cottage cheese in which a bit of onion juice and a few chopped nuts are added, is another good filling.

Cheese, tsk or eggs in various forms or combinations may be used, or a bit of chicken, lamb or beef.

Baked Apples.—Wash and core tart apples, plunge into a kettle of boiling water, drain and fet cold water run over them. Place in a pan in a hot oven and bake until tender. Remove the skin if desired and serve with sugar and cream.

Deviled Ham.—Chop very fine one pint of boiled ham (more fat than lean), six hard cooked eggs, one teaspoonful of mustard (the made mustard), season and press into a mold. This will keep for months in cold weather and makes fine filling for sandwiches.

Danish Raisin Pastries.—Mix and sift two cupfuls of flour, one teaspoonful of salt, one-half cupful of shortening; cut in with knives. Beat one egg, add one tablespoonful of milk and mix with the dry ingredients, adding only milk enough to hold the mixture together. Turn out on a floured board and roll very thin. Spread with three tablespoonfuls of softened shortening. Cut into fourinch squares and sprinkle with raisins, nuts and sugar. Roll up like a jelly roll and press the edges together. Place on a baking sheet, cover with a damp cloth and set on ice for two or three hours to chill. Brush with egg and milk, sprinkle with a little sugar and bake in a hot oven. Serve hot. Nice with a cupful of tea or coffee for a bridge party.

Nellie Maxwell

Worry Stupid Waste

Worry is evidence of an ill-controlled brain; it is merely a stupid waste of time in implementation, says Arnold Bennett. If men and women practiced mental calisthenics as they do physical calisthenics they would purge their brains of this foolishness.

Made Candy of Clay

After the Civil war, when the price of cane sugar rose to great heights, candy makers tried the experiment of using clay in place of sugar.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from indigestion, dyspepsia, sour stomach, think your heart is going to stop beating.

Your stomach may be so distended that your breathing is short and gaspy. You are ready to pray for quick relief—what a tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and satisfactorily.

What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

He Was, Though

Customer—How are your salted peanuts? Fresh? Clerk—No, help salted.—Boston Transcript.

A Raw, Sore Throat

eases quickly when you apply a little Musterole. It penetrates to the sore spot with a gentle tingle, loosens the congestion and dispels some of the soreness and pain and won't blister like the old-fashioned mustard plaster.

Musterole is a clean, white ointment made with oil of mustard. It gives quick relief from sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds on the chest.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

MUSTEROLE WILL NOT BLISTER

Better than a mustard plaster

Woman Athlete Honored

Frau Lisbeth Schleider, of Dresden, is the first woman in the German empire to receive the golden band awarded for excellence in athletic proficiency. The golden band is the highest athletic award given, and can be won only by persons above forty years of age who have kept up for a long period of years a record for faithful training and successful participation in contests. Frau Schleider is a member of Dresden's women's swimming club, Dresdenia.

Too Much "Acid?"

Excess Uric Acid Gives Rise to Many Unpleasant Troubles.

AUTHORITIES agree that an excess of uric acid is primarily due to faulty kidney action. Retention of this toxic material often makes its presence felt by sore, painful joints, a tired, languid feeling and, sometimes, toothache and headache. Than the kidneys are not functioning right is often shown by scanty or burning passage of secretions. Thousands assist their kidneys at such times by the use of *Doan's Pills*—a stimulant diuretic. *Doan's* are recommended by many local people. *Ask your neighbor!*

AGED TEXAN TELLS OF BUFFALO HUNTS

Vast Herds of Animals Roamed the Plains.

Tahoka, Texas—Frank M. Sherrod of Tahoka is one of the few men still living who hunted buffaloes for their meat in the 70's. His first trip to the plains region of northwestern Texas on a buffalo hunting expedition was before the wholesale slaughter of the animals by their hides began. As a means of preserving Mr. Sherrod's reminiscences of pioneer days, J. E. Haley, field representative of the Panhandle-Plains Historical society, visited Sherrod a few days ago and obtained from him an account of his buffalo hunting experiences. One of the interesting statements made by Mr. Sherrod was that in 1875 buffaloes were killed in great numbers for their tongues, considered a great delicacy.

His First Buffalo Hunt.

"I was just a boy and was out here on the buffalo range in 1874 and 1875," he said. "I was seventeen years old when I came out the first time. We came out from Brown county, about 200 miles to the east, and there were only five of us. We hunted for meat. That year you could see 200 and 300 coyotes in a bunch, but the second year these animals were thinned out. There were many men buffalo hunting, who killed the coyotes for their skin.

"We really came a lot further out than necessary to kill the buffaloes, but we had lots of fun. There were tens of thousands of buffaloes everywhere. When we got tired of one place we would move to another. We made houses of poles, covered with buffalo hides, lined and floored with the same. The second winter we came out here there were thirty-two of us from Brown county, and I killed 365 buffalo that winter myself. I didn't do anything but hunt.

"The first winter we loaded our wagon with meat. We took rawhidings and two year olds and dried their hams whole. We brought a wash kettle along with us and rendered up thirty-two kettles of full marrow and tallow. This, of co se, hasn't that you could throw it around like a chunk of wood. It would take an ax, break of some and then scrape the marrow out. The marrow and tallow were used for cooking, making soap and the like.

"We killed enough buffaloes to furnish the people of Brown county with meat all the next year. Twelve months afterwards the meat would be as hard as a stone on the outside, but good and fresh when cut into. We didn't salt our meat. The majority of the meat we cut in big chunks, as large as a tea pound bucket, and dried. Some of it we carried back in the whole hams.

"In killing the buffaloes we used needle guns and it cost us five cents a shot. We met two fellows up on the head of the Colorado river the second year who had been out two months and hadn't killed a buffalo. They had these 'citizens' rifles and traded us some tobacco to kill some buffaloes for them. We went out and killed about fifteen for them.

No Trouble With Indians.

"There were lots of Indians the first year. We left our camp many times and would look back and see the Indians sitting on the tops of our wagons and moving around our camp. They never would bother anything except something to eat or our mules. We had to guard the mules every night. Many a night we have gone off into a thicket without mules, and the Indians would come into camp and pass all around us. There were more Indians over in Crosby county than across Tahoka lake. We never did have a fight with them, as they never did bother us. Lots of times we would ride around a point and meet a bunch of Indians face to face. We would look at them, and in a minute the Indian behind would turn his horse and then all would turn and ride back the way they had come.

"We never bothered with the buffalo hides in 1874 except to throw a few on top of our meat when we started back. There was a spring at Tahoka lake, but no water in the plains taken then.

"The second winter there were hundreds of men killing for hides.

"We drove on teams in 1875 and must have had about fifteen wagons that year. There was an outfit from Fort Worth on the Colorado river which was killing just for the tongues. They said they were worth fifty cents in Fort Worth. They would kill the buffaloes, cut out the tongues and leave the rest lying there. We were gone on the trip about six months and a half."

Rich Gift to World

William Sturgeon, British shoemaker, philosopher and scientist, gave to the world the electro-magnet, one of the most important of electrical devices, but like many other inventors, he spent his later years in penury. His invention is in some form or another the fundamental element in the dynamo, the electric motor, the transformer, nearly every telegraphic instrument, the telephone, the loading coil, and the electric bell, says the New York World. Sturgeon made the first electro-magnet with a rod of iron, half an inch in diameter and a foot long, bent into the form of a horseshoe and wound, spiral fashion, with 18 turns of bare copper wire.

SCIENCE IS USED TO BARE CRIME

Novel Apparatus Registers Guilty Excitement.

New York.—Using specially devised apparatus to measure the electrical resistance of the human skin and an electrical stethoscope which enabled the audience to hear the thumping of the heart of the person under examination, Dr. A. A. P. Link, instructor in psychology at New York university, demonstrated to the New York Electrical society how science can aid in detecting and apprehending criminals.

Three persons selected from the audience were sent out of the room under sealed instructions. One of the trio chosen by lot went to a room on the tenth floor of the building where a letter was taken out of an overcoat pocket.

From the envelope $10 was removed, the letter was replaced and the "culprit," whose identity was not disclosed to Doctor Link or those in the audience, returned to the auditorium.

Doctor Link then subjected each of the three to electrical psychology tests. The emotions aroused by the guilt of the "robber" became instantly evident on the records of the apparatus.

An electrical stethoscope, specially devised by the Bell Telephone laboratories, magnifying the heartbeat sounds more than 100,000 times, enabled the audience to hear the thumping of the heart. When the young man who had opened the envelope and removed the $10 was asked questions bearing on the "robbery" his quickened thumping of heart, when the key words were mentioned was instantly made evident.

In addition to the quickened heart beat of the one who removed the $10 from the envelope, "guilty excitement" was also demonstrated in the form of a moving spot of light thrown on a screen in full view of the audience. The spot shot clear across the screen when the person questioned became unduly excited.

Doctor Link explained that excitement lowered the electrical resistance of the skin. This, he said, was especially when an effort was made to lie or to conceal the truth.

According to Doctor Link this reaction is entirely outside the control of the person examined. He said this apparatus was "a complete give-away of the emotions which the robber was attempting to conceal." Doctor Link also explained a number of psychological tests, electrical and otherwise, now in use for the selection of employees either for hire or promotion. He said these tests must not be used as infallible guides, but as an aid to the general common sense.

Columbus' Debt to Wife.

If it be true that there is a woman in the background in every notable achievement, there seems to be justification in calling Dona Felipa, the wife of Christopher Columbus, that influence in the life of the man who was later to discover the western world.

When Columbus talked to her about his exploration enthusiasms, she was sympathetic and his ambitions appealed to have found grateful nurture at their fireside. There is a tale of how Dona Isabella, Columbus' mother-in-law, produced an old box containing maps and logs—piously kept relics of her husband's. It may be that something found in this box prompted in Columbus the conception, later to become a flaming article of faith, of a land beyond the horizon.—Kansas City Times.

Prophetic Plant

A plant which is said to be able to predict earthquakes and volcanic eruptions bears the scientific name of Abrus precatorius. It is a native of Cuba, has no flowers, and consists of a long stalk from which branch numerous twigs containing rows of delicate-looking leaves. The leaves frequently change color or close, while the twigs bend themselves into different positions.

This plant is highly sensitive to electric and magnetic influences, and by being able to interpret the movements of the plant in response to electric currents the scientist is enabled to predict great convulsions of nature.

Flowers and Coins

Plenty of money has always gone into floral exhibitions, and this is literally true in England, where a florist has succeeded in getting delicate tints with the aid of silver coins. He drops silver coins in water in which the flowers are standing. Silver hydroxide is formed and the action of the chemical changes the natural color of the blossoms, giving them shades not possible under natural conditions. After the coloring has proceeded to a satisfactory degree, the coins are removed and a few crumbs of slaked lime or mortar are added to fix the tint.

Nurich's Great Idea

"Now let's see about this portrait you're to make of my wife," said Nurich. "Water colors rub out easily, don't they?"

"Oh, yes," said D'Auber; "it must be in oil—"

"What a minute. Just make the head and neck in oil and the dress in water color. Then it'll be easy to bring it up to date every time the style changes."

Two Viewpoints

Sometimes the man who insists his wife is his "right hand" never lets his right hand know what his left does. Such consideration may be prompted by the best of motives, and then again by another reason.—Grit.

Electric Heat Dries Ink

Our Pet Peeve

Bird Cripples Live Under Big Handicap

As in the case of human beings, an in bird life there are those which for some reason or other are fated to go through life with certain handicaps.

Unfortunately, man is mainly responsible for bird cripples. Rabbit trapping, as carried on today, is responsible for damage to thousands of pheasants. No less than 50 per cent of those shot in a small wood recently had only one foot, but they had managed to survive and were in perfect condition apart from this damage.

Steadier birds often get a leg wounded, but seem able to get along without it by hopping on the sound one and using their wings. Not only will a startling feat amuse to refer under such conditions, but it will fight and scramble after food and manage to hold its own.

In wild-fowling it is frequently found that after a large flock of birds has been put to flight a smaller number remain behind and seem loath to fly. If these are examined through a good pair of glasses, they will be seen to be the halt and the lame that have been damaged in some part of the body.

Nature has a rough-and-ready way of healing their hurts and many cripples survive for a time.

Few birds that are born cripples survive for long, for their enemies are many and the weakest are the first to go.

Doctor's "Pull" Landed Him in Mayor's Chair

The only doctor in Scrapville decided that he would like to be mayor so he came out in the Scrapville Times with the following notice:

"Fellow citizens, I am running for mayor. I have no particular platform; no reforms to make, nothing to say against my opponent. I merely desire to be mayor of this town before I die. I know every man, woman and child in this town. I have been present at every birth, marriage or death in Scrapville for the past forty years. I am not elected I am going to leave the town. But before I go I will tell all I know about each one of you."

For the first time in the history of the town everyone of legal age turned out to vote. When the ballots were counted the old doctor had received all but one vote, and that was cast by a man who had just moved into town.—Los Angeles Times.

Well-Trained Horses

Visitors to a circus or fair are always much impressed by the cleverness of the horses which prance around the ring, and rise up on their hind legs and dance to the music of the band. In fact, so highly have horses been trained that at the circus of Curtz Altdorf, a famous continental ring, a horse inside a number of ballroom scenes alone. The audience are said to have been great masters of horse training. The people of Italy taught their horses to dance to the music of the pipe. In the Thirteenth century there was shown a famous rope-dancing horse, while the artists of the Fourteenth century found plenty of scope for their talents in depicting the different methods employed in the instruction of performing ponies and horses, one of which was taught to tap his forelegs and hind legs on a board like a man playing a drum.

Curiosity Wins

"Look here," began the youth, as he entered a butcher's shop and displayed two lovely-looking if decidedly blue eyes, "you have fresh beef for sale?"

"I have," responded the butcher.

"And fresh beef is good for black eyes, is it not?"

"It is."

"Very well, I have the eyes, you have the beef. Do you think you can sell me a pound or so without asking how I got acquainted?"

"I'll do my best, sir."

The butcher cut off the meat and received the money without another look at his customer. At the last moment, however, the old Adam proved too strong for him.

"Look here," he said, handing back the cash, "I'll make you a present of the beef. Now tell me all about the fight."

The Way Out

Too many marriages aren't marriages, but merely efforts to escape the monotony of staying single.—Arkansas Democrat.

D. S. PAYTON, Deputy.

Jackson by No Means Lacking in Education

John Quincy Adams declined to attend the ceremonies at Harvard college in 1833 when the honorary degree of doctor of laws was conferred upon Andrew Jackson, then President of the United States.

His reason, according to his diary, was that "as an affectionate child of our alma mater, I would not be present to witness her disgrace in conferring her highest literary honors upon a barbarian who could not write a sentence of grammar and hardly could spell his own name."

Adams' estimate of Jackson has been challenged by Dr. Archibald Henderson, who tells in the Raleigh (N. C.) News and Observer, the result of his exhaustive researches regarding Jackson's early life. He finds that Jackson, as a boy, received a better education than the average child of his station in life.

Later he attended Waxhaw academy. He continued his studies in that part of Carolina known then as New Acquitaine. An account of the life of Rev. Freely Cumming, once a teacher at Bethel, S. C., shows that Jackson took the best schools then afforded the old doctor had received all but one vote, and that was cast by a man who had just moved into town.—Los Angeles Times.

Visitor Surely Had Impressed Small Boy

There was a visitor stayed in Mr. Jones home out on Long Island. A real lord was paying them a visit. He was quiet and nice to the mister and Mrs. Jones fluttered as she urged her lord to eat this and that.

Mr. Jones, swollen with a sense of the great honor bestowed upon his household, kept silence with his lordship under such conditions, but it will fight and scramble after food and manage to hold its own.

In wild-fowling it is frequently found that after a large flock of birds has been put to flight a smaller number remain behind and seem loath to fly. If these are examined through a good pair of glasses, they will be seen to be the halt and the lame that have been damaged in some part of the body.

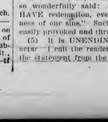
Incomparable Love of God

By REV. W. TAYLOR JOYCE
Director of Pentecost Week, Moody Bible Institute, Chicago.

TEXT—Behold what manner of love the Father hath bestowed upon us, that we should be called children of God, and such we are.—1 John 3:1, 2 (R. V.)

The Word of God is the most likely source to which one would go to find a correct definition of what is termed a child of God. John here addresses himself to those who have definitely accepted the Lord Jesus, and recalls to mind the exact fulfillment of the words in his Gospel: "He came unto His own, and they that were His own received Him not, but as many as received Him



Rev. W. T. Joyce.

Him gave He power to become the children of God." This foundation for possible entrance the heart of those who have come to know Him as saviour at the love which God must possess toward those who are His. It is this incomparable love of God, bestowed upon believing people, that I wish to dwell upon.

(1) It is an UNSOLICITED love which He has bestowed. Every religion existent seeks to merit favor with God in some way or other, but as revealed by the Apostle Paul when he concluded his mighty burst of eloquent pleading for our faith in the love of God. "I am persuaded, that neither death, nor life, nor angels, nor principalities, nor things present nor things to come, nor powers, nor height, nor death, nor any other creature shall be able to separate us from the love of God, which is in Christ Jesus our Lord." Such a love, so unhazarded, unsolicited, unchanging, unending, constrains us to sing with the saintly Watt,

Were the whole realm of nature mine,
That were a present far too small;
Love so amazing, so divine,
Demands my soul, my life, my all.

Worthy of Trust

Is He worthy of trust, of absolute trust? How absolutely will you yield to Him? How far up toward the height of His perfect surrender will you climb? You may have all the fullness you will make room for.—Echoes.

Watch and Pray

Cherish good desires. Don't trifle with them. Very often they are lost for want of care, or by levity, censoriousness, or prayerlessness. Don't grieve the Spirit. Follow up good desires. Watch and pray.—War Cry.

A Womans Missionary Vesper Hour

A vesper feature service that was unusual in its instructive interest was held last Sunday afternoon in the First Methodist Episcopal Church. A church full of people heard the fine address of the hour which was given by song, sermon, pageantry and pictures.

In presenting his subject "Christ or Mohammed," the pastor contrasted the lifes and teachings of these great leaders in religious, social and domestic achievements. To illustrate his description of Moslem domestic life, about twenty ladies were costumed in the latest manner and represented a Moslem harem, a Moslem wedding, child life and the entrance of Christian Grace women of the Woman's Foreign Missionary Society, and the new day for women, the world around.

Mrs. Ada Beeman, president of the local Woman's Missionary Societies of the Methodist Episcopal Church, was in charge of the costuming and arranging of the pageantry and the work was splendidly executed.

Mrs. A. C. Belding had charge of the musical part of the program.

The pictures were so excellent climax to the sermon, music and pageantry.

NOTICE!

The Board of Education of Charlevoix will accept closed bids, for sale and removal on houses owned by them known as Ed. Seward Sisters, Hamlin and Withers houses. Board of Education reserves right to reject any or all bids.

Board of Education,
H. A. Craig, Secretary.

Popularity

We think more of Louis Pasteur than we do of Napoleon. Pasteur was a great benefactor of mankind but Napoleon never brought anything but misery to most of Europe and some of Africa. Yet, if those two met in New York and one walked north and the other south Pasteur would probably be honored and Napoleon would be unnoticed by the mob.—The Third Link.

Result of Loss of Eye

An eye hospital informs us that the loss of one eye will affect a person in diverging the focus of one of an object for a while following the operation. As time goes on the eye will accommodate itself to the new condition and the patient will be able to discern the roundness of an object.—Washington Star.

Is Wireless to Blame?

The supposed disturbance of the ether by wireless waves is held responsible for a multitude of occurrences. It is stated that birds are singularly affected in places where there are wireless stations, and that doves especially experience a difficulty in finding their way home.

Methodist Church.

C. E. Pollock, Pastor.

NEXT SUNDAY:—

"Glorified Excellencies," sermon at 10:30 a. m.

For every one—the great service at 4:15 p. m. next Sunday. Fathers, mothers, sisters and brothers and all the rest are welcome. But a particular invitation is extended the pupils of the high school by the men's club and by the pastor and people of the First Methodist Episcopal Church to hear former chaplain Kruse in his captivating address, picturing the inside life of the State's prison. No admission is charged, but as there is the expense of bringing the speaker to our city a free-will silver offering will be received. Hymn slides will be used in the opening service. The schools and other churches of the city are invited to participate in the 4:15 afternoon service.

The Ladies' Club meets with Mrs. Dell Dutcher Thursday afternoon, this week.

Sunday School meets at twelve 12 o'clock Sunday.

February 8th, one week from next Tuesday, is the date of the Church School-Epworth League concert. A program of surprises awaits those who are looking for a wonderful evening.

Father and Son banquet comes February 28th.

Young Peoples' prayer meeting next week is on Tuesday evening at seven o'clock, for one-half hour. The lesson study will be taken.

The Scouts, under the leadership of the scout-master, will meet Tuesday evening at 7:30. Every Scout is expected.

Epworth League hour next Sunday is at 6 p. m. The mission study topic will be presented, and a discussion will follow. Good music and a good time for all young people.

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on West Horihut Avenue:

Morning service at 10:30.

Sunday School at 11:45.

Young Peoples meeting, 6:30 p. m.

Evening service at 7:30.

Prayer meeting Wednesday evening at 7:30, at the parsonage.

The Sewing Circle will meet at Robt. Dickie's residence, 106 W. Garfield, Thursday p. m.

Topics for Sunday morning and evening:

"The Life Giving Stream."

"Why We Praise the Lord."

The issue of sorrow and joy which caused the only son of God to suffer upon the cross for our disobedience is enough to make any thinking person to stop and consider the point for a few moments. He died to save His people from their sins—yes, to keep us free from sin. By His mighty power (grace) by which we reign supremely free from sin! Sin is bondage! Grace is freedom! Come and hear about it—we invite you.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At the First Congregational Church the pastor will preach in the morning on "Road Signs on the Highway of Life" and in the evening on "The Gift That is in Thee" with illustrations from the folks of today.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Life."

Sunday School 12 o'clock

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 2 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelo.

WANT COLUMN

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Jan. 29-30

Outdoor Special, Zane Grey's "Man Of The Forest" with Jack Holt, Georgia Hole and El Brendel. The present day vogue in entertainment is for big, slashing outdoor thrillers—especially when they're Zane Grey Paramounts. A tale of hair-breadth adventure in the mountain regions of the far West. An out-of-doordinary "Western" done in the super-style that makes Zane Grey Paramounts stand alone. Also a Fox comedy "Family Picnic."

Thursday Only, Feb. 3.

"The Girl From Montmare" with Barbara La Marr and Lewis Stone, scandal, passion flower; rare bloom of Paris night-halls, transplanted to the burning sun-light of Spain; swathed in silk, fed with rare perfume—she for whose smile men fought, herself fought for the cool smile of an English gentleman. Also Hodge Podge and Fox News.

Coming—Bebe Daniels in "Counsel In Paris."
Coming—Harold Lloyd in "The Kid Brother."
Coming—Eddie Canton in "Kid Boots."

NOTE—"Girl From Montmartre" will be shown Thursday, February 3rd—one day only.

—) PERSONALS (—

Dr Leehy, the Optometrist, will be at the Hotel Charlevoix Monday, February seventh.

"Failures and Misfits" at the Palace theatre, Wednesday evening, February 2nd—Lyceum number.

The Congregational Ladies' Aid Society meets Wednesday, March 2nd, with Mrs. Chas. Lamphear, 209 Mason street.

Mr. and Mrs. Mat Koutley motored to Bellaire last week and spent Friday and Saturday with relatives in that village.

James Simmons and Henry Block motored to Detroit Wednesday morning where they intend to take in the automobile show.

R. F. Sloan Sr., motored in from Muskegon yesterday and will remain here for a few days to look after his local business interests.

Mrs. I. B. Bartlett came up from Grand Rapids Wednesday to spend a few days with relealtives and friends and attend to business affairs.

The members of the Missionary Society of the M. E. Church will meet with Mrs. Martin Block Wednesday, February 2nd.

"Facts, philosophy and fun," by former Chaplain Kruse at the M. E. Church Sunday afternoon at 4:15. Don't miss this treat.

Mrs. George W. Weaver leaves tomorrow for Charlotte where she will spend about three weeks with her daughter, Mrs. Donald C. Gaffney.

Mr. John McCann and son Harold are motoring to Frankfort today. Mr. McCann will continue his trip by boat to Kenosha, Wisconsin, while Harold returns to Charlevoix.

Members of the fire department made a run to the Goldstick store at an early hour this morning, but they speedily put out a small fire of undetermined origin before it had created but a small amount of damage.

Messrs. James Wyers, Edgar Smith, Harry Porter and Charles Novak motored to Detroit last Monday and will spend their time while in that city at automobile show and attending to business affairs.

Louis K. Silicox, young nephew of W. G. Parker, of Charlevoix, has been placed in charge of motive power of the St. Paul Railway system. Mr. Silicox received his technical education in Brussels, Belgium.

Members of the W. C. T. U. and friends will attend a banquet at the Congregational Church Tuesday night, February 1st, at which Pastor Herman Horne D. D., of the local Baptist church will be the principal speaker.

Zona Gale's "Neighbors" is to be put on February 15th at the Palace theatre by the Pilgrim Players for the benefit of the Congregational Ladies' Aid. This company is made up of well known local talent and everyone will want to see them act.

Nay Smith and brother motored in from Detroit last Monday afternoon about five o'clock, leaving Detroit at seven o'clock the same morning which is considered a good condition of the highways for those who travel by automobile.

Edgar Smith, by an arrangement entered into late last week, takes an interest in the Lakeway Garage and becomes a partner in the business which, hereafter will be managed by James Wyers the former owner and the new member of the firm.

Dan E. Goodman, hardware merchant on East Jordan for the past thirty years, has purchased the hardware business recently conducted by Smith & Bronkema also East Jordan dealers. Mr. Goodman has completed the deal and will continue the business at the former location of Smith & Bronkema, corner of Main and Easterly street.

Cold, stormy and disagreeable weather predicted for Saturday, Sunday by the weather bureau did not put in its appearance in accordance with the program outlined. This entire region enjoyed perfect winter weather, complete sunshine was predominant throughout the week with atmospheric conditions such as make for perfect winter days.

Mr. and Mrs. C. R. Munyon returned to Charlevoix last Saturday after spending about five weeks making a motoring trip and visiting friends in southern Michigan, Detroit, Saginaw and Brown City. During their absence Mr. Munyon was laid up with a severe attack of rheumatism for about three weeks and although greatly improved at this time he is compelled to use crutches as an aid in walking. These he hopes to place in the discard as non-essentials in the near future.

St. James citizens are now and have been for the past few days receiving and sending their mail via the ice route to and from Cross Village, the delivery being made with automobiles which thus far have made trips with safety over the ice formation and at the same time transferring quantities of freight, express and carrying passengers between the terminal point. The automobile way proves very satisfactory and far superior to the dog and horse drawn sleds of previous years, and to date used with a high degree of both success and safety.

Monday, February seventh, is the date when Dr. Leehy, the Optometrist, will be at the Hotel Charlevoix.

Tuesday night was clear, crisp and cold—the coldest of the winter in this section. Thermometers registered various degrees of temperature depending somewhat on location and accuracy of the instrument. Wednesday morning early temperatures were reported some as low as 12 below zero, others 20 below at 9 o'clock a. m. The Coast Guard station stated that their instrument registered 16 below. Throughout the day the markings continued around the zero point regardless of the fact that it was a day of continuous sunshine. Just the right kind of weather for making an ice road for coasting parties to enjoy on the South Bridge at the hill down through the business section.

P. T. A. MEETING.

A large number of Charlevoix citizens met at the high school building last Thursday evening in the interest of a Parent Teacher Association, Rev. Pollock, presided. After several musical selections, under the direction of Miss Vander Hagan, Mrs. Grace Jessup, of Petoskey, was introduced and outlined the aims and purposes of a PTA organization.

Parent Teacher Associations are groups of parents and teachers banded together to bring into closer relationship the two most important factors in community life—the home and the school, they are organizations bringing to the school the moral support of the home.

Parents should know the teacher—the teacher should know the parents. The good school feel that they are all in sympathy with his problems. Some of the special topics that Mrs. Jessup covered were—intelligent study of the child; Manual Training; equipment for work and play; medical attention; school courses; juvenile laws by co-operation; hot lunch for the country children; truant officer which may be the school nurse. If the child is surrounded with that loving, wise care in the impressionable years of life, they will develop good citizens and we will have the best children the world has ever known.

Following Mrs. Jessup's address a motion to organize a PTA prevailed. The following officers were elected:

President, Mrs. E. E. Cross.
Vice President, Miss Pearl C. Bigge.
Secretary, W. E. Parmelee.
Treasurer, Mr. Alexander.

Mrs. McMillan and Mrs. Kelderhouse, the committee who have had the PTA in contemplation for several weeks, are to be congratulated on the success of their efforts. Mrs. Kelderhouse, Miss Pearl Bigge and Mrs. Dick assisted by a number of the teachers served refreshments.

Another meeting of the Association will be called for February and we hope to have the State President, Mrs. Fred Raymond with us in March.

Dues are 25c a year.

Highest Flight of Birds

The highest flight of birds is estimated to be 20,000 feet. This altitude is reached by the large type of bird, the smaller ones flying 23,000 feet. It has been found, however, that geese have been known to fly the Himalayas at 35,000 feet.

Across North Sea Alone

A Norwegian seaman recently crossed the North sea alone in an open sailing boat 25 feet long. Two days out the boat sprang a leak, and for eight days the sailor had to bail her out every three hours, days and night.

The Purist

A pair of owls came down the chimney into the sitting room of a Kent schoolmaster. We understand that he is emasculating him by repeatedly saying, "To who?" instead of "To whom?"—London Opinion.

Would Be Popular Ruling

The New England judge who decided that at least one egg is necessary in a custard might have gone even further and ruled that there must be a clam, or section thereof, in the chowder.—Detroit News.

Be Careful of Rust

Rust stains washtubs, sinks and bathtubs. Rusty water ruins clothes in the laundry. Walls are stained and ceilings fall when pipes leak and rugs and furniture are frequently damaged by dripping water.

Castles in Spain

The expression, "castles in Spain," is the equivalent of "castles in the air," and is intended to suggest visionary, if not impossible schemes, projects, etc., whether in Spain or elsewhere.

Purposeful Vacation

"He gave his wife $1,000." "That will get a long vacation." "Longer than he anticipates, I fear. I understand she took the money and went to Reno."—Louisville Courier-Journal.

The First of Them

It is not at all beyond the realms of probability that 434 years ago Christopher Columbus was telling the natives who eagerly crowded around him what he thought of American women.

Had One Virtue

Golfer (wishing to be kind to his friend's partner)—Well, no, he is not a great golfer yet, but I hear he is very good to his mother.—London Opinion.

Bad News for Pessimists

The country can't be going to the devil when books on history and philosophy jump to the top of the best-selling column.—Milwaukee Journal.

LAWN TENNIS MEETING

Of Interest to Charlevoix Players and Citizens

According to plans outlined at a meeting of the Western Lawn Tennis Association, held at the Chicago Lawn Tennis Club last Saturday afternoon the Western Michigan championship games are scheduled to be played on the Charlevoix courts again this year.

Mr. W. G. Parker, of this city, was present at the Chicago meeting and reports that in the Middle West allotments that National clay court championship games were awarded to Detroit, with the State championship games going to Grand Rapids and the Western Michigan State championship for Charlevoix, the dates of which have as yet not been announced. This will come later and will be so arranged as will not conflict with other major games.

The local dean of tennis men also reported that tennis is now on a high place in the western division.

Tonny George Latt, of Chicago, is regarded by many as the logical coming champion to meet the crown from the famous Champion Tilden.

It was demonstrated at this meeting that present tennis officials are more or less up in the air as regards the question of professionalism.

The final decision regarding the proposed meeting of Helen Wills and Suzzane Lenglen, international players is looked forward to with more than ordinary interest.

According to Mr. Parker the two authorized tournaments held in Charlevoix, have made many strong friends and fine supporters and delegates to the recent meet frankly declare that no tennis clubs have volunteered to send players to the next tournament in which players from Detroit, Cincinnati, St. Louis, and Indianapolis will participate.

Indications at present lead to the conclusion that the next tournament will be put on early in order to place the high graders into the main event.

Uselessness of War

Proved by Voltaire

One of Voltaire's most popular books, his history of Charles XII, is devoted to a practical proof of the utter folly of war. The life of Charles XII of Sweden is an example without equal of the colossal futility of war. Charles, one of the world's most inspiring examples of a capable, intelligent ruler, in a life of only 36 years had but one fault. He spent his entire life making war. Starting his career at the age of eighteen with the successful defense of his kingdom against the combined forces of several of the greatest countries of Europe, within a comparatively short time he was Grand Dictator of eastern Europe. Many times he overwhelmed forces outnumbering his own five or ten to one. Crowning and dethroning kings almost at will, his aims were usually attainable. He sought always to be impartial and just. He undertook no offensive war with the intention of betering himself or his country. Even when he died he had done no lasting good. He had irreparably injured the lives and total wealth of his country, and had wasted his great life, which might have been so productive of good to the world. In telling this most significant story Voltaire impressed upon the world the terrifying nothingness of anything he so hated—war.—From "The Young Voltaire," by C. B. Chase.

Small Change of No Interest to Royalty

Louis Philippe of Bourbon, the French pretender, had a royal way of shopping. When the World war was at its height, he stalked into an expensive London shop in London and ordered a dozen pairs of boots and shoes. The bootmaker was amazed to suggest something out account, as the man was a stranger, but his remark that the bill would run to much $250 made him write no response. So his wife, regally naked for economy, bowed to the cost of buying leather. The stringer pulled out a thick roll of treasury notes and handed over. A week later he returned and "tried on." The result was satisfactory and the bootmaker inquired as to where to send the order.

"You may consign it to the king of France," he replied, and passed his hotel. The order was delivered by messenger with a flowery letter in French, in which was enclosed $27.50, representing the amount overpaid. A day or two later a secretary appeared at the shop with the news that the king was incensed at the refund, adding affably that it would have been the same if the balance had been on the other side.—Manchester Guardian.

Slitting Parrot's Tongue

"It is a widespread superstition that to enable a parrot to talk the instruction of human speech it is necessary to split the tongue," says Alexander Wetmore in the Scientific Magazine. "This, however, has no foundation in fact, and when practiced only inflicts an unnecessary cruelty." Birds make sounds in a little organ known as the syrinx at the lower end of the trachea or windpipe, and as the tongue has little to do with the process, splitting it has no connection whatever with the ability to imitate sounds."

A "Show Me" Boy

Bobby had his mother's best bread knife out in the yard, where he had been trying to cut bricks. His mother found him at the job and asked him:

"How in the world do you expect another to cut bread with that knife when you get through?"

"I don't know, mother. Show me how," came back Bobby, who handed the knife back to the fond parent.—Columbus Dispatch.

The Ananias Club

"It's amazing" said the clerk, "that those articles marked 21 go so much faster than the ones marked 98 cents."—Cincinnati Enquirer.

Discovery of Helium

Helium, a gaseous element, was discovered in a spectrum analysis of the sun by Lockyer 30 years before its existence in the earth was proved.

Facts of Tree's Growth

The bureau of plant industry says that a tree never gets so large that it does not put on rings of growth, so long as it stays green.

Soul on the Heights

Never does the human soul appear so strong as when it forgives revenge, and dares to forgive an injury.—E. H. Chapin.

Protection for Youth

Twenty-four states require physical examination of children by a physician before granting them work permits.

What He Had in Mind

No doubt the Prodigal Son repented before he went home; but he really went home to eat.—Exchange.

Billions of Gold

The placer-gold reserve of Alaska is estimated at $360,000,000,000.

Far From Perfect

"Why don't you call me a donkey and have done with it? You're hinted at it long enough," said the henpecked husband.

"It wouldn't be quite true," Mrs. Meek replied.

"I suppose not. I haven't cars long enough for that animal," he retorted, sarcastically.

"Oh, yes, you have," she returned, sweetly. "You don't need longer ears."

"What do I need, then?"

"Two more legs and a better voice."

Spread of Leprosy

America was discovered about the time that

Depending on Viewpoint

Benham—That canary bird does not know anything.

Mrs. Benham—Of course he can't have any brains in such a small head.

Benham—What do you suppose the elephant thinks about you?

Might of Music

"Are you fond of music?"

"Very," answered Senator Sorghum. "A brass band keeps a crowd good natured and never projects a thought that might lead to controversy."

AN UPLIFTER, OF COURSE

He—"Our elevator boy has been given membership in our local association of reformers." She—"Why, I would like to know?" He—"As an uplifter, of course."

Superstitious

In a crowded hotel dining room a man arose and asked: "Is there a preacher in the room?"

"I am a minister," came the answer. "What can I do for you?"

"We've find we have thirteen at our dinner party and want you to make two of these people one."

Books as Medicine

"Doctor," said the druggist, "I have stocked books in case you wish to prescribe any literature."

"What have you?"

"Mild stimulants, depressants, and soporifics."

Efficient Porter

Porter—Now, then, miss, get in quick. The train's just going to start!

Pretty Passenger—But I want to give my sister a kiss.

"Get in; I'll see to that."

PREFERRED AN UNCLE

Friend—"Sad, but you're lazy—you ought to go to the ant."

Sluggard (fingering his watch)—"Think I'll be more apt to get what I want by going to an uncle."

Actor's Life

Buskin, the actor, had become so conceited he was intolerable.

"Hundreds stand in line at the box office when I am billed," he impressively announced.

"Yes?" asked a still, small voice "Trying to get their money back, I suppose."—American Legion Monthly

Red Buntline

"And Another Redskin Bit the Dust!"

By ELMO SCOTT WATSON

IT WAS Kin Hubbard, the genial Hoosier philosopher who utters his epigrams through the mouthpiece of "Abe Martin of Brown county, Indiana," who declared the other day that "lots o' things are awful high, but I don't believe anything has gone up like th' dime novel, some o' which sell for $3." It is not certain whether Abe was making this sly insinuation against the quality of some of our modern fiction or against a new development in American writing in which the exploits of dime novel heroes are being preserved in such formal biographies as "The Saga of Billy the Kid" by Walter N. Burns, "The Rise and Fall of Jesse James" by Robertus F. Love, and "Wild Bill, the Prince of Plainsmen" by Walter J. Wilstach.

Whichever it was that Abe had in mind, he was in reality, doing the dime novel an injustice, in monetary. If not in literary value. For the old ten-cent thrillers which were devoured, swapped and secreted by the boys of 40 years ago and which were then considered the source of all juvenile crime have in late years become eminently respectable and extremely valuable possessions to have. Remember the days when you spent your whole week's allowance for a copy of "Deadly Eye"; or "The Dumb Devil Boxer," by Buffalo Bill-(William F. Cody); or "Arkansaw, the Man With the Knife"; or "The Queen of Fate's Revenge," by T. C. Harbaugh, to be read surreptitiously behind your "juggerly book" at school or in the bagloft at home when you were certain that dad would not appear unexpectedly? After you had read this treasure to the last hair-raising page, perhaps you traded it off to a crony for his copy of "Arizona Joe, the Boy Pard of Texas Jack" or "California Joe; or, The Angel of the Wilderness; A Story of the War in Virginia."

For all of these were titles in Beadle's Dime library or Beadle's Half Dime library, published by those eminent instructors of American youth in the days of the wild and wooly West—Beadle and Adams of New York. If you had a copy of them now, you wouldn't need to hide it away as you once did. You could exhibit it proudly to your friends as "collector's item" or "rare Americana" which has "taken a place in American literature" and which not so long ago was the thesis subject by which a student won his PhD. degree in the literature department of one of our largest universities. If you wanted to sell your copy, you could probably get anywhere from five to ten dollars for what originally sold for five or ten cents.

At least, if the prices paid for Dr. Frank P. O'Brien's library of dime novels in New York only a few years ago is any criterion, you could. His collection of 316 volumes of thrillers, which represented 20 years of searching through 50 states in order to secure those rapidly disappearing little books and pamphlets relating to pioneer American life, were auctioned off for a total of $3,168.20. Individual volumes brought various prices but the top price was $1,025 for 28 volumes of Beadle & Co.'s weekly magazine the Saturday Star Journal. It is not likely that another such collection will ever again appear in the auction rooms but from time to time individual volumes bob up somewhere and they are quickly snapped up by collectors who know their value.

Other echoes of the old dime novel days are heard occasionally to recall to the boys of yesterday the fervent shudders in his writings, but one of them was heard a year or so ago when press dispatches carried the news that T. C. Harbaugh had sold off his manuscript possessions and entered an Ohio poorhouse, there to spend his declining years. Also that Harbaugh was one of the most prolific of Beadle's dime novelists and between 1880 and 1897 he wrote nearly a thousand volumes of this type of fiction, or more than 5,000,000 words of thrills, of which it was once said, "There are ten thousand shudders in his writings, but not one blush." Harbaugh was paid $250 each for the dime novels and $150 for the half-dime novels, and he made it fast at the work, only to end his days in poverty.

Other echoes were heard in more recent press dispatches when the original "Deadwood Dick," whose real name is Richard Clark and who lives near Whitewood, S. D., was quoted as protesting against the news that he was dead, as it had been reported from California, and when, from Norfolk, Neb., came the news that the original "Diamond Dick" was still living there. He's not known as Diamond Dick, however, by the people of Norfolk, but as Dr. Richard J. Tanner, one of the foremost physicians in the county. Although neither Deadwood Dick, nor Diamond Dick, had one-tenth of the thrilling adventures credited to them in the dime novels, both have lived authentically interesting lives and had more than their share of narrow escapes from death. Deadwood Dick was a miner and stage driver in the Black Hills of 50 years ago. Diamond Dick also had a varied career in that country in the old Indian-fighting days but he was best known for his later career as a fancy rider and pistol shot with a circus until he gave this up to study medicine.

In fact, a great many of the dime novel heroes were real persons and in some cases the events narrated in the books were autobiographical, since the authors themselves had lived on the frontier and had made share of thrilling experiences. Certainly Buffalo Bill (Col. W. F. Cody), who was both a dime novel hero and author, was a real person, as history will testify. Other heroes who are not so well known were California Joe, Texas Jack, Arizona Joe, "The Evil Spirit of the Plains," Roving Joe, Buckskin Sam, Pawny Frank, the Iron Face, Old Grizzly, the Bear Tamer, Brain Absorbing Captain Jack, the Post Scout, and Ned Buntline.

California Joe is often referred to as a man, "the riddle of whose identity, like that of the man in the iron mask, is still unsolved." As a matter of fact, it was solved long ago and whatever mystery there was about it arose from a confusion of two men—a member of Berdan's sharpshooters in the Civil war, who bore the name of California Joe, and Joseph E. Milner, the real California Joe, who was a native of Kentucky, a scout for Generals Sheridan and Custer during the plains Indian wars after the Civil war and a miner in the Black hills where he was assassinated in 1876.

Texas Jack's real name was J. B. Omohundro, a Virginian who emigrated to Texas at an early age where he distinguished himself by extinguishing several bad men who made the mistake of thinking that this quiet young fellow wouldn't fight. He served in the Confederate army during the Civil war and was a guide, rancher, mustang-breaker, hunter, scout and Indian fighter afterwards. He and Buffalo Bill were the guides for the earl of Dunraven when that adventure-seeking Englishman penetrated the Yellowstone country in the seventies and he ever spoke highly of the character and ability of both men. Texas Jack is said to have died in Louisville, Colo., in 1880.

Wild Bill is also a historic character, as any number of authoritative works will testify. His real name was James Butler Hickok and he was born in Illinois in 1837. He was a scout for the Union forces in the Civil war, an overland stage driver and a scout for Custer in the Indian wars but he won his greatest fame as marshal of Hays City, Kans., and Abilene in the days when they were typical of the wide-open and roaring frontier town. Like his friend, California Joe, Wild Bill was also assassinated, shot down from behind, in the Black hills, in 1876.

Buffalo Bill, Wild Bill and Texas Jack are the triumvirate of heroes in Col. Prentiss Ingraham's "The League of Three"; or, Buffalo Bill's Pledge," which gives an interesting and accurate picture of the city of Omaha as it was in the sixties. Colonel Ingraham was also the biographer of Brain Adams, who was the nephew and biographer of the famous "Old Grizzly" Adams. James Capon Adams ("Old Grizzly") was one of the most remarkable characters in the history of the West. He was born in New York but went West at an early day. In his Doctor O'Brien has said, "In future millenniums the quaint figure who went about the country riding an enormous grizzly bear, with a second similar beast for a bodyguard, will probably become a legend and finally a myth." But he was a real person, all right, even though it is difficult to pick out the truth from the fiction in the accounts of his life as written by Fanny Frank, the Iron Face (Dr. D. Frank Powell, who was also known as "White Beaver" and who was associated with Buffalo Bill at one time) and his nephew, Brain Adams, who joined him in the Rockies at an early age.

Arizona Joe's real name was Capt. Joe Bruce, and Captain Jack, the Post Scout, was John Wallace Crawford, who fought in the Civil war as a boy and later became noted as a scout in the Sioux Indian wars, a miner in the Black hills and a friend of Wild Bill, California Joe and other worthies in the old Black hills gold rush days.

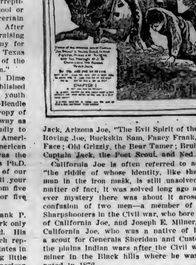
Roving Joe was Joseph E. Badger, Jr., and his biography, although written as a dime novel by A. H. Post, under the title of "Roving Joe: The History of a Young Border Outlaw," is in the main an accurate historical record of Badger's career as a hunter, trapper, Indian fighter and miner in the Pikes Peak gold regions. Buckskin Sam was Maj. Sam S. Hall, author of "Kit Carson, Junior, the Crack Shot of the West" which was a narrative of events in 1860 which came under his personal observation, his recital of the capture of a party of Texas rangers in pursuit of Cortina, the Mexican outlaw, has been called "a real contribution to American history." "The Evil Spirit of the Plains" was Dr. William Frank Carver, noted as a crack shot, a scout, hunter and a companion of Buffalo Bill.

Most interesting of all, perhaps, is Ned Buntline ("Col. E. Z. C. Judson") because he has some claim to being the author of the first true dime novel. Judson, when only nineteen years of age, wrote his first story which appeared in the Knickerbocker Magazine in 1838. In 1846 he became editor of a magazine called "Ned Buntline's Own Weekly." He was arrested for inciting the Astor Place riots in his magazine, fired $250 and spent a year in prison. Upon his release from prison in 1850 he began writing more voluminously than ever before. In 1860 he visited Jim Bridger, the famous mountain man and guide, on Bridger's farm at Westport, Mo. Bridger liked Judson and took him on a trip to the plains with him. In return Judson made Bridger the hero of a series of six-dime novels brought out in greater fame to this remarkable character.

From that time on Judson continued as a writer of dime novels and was soon making $20,000 a year with such thrillers as "The Red Right Hand," "The Commander's Dream," "Life on the Prairies," "Wild Bill's Last Fight," and various other narratives of the deeds of Buffalo Bill, Wrestling Joe, Mountain Tom, Big Foot Wallace, and Buntline's Ned.

Buntline's great fame, however, came from his ventures in the theatrical world when he transferred the dime novel idea to the stage and brought before the American public the wild West in the form of Buffalo Bill, Texas Jack and Wild Bill.

Although Ned Buntline may be credited with starting the dime novel, it was Erastus Beadle who made them famous and made the name "Beadle's dime Novel" a universally known trademark. Beadle may have got the idea from Buntline or have seen the possibilities of giving readers a new type of fiction based upon some of the stirring scenes he witnessed during a trip from Buffalo, N. Y., to some of his pre-empted lands in Omaha, Neb., in 1857. At any rate, the firm of Beadle and Adams began issuing the dime novels in 1860. But it was not until the following year, when their novel "Malaeska; or, The Indian Wife of the White Hunter" by Mrs. Anna S. Stevens, was such an enormous success, that they began production on a big scale. Some of their novels bore the imprint of "Frank Starr & Co., 41 Platt Street, N. Y." Starr was a foreman in Beadle's printing shop and the address of the Starr company was the rear entrance of the Beadle establishment. Beadle and Adams ceased issuing their dime novels in 1907, the last one being Colonel Ingraham's "Buffalo Bill's Tough Tussle; or, The Buckskin Boss Boy."



Failed to Qualify as Perfect Woman

I remember Belinda: She was arguing with another young woman about the car fare. "Let the guy," said Belinda; and she paid.

"There," I mused, "is a perfect woman, nobly planned."

I met her shortly after that, and she came through many a test. . . .

She could write a decent letter. She did. Lots of them. To me, too. She wrote the best letters I ever read. They were intelligent, humorous, and—why shouldn't I tell the truth?—ardent. Fervid is nearer. Convivial is not far off. And that is how I lost her.

"I. S.," she wrote, "Burn this letter and all of them."

A few weeks later Belinda said "At the rate I write you, my letters must fill a large drawer by this time."

"Why," I said, "I turn them of the file clerks, forming part of the relics from the ancient city of Ur, now on exhibition for the first time publicly at the British museum. One of these tablets in clay gives the official account of a lawsuit which took place in Ur about 4,000 years ago over a breach of contract by a builder.

The plaintiff summoned a builder because the latter had not completed a house within a given time. The tablet adds that the builder was heavily fined.

"Hardware" Jones' Secret

Mr. Jones is a hardware merchant in a small town. He has a reputation for knowing his business. He is a good buyer. He is a good salesman. He is a good advertiser. He is a good mixer. He is a good fellow. He is a good citizen. He is a good husband. He is a good father. He is a good Rotarian. He is a good Mason. He is a good Elk. He is a good Moose. He is a good Eagle. He is a good Woodman. He is a good Odd Fellow. He is a good Knight of Pythias. He is a good Red Man. He is a good Pythian. He is a good Shriner. He is a good Knight Templar. He is a good Knight of Columbus. He is a good Knight of Malta. He is a good Knight of Honor. He is a good Knight of the Golden Eagle. He is a good Knight of the Maccabees. He is a good Knight of the Golden Rule. He is a good Knight of the Round Table. He is a good Knight of the Square Deal. He is a good Knight of the Road. He is a good Knight of the Rope. He is a good Knight of the Sword. He is a good Knight of the Whip. He is a good Knight of the Spur. He is a good Knight of the Bridle. He is a good Knight of the Saddle. Flexibility Is Big Crop Factor

Rotation Is Long Recognized Principle of Farming Economy.

(Prepared by the United States Department of Agriculture.)

Flexibility in crop rotation is a long recognized principle of farming economy. Agricultural history contains many illustrations of the use that has been made of this idea from the Middle ages to the present time, especially in Europe. It is commonly observed, however, says the bureau of soils of the United States Department of Agriculture, that uniformity of soil, even on a single farm, is most unusual, and that one field may require an entirely different rotation of crops from another adjoining it. A rotation best suited to a low-producing sandy soil is unlikely to be suited to a highly productive silt loam. Again, a hillside field, subject to soil washing calls for different rotation management from a field on a flat area.

Each Farm Has Problems.

Each farm presents its own problems. The farmer who farms more or less with live stock is not so much concerned with rotation as with the acreage of crops necessary to meet his feeding requirement. The truck grower is concerned primarily with the question of crops in relation to market conditions. In either case rotation is a means to an end, with two aspects: The growing of the desired crops in a manner, or in different rotations, best suited to the soil and crop conditions; and the diversifying of the different rotations so as to enable the farmer to realize annually the required acreage of each crop he desires.

Influencing Conditions.

Still greater flexibility in crop rotation may be necessary, owing to local conditions which may arise, such as insect pests, crop diseases, or weeds. Changing the common rotation may reduce army worm injury, or an additional intertilled crop may help combat some obnoxious weed. Changes in economic or market conditions may compel rotation changes. Any prospering system which will permit of easy alternation is preferable to one that does not possess this quality of elasticity.

Hardiest Alfalfa Seed Is Brought From Canada

For many years it was thought that Grimm was the hardiest known variety of alfalfa and, for that reason, was most desirable for this region, but recently Ontario Variegated, although not a new variety, has come into prominence and has proved itself fully as hardy as Grimm, according to Prof. L. A. Dutch at the New York state college of agriculture at Ithaca, N. Y.

When Grimm was considered the only good variety to plant, the farmers had to pay high prices, and, frequently, they resorted to common alfalfa as a substitute. The common alfalfa, however, came from many sources where the climate was mild, and therefore the seed was unadapted to our severe winters.

Although Ontario Variegated has been grown in Canada for half a century, the production has not been large enough to meet the demand from the United States until during the past five years.

Ontario Variegated is like Grimm so far as one can tell, says Professor Dutch, and this has a bearing on the question of Grimm versus Ontario Variegated. Grimm is highly prized, and in some instances the Ontario Variegated is purchased and resold as Grimm.

The best way for farmers to get genuine hardy Ontario Variegated alfalfa seed, he says, is to buy from reliable seed men and insist on this variety.

Soil for Raspberries

Moisture is the one important factor in selecting soil for raspberries. A silt loam is excellent, probably as much because of its water-holding capacities as any other one thing. Even a sandy soil is good if it is built up with an abundance of humus and water-holding material. But as for limestone, raspberries do very well on even a strongly acid soil. Acidity is apparently no factor only as it affects green manure crops and contributing factors of that sort.

Ear Sucking Among Calves

Calves sucking the ears of other calves while confined in small pens in barn or on pasture, is not only injurious to the healthy development of the calves, but is likely to cause chronic indigestion. The ear sucking habit usually starts very soon after the calf is weaned, and continues as long as allowed to run with other calves. Calves raised on the pail are very likely to contract this habit as soon as they have learned to drink.

Encourage Drinking

Calves having access to water at will produced 7 per cent more than when watered once a day. This result was obtained from dairymen's calves on the federal dairy farm, Beltsville, Maryland. This higher the production, the greater the benefit of free-will watering.

Cows require 80 per cent more water for the same amount of milk produced. The use of large quantities of beets reduces the amount of water required. In cold weather cows prefer water that has been warmed and will drink more of it.

FARM NOTES

Keep boarder cows—until you discover that they are boarders.

Stinking smut which grows in wheat brings a loss that means defeat.

• • •

Cutting the weed trees in the woodlot will improve the quality of the stand in future years.

Genuine BAYER ASPIRIN

SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Treasure Trove

At Grand Rapids, Mich., Hugh P. Perry is showing a diamond ring appraised at $500 which his wife recently found in a second-hand sofa purchased several years ago. Mrs. Perry lowered the ring while removing articles their small child had hidden in the furniture.—Indianapolis News.

Stop Croup in 15 Minutes

Croup usually comes suddenly—at midnight—with—no warning. In preparation to spare the dangerously crowded Head Nurse Have on hand this physician's prescription which often brings relief in 15 minutes or less. Vicks Vaporub is rubbed on the throat and chest. The vapors, known-relief for Colds, Colds and Whooping Cough. If you have children, get a bottle at this tried remedy.—Dr. Brakes Children—from your druggist. Only 30c a bottle. —Adv.

The Remedy

Mary—I'm never happy unless I am breaking into song

Nell—Why don't you get the key, and then you won't have to break in?

Experience Will Help Others, Says Chicago Man

Suffering from Indigestion, Nervousness and Run-down Condition, Chicago Business Man Regains Health and Strength, Takes Tanlac

Mr. William E. Simon, 127 No. Dearborn St., Chicago, says: "After suffering from nervousness, run-down condition, I regained good health, new strength and youthful energy . . . Thanks to Tanlac.

"Imagine me being able to eat without suffering from indigestion. I was so nervous and my nerves suffered because I was always tired, too tired to think. My head always throbbed with blinding pain and dizziness bothered me. Still I dragged along. Then came the moment when I had to get relief.

"I decided to try Tanlac and the results amazed me. I began to sleep better, eat my food with relish and without suffering from indigestion.

"Tanlac made me 100 per cent. I now enjoy robust health, sleep like a log, and work all day without tiring. My head is clear as a bell. Everyone should take this wonderful tonic."

Tanlac has helped many thousands more and bonnets. It is Nature's remedy made from roots, barks and herbs according to the famous Tanlac formula. The first bottle usually brings wonderful results. Every bottle is a treasure and you grow stronger, healthier, more robust.

Don't neglect your health, don't suffer from pain needlessly. Begin taking this wonder tonic now. Ask your druggist for Tanlac—today! Over 40 million bottles sold.

Aim High

Who shoots at the midday sun though he be sure he shall never hit the mark, yet he sure he is that he shall shoot higher than he who aims at a bush.—Sir Philip Sidney.

To Have a Clear, Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and rub on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Advertisement.

Shady Customer

Clerk—There's something shady about this man who is going out.

"What do you mean?"

"He just bought an awning."—Good Hardware.

"DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 25 cents.—Adv.

A page digested is better than a volume hurriedly read.—Macaulay.

Nothing aggravates a girl so much as her inability to make a man angry.

WOMEN BARRED ON "PARADISE ISLAND"

"No Money, No Trouble" in Restful South Seas.

San Francisco, Calif.—Nine willing Robinson Crusoes, who, though young, are weary of the turmoil of cities and the babble of women, are here preparing to colonize a new "Paradise Island" in the South Seas.

"No trouble and no women; no money and nobody to ask you for any," is their motto.

The intended home of the self-appointed castaways is Santa Maria Island, lovely bit of land exactly on the equator in the Galapagos group.

The men are the crew of the Ecuadorian auxiliary schooner Floreana, at present docked here, who own their own ship, and, as members of "The Colonia ija Floreana," are owners of the modern prototype of Robinson Crusoe's home on Juan Fernandez Island.

No ordinary sailors are they, but philosophers, every one. One is an accountant, another an author. A former executive in the enterprise, who later deserted, was a scholar and university graduate. All are from Norway.

Each man has his particular reason for fleeing from the society of women. Three of the Floreana are divorced. Two are married and separated from blanketers of unfaithful wives. The others of the company admit they are "disappointed men."

Then there are 21 men, ranging in ages down to eighteen years. Thirteen of them were left on Santa Maria Island before the Floreana came to San Francisco a month ago.

Chief, August Christensen, forty-five, and Capt. Anton Stib, fifty-one, mariners, are the leaders and the oldest of the colony.

They have, of course, the intention of colonizing their island with additional people eventually and reaping fortunes in tilling its fertile soil. They also contemplate fishing and whaling enterprises in the populous tropical waters of the vicinity.

The islet was selected by the adventurers first, because the Ecuadorian government, which owns the 41 islands of the Galapago, granted them the land, and second, because of its romantic history and isolation.

Centuries ago, Santa Maria was Charles Island, refuge of Pacific buccaneers. Only one island of the Galapagos is now inhabited. It is 50 miles from the Crusoes' home.

Find $2,000,000 "Rose" Diamond; Arrest Two

Paris.—The famous rose diamond, known as the "Grand Conde," stolen from the jewel tower in the chateau of the Duc d'Aumale in Chantilly early in October, has been recovered.

The famous gem was found in a valise, the stone wrapped carefully in cotton. Two of the alleged thieves, Leon Kaufler and Emile Soufer, who crossed a flooded moat and climbed into the gem cover on a ladder, were arrested and are reported to have confessed.

Two fences, who sold a fortune in smaller jewels which also were stolen, were arrested. Other accomplices are sought. The thieves got only 30,000 francs (about $1,200). They threw settings, many of which were of great value, into the Seine and sold the stones to unsuspecting reputable jewelers.

The mystery was cleared because Kaufler talked too much. One of his lapses from caution was promptly reported to the police. He was shadowed for several weeks, and finally connected with the robbery and arrested.

Find Way to Grow Hair on Bald Mice

Taunton, England.—Bald mice have been made to grow hair in experiments designed to discover a cure for baldness among humans.

To grow hair on mice is easy, scientists explain, but the trick was to make the mice bald.

Dr. F. A. E. Crew, principal of the animal breeding institute of the Edinburgh university, discovered that mice may be made to shed their coats by extracting certain gland substances.

Doctor Crew also says that by extracting a substance from normal mice and grafting it on the bald ones, he has been able to promote the growth of the coat again completely or partially, according to the amount applied.

The experiments are being continued with a view of ascertaining if human baldness may not be due to the same glandular deficiency, and therefore curable in a similar way.

Success in Business

Behind every business that keeps up with the times is somebody who keeps ahead of them. Successful business is not a mere happenstance, but the product of brains, enterprise, courage, even risk. It indicates a big man whose success it is.—Grit.

Pedantry

There is a pedantry in manners, as in all arts and sciences; and sometimes in trifles. Pedantry is properly the over-rating any kind of knowledge we are versed in. And, if that kind of knowledge be a trifle in itself, the pedantry is the greater.—Swift.

Petals Turn Back

A rather remarkable trait of the hibiscus, says Nature Magazine, is that often, after it has been plucked, the petals will turn back, gradually returning again to normal, several hours later. A silent protest, it would seem, against despoliation.

Influence of Character

We shall one day see that the most private is the most public energy, that quality outlives quantity, and grandeur of character acts in the dark and secrets them who never saw it.—Emerson.

Pay for Itself

When the earnest demonstrator can't think of any other reason why you should buy his novel device, which he feels every householder ought to have, he says "In time it will practically pay for itself."—Detroit News.

Bird Avoids Land

Albatrosses are seldom seen in the North Atlantic. They frequent nearly all other seas, but are never seen ashore except on the islands of the Antarctic ocean where they breed.

Simple Divorce

Among some of the tribes in the Arctic region a man who wants a divorce leaves home in anger and does not return for several days. The wife takes the hint and departs.

Incentive

All that is necessary to have Mount Everest climbed is for some one to discover that its peak would make a good place for putting up an advertising sign.

Changed Attitude

Men used to say that the world owed them a living. Now they are learning that they owe the world a reasonable amount of work at a useful occupation.

Paper From Wood Pulp

Charles Fenerty experimented for many years and in 1841 made public his invention of the process for making paper from wood pulp.

Not Always Best Plan

Compromise is but the sacrifice of one right or good in the hope of receiving another—too often ending in the loss of both.—Edwards.

Hot One

The story is told of two opposing English politicians who met in the parliamentary lobby and smoothed over their differences. But the opposition fange did not remain in very long. "Why is it that you always bring coals of fire on my head, cousin?" asked the Socialist M. P. "I heap coals of fire on your head because I love the smell of a wood fire," was the Tory M. P.'s retort.—Boston Transcript.

Poor Music

A very deaf old lady, walking along the street, saw an Italian turning a peanut roaster. She stood looking at it awhile, shook her head and said: "No, I don't give you any money for such music as that. I can't hear any of the tunes, and, besides, it smells as if there were something burning inside."

LEGAL NOTICES

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Fred C. Pillsbury and
Lillian C. Pillsbury, Plaintiffs.
vs.
John S. Dixon and Phebe S. Dixon, Charles H. Dixon and Charles A.D. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa M. Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above; and Charlevoix Manufacturing Company, Defendants,
County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county on the 15th day of December A. D. 1926.

Present: Honorable Parm C. Gilbert, Circuit Judge.

In this cause it appearing by affidavit on file that the defendant, Charlevoix Manufacturing Company, a corporation, had ceased to exist and that there is no officer or agent in this State upon whom process may be served; and that the remainder of the said defendant, to-wit: John S. Dixon and Phebe S. Dixon, Charles P. Bush, Charles A. D. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above named residence is not known and it is not known as to whether or not they are deceased.

On motion of Lisle Shanahan, attorney for the plaintiffs:

It is ordered that the appearance of the said defendants be entered in this cause within three months from the date of this order, and that in case of his, her or their appearance, that he, she or they cause his, her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiffs within fifteen days after service on him, her or them or his, her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants in default.

And it is further ordered that within forty days the said plaintiffs cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiffs cause a copy of this order to be personally served on said Maud Peters, defendant, at least twenty days before the time above prescribed for her appearance.

PARM C. GILBERT,
Circuit Judge.

Order for Publication—Final Administration Account

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 8th day of January A.D. 1927.

Present: Hon. Serveius A. Correll, Judge of Probate.

In the Matter of the Estate of Anna Mcmsington, deceased.

Margaret Whitefield having filed in said court her final administration account and her petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.

It is Ordered, That the 3rd day of February, A.D. 1927, at ten o'clock in the forenoon, at said Probate office, be and is hereby appointed for hearing said account and hearing said petition.

And it is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said time of hearing, in the Charlevoix Sentinel a newspaper printed and published in said county.

SERVETUS A. CORRELL,
Judge of Probate.
38-3t

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.

Notice is hereby given that a certain mortgage executed by Empire Sites and Belle Sites, his wife, of Charlevoix, Michigan, unto to James F. McGeagh, of Charlevoix, Michigan, dated January 24th, 1914, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January 1914, in liber 39 of mortgages on page 457, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage, dated September 8th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 10th, 1915, in liber 43 of mortgages on page 356; which mortgage was afterward sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Five Hundred Thirty-Two and 62-100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required to be paid on said mortgage were duly paid prior to the recording thereof, now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 16th day of April, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres, more or less.

Dated January 18, 1927.

Character in Making

Some writers assert that character is formed in the days of childhood. So was the Los Angeles Times. They allege that in infancy the habits of age are formed. If the kid throws mud he is going to be a politician. If he likes to play with dolls he is going to be a movie actor. If he fights with all the other boys in the block he will be a lawyer. If he robs birds' nests he is going to be a promoter. So the argument might go. As a matter of fact very little character is formed in the kindergarten stage. It does not develop until the contacts of life in school, college and business begin to be felt.

Proud Woman

Once upon a time there was in Salem a storekeeper who did not like proud people, not even if they were among his customers. He had an antipation who was extra proud. She sent her servants to do her shopping. That was when a "hired girl" got $3 a week pay, and a wealthy family kept two or three maids.

So proud was this woman that she would not even let her servant carry bundles. She insisted that the storekeeper send them. One morning she ordered a spool of cotton. The storekeeper called his errand boy, told him to get a wheelbarrow, tie just the spool of cotton on the wheelbarrow and ordered the boy to deliver it. Did it have an effect? It did not.—Salem News.

Let Like Him

Two public men in Washington were one day talking of the traits of certain member of congress, who has a way of permitting himself to get "all het up" over trifles and who frequently makes a great to-do with respect to the accomplishment of small things.

"Yes, sir," observed one of the men first mentioned, "that chap invariably kitches a 'Forlius engine to a gimlet.'"

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Empire Sites and Belle Sites, his wife, of Charlevoix, Michigan, unto to James F. McGeagh, of Charlevoix, Michigan, dated January 24th, 1914, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January 1914, in liber 39 of mortgages on page 457, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage, dated September 8th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 10th, 1915, in liber 43 of mortgages on page 356; which mortgage was afterward sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Five Hundred Thirty-Two and 62-100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required to be paid on said mortgage were duly paid prior to the recording thereof, now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 16th day of April, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres, more or less.

Dated January 18, 1927.

MARTIN BLOCK,
Assignee of Mortgagee
Lisle Shanahan,
Attorney for Assignee of Mortgagee.
Business Address: Charlevoix, Michigan.
108 Clinton Street. 39-13t

NOTICE OF MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described by the non-payment of the three annual installments of forty-eight and 75-100 (48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen an 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy and 76-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1923, in Liber 62 of mortgages on page 235, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the north-east quarter (E½E¼NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 (1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK OF SAINT PAUL, Mortgagee.
Dated, Dec. 27, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney for the Mortgagee,
Mr. Pleasant, Michigan.

Education and Business

An insurance company, like many companies in other lines of business, found that it is not always wise to employ a man too well educated. He may be too ambitious to stay, or at least may feel himself above it, and not put much heartfelt effort into it. For many selling jobs a high school graduate is far more desirable than a college graduate. But a high school graduate has more persistence than a man who went only part way through high school. Likewise, a college graduate is more likely to stick than one who went to college but not all the way through.—Nation's Business.

Dominion Sought as the Perfect Freedom

The history of the struggle for liberty is the deeper sense is thus not merely the history of wars fought and battles won in the name of deliverance from oppression. It is the history of the struggle of mankind for dominion: and dominion is only another name for the perfect freedom.

Man has achieved not only freedom from the forces, but dominion over it, not only freedom from enemy man but dominion over him. He has achieved at least a partial safety from the elements, and exercises at least a partial dominion over them. He has learned to divert and dominate the lightning; he has made fire and water his slaves, and only on occasion do they rise against him; he has subdued the hard earth with the plow, and converted its substrata and metals from dumb weights into the admisters of his comfort. He has made the labor of an hour the achievement of a minute; he can travel in a day by sea the week's distance of his grandfathers, and by land the distance of their mouth; he has vanquished space, air. In these ways and others he has won new liberties. In these ways and others he is seeking liberty still—through the control of natural forces, the control of disease, the control of intelligence, the control of passion, the control of men in masses and singly.—Robert Sincerman in the University of California Chronicle.

He Who Gets Hurt

Our idea of a real insurance risk is an innocent bystander.—Lebanon Reporter.

THE CHARLEVOIX SENTINEL

Volume 57 Charlevoix, Michigan, Thursday, February 3, 1927 Number 41

MARL AND LIME NEEDED IN CHARLEVOIX COUNTY

(B. C. Mellencamp, Co. Agr't Agent.)

Thirty percent of the soil in Charlevoix County needs lime before it will successfully grow alfalfa and clovers, according to the Soils Department of the Michigan State College, which has made up a map of the state showing the lime requirements of the counties.

This county has two main sources of lime for agricultural purposes; ground limestone from Petoskey, and marl from the many deposits in the county. Both will do the required work of sweetening the soil. It is merely an economic proposition which should be used. If a farmer is close to a railway station and can combine with his neighbors to make up a carload, then he should use limestone. If he is some distance from a railroad or has trouble in making up a carload and has a marl bed close to his farm, then he should use marl.

Marl that tests 85 percent or better, calcium carbonate or lime, is good mater; ial to use. One and one-quarter yards of marl is the equivalent of one ton of the best grade of ground limestone. Marl, as a general thing, is priced at $1.00 per yard. Therefore, it is a simple matter for the farmer to figure whether it will pay him to use marl or lime.

In many places throughout the state, farmers have found it to their more formed associations in order to finance the digging of a stock pile of marl. When 1,000 yards are put out on land ground, the pit is always available. One of the main advantages of using marl is that whenever the farmer has some spare time he can haul marl and does not have to drop his other work to do so as in the case of delivery of a carload of limestone. Much of the marl is hauled in the winter on sleighs.

Marl can be spread by hand or by using a manure spreader with four to six inches of straw or other material in the bottom.

Three years ago 3,000 yards of marl were used in the state. Last year over 400,000 yards were used.

MORE LAWS TO BE BROKEN

Regulation of Automobiles Is Purely a Police Problem

"Insurance is a purely social scheme, not a police matter," declared Most owners who are responsible and can afford the cost carry liability insurance. "Now in order to provide liability for the damage cost of the irresponsible, it is proposed to load it on to the responsible. But it will not have the effect of keeping off the road any reckless driver who has the money to pay a premium. Upon a certain class of people, it will have the effect of a license to drive as they please and let the insurance policy pay. It would open the way for fraud," says the Insurance Field.

"The regulation of automobiles is purely a police problem. There is no other way to control motor driving but they are largely disregarded and unenforced in every city and on country roads. The automobile has become a necessity. The public gives its consent, participates in its use and must depend upon surrenders its rights to particular protection except through the exercise of police regulation. The pedestrian is therefore put on the same notice as the car driver—each must look to himself. He can't hand his responsibility over to a third party."

If the states and cities already fail to enforce their police regulations, what is to be expected when more regulations are added which make it easier for the irresponsible to escape all personal responsibility?

Dominion Sought as the Perfect Freedom

The history of the struggle for liberty is the deeper sense is thus not merely the history of wars fought and battles won in the name of deliverance from oppression. It is the history of the struggle of mankind for dominion: and dominion is only another name for the perfect freedom.

Man has achieved not only freedom from the forces, but dominion over it, not only freedom from enemy man but dominion over him. He has achieved at least a partial safety from the elements, and exercises at least a partial dominion over them. He has learned to divert and dominate the lightning; he has made fire and water his slaves, and only on occasion do they rise against him; he has subdued the hard earth with the plow, and converted its substrata and metals from dumb weights into the admisters of his comfort. He has made the labor of an hour the achievement of a minute; he can travel in a day by sea the week's distance of his grandfathers, and by land the distance of their mouth; he has vanquished space, air. In these ways and others he has won new liberties. In these ways and others he is seeking liberty still—through the control of natural forces, the control of disease, the control of intelligence, the control of passion, the control of men in masses and singly.—Robert Sincerman in the University of California Chronicle.

GEORGE ROSS.

COMMITTEE MEETING HELD

Executive Committee Appoint Chairman Etc. Last Monday

Members of the executive committee of the Parent-Teachers association held a board meeting at the high school building last Monday, at which they formulated plans for increasing association membership, appointed several committees and established the amount of dues to be paid annually.

Mrs. E. E. Cross, president of the executive committee acted as presiding officer and Mrs. F. E. McMillan secretary pro tempore.

Several committees were appointed with the following as chairman:

By Laws—O. P. North.
Program—Miss Vander Haagen
Membership—Mr. and Mrs. Frank F. Bird.
Publicity—Mrs. Clinton Cooper
Social—Mrs. George Kelderhouse
Ways and Means—Mr. and Mrs. Merritt Miller
Legislation—Archie C. Belding
Health—Mrs. Clarence Ivridge
High School Historian—La Rue Higgins.

The chairmen of the several committees automatically become members of the executive committee.

Membership cards have been placed low, within the reach of everyone, only twenty-five cents per year.

Naturally the association want a large membership and at the price it is safe to presume that their desire in this regard will come up to expectations.

The Parent-Teacher association is primarily for the purpose of having a better understanding between patrons of the school and their educators. In connection with this was anticipated enlarging many social features that otherwise would not be carried out.

The next meeting of the association will be held at the high school auditorium February 23rd.

PETITIONS FILED PRIMARY ELECTION

The following named persons have filed nominating petitions and will be candidates for nomination at the primary election to be held Monday March 7, 1927. The candidates are with two exceptions unopposed, as others having filed petitions than those herein given. All are well known citizens and with one or two exceptions have had experience in official duties while with those who have not held offices are considered capable to fully perform the duties of the office to which each aspires.

Mayor—Arthur Bergeon
City Clerk—Ray S. Hamilton
City Treasurer—John Cook and Alexander J. Hamilton.
Park Comr.—Frank Partridge
Justice of the Peace—Charles Ray Ashton and Joseph H. Cooper
Aldermen—1st ward, Henry Partridge; 2nd ward, Archie Livingston; 3rd ward, David J. Kelsinger and Clifton B. Sheldon.
Supervisors—1st ward — Harry A. Craig; 2nd ward, John H. Hughes; 3rd ward, Archie Alcox.
Constables—1st ward, Joseph Howard; 2nd ward, Elmer L. Johnson, 3rd ward, William J. Wenkel.

Trapping the Deceitful

The most artful maneuver is to pretend to fall into the trap you have laid for us; for we are never so easily deceived as when we think we are deceiving others.—La Rochefoucauld.

Capain Ava Smith Shown as Rescue Worker Recently

The Sandmaster, owned by the Construction Material Company of Chicago, was one of the ships sent to the relief of Bulling tug Imperial, caught in the big ice field in Lake Michigan off Michigan City last week in which three men were rescued from their perilous position.

Captain Ava Smith, formerly of this city, has been in command of the Sandmaster for several months and as a result comes in for special mention in connection with the rescue work. In addition the Chicago Daily Tribune issue of January 27th, carried a two column cut of the captain showing him taking a survey of the situation through a powerful telescope.

ICE IN STRAITS IS DANGEROUS

Mail Carrier, Team and Load of Mail Dropped Through Ice; No Loss

Mail for Mackinac Island since the close of navigation is taken across from St. Ignace with sleds and now as always under like conditions the transferring of mail and by passengers making the trip is attended by the element of danger to life and property, this element being due to the treacherous ice formation at all points in the straits region.

Ice that is heavy and safe today, on account of an under current, may be unsafe and dangerous tomorrow, and the claim is made that like changes may be found hourly even during the coldest part of the season. This was demonstrated as the mail carrier was returning from Mackinac Island a few days ago with his load of mail, dropped through the ice a short distance off shore from Chimney Rock while following a course traveled a number of times previously. The team, mail and mail carrier were rescued from their perilous position and the trip resumed, arriving safely at their destination.

TRIUMPHS OF GENIUS, 100 YEARS AGO

We Are a Big Country and Must Do Business In a Big Way

Had our farmers employed the same methods of sowing and harvesting 1926 wheat as were used 100 years ago, it would have required the labor of our 115 million people for 9 months, and the labor of 50 million people in addition. By modern methods, the great crop was sowed and harvested by 3 or 4 million farmers in a few months.

Statistics also show that had our railroads used same methods of 1826 as were used but 20 years ago, cost to producers, shippers and consumers would be 350 per cent greater, and because of shortage of cars and lack of facilities, much of it would still be unmoved in the warehouses or rotting in the field.

Just as our farmers met the situation by using modern methods and machinery, so our railroads met it by providing additional facilities, including larger engines and cars to haul more tonnage per train.

Had primitive methods been used in cultivation and transportation of our crop and commerce in 1926, our condition despite our boundless resources, would not be unlike that of China or Russia, where modern methods are under used nor understood and where both productivity and transportation are alike still in the primitive stage.

As a people we have had the good sense to avail of the achievements of inventive genius, and have progressed and prospered as have no other people in the world.

In regulating transportation and public utilities, we should see to it that facilities provided to accommodate our growing industrial needs, like larger locomotives to haul heavier trains, are not wastefully restricted by laws reducing and limiting either capacity to serve the public in moving traffic or to earn a reasonable amount on their cost. We are a big country and must do business in a big way.

Mexican Federal Troops Attacking Leon

Mexican federal soldiers firing from a trench along the high road to Leon, which they later captured from the Catholic rebels. Across the field from this picture were the outskirts of some of the relief military forces.

Big Four in the Save Election Contest

When the sennte took up the election contest William R. Wilson, former member of Woodrow Wilson's cabinet, made against Senator-elect William S. Vare of Pennsylvania, these four men played the leading roles. Left to right: Senator-elect William S. Vare of Missouri, chairman of the investigating committee; William B. Wilson, and Mayor W. Freeland Kendrick of Philadelphia.

Oldest Soldier Takes Fourth Wife

GETS AIR TROPHY

Sergt. John Van Duzen, seventy-four years old, was married for the fourth time the other day in Cincinnati. He is the oldest American soldier in active service, having been enlisted for life by General Pershing. He is shown above with his bride and wearing his wedding costume, which is that of chief snake of the Order of the Serpent, which he helped organize after the campaign in the Philippines.

Another Royal Match Reported

The engagement of Prince Aimone of Savoy, son of the duke of Aosta, and Princess Irene of Greece, sister of Crown Princess Helen of Rumania, is reported.

SHORT ITEMS TO REMEMBER

A kite over 14 feet tall won a recent kite-flying contest.

It has been predicted that homes will be heated by radio in a few years.

The town of Bath, England, had public baths established by the Romans, A. D.

A report says that the auto century of Tibet has only one motor vehicle—a motor cycle.

The black swan is one of Australia's native birds.

The early Greeks used poisoned arrows in fighting.

Crude rubber was the leading American import in 1923.

Hilly is in danger of being exterminated by reckless cutting.

Scratchless moving picture films have been discovered, according to the claim of a German chemist.

Tips for Large Alfalfa Yields

Big Increase Obtained by University of Illinois Last Year.

Alfalfa grown on the Davenport plots of the College of agriculture, University of Illinois, has been made to produce what is considered a big hay yield through careful attention to six points, according to F. W. Gault, of the agronomy department. Last year, for instance, the hay yield was increased from 1.8 tons an acre up to 4.5 tons an acre of high quality alfalfa hay. This increase is a large one and offers considerable in the way of more economical production, he said.

Eye on Six Points.

Similar results no doubt could be obtained on farms in certain other sections by keeping an eye on the six points, Gault said.

In the first place, the soil must be sweet. Ted in that way, grows alfalfa successfully must have naturally a large supply of lime or else enough limestone must be applied to sweeten the soil. The land which produced the 4.5 tons was heavily limed.

In the second place, alfalfa does best on fertile land. Manure, sweet clover plowed under, and phosphate greatly aid the growth of alfalfa. The land which produced the 4.5 tons had manure, lime and phosphate applied to it. Both rock phosphate and bone phosphate may be applied to sweeten the soil. The land which produced the 4.5 tons was heavily limed.

In the second place, alfalfa does best on fertile land. Manure, sweet clover plowed under, and phosphate greatly aid the growth of alfalfa. The land which produced the 4.5 tons had manure, lime and phosphate applied to it. Both rock phosphate and bone phosphate may be applied to sweeten the soil. The land which produced the 4.5 tons was heavily limed.

Good seedbed is essential. Northern-grown seed, such as South Dakota No. 12, has proved to be the best. The northern strains are winter hardy and less susceptible to disease. The rate of seeding may vary from 12 to 15 pounds of seed an acre.

Good thorough inoculation is necessary as the sixth requirement. Proper inoculation may be had by using soil which is known to carry alfalfa or sweet clover inoculation or good commercial cultures may be used.

After an alfalfa stand is secured, considerable caution must be exercised in order to keep it in condition to the best advantage. It is not best to cut alfalfa during its first year's growth. When cut for hay, the cuttings should be made when about one-tenth of the alfalfa is in bloom. The last cutting in the fall should not be made too late. They should be done after the last cutting to allow a growth of six to eight inches to develop. This will allow a good food to be translocated to the roots and lessens the danger of winter killing and insures a vigorous growth the following spring.

Liberal Use of Potato Seed a Good Investment

The importance of using a liberal quantity of seed potatoes is not generally recognized by commercial potato growers. The recent accomplishment of a firm of California potato growers in producing 1,038.3 bushels of potatoes on a measured acre and an average yield of 1,001 on nine acres would not have been possible if only the usual quantity of seed had been planted. These growers consider the liberal use of seed a profitable investment. In the production of their phenomenal yield seed potatoes were planted at the rate of 2,000 pounds per acre or more than twice the quantity used by our best potato growing districts.

Experimental results indicate there is a close correlation between the quantity of seed planted and the yield per acre. Planting large-size sets insures a better germination and a larger set of tubers, therefore it is a desirable practice provided the resultant plants have an abundant supply of plant food and moisture. Large-size sets mean more stems and tubers per set, consequently more attachment is needed to develop these tubers to market size.

United States Department of Agriculture Bulletin 1248-D discusses size of potato sets, also compares the relative value of whole and cut seed. It should prove valuable to potato growers interested in the production of maximum yields. Copies may be obtained, as long as the supply lasts, by writing the department at Washington, D. C.

Locusts Due in 1927

Seventeen-year locusts will be due in the summer of 1927. They were here in 1910, but did little damage. Scientists say these insects live underground 17 years. The record of their operations runs back about 200 years. Sometimes they are found among growing grain, but the leaves of trees seem to be their main food.

Keep Collars Clean

Keeping the shoulders and collar clean and providing well-fitted collars will help prevent sore shoulders on work horses. A loose collar constantly rubbing and forth over the shoulders soon brings on a sore. The same thing results when the traces are too high or too low, putting too much pressure on part of the shoulder. Using a collar pad may help when the collar is too large, but it also absorbs the sweat and dirt and soon loses its shape.

Working in Limestone

Working quivering limestone into a clay soil is a step that will, in a few seasons, bring a surprising result in the way of making it friable. Once the clay is broken up and put under cultivation it will be found to be improving in texture with each season's working as air is let into it and vegetable matter incorporated. It is an excellent idea to apply in manure or vegetable compost in the fall it bringing clay into shape for next season's gardening.

Civil War Veteran and His Queer Trophies

Joseph Trax of Newcastle, Pa., who was in the Second West Virginia cavalry during the Civil war, is shown above with part of his extraordinary collection of war trophies. Of all the articles he is proudest of the little gun beside him. It weighs 252 pounds, and among the things used to fire it were two brass door keys from Ford's theater where Lincoln was shot, nine pairs of Confederate spurs, a B. & O. brass lock from Harper's Ferry, three gold army dollars, and countless army buttons, bullets, shell cases, infantry flag spears and bugles.

Mexican Indians Are Fleet of Foot

Tarahumares Excel Other Aborigines in Covering Long Distances.

Almaen, State of Chihuahua, Mex.—It has long been a well-known fact to Americans of this part of Mexico that the mule muscles of the Tarahumare Indian tribe excel all other aborigines in fleet-footedness and endurance. The record made by Leonelo San Miguel, a Tarahumare runner, in covering the distance between Chihuahua and Mexico City, 100 kilometers, equivalent to 62 miles, in 9 hours and 37 minutes, which seems to have created a stir in the sporting world recently, has been excelled times without number in the ordinary run of life of these lowly Indians upon their native heath in the rough region west of here.

No white person is better qualified to speak authoritatively about the Tarahumare Indians than Charles T. Wallace, an Englishman, who, for nearly forty years, has made his home in the little Tarahumare village of Guazapares. Don Carlos, as Wallace is called, has been operating a common mine and a ranch of a few thousand acres bordering the Indian country, and purely for human companionship he asked and received permission of the head men of the tribe to make his home among them.

Indians' Legal Advisers.

On many occasions he has represented the Tarahumares in matters that came before both the state and federal governments. He is highly respected by the Indians, and he has been given an insight into many of their tribal customs and traditions. Don Carlos was at Almaen to buy in a supply of provisions for his own use during the winter, which is severe in these altitudes, when the published report reached here of the long-distance running record made by Leonelo.

"To a person who is not familiar with the running feats of the Tarahumares, Leonelo's performance may stands out as a notable performance," Don Carlos said. "When he comes back to his people, he will laugh about it and his friends will laugh with him. Why, do you know that I was at all an unusual thing, and certainly it was almost a weekly event in the days before the railroad was built as far west as Minaca from Chihuahua, for Tarahumare runners to be sent on messages from Guazapares to the city of Chihuahua, a mile a half along the way there and back, by road they had to travel, and that they made and still make the round trip in two days, including the time off for eating and sleeping.

Pays Tax on Time.

"On one particular occasion when I wanted to get a tax payment to the mining office in Chihuahua before the date of delinquency arrived, I employed a young Indian to take the money and letter there and he made the one-way trip in less than two days and was back in Guazapares before the end of the fourth day. The boy's name was Serrance, and for beauty of body and powers of endurance I don't believe he ever had an equal. He is still living—an honored member of the tribe. He is now past forty years old, and his fast running days are over, although he can still hold his own against much younger men.

"It may be hard for an outsider to believe the statement, but it is a well-established fact that it is not considered any remarkable feat for Tarahumares to run 175 miles to 200 miles without stopping. In it my opinion that the record made by Leonelo in covering the distance of 62 miles without stopping is not any record at all among his own people?

Capture Wild Horses.

"When I first located at Guazapares, there were thousands of wild horses in the foothills of the Sierra Madres and it was a common practice for Mexican ranch owners of that region when they wanted to collect a drove of the animals for their own uses or for market to send a few Tarahumare Indian runners to the grazing ground of the wild horses to round them up and drive them to the ranche. The Tarahumares could run as fast or faster than the fleet-footed horses and they invariably brought in the drove when assigned to the task. The soles of the feet of the Indians are so thick and hard that the roughest sort of traveling has no effect on them.

"The Tarahumares do all their deer hunting on foot. When they sight a deer they run the animal down, even if it takes a day or two days to accomplish its exhaustion. The men are great hunters and are expert with bows and arrows, although they get the keenest enjoyment in running their game to earth instead of shooting it.

"The women also are swift runners and running matches between young women and young men are held at frequent intervals, especially in the fall, in the light of the bright October moon. These races sometimes extend over a period of three or four days and are attended by several thousand Indians. The total number of Tarahumares is about 25,000 and, despite all of the fine breed, they are the strongest and most vigorous people I have ever known.

"I have witnessed many of their big racing events and the spectacle is well worth seeing. When the women are especially true at night, when the pine knots are lighted to mark the path of the runners and the flare of campfires upon the mountain sides lends a weirdness to the scene they is somewhat awesome. Besides the straight-away race, there are races which are handicapped in certain ways. One favorite handicap is for the men to kick a ball along the trail as he runs, and the women keep the ball moving by striking it with sticks.

Medicine Man Knows.

"Notwithstanding the proved physical powers of the Tarahumares, they do little in the way of real work. Some farming—just enough to raise corn and beans for their own use—is carried on, but most of their living comes from the wild game that they kill and these Indians are one of the few native tribes that have not been Mexicanized and they still cling to and speak Spanish and most of them resent the intrusion of aliens. I am glad to say I was made a notable exception to that rule.

"They are honest, good-natured, fun-loving folk. The men do not wear beards, because they believe the devil has a beard. To keep their faces beardless, the men pluck out the hairs when they first begin to appear and they keep this up all through life.

"I witnessed an incident at Guazapares not long ago which convinced me that the bobbed-hair style will never be adopted by the Tarahumare young women. It was while on a trip pilgrimage to Chihuahua that a young girl of the tribe saw that bobbed hair was the fashion. She indeed a friend to ally her hair.

"Bobbed Hair" Out of Favor.

"When she got back home and her parents saw her short locks, they declared she was in disgrace. The head men of the tribe held a conference and were about to sentence her to a life of banishment in the mountains, which meant that she would have to take shelter with some poor Mexican family or die of starvation.

"It happened, however, that one of the Indians insisted that I be made a party to the conference, so I was sent for. I heard the case and then I suggested that they should not carry out the severe sentence which they had proposed, but that they permit the girl to remain in her parents' home until her tresses had grown to normal length, when she would have atoned for the disgrace she had brought upon herself and the tribe. This was done.

"One of the remarkable beliefs of the Tarahumares is that stones and all other inanimate objects really possess life and that they suffer joy and pain just the same as human beings. By reason of this belief they have great reverence for stones, plants and trees. They worship a species of cactus which lives several months after it has been pulled from the ground. The root of this cactus contains a juice which the Indians drink and which has a powerful narcotic effect.

Never Look in Mirrors.

"No Tarahumare maiden or male member of the tribe had ever looked voluntarily into a mirror or any other reflector that might show to them their features. It is one of the solid superstitions of these Indians that to catch even a fleeting glimpse of their reflections in mirrors, or in a pool of water, is bad luck. Notwithstanding the existence of this taboo, the Tarahumare young women are possessed of more than ordinary maidenly vanity. They plait and dress to attract the attention of the young men, and yet still at fence how any idea of what their personal appearance is like.

"The women do the carrying, and it is one of the most amusing processes toward marriage that perhaps exists anywhere in the world. Both young men and women are extremely bashful. When a girl starts upon a journey of a certain point the next time she is charged not, goaded into desperation by these strange sensations, to stop the smashing blow at his head with the tomahawk, and, as he lifted his own hatchet to parry, I struck for his belly. I have no idea of how many times I struck, as he runs, and the women keep the ball moving by striking it with sticks.

Medicine Man Knows.

"The Tarahumares live in the heart of the greatest country of wild game to be found anywhere on the face of the earth. Deer, bears, antelope, wild turkeys and various other kinds of game abound. The mountain lion, the jaguar and the ocelot, or leopard, are the most dangerous animals that they have to contend with. Without any appearance of haste the Indians pursue and run down the animals until they are literally or die of starvation.

"I

This has been another hard week for the officers, friends, associates and members of the dear old Democratic party! For months they have been slowly working from the paper collar to the real linen stage of attire and wistfully appealing to the public for recognition of the fact that they have ceased gurgling their soup, and know how to use plain table cutlery, all in anticipation of their coming out party in 1938. As a result a new batch of Columbia University professors who were thinking of joining the socialist party had half intimated they might join up with them for a trial trip at least. Then just as everything was getting set, their star performers began to cut up disgracefully under the big top and gloom again overspread party councils.

In Albany Al Smith whose chances depend absolutely on his adoption of the role of the ideal small boy in being seen and not heard, jumped over the traces to advise the country as he was going to take the best governor ever, so good a governor that the southern Democrats would have to nominate by acclamation whether they wanted to or not. Then Brother McAdoo who is supposed to live in a hickory shirt with top boots had to hie himself to New York where entirely forgetting the Jeffersonian simplicity of life of which he is the chief apostle, he located in a suite in the Plaza Hotel, the only hotel now without a cafeteria, and from this roosting place promulgated a denial that he was politically dead, and kicked the furniture around in full view of the audience to prove his claim.

Meanwhile in the Senate Tom Heflin of Alabama, ignoring the fact that while a K K K membership is an open sesame for Democratic party membership in many southern states, it is wormwood and gall to the Democrats in the north, cut out his muffler and let loose a blast at the Knights of Columbus and the Catholic Church, as agencies seeking to foment a war between Mexico and the United States. The net result of his activities being of course, that Jim Reed of Missouri, and Bruce of Maryland, and the Walsh boys Tom of Montana and Dave of Massachusetts with a wary eye for the safety of their own political hides had to jump in and belabor their dear party associate. It has indeed been a sorry week for the party, but a great week for the "trippers" especially those who have had ringside seats.

FOREIGN AND DOMESTIC TRADE

We hear a great deal nowadays about our foreign trade. It is the pet hobby of the internationalist, and when congress doesn't do just what he wants he threatens us with the loss of our foreign trade. First we were told that if we didn't join the League of Nations our foreign trade would suffer; then we were informed that if we didn't cancel the debts which Europe owes us our foreign trade would be wiped out. And of course it has always been a favorite argument of the free trade internationalists that if we maintain a protective tariff we can't have any foreign trade.

Well we haven't done any of these things which the internationalists have told us to do and yet we still have a pretty healthy foreign trade. Even our importers seem to be doing business at the old stand. And judging from the number of articles of foreign made goods in the retail stores nowadays they have been doing an increasing business.

Of course every good American is in favor of our having a foreign trade. We want to increase it when we can so that our manufacturers and working people will benefit from international trade so far as possible. But the internationalists, in seeking to put over their propaganda on us frequently exaggerate the relative importance of our foreign trade. They seem to regard it as the something superior because it is found away from home.

Everyone is familiar with the lure which comes from distance. To the budding yodth the girls in the next town are always a little more comelier than the ones at home. Often we think the government or the business conditions in the next community seem just a little better than our own. Distance always lends enchantment and this seems to hold good with our internationalists and our foreign trade.

But as a matter of fact our foreign business, important as it is, does not compare in importance with our trade at home. In fact, according to Dr. Julien Klein, director of our bureau of foreign and domestic commerce at Washington, which gathers all our statistics about our business, the American foreign trade, that is, the goods we sell to foreign countries represent less than ten per cent of the transportable goods which we produce in the United States.

In other words we sell in our home markets more than nine times as much goods as we sell in foreign countries. Yet the free traders tell us we ought to let down the tariff barriers on this splendid American market, and throw it open to foreigners in order to try to improve a hazardous market over which from only a teath as good, and by no means capable of being developed into anything remotely approaching our domestic trade in size.

To put it mildly such a proceeding would be anything but business like. By all meaas let us develop our foreign trade, but in a vain effort to do it, let us not sacrifice the best market to be found in the world, one several times better than anything we could possibly get at a distance.

Of the Old School

An old gentleman and a very young lady arrive simultaneously at the elevator in a large hotel. Both are French (This is a true story.)

"Room for one," says the elevator boy.

The old gentleman, with a courteous bow and a murmured "Madame!" stands to one side.

"Oh, not at all," declares the young lady smilingly. "I am young, and I'll walk up."

"Precisely, madame, you are young, whereas I belong to the period when one surrendered one's place to a lady. So you must understand, my dear, that I am too old to take yours."

The young lady smiles and steps into the elevator—but forgets to say "Thank you."—From Le Figaro Hebdomadaire, Paris. (Translated for the Kansas City Star.)

The Blue Danube

Near Vienna on the Danube at the point where it issues from the Gates of Hungary, from 12 to 16 feet per second—and the British monitor the Gloucwsrm got stymied halfway up it, couldn't go either forward or astern, and had to hold down her valves to get a high enough head of steam to struggle out of it. It was a question whether she would go up or blow up.

It takes a special towing steamer, pulling itself up on a cable from one end one-half to two hours, to go up this two-kilometer stretch. The Germans used locomotives to flow ships through it during the war. Dana below Orsova these dreaded Iron Gates are not one-half so sticky as the sixty-five miles of rapids and submerged ledges below Drencova. As a matter of fact, the "Schonbrunn" by Vilmoden is one of the mostest parts of the river.—Negley Farson in Adventure Magazine.

Ancients Varied Day

Two old sun dials discovered in Ireland are said to prove that daylight saving existed hundreds of years before the Twelfth century. The ancient Irish hour varied, the daylight hour in midsummer being 80 minutes, and in winter only 40.

New Use for Microscope

The bureau of standards says that it is possible to take a picture through a microscope. Remove the camera lens and fit the camera to the eyepiece end of the microscope, focus the microscope on the camera ground glass and photograph as usual.

Too Busy to Smile

Foreigners of observant habit say New Yorkers do not smile. Perhaps we are too busy speculating as to the revelations of our deficiencies the observant foreigners are going to make. —New York Sun.

Use of Simple Words

I am so tired of big words and long and meaningless sentences that I suppose I go to the other extreme; I know nothing that cannot be expressed in a few lines in simple words. —Phillips Brooks.

Of Trade Significance

The monomark is a common trade mark used by British manufacturers or contemplated for use by them. The letters B C M are understood to represent the name British Commercial Monomark.

Smallest Measurement

The smallest known measurement, according to the bureau of standards, is one billionth of an inch. It is measured by an ultra-micrometer which was recently developed at the bureau.

"Last Confederate Mother" Still Living

Union, N. C.—The last Confederate mother is not dead, as was reported in a recent dispatch from a Virginia city.

Mrs. Julia Anne Pridgen of near Moore's Creek Bridge, Pender county, now in her one hundred and third year, is the mother of a Confederate soldier—M. B. Pridgen, now deceased. He was her eldest son. Her second son was within the draft age at the close of the Civil war and was about to join the colors when the war ended.

Mrs. Pridgen still enjoys good health, and can walk unaided. She is the mother of 12 children, six of whom are living, the youngest being sixty. She was born November 3, 1823. She was three years old when John Adams and Thomas Jefferson died July 4, 1826.

Priest Plans to Restore California Mission

San Juan Capistrano, Calif.—Seventy-one years after President Lincoln signed the land office patent, restoring the lands and building of Mission San Juan Capistrano to the Catholic church for "religious and educational purposes," the ruins of the "Jewel of the Franciscan chain" are to be made to conform to the purposes for which the patent was signed.

Rev. St. John O'Sullivan, the Roman Catholic padre, who came to the mission to die in 1911, but who became so inured to the restoration of the ruins that he regained robust health, announced that work had started on a construction program which will convert the ruined abode of the padres' wine into quarters for a convent and religious school.

Engine Cylinders

The Society of Automotive Engineers says that all radial or rotary engines as commonly used in airplanes have an odd number of cylinders around a single crank. The firing order skips alternate cylinders, and will have occurred in all the cylinders in two complete revolutions of the crank or cylinder, depending on whether the engine is fixed or rotary. radial engines of this type having an even number of cylinders, such as 10 or 14, are composed of two banks of five and seven cylinders, respectively. Radial and rotary engines are characterized by having the cylinders disposed in equal angular intervals around a complete circle.

JAMES M. LYNCH

James M. Lynch, president of the International Typographical union.

Dad's Wrong Impression

"Listen to the informal recital that confounded motorcycle is making," grumbled Aubrey's father the other evening. "How can we, pops," answered little Aubrey, laughing merrily the while, "when it is not a motorcycle, but a shooting gallery going by?"—Kansas City Star.

Snakes Kept to Kill Mice

Rail snakes are kept in the balloon houses of the big oil refining plant at Casper, Wyo., to exterminate mice that eat holes in the balloons. The balloons are used for the storage of gasoline vapors over the tanks during the day when the vapor expands.

Best Memory Season

The memory is said to be stronger in summer than in winter.

Exactly

A real optimist is one who works a cross-word puzzle with a fountain pen.

Interpretations of Life

By REV. WM. M. RUNYAN
Extension Department, Moody Bible Institute, Chicago.

TEXT—The people therefore that sitteth by not heard it and that it thundered; others said, an angel spake unto him.—John 12:29.

Life is filled with thunder for some people, the evidences of mere material forces, untuned and unrecognized. Angel voices are heard by others, the gracious messages of God's holy will. The hearing of the heart is affected variously by similar circumstances in life. Some hear thunder; some an angel voice. The Scriptures, history and human experience yield examples.

Geniuses and religious ship wrecked and cast upon an inhospitable coast, serve to illustrate. The story has it that they found a rough-hewn hut, provisioned with such things as would save and sustain life. Timber provided made a fire possible, and there was every evidence of thought and consideration for human life. Gestimage, true to his name, saw in it all a story and every moment he feared the outbreak of pirates. Benignus interpreted the whole as an expression of a most gracious providence through the thoughtfulness of some who had preceded them. One was simple-minded and resentful, the other felt his heart warmed with gratitude. To the "thunder" to the other, an angel's voice.

"Listening thunder" is necessary to a right understanding of life.

Elijah, recovering from his collapse under the juniper tree, went to Horeb. The mount was rocked with an earthquake, smitten by a gale, swept with flame; bleeding through all this a still, small voice spoke to his heart the eternal will of God.

The story of Joseph is surcharged with thrilling providences. The voice of thunder was voiced in the jealousies and threatenings of his designing brothers. He was sold into Egypt, falsely accused, and lost into prison. "Thunder! Thunder! But through those years deeply was the testing through and, come at last, say he his brethren. "But as for you, ye thought evil against me; but God meant it unto good. And he comforted them and spake kindly unto them" (Gen. 50:20, 21). The wronged and persecuted Joseph had heard an angel voice through the thunders of the cruel conditions of his life.

A young man staggered across the "quad" of an English university. He was dazed and crushed. His physician had given him the sentence that his eyesight would soon be gone. It is even reported that the beloved of his heart turned from him when she found he must walk in darkness. Some said that it thundered. Others felt discovered that an angel spake to him. If ever an afflicted soul listened for God, and it was then that he wrote one of the greatest and best-beloved hymns of the English language:

O love that will not let me go,
I rest my weary soul on Thee;
I give Thee back the life I owe,
That in Thine ocean depths its flow
May richer, fuller be.

Some would listen to God, or seek to interpret the events of life, from sin ground. A right understanding of life, however, can never be acquired by the sinning heart or the cynical mind. "But we know that all things work together for good to them that love God" (Rom. 8:28), and the love of God, welcomed and nourished in the heart, is necessary for a right interpretation of life.

Sin gives a sort of soul-deafness, and the deaf are constantly hearing things incorrectly, and thus coming to wrong conclusions. How often, even the deafened heart expect to know when an angel voice is trying to make known the will of God!

But from holy ground one may listen and hear. How many have their come to know the sweet will of God! Moses took off his shoes and from the burning bush came the revelation that liberated Israel. From holy ground, through all the Christian years, souls have heard the assurances of God's goodness and mercy. "My grace is sufficient for thee!" became the staff of him who bends beneath a burden. "I will not leave thee, nor forsake thee" is the sufficient comfort for him who, on God's errands, goes to the ends of the earth.

From many an invalid chamber, from many a home of poverty, from many a lonely frontier cabin, songs of praise have gone heavenward from hearts that have heard not thunder—hideful threatenings in seemingly unfavorable conditions of life—but angel voices conveying a strengthening knowledge of the purposes of God.

When perplexities rest heavily upon the life, when skies seem overcast, when sorrow stands vigil, shall we not pray for that hearing heart that is gauged to something more infinitely sweet and gracious than the rumblings of thunder? For every true believer, who is willing to be patient and attentive to the divine things, our heavenly Father's purpose is that he "shall not walk in darkness, but shall have the light of life." (John 8:12)

Ostrich Eggs as Cups

The ancients used ostrich eggshells for drinking cups, says the Dearborn Independent.

THE THEATRE

"Stranded In Paris"—Have you ever been to Paris—city of the midnight sun? Bebe Daniels has. In fact, she's been 'stranded there!

Her current starring comedy, "Stranded in Paris," arriving at the Palace theatre Saturday and Sunday takes Bebe from a small western town to the land of her dreams. On the way over, she meets handsome young James Hall and gives him her Paris address.

Finding the street on which the house is located, she discovered nothing but a heap of ashes. Not knowing what to do, her worries are increased when a thief snatches her purse. Bebe gives chase but loses him in an amazing maze of streets. Incidentally, she loses herself.

Naturally, when Hall comes to call on her and discovers only a burnt ruin he starts making a search of his own, finally finding her at St. Po, involved in the most incredulous series of questionable adventures one might ever wish to keep away from. And how, you ask, did this girl reach the fashionable hotel at St. Po?

Well, after losing her way, she wins a position with "Hortense," la modiste. They ask Bebe to deliver some gowns at Deauville, but through a switch in the railroad tickets she is transported to the other resort and welcomed as Countess Pasada.

Laughs? You can't count 'em!

Smiles? Miles and miles of 'em!

Thrills? Enough to chill and chill!

Beauty? Enough to make any pirate's booty! What else could you possibly ask in a Bebe Daniels comedy?

"Mismates"—The Palace theatre feature for next Wednesday (only) will be "Mismates," Doris Kenyon's latest First National vehicle, which Charles Brabin directed for an Earl Hudson unit in New York. "Mismates" is the screen version of Myron Fagan's stage play of the same title and has been filmed on a lavish scale.

Doris Kenyon and Warner Baxter have the featured roles. In the cast are Philo McCollough, Mae Allison, Charlie Murray, John Kolb, Cyril Ring, Nancy Kelley, Maude Turner Gordon, Gaylord Kelley, Maude Turner Gordon, Charles Sellon and many other well known screen players.

One of the high lights of this picture is a jewel parade the like of which has never been been shown before on the screen. A few of the most beautiful artist models in New York were secured for this scene, and the display of feminine pulchritude and bedizening jewels is one of the features of the picture.

Age of the Earth

According to Leo Vigodner, there are twenty different computations as to the creation to date. A remarkable calculation was that of Doctor Lightfoot, who gave the actual time of the creation as at 9 a. m. on October 23, 4004 B. C.

Blood in Human Body

Experiments have shown that the total blood volume of a series of healthy men averaged 4.9 per cent, or approximately one-twentieth of the body weight. There were individual variations of from 4.2 per cent to 5.5 per cent.

Count the Fence Posts!

Estimates printed in the Forestry Primer being given to the schools by the American Tree association and Washington show we use 500,000,000 fence posts in this country every year.

Useless Attribute

South America has a fly that travels at the rate of 400 yards a second, although you wouldn't suppose flies had very important errands.—Detroit News.

Chicken's Iron Diet

Sixty half-inch brads, two screws, a ring, a wireless terminal and three buttons were found in the crop of a chicken killed at Malden, Essex, England.

London Irate; Research Blamed for Lost Dogs

London, England—Unlucky dogs have been let astray in such numbers for medical and scientific research that thousands of London pet owners have appealed to the authorities for protection.

The question of dog-stealing has been brought up in the house of commons before. The Research Defense society contends that research workers, by paying from 6 to 8 shillings for any kind of dog, have given impetus to dog stealing here and are responsible for the deaths of great numbers of these animals. The research workers say that they thought the dogs were homeless and not beloved pets which had been caught napping by the dog catchers.

CHURCHES

Methodist Church.
C. E. Pollock, Pastor.

Next Sunday, February 6—Topics for consideration:

"Humanity On The Throne," sermon 10:30 a. m.

"Three Factual Triumphs," sermon 7:00 p. m.

"Christian Stewardship," Church School 12 m.

"The Crowded Ways," Epworth League 6 p. m.

Motion Pictures.—"Iomois" will be shown at the Sunday evening hour. Dorothy Gish and her sister Lillian are at their best in the presentation of this great psychic drama which so aptly illustrates certain eternal truths. No admission charge will be made, of course, but the expense of the service has to be met—a free will offer of giving that is generous will care for this. Children under 13 years of age are welcome also, if accompanied by their adult friends, and will be expected to sit with them. This service is for the general public. Young and old are invited to think, worship and enjoy this quiet Sunday evening in the church.

The Epworth League-Church School entertainment comes next Tuesday evening, February 8th. In addition to the fine program of fun and music, two reels of film will be shown, one entitled "Sheep In Fasion and Sage" another entitled "What a Careless Hunter Can Do."

The men have a great program for next Monday evening. Some of the outstanding features of it will be—super at seven sharp—a half hour of unusual Ton, "an indoor track meet" (the exertion not too strenuous for after dinner, but very surprising)—an address by Joshua O. Randall, a man of wide culture, from Traverse City—excellent music and matters interest and general welfare. The men invited their wives as guests of the evening. Which, however, may look into the kitchen—the men will transact all domestic stunts.

Next meeting each Tuesday evening at seven.

There will be a great Lincoln vesper service February 12th. Keep this date on your program.

Mid-week lecture February 10, "The Prophet of Universalism." This completes the series.

STATE OF MICHIGAN—Department of Conservation.
Notice of Hearing on Applications for Timberland Tax Listings.
Notice is Hereby Given, That at 10 a. m. Tuesday, March 1st, 1927, at the Court house at Charlevoix, a public hearing will be held to inquire whether the lands hereafter described, are eligible for listing under Act 94 of the Public Acts of 1925. Inquire of County Treasurer as to office in which hearing will be held.
Description Sec. Town. Range Acres
nwj of swj 19 32n 6w 43.16
L. J. YOUNG, Director.

Congregational Church
Rev. B. G. Mattson, D.D., Minister

Morning worship at 10:30 with sermon by the pastor on "The Broken Reed."

Sunday School at noon.

The evening service at seven will provide a program by the young people. A pageant will be presented with interesting symbolic lessons, picturing the church in her great mission to bless and save the world.

The pastor will give a brief address at the close of the pageant.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Spirit."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 2 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.
Rev. Fr. Odelo.

Hot One

The story is told of two opposing English politicians who met if the parliamentary lobby and squabbled over their differences. But the opposition fangs did not remain in very long. "Why is it that you always keep coals of fire on my head, comrade?" asked the Socialist M. P. "I keep coals of fire on your head because I love the smell of a wool fire," was the very retort.—Boston Transcript.

To Clean Boilers

Numerous boiler secretions are used for the purpose of dissolving out incrustation and preventing further crust from forming. Soda ash and caustic soda are two of the best substances to apply; oak bark, dextrine, molasses are other substances recommended.

Power of Thought

Thoughts are forces, in that they have form and quality and substance and power, that they are the silent, unseen, but subtle agents at work, that make daily and hourly producing and determining, and with almost absolute precision, the conditions in our lives.

Class by Themselves

Members of congress are the only persons holding office under the government who are not entitled to receive their appointment directly from the people.

Jaw of Mammoth Found

24 Miles From Warsaw

Warsaw—The jaw of a mammoth was found 24 miles from Warsaw, in Warrin, when workers were excavating for the construction of a new house. The diameter of the jaw is 34 inches. After news reached Warsaw the government rushed an expert to Warrin, basing possibly its research further parts of the mammoth's skeleton.

'Sleeping-Car Sirens' Bilk American Tourists

London—Sleeping-car stress are a menace to travelers in some parts of Europe. Wealthy Americans are said to be frequently their victims.

Good looks, beautiful clothes, a mixture of tours and coquetry, a card case containing names of famous persons of Europe and a tearful tale of a lost purse or railway ticket enables these adventuresses to extract large sums of money from male travelers.

Yugo-Slav police recently arrested a young woman of tween Belgrade and Nish the last three years has been levying toll from wealthy travelers on the famous Simplon Express, which rushes across the continent from Paris to Constantinople.

Origin of A-1

The familiar symbol, "A-1," was used originally only by insurance companies in rating the general condition of ships. It is now quite generally applied to anything in first-class condition, or "ship-shape."

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday, February 5-6.

Bebe Daniels in "Stranded In Paris." New Bebe Daniels comedy is flashy—better than "The Campus Flirt." A sky—highly romantic comedy in which Bebe wins a trip to fascinating, gay Paree and becomes stranded without a cent. Also a Fox comedy "Rah Rah Heidleberg."

Wednesday Only, February 9.

"Mismates" with beautiful Doris Kenyon and Warner Baxter. You have'nt seen the ultimate in drama until you see "Mismates." A woman's daring courage when her baby is in danger—the jewel pageant; the most magnificent scene ever produced—the Roman festival where a cowardly husband gives a feast for a lie—the pursuit by the armed constabulary—and a smashing climax as thrilling as the screen can give. IT'S WONDERFUL. Also Felix in "Scrambled Yeggs" and Fox News.

Coming—Eddie Cantor in "Kids Boots."
Coming—"The Cohens and Kellys."

PERSONALS

See "The Neighbors" at the Palace theatre February 15th.

Attorney E. N. Clink of East Jordan was a business visitor here last Monday.

Messrs. Herman Johnson and E. E. Allen were visitors in Boyne City last Saturday.

Horn, to Mr. and Mrs. Onkley Hammond a daughter, Saturday, January 29th, at the Charlevoix hospital.

County Clerk George Roderick and Mrs. Roderick spent Wednesday night of last week with friends in Boyne City.

Captain John Chambers who recently spent several weeks in southern Michigan, mainly at Ypsilanti, returned to Charlevoix last Thursday.

Mr. Frank A. Kenyon of Mackinac Island spent a few hours here early this week attending to business interests, leaving for Mackinac Island Monday noon.

Friday evening, February 18th has been decided as the time for a Colonial Tea Party at the Methodist Episcopal church under the auspices of the Ladies Aid Society.

Dr. and Mrs. Charles J. McCann and wife motored from Grayling last Friday and spent the week-end with Charlevoix friends, returning to Grayling Sunday afternoon.

W. S. Richardson will spend the balance of the winter with Mrs. Richardson at Long Beach, California and is making his plans to start on his western trip next Tuesday.

The salesroom of F. S. Myers taken on a neat new appearance all due to work that has been in progress the past two weeks under the direct and personal supervision of the owner.

Mr. and Mrs. A. F. Bridge leave for Chicago today from which place they will continue their trip to the west coast, with the expectation of remaining at Pasadena, California for an indefinite period.

B. A. Hermen went to Detroit Tuesday where he will spend a day or two on business. From Detroit he will go to Grand Rapids where he will join his brother for a motor trip to Florida and other points in the south for an extended visit.

Changes in the salesroom at the store of S. M. See & Sons, according to plans adopted recently are under way and when completed will add greatly to the appearance of the salesroom, give more space for displaying goods and increase the attractiveness of their business place.

The Pilgrim Players of the Congregational church will present a three-act dramatic cast Feb. 15th at the Palace theatre. In addition to Zona Gale's delightful humorous play, "The Neighbors," the little people will enact a charming comedie playlet entitled "The House of Joy."

The farm home of Mr. John Stolt, near Bay Shore, was totally destroyed by fire last Friday afternoon together with practically all the household furnishings. The fire was in an advanced stage when discovered, giving but little opportunity to save the personal effects.

Mrs. Glen See left Monday for the south where she will spend two or three months with her sisters, one at Tampa and the other at Dade City, Florida. On the south bound trip she will visit friends for a few days in Grand Rapids and Chicago, after which Tampa will be her point of destination.

Six weeks more of winter providing the old maxim concerning the groundhog and his shadow. Candlemas Day, Wednesday, February 2nd, was one with lots of real sunshine in this region moderately warm with but few clouds to obscure the sun throughout the hours between sunrise and sunset.

The Y. P. S. C. E. of the Congregational church will celebrate Christian Endeavor Day next Sunday at the hour of evening service, 7 p.m. The young people are to present a pageant, "The Keeper of the Keys" and the pastor will make an address appropriate to the occasion. Everyone welcome.

An old fashioned dancing party will be given at I. O. O. F. hall Friday evening at which time the dances and figures of long ago will form the principal part of the program. At the same time those who prefer the Two step, Fox trot and Charleston will have an opportunity to indulge in their favorite steps.

James Simmons, Henry Block, Frank F. Bird and W. E. Byers, visitors at the motor show held in Detroit last week, returned to Charlevoix last Sunday, making the return trip by way of Pontiac and driving through from the latter place with three new machines for the Simmons-Block local agency.

The dancing party given by Dean Scroggie W.R.C. at I. O. O. F. hall last Friday evening was well patronized and proved to be a most enjoyable and pleasant function. Everyone in attendance made the same report—a fine time. Following the dancing party a splendid free luncheon was served that was greatly appreciated.

Painters and decorators have recently finished a much needed and splendid piece of work at the St. Mary's school building. Refinishing the floors and all walls and ceilings places the interior of the building in new condition, making for neat and much finer appearance as well as much pleasanter for instructors and students.

Commencing Friday morning a special cash sale will be inaugurated by H. B. Jacobs. Special low prices will be offered for a five day period making for a money saving opportunity for all customers. A study of prices quoted in this issue of the Sentinel will show the financial advantage to be gained by making your purchases during the five day period.

"Billy" Foster, young son of Mr. and Mrs. Joseph M. Foster was severely injured about the head, his collar bone broken as well as more or less cut and bruised at the ice rink last Thursday night when he was thrown with force against a tree after colliding with another skater at the rink, all with sufficient force to inflict the injuries.

Miss Olive Allen who was called to Grand Rapids about two weeks ago on account of the illness of her father, notified friends here Tuesday that her patient passed away suddenly Monday evening. The father had not been well for several weeks and was arranging for a trip to California where he contemplated spending the winter months. His death was therefore wholly unexpected at the time by family members.

Prof. Brumm, from the University of Michigan, very highly entertained and instructed the men in an after dinner talk last Monday evening at the Methodist Episcopal church at seven o'clock. At eight o'clock he spoke at the public meeting in the church auditorium to a well filled church of Charlevoix citizens. His public lecture subject was "Escape From the Commonplace." Sound wisdom and engaging humor characterized the lecture.

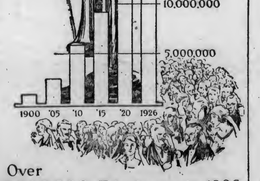
According to nominating petitions filed by candidates voters in Charlevoix county will have an opportunity to choose any one of three candidates when they cast their ballot for County Commissioner of schools, one of which is a woman, Archie C. Behling, present incumbent of the office, W. C. Palmer of Clarion and Amelia Kaden of Boyne City, comprise the three having filed their petitions with the county clerk.

An accident at the banking grounds of the East Jordan Lumber company, near Chestonia, resulted in the death of Mr. Martin at Peoskey last Thursday. The breaking of an evener on a log jammer broke suddenly and Mr. Martin received the force of the blow across the abdomen. He was a widower forty nine years of age and is survived by two daughters and two sons, besides brothers and sisters. The remains were brought to Charlevoix for interment.

A letter recently received conveys the information that Mr. and Mrs. Louis S. Orlowski and son Louis Jr., are now living temporarily in Phoenix, Arizona. Also that the health of Louis Jr. has been greatly benefited by the change in climate, his physical condition being far superior at present than for a long period of time in the past. Mrs. Orlowski was a music primarily for the benefit of the son. Friends in Charlevoix will be pleased to learn of the lads physical improvement.

If attendance, good dinner, speeches and music make for success the community banquet given by local W.C.T.U. last Tuesday evening at the Congregational church was an unqualified success. The rooms were crowded to full capacity; the banquet elaborate, well arranged and most excellently served; talks by Mrs. Satterstall and Pastor Herman Burns D.D., meritorious and of an order consatible and in full accord with the W.C.T.U. viewpoint; the music enjoyed by the entire assemblage. It was a most noteworthy W. C.T.U. function wherein good cheer and happiness prevailed and a source of gratification and pleasure to the assemblage.

A crowded church full of people listened to the stirring address of former chaplain of Ionia reformatory, Rev. Edward Kruse, Sunday afternoon at the Methodist Episcopal church. It was the second delivery of this same address in the city of Charlevoix. The men so highly valued his message delivered to them in the "men only" meeting, that they arranged this return engagement for a public presentation of the theme. The lesson of the sermon by convicted prisoner, who told his 12-year old brother, "Sonny, if you see a pin lying on the street and it does not belong to you, don't pick it up. Don't touch it. Don't ever take anything that don't belong to you, so you won't ever have to come to this place. This is an awful place," will not soon be forgotten by those of impressionable years who heard the lecture about conditions behind the prison bars.



Over 17,000,000 Telephones in 1926

The number of telephones in the United States mounts steadily upwards, from a million or so at the beginning of the century to the amazing figure of over 17,000,000 in 1926.

Much has been written about the great increase in American prosperity during the past quarter of a century and the millions of automobiles, radios and household comforts that have followed in its wake. It is well to remember that the telephone has played an important part in this process of enrichment.

No one can calculate the vast wealth in terms of energy and time saved for the American people by the daily use of their millions of telephones.

MAJ. G. C. BRANT

Maj. Gerald C. Brant, United States army air service, has been appointed as executive officer of Assistant Secretary of War Davidson in charge of aviation.

Bureau Makes Record in Measurement of Time

Washington.—The measurement of time to an accuracy of from one to two hundred thousandths of a second has been effected by the bureau of standards.

The measurement is ten times as fine as obtained by any previous method, bureau experts said. In physics research the measurement is believed to be of great value, as it is estimated that light travels nearly two miles in one hundred thousandth of a second.

A tuning fork, a pendulum swinging in a vacuum, a photoelectric cell, an oscillograph or ring mirror mounted on two wires in a strong magnetic field, and a high speed camera constituted the measuring apparatus.

New "Spender"

New York—A new type of Broadway "spender" was described in federal court. He is alleged to have taken his feminine companions to the morgue for entertainment and to have presented them with forged checks.

Martyr to Science

Cambridge, Mass.—A martyr to science, Dr. James L. Koch, died in the use of the X-ray, it is said from cancer.

Brings New Light

Often when an electric light bulb ceases to function it can be urged to action by tapping it gently on one side. This is rarely more than a temporary expedient, but if new bulbs are not at hand, it is a good thing to try.

NOTICE!

The Board of Education of Charlevoix will accept closed bids, for sale and removal on houses owned by them known as Ed. Steward Stucco, Hamlin and Withers houses. Board of Education reserves right to reject any or all bids.
Board of Education,
H. A. Craig, Secretary.

The Girl He Needed

She was young, obliging, and fair-tolled, and more than ordinarily attractive. As she sat down near the well-dressed man who had called her from the adjoining room her face wore a look of expectancy. Prodigy to this, he had said that he had a needed her.

"Here," he began; and then smoothened to fall him. He rose and made a circuit of the room as if to collect his thoughts.

The girl smiled encouragingly, and he sat down once again. With visible effort, he pulled himself together; then:

"Dear sirs, in reply to yours of yesterday's date—"—Loudon Answers.

Pure Air on Market

In Amsterdam, Holland, the municipal electric light works sell air to citizens. This seems an odd by-product of the electric industry until it is considered that the electric ozonizing process is one of the most effective means of purifying air just as lighting "freshens" a dank and humid atmosphere, stimulating those who breathe it. The Dutch air is drawn down through a chimney 100 feet high, purified and dried by electricity and compressed into cylinders like those used for soda fountain gas in America. These are sold to homes in the city on an annual contract basis, for about $24 a year. Shop release of the air in bedrooms of people afflicted with sickness is said to bring relief to the sufferers.

Man Not Only Harvester

Man is not the only animal engaged in harvesting. For example, says the Nature Magazine, how, many of the following normally store food for future use so far as you can determine during October: Woodchucks, chipmunks, red squirrels, deer, nuthatches, meadow mice, deer mice, skunks, dogs, cats, cows, horses, sheep and others?

Drink Water If Kidneys Bother

Take a Tablespoonful of Salts If Back Pains or Bladder is Irritated

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids; to help cleanse the kidneys and flush off the body's poisonous waste, get four ounces of Jad Salts from any pharmacy here. Take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive; cannot injure and makes a delightful effervescent lithia-water drink.

Colds Broken in a day

Hill's act quickly—stop colds in 24 hours. Fever and headache disappear. Grippe is conquered in 3 days. Every winter it saves millions danger and discomfort. Don't take chances, don't delay an hour. Get the best help science knows.

The Low Rumble of the Kettle Drum —the Synchrophase brings in all such illusive sounds

EVERY inflection of a speaker's voice, the delicate overtone which give music its beauty, are faithfully reproduced because of the Grebe "Colortone"—perhaps the greatest recent contribution to radio reception. This gives you absolute control over sound quality, irrespective of the host speaker's characteristics. You can vary it to suit your own taste and do away with the artificiality which has heretofore interfered with radio enjoyment.

Ask for a demonstration and then compare. Quite reception with that of other sets.

The GREBE SYNCHROPHASE

All Grebe sets are electrically operated by current supplied by batteries.

Withers Variety Store.

HOME OF CHARLIE ROSS IS WRECKED

Recalls Famous Kidnaping Case of 1874.

Philadelphia.—Bowing to time, showing signs of age in its vacant windows, and its moss covered, drooping verandas, a bleak, weather-beaten house, perhaps the most interesting structure in Philadelphia except Independence hall, today is crumbling under the blows of the pickax and the wrench of the crowbar.

This stolid three-story dwelling, of "the cupola era," rising on its high knoll above one of the declivities of Washington lane, in Germantown, once sheltered Charlie Ross, the boy whose disappearance has remained one of the mysteries of America and whose name through a half century was carried in hope, anxiety and despair to all corners of the earth.

Now it is being torn down to make room for the progress of a new generation which remembers little of the tragedy which came to the occupants of this house.

Mansion Became Church.

The Ross mansion, for the last decade, has been the seat of the Olivette Presbyterian church. With the growth of the congregation it was found inadequate and a new church has been erected to the rear of the house. Now the house itself is being razed and on this site another church is to be built.

In the disappearance of the Ross home, Philadelphia loses one of its greatest shrines of the curious. From every section of the country have come visitors to gaze in awe at the old stone dwelling which has stood throughout the years a mute reminder of the tragic search for the lost boy.

More than fifty-two years have passed since that July day in 1874 when golden-haired Charlie, four-year-old son of Christian K. Ross, disappeared. The boy was playing on the lawn of his father's estate, when he was enticed away by two men believed to have been responsible for his death. William Mosher and an accomplice drove up to the estate in a spring wagon and with promises of candy and a ride lured Charlie and his elder brother, Walter, into the wagon.

The four drove off and at the corner a few score yards distance away Walter was given 25 cents to buy candy. When he returned with his purchases, the wagon, the two men and his little brother had disappeared. Charlie was never seen again by his family.

Until his death 23 years later, Christian Ross, the father, spent his life and fortune in an unsuccessful world-wide search for his boy, but no definite word was ever received concerning him.

Several times messages emanated from Mosher, presaging Charlie's return if a large ransom were paid, but nothing came of the desperate father's attempts to comply with these requests.

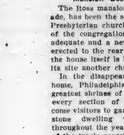
Finally, without betraying the secret of Charlie's fate, Mosher and his comrade were killed in another city during an unsuccessful burglary.

Stories of Boy Plentiful.

Rumors of all sorts spread over the country as to the fate of Charlie Ross. Some say he was killed by Mosher or died while held a captive. Others were of the opinion that he is alive and from time to time claimants to his name have appeared.

Shortly after the old Ross home was sold to the Olivette church, Mrs. Ross died, on December 13, 1912. Walter Ross, Charlie's brother, and his sister, Miss Sophia L. Ross, survive and are living near Philadelphia.

Only the old, weather-beaten house has remained, the solitary reminder to curious visitors of the most famous kidnaping case of the last century. That now is crumbling to dust, and Charlie Ross, fading out as a memory, is crystallizing as a tradition.



Georges Cretziano, newly appointed Bulgarian minister to the United States.

Tumble of Human Fly Wins Chicago Wife

Detroit.—Though a fearless performer of daredevil stunts, Benjamin Kopalow Fox, a "human fly," seemed just the least bit nervous while he was being married to Miss Nan H. Clifford by Fred E. DeGaw, Justice of the peace. Fox, who is twenty-seven years old, met Mrs. Fox when she was a nurse in the Mercy hospital in Chicago six years ago. He was taken to the hospital after a fall from a building he was climbing.

It was necessary for Fox to procure a special order from Probate Judge Edward Cousmaud directed to the county clerk before a marriage license could be issued. Fox was unaware of the five-day marriage law, and as he is required to leave New York city at once on his way to Paris, it was essential that he obtain the special dispensation.

He Understood

An English employer has ordered the following notice to be posted in his business premises: "Any male employee desiring to attend the funeral of a near relative must notify his foreman before 10 a. m. on the day of the match."—Cork Examiner.

Society's Handicap

"I guess we may as well give up," sighed the president of the antiprofanity society. "What's the trouble now?" asked his secretary. "I just read they are making more fountain pens than ever," he explained.—Cincinnati Enquirer.

On Cash Basis

Washington.—The army is doing business on a cash basis, virtually all of its bills being paid monthly, a financial report of the military service revealed.

Rail Revenue Drops

London.—Revenue of the four great railways of England decreased by £2,000,000 during the six months of the coal stoppage.

WILD WOMAN FOUND FROZEN TO DEATH

Roamed Michigan Woods for Fifty Years.

Calumet, Mich.—Old Maggie Harrington, forest wanderer, was found frozen to death, eight miles from her dilapidated old cabin near the old Central mine in Copper country, northern Michigan, recently.

She was seventy years old. For the last fifty years Maggie has roamed the forests, fearless of sun or hoost, at all times of the day or night, as wild as the gray wolf and as harmless as the deer.

Subsisting upon raw and uncooked foods and wild berries, with clothing ragged only to decently cover her, no stockings, mittens and no hat, she wandered many miles through the dense forests from one camp to the other and often crouched in the corner of a deserted cabin for the night away from the howling wolves and sheltered from the bitter north winds when the weather was far below zero. At daybreak she would walk another ten or fifteen miles back to her own storeless shack, or go on many miles in another direction to some miner's cabin for a cupful of coffee.

Wild Woman's Home.

Her old tumbled-down cabin at Central mine, with windows stuffed with old papers or potato bags, its pile of ashes in the middle of the floor, where the old rusty stove had long since fallen apart, the chairs and kitchen table thrown where they stood, and in the corner of the bare room a pile of dirty rags which served her as sleeping quarters for these many years.

She was often seen by tourists as they drove along the northern highway, but she managed to get into the forest before they reached her.

Maggie had one ride in an auto and that was four years ago when she had an infected foot. That ride took her twenty-five miles to Calumet for treatment.

She was intelligent and had a common school education, and her mother was noted among the old neighbors as a splendid housekeeper, clean and orderly.

Retained Keen Mind.

Maggie had degenerated in the matter of clothing and way of living only; her mind was keen, and what stories she could tell of the wild things she knew so well.

Whatever transpired in the life of this strange woman to change her from a shy, sheltered, golden-haired beautiful girl as she was fifty years ago, at the time her mother died, into a silent hermit of the great forests, no one can say. She kept her own council—shared confidences with none and died with her secret on her frozen lips.

Old Maggie was buried at Eagle Harbor near the spot where she stood over the little grave fifty years ago and cursed the fate that had robbed her of the mother she loathed, and changed her into a wild woman of the great Michigan forests at one stroke.

"Trench Mouth" Attacks Thousands at Trenton

Trenton, N. J.—An epidemic of "trench mouth," a gum infection technically called Vincent's disease, has spread through Trenton in the last few days. The malady, which is traceable to the World war and transmitted from person to person, has effected several thousands, Trenton dentists declare.

Nearby places also are troubled. At the Skillman epileptic colony, a state institution, the malady has been so general that physicians were called to launch a fight against it.

"Stop kissing" is the word passed out by the health department in an effort to combat the malady.

The doctors believe the disease was rare in the United States before the war. They say it was brought back by the American Expeditionary forces.

LEGAL NOTICES

Order for Publication—Final Administration Account.

IN CHANCERY.

Saul Peters, Plaintiff.
vs.
Maud Peters, Defendant.

Suit pending in the circuit court for the county of Charlevoix in Chancery, in the city of Charlevoix, in said county, on the 22nd day of December, A. D., 1926.

In this cause it appearing from affidavit on file, that the defendant, Maud Peters, is concealed within the State and her whereabouts cannot be ascertained.

On motion of R. L. Lewis, plaintiff's attorney, it is ordered, that the said defendant, Maud Peters, cause her appearance to be entered herein, within three months from the date of this order and in case of her appearance that she cause her answer to the plaintiff's bill of complaint to be filed, and a copy thereof to be served on said plaintiff's attorney within fifteen days after service on her of a copy of said bill and notice of this order and that in default thereof, said bill be taken as confessed by the said Maud Peters, defendant.

And It Is Further Ordered, That within forty days the said plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that such publication be continued therein at least once in each week for six weeks in succession, or that he cause a copy of this order to be personally served on said Maud Peters, defendant, at least twenty days before the time above prescribed for her appearance.

vs.
John S. Dixon and Phebe S. Dixon, Charles H. Emery, Register, and C. F. Woodbury, Edward Woodbury, William C. Newman and Louisa M. Newman and Harriet L. Clifford, or his or unknown heirs, devisees, legatees and assignees of each of the above; and Charlevoix Manufacturing Company, Defendants.

County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county on the 15th day of December A. D., 1926.

Present: Honorable Parm C. Gilbert, Circuit Judge.

In this cause it appearing by affidavit on file that the defendants Charlevoix Manufacturing Company, a corporation, has ceased to exist and that there is no officer or agent in this State upon whom process may be served: and that the remainder of the said defendant, to-wit: John S. Dixon and Phebe S. Dixon, Charles F. Bush, Charles A. B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above named residence is not known and it is not known as to whether or not they are deceased.

On motion of Lisle Shanahan, attorney for the plaintiffs.

It is ordered that the appearance of the said defendants be entered in this cause within three months from the date of this order, and that in case of his, her or their appearance, that he, she or they cause his, her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiffs within fifteen days after service on him, her or them or his, her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants in default.

And it is further ordered that within forty days the said plaintiffs cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiffs cause a copy of this order to be personally served on the said defendants, individually, at least twenty days before the time prescribed for their appearance.

The bill of complaint in the above entitled cause is filed for the purpose of quieting the title to Lots ten and eleven in Block twenty of Newman's Addition to the village (now city) of Charlevoix, Michigan, in the above named plaintiffs as tenants by the entirties.

Century-Old Cells of Plant Found Alive

Philadelphia.—The discovery of plant cells that have lived and retained their individualities for more than a century was described to the American Philosophical society recently by Dr. Daniel T. MacDougal, director of the department of botanical research of the Carnegie Institute of Washington.

Most of the cells of trees die in a few years and their remains become part of the permanent woody structure. The ordinary cell of the living creature is supposed to disintegrate and become absorbed and replaced by other cells within a few years, though some biologists believe that brain cells endure throughout the life of the individual. It is difficult to account for the faculty of memory without supposing that the brain cells commonly live as long as their possessors, they say.

ARCTIC OWL CAUGHT IN TRAP NEAR IRONTON

H. E. Coblentz, Eveline Township, Gets Bird after Many Trials

An arctic owl was captured by Mr. H. E. Coblentz of Eveline township, a few days ago. The bird was caught in a trap after having committed more or less depredations in the vicinity of the Coblentz home. Several neighbors at various times tried to shoot the bird but did not succeed in their effort.

Failing to kill the owl by shooting Mr. Coblentz adopted the trappers method by fastening a spring trap over a rabbit which in turn was securely fastened to the ground. The rabbit being one that the owl had killed a little earlier for a future meal. The owl flew away before it had finished the meal.

When the bird returned for his game feed the trap was evidently sprung and the owl, which measures four feet six inches from tip to tip of wings, was the victim. Mr. Coblentz says "its a fine looking bird," and that he has it now confined as a regular pet boarder.

Age of the Earth

According to Des Vignoles, there are twenty different computations as to the age of the earth. The most modern calculation was that of Doctor Lightfoot, who gave the actual time of the creation as at 9 a. m. on October 23, 4004 B. C.

1905 1927

Stopping The Leaks!

Saving does'nt curtail legitimate spending, it simply stops the leaks, and when you see your deposits grow—and the interest we pay multiplying them—you soon eagerly cultivate the habit, and you are saving successfully.

Start now, there will never be a better time.

THE CHARLEVOIX SENTINEL

Volume 57 — Charlevoix, Michigan, Thursday, February 10, 1927 — Number 42

MEN'S CLUB CHIVALROUS

Entertain Their Ladies to a Steak Supper Monday Evening

Last Monday evening the men entertained their ladies to a supper and program of great interest and profit at the First Methodist Episcopal church. More than one hundred sat down to the tables and enjoyed the excellently prepared Swiss steak supper which was served in expeditious manner by the men.

During the grand march to the tables and the early part of the supper, the orchestra rendered highly appreciated music. Rev. C. E. Pollock gave an address at the table on the subject, "The Patriotic Month," stating that February is the birth month of Washington, Longfellow and Lincoln—soldier, poet and statesman respectively. He drew some interesting statistic conclusions from the lives of these men.

Earl Shapton conducted the "Indoor Track Meet" with Mr. Jacobs for official scorekeeper. Dr. J. O. Reach of Traverse City, was the principal speaker of the evening. His subject was "The modern democrat." In a very forceful manner he presented his view that the church is in the community to serve its highest purposes and interpret religion to it in the vocabulary and methods of the age.

The ladies voted their appreciation of the treat the men had given them. The men replied by cheering the ladies, thus having the last word.

The first meeting will be held at the Marion Center Grange Hall, Feb. 15th in the afternoon, starting at 1:30 fast time; second at Horton's Bay, in the Odd Fellows hall, starting at 8:00 fast time; third in the Rock Elm Grange Hall, Feb. 16th in the forenoon, starting at 9:30 fast time; and the last at Boyne Falls in the town hall Feb. 16th in the afternoon, starting at 1:30.

At each convention your will be present and desire that you come full of questions and anxious to get into the discussions and help by contributing your ideas in the vicinity of the Coblentz home. Several neighbors will take dinner with us. Come and help us eat.—B. C. Mellencourt.

Work to Know

Properly then last no more knowledge than is sufficient that last gasp by working; the rest is yet all an hypothesis of knowledge; a thing to be argued of in schools, a thing floating in the clouds, in endless logic vortices, till we try it in life.—Carlyle.

Vocal Power General

A living thing is rarely found that has no way of expressing itself by way of sound. All birds and many insects have vocal power of some kind, and even lizards, when voiceless, call attention to their presence by means of vibrations.

GIFTS FOR ST. VALENTINE'S DAY
Valentines 1c to $2.00.
Whitman's Valentine Boxed Candy
Sampler 1, 2 and 3 lb boxes
Valentine Boxed Stationery
Something new.
FESSENDEN the Druggist

Men Yield to Color: Orange Suede Coats!

London.—Any man who would like to be a hero to his valet should appear in one of the new dinner jackets shown at the shops and leather fair.

They are made of black suede leather, with orange lapels, with accompanying suede waistcoats in scarlet and other brilliant colors. The men's section also offers:

A gray suede shoe with crossword puzzle squares worked in white and black glace kid on the uppers.

Dress shoes in colored patent leather.

Studded heels on rubber-colored dance shoes.

SOILS AND FERTILIZER MEETINGS

Held in Charlevoix County February Fifteenth-Sixteenth

A series of meetings will be held in the county during the 15th and 16th of February that will be of interest and value to farmers. The subjects to be discussed will be "Soils and Fertilizers" as well as other farm problems, and it is hoped that a good attendance will be on hand to hear the speakers.

S. J. Culver, Agr'lagent of Emmet county, will discuss in detail the Soils problems, and your local county agent, Mr. Mellencamp, will take the subject of Fertilizers, which subjects are very closely related to each other and are today probably the most important factors in successful agriculture.

The first meeting will be held at the Marion Center Grange Hall, Feb. 15th in the afternoon, starting at 1:30 fast time; second at Horton's Bay, in the Odd Fellows hall, starting at 8:00 fast time; third in the Rock Elm Grange Hall, Feb. 16th in the forenoon, starting at 9:30 fast time; and the last at Boyne Falls in the town hall Feb. 16th in the afternoon, starting at 1:30.

At each convention your will be present and desire that you come full of questions and anxious to get into the discussions and help by contributing your ideas in the vicinity of the Coblentz home. Several neighbors will take dinner with us. Come and help us eat.—B. C. Mellencourt.

SEWING CLUB ENTERTAIN

Their Husbands at Annual Banquet last Friday Evening

The members of the Ladies Literary and Sewing club entertained their husbands at their annual banquet, in the Methodist church on Friday evening. The tables were beautifully and daintily decorated in the club colors and an elaborate and delicious supper was served.

During the banquet, the diners were favored with an extended program of music rendered by the Durance orchestra which was well received. In response to her name when read by the club secretary, Mrs. Frank Courier, each lady responded with a short toast.

Dr. McMillan gave a humorous reading from Irving S. Cobb, after which Miss Lucile Belding and Mrs. Edward Stewart gave recitations. Rev. C. E. Pollock finished the program with a fitting speech.

In behalf of the club the president, Mrs. F. E. McMillan, presented a fine gift of silverware to Arthur Edwards, who recently finished a term as president of the club.

Members and guests of the club are unanimous in the opinion that this was their finest and most delightful annual party.

MR. WILFORD L. COFFEY

Candidate for Office of Superintendent of Public Instruction

Wilford L. Coffey announces his candidacy for the office of Superintendent of Public Instruction and therefore seeks the nomination which will be made at the Republican state convention called for Grand Rapids March 1st.

Mr. Coffey is Superintendent of Public Instruction at present and an appointee of Governor Groesbeck, successor of T. E. Johnson who was removed during recent months. In a recent statement Mr. Coffey says in part:

"I shall continue to have a part to support Governor Green in carrying out policies that may be for the best interests of the people, the schools and the pupils who attend the schools. Also "I believe no Superintendent of Public Instruction should be involved in problems that are neither dirgedly or indirectly connected with his educational work."

At a regional meeting recently attended by inspectors and teachers serving in western and northern Michigan Mr. Coffey was given an unanimous endorsement relating to his qualifications for the office now held by him. Rumors that other candidates will enter the field are in circulation, but as yet, no public announcement of their candidacy has been made.

It has been generally understood that Mr. Johnson would seek the nomination as a matter of self vindication over his removal by Governor Groesbeck, however he disavows such intention having practically concluded a new business agreement that will agreeably occupy his time and requires constant personal service.

CHURCH PROGRAM FINELY RENDERED

At the First Methodist Episcopal Church Last Tuesday Evening

The following program was excellently rendered at the First Methodist Episcopal church last Tuesday evening to a good and appreciative audience. The proceeds of the evening were applied on the purchase price of the new church hymnals:

Vocal Solo.....Mrs. Livingston
Trombone Solo.....Mr. Durance
Dialogue....Marion Tuby-Mauquis Roen
(a) The Joys of Marriage
(b) The Little Peach.
Solo.....Harker Kirby
Clarinet Solo.....Teddy Miller
Instrumental.....Four Small Boys
"The Happy Four"
Reading.....Esther Case
(a) The Courtin.
(b) Burglar Bill.
Pantomine.....Epworth League
"The Melterdrams"
Motion Pictures—
(a) "A Careless Hunter"
(b) "Sheep Psalm and Sage."

A cordial invitation is extended to all to attend the Church School and the Epworth League and enjoy the use of the hymnals which this program helps provide.

Reappointed Deputy Collector of Internal Revenue, this Dist.

W. S. Darling, retaind through a recent reappointment the position of deputy collector of internal revenue held by him for the past few years.

Mr. Darling has been a faithful worker and holds his position wholly on account of efficient, persistent effort in his past service which was taken into consideration by his superiors prior to the issuance of his new commission. The reappointment of Mr. Darling meets with universal approval and the business men of the district throughout this part of the state are congratulating him on his continuance in the position.

WHAT OUR LATE VISITORS THINK OF CHARLEVOIX

The Following Article is Taken from Oak Leaves, Date February Five

Charlevoix is to become the St. Moritz of the Great Lake region and a rival of Lake Placid as a center of winter sports, according to Fred Lee Tarlton, George R. Heming way and Homer D. Jones. They returned this week from Charlevoix, where they had more fun in the snow and on the ice than they ever had on the beach at Miami or on the warm shores of the Pacific.

"We went tobog on ice boats, rode the long sleds in the dunes, took bob sleigh rides and were rejuvenated, said Mr. Heminway. "The place to go to get recreation in winter is not to a warm climate, but to Charlevoix, where the snow and ice stay all winter." Next week there is going to be a program of winter sports at Charlevoix and those who wish information may phone either one of the returned travelers.

They found a new adventure in driving over the surface of the Inland lakes with no roads in sight and an ice boulevard 25 miles wide.

MARL AS A FERTILIZER

Thirty Per Cent of Land in County Needs a Soil Sweetener

Marl is one of the several materials that are used to correct soil acidity and has the added advantage of being the cheapest source of lime available, providing the per cent of lime is high enough and the distance is not too great to haul it.

Ordinarily marl is sold at $1.00 per yard, air dry and no other agent can touch this price, the nearest being crushed limestone, which costs $1.25 per ton at Petoskey plus the freight. Any marl that tests 85 per cent lime is profitable to buy at $1.00 per yard and in this county there are several bed, that average 90 per cent.

Marl should be applied at the rate of from 2 1-2 to 3 yards to the acre as compared to 2 to 2 1-2 tons of limestone, which indicates that it takes about 1 1-4 yards of marl to equal one ton of limestone. It can be applied practically any time during the year including winter without detrimental results to the land or crops.

The two most convenient ways of applying are by hand or by use of the manure spreader. Also marl can be hauled any time during the winter if it is dug out in the early fall and had a chance to dry out, during which process it loses about 30 per cent in weight. This is a big advantage in that a farmer can haul it when he has the most time and when it suits his pleasure.

We hope to open up several marl beds this coming season and in time have marl available to every farmer in the county. We have a marl bed just outside of Boyne City that will be opened up early in the spring, and it is hoped that before that time we can have many more available, so that the farmer coming to town in any of the cities can take a load of the cheapest fertilizer available back with him and without making a special trip.

By all means inform County Agent Mellencamp if you know of a good marl bed and talk with your neighbors about co-operating in bearing the expense of getting it out—the main thing is 30% of the land in this county needs a soil sweetener and you as a farmer should use either marl or limestone whichever seems to be cheaper for you to use.—B. C. Mellencamp.

IN HANDS OF RECEIVER

Michigan Transit Co. Crack Ships—Manitou and the Puritan

Newspaper reports and rumors afloat indicate that the Michigan Transit Company is burdened with a heavy indebtedness by way of mortgages on the crack ships Manitou and Puritan as well as open and unsecured accounts, some of which are of long standing.

Last reports state that the Clinch Coal Company of Chicago, one of the creditors has placed an action to recover their claim and that as a result the ships mentioned have been in charge of a deputy United States marshal. The ships in question are now in winter quarters at Manistee. Also that the courts of Cook county, Ill., has appointed receivers to take charge of Transit company affairs.

That both actions taken are of a friendly nature, designed to assist the company in its present embarrassment and that an effort will be made to raise necessary funds to pay amount of outstiting the ships and place them in readiness to engage in transportation business with the opening of the season.

Several local citizens are stockholders in the Michigan Transit Company, having taken an interest in the company in comparatively recent years with the present they are more or less up in the air concerning their financial holdings and are now figuring on the amount of their loss if any, a proposition that can not be fully determined at this time.

IS M

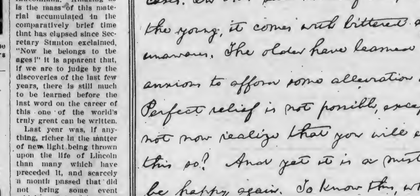
Will Help Make Legionnaires Feel at Home

When the members of the American Legion go over to France next summer for their annual convention, those who run across this open air lunch room in Paris will greet it with cheers. For the chief article of food it offers is the familiar "hot dog."

Palm Beach Censor Is a Busy Man

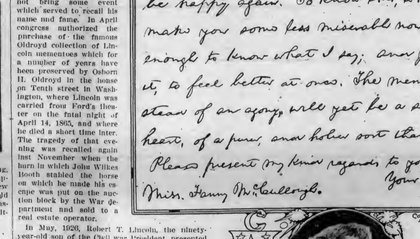
Connie Lewis, a minor league baseball umpire, is also the well known censor of Palm Beach, and one of his chief duties is to see that the bathing costume regulations are observed. Above he is seen warning Martha Nordtlus, national woman swimming champion, that her stockings must not be rolled down so far.

PEACHES ON STAND



Mrs. Frances Hesman Browning, better known as "Peaches," as she appeared on the witness stand in New York in the separation suit and told of the conduct of her millionaire husband. The photograph was transmitted by wire.

COMMANDS IN CHINA



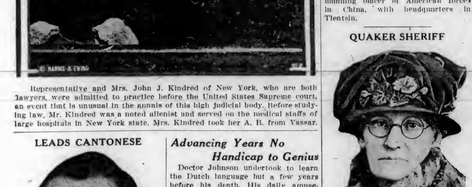
Mrs. Frank Chase, a Quaker, is the sheriff of Kiowa county, Kan., the first woman to hold that position in the state. Her husband had been sheriff for four years and as he could not legally succeed himself the voters asked her to run for the office and elected her. She is the mother of four children.

COMMANDS IN CHINA

Maj. Gen. Joseph C. Castner, commanding officer of American forces in China, with headquarters in Tientsin.

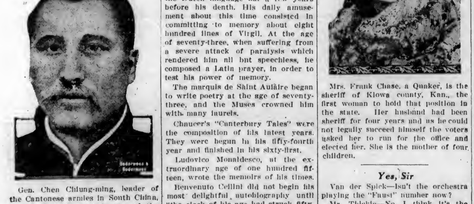
QUAKER SHERIFF

Supreme Court



Representative and Mrs. John J. Kindred of New York, who are both lawyers, were admitted to practice before the United States Supreme court, an event that is unusual in the annals of the high judicial body. Before entering law, Mr. Kindred was a noted alienist and served on the medical staffs of large hospitals in New York state. Mrs. Kindred took her A. B. from Vassar.

LEADS CANTONESE



Gen. Chen Chiung-ming, leader of the Cantonese armies in South China, and one of the best known of the Chinese militarists.

Advancing Years No Handicap to Genius

Doctor Johnson undertook to learn the Italian language at a few years before his death. His daily amusement about this time consisted in committing to memory about eight hundred lines of Virgil. At the age of seventy-five, when suffering from a severe attack of paralysis which rendered him all but speechless, he composed a Latin prayer, in order to test his power of memory.

The marquis de Shint Aulaire began to write poetry at the age of seventy-three, and the Muses crowned him with many laurels.

Chaucer's "Canterbury Tales" were the composition of his latest years. They were begun in his fifty-fourth year and finished in his sixty-first.

Ludovico Monaldesco, at the extraordinary age of one hundred fifteen, wrote the memoirs of his times.

Benvenuto Cellini did not begin his most delightful autobiography until "the clock of his age had struck fifty-eight."—Market for Exchange.

ALL AROUND THE GLOBE

Thirty years will be required for the restoration of Rheims cathedral.

Pelicans are fishing experts, but their catch consists chiefly of coarse fish not attractive to man.

Since the bronze age of prehistoric man, salt has been mined almost continuously in Austria.

An egg-laying contest in Great Britain has attracted more than 15,000 ambitious pullets and ducks.

A full-sized hair comb has been invented, made in three parts that fold and are carried in a vest pocket case.

Porcupines are gaining the attention of biologists because of their increasing raids on trees and farm crops.

The steam engine was invented in 1781, but the first steam railroad in this country did not appear until 45 years later.

A New Lincoln Letter

By ELMO S. WATSON

YEAR by year the fame of Abraham Lincoln grows and each succeeding year sees new accessions to the nation's priceless store of Lincolniana, amazing as is the mass of this material accumulated in the comparatively brief time that has elapsed since Secretary Stanton exclaimed, "Now he belongs to the ages!" It is apparent that, if we are to judge by the discoveries of the last few years, there is still much to be learned before the last word on the career of this one of the world's truly great can be written.

Last year was, if anything, richer in the matter of new light being thrown upon the life of Lincoln than many which have preceded it, and scarcely a month passed that did not bring some event which served to recall his name and fame. In April congress authorized the purchase of the famous Oldroyd collection of Lincoln mementoes which for a number of years had been preserved by Osborn H. Oldroyd in the house on Tenth street in Washington, where Lincoln was carried from Ford's theater on the fatal night of April 14, 1865, and where he died a short time later. The tragedy of that evening was recalled again in November when the barn in which John Wilkes Booth stabbed the horse on which he made his escape was put on exhibition block by the War department and sold to a real estate operator.

In May, 1926, Robert T. Lincoln, the ninety-year-old son of the Civil war President, presented to the congressional library a trunk, the contents of which, it is believed, is a veritable gold mine of Lincoln material. Ah, sir of mystery has long about the trunk, for years and the secret of what it contained. Perfect faith was kept by Robert Lincoln, despite all the efforts by biographers of Lincoln to make sure of the material it is supposed to contain. The gift to the congressional library was made with the provision that under no circumstances was the trunk to be opened until 25 years after Robert Lincoln's death. That means that Lincoln scholars will have to wait until 1951 before they can delve into the treasures of information which they believe this receptacle holds. The death of Robert Lincoln came on July 26, 1926, with another outstanding event of Lincoln interest last year, since his passing meant that the male line of the Lincoln family was ended.

Others were the publication from time to time during the year of the researches by Rev. William E. Barton in the monumental history of the myths about Lincoln, including the circumstances surrounding Ann Rutledge, Lincoln's part in the reprieve of William Scott, the "sleeping sentinel," some interesting facts concerning the Gettysburg address and the imaginary over whether Lincoln ever said, "You can fool some of the people all the time; all the people some of the time; but you can't fool all the people all the time." Nolens lispertant was the publication of Carl Sandburg's two-volume study of "Abraham Lincoln: The Prairie Years," in which appeared some 50 letters and papers in Lincoln's handwriting, which had never before been published.

Recently there has come to light in Bloomington, Ill., a city which is closely associated with the early career of the Lincoln family, another important Lincoln letter, reproduced above, which is here made public for the first time. It was written to Miss Fanny McCullough of Bloomington and tells of the death of her father, Lieut. Col. William McCullough of the Fourth Illinois cavalry, who was killed near Coffeyville, Miss., December 5, 1862.

Colonel McCullough, a pioneer of the Prairie state, was born in Kentucky in 1812 and came to McLean county in 1836. At the outbreak of the Blackhawk war in 1832 three companies of mounted volunteers were raised in McLean county for service against the Indians and McCullough was a member of the first company. He was soon promoted by Osborn H. Oldroyd in the house on Tenth street in Washington, where Lincoln was carried from Ford's Theater to the fatal night of April 14, 1865, and where he died a short time later. The tragedy of that evening was recalled again in November when the barn in which John Wilkes Booth stabbed the horse on which he made his escape was put on exhibition block by the War department and sold to a real estate operator.

In May, 1926, Robert T. Lincoln, the ninety-year-old son of the Civil war President, presented to the congressional library a trunk, the contents of which, it is believed, is a veritable gold mine of Lincoln material. Ah, sir of mystery has long about the trunk, for years and the secret of what it contained. Nolens lispertant was the publication of Carl Sandburg's two-volume study of "Abraham Lincoln: The Prairie Years," in which appeared some 50 letters and papers in Lincoln's handwriting, which had never before been published.

Recently there has come to light in Bloomington, Ill., a city which is closely associated with the early career of the Lincoln family, another important Lincoln letter, reproduced above, which is here made public for the first time. It was written to Miss Fanny McCullough of Bloomington and tells of the death of her father, Lieut. Col. William McCullough of the Fourth Illinois cavalry, who was killed near Coffeyville, Miss., December 5, 1862.

Colonel McCullough, a pioneer of the Prairie state, was born in Kentucky in 1812 and came to McLean county in 1836. At the outbreak of the Blackhawk war in 1832 three companies of mounted volunteers were raised in McLean county for service against the Indians and McCullough was a member of the first company. He soon was elected captain of the company and later was made major of the regiment. He was not elected circuit clerk and held that office four successive terms. It was during this time that he probably met Lincoln, as there is no record of their having met during the Blackhawk war.

At the outbreak of the Civil war, McCullough was exempt from service because of the loss of his right arm (which had been torn off in a threshing machine in 1840), defective sight in one eye and his age. But he was determined to serve and in August, 1861, he obtained permission from President Lincoln to be commissioned to the service as lieutenant colonel of the Fourth Illinois cavalry. "William McCullough was the last cavalryman," writes one historian. "He was a superb horseman of martial appearance, with a full, resonant voice, eight feet of spirited sweep of the lowed and lost, and th solemn pride that must be yours to have laid so early a sacrifice on the altar of freedom.

Yours very sincerely and respectfully,

A. LINCOLN.

The Fanny McCullough, to whom this new Lincoln letter was written, afterwards became the wife of Frank D. Stevens. Her sister, Nannie L. McCullough, also married into the Orme family, a family of soldiers. Her husband was the Rev. William W. Orme who entered the Union army as colonel of the Ninety-fourth Illinois infantry and whose distinguished services, especially at the siege of Vicksburg where he contracted the disease which brought about his death soon after the close of the war, made him a brigadier general. Fanny Orme died in Washington, D. C. in 1920, and upon her death the Lincoln letter was given to the present owner, Mrs. Bernadine Smith Smith of Normal, Ill. (the "twin city" of Bloomington), whose husband is a grandson of General William W. Orme and Nannie McCullough Orme.

Lieut.-Col. William McCullough

Ill the few who performed at all creditably in this affair, and so far as there is record Lieut. Cullough was one. The day before the fight he had lost his gun, but during the engagement, it is said, he captured another from an Indian. A friend who knew him during the Civil war and who usually referred to him as "a man of reckless bravery," in commenting upon this fact, said, "Armed or unarmed, I cannot conceive of William McCullough as afraid of anyone, savage or civilized." This bears out the statement that when Captain Covell of the First, amid all the confusion of the retreat, tried to get his men to make a stand, McCullough was one of the ten soldiers who rallied around their leader in his vain attempt to stem the rout.

After the loss of the brief Indian war, McCullough returned to McLean county. In the fall of 1840 he was elected sheriff, an office which he held for three successive terms. He was next elected circuit clerk and held that office four successive terms. It was during this time that he probably met Lincoln, as there is no record of their having met during the Blackhawk war.

At the outbreak of the Civil war, McCullough was exempt from service because of the loss of his right arm (which had been torn off in a threshing machine in 1840), defective sight in one eye and his age. But he was determined to serve and in August, 1861, he obtained permission from President Lincoln to be commissioned to the service as lieutenant colonel of the Fourth Illinois cavalry. "William McCullough was the last cavalryman," writes one historian. "He was a superb horseman of martial appearance, with a full, resonant voice, eight feet of spirited sweep of the lowed and lost, and th solemn pride that must be yours to have laid so early a sacrifice on the altar of freedom.

Yours very sincerely and respectfully,

A. LINCOLN.

The Fanny McCullough, to whom this new Lincoln letter was written, afterwards became the wife of Frank D. Stevens. Her sister, Nannie L. McCullough, also married into the Orme family, a family of soldiers. Her husband was the Rev. William W. Orme who entered the Union army as colonel of the Ninety-fourth Illinois infantry and whose distinguished services, especially at the siege of Vicksburg where he contracted the disease which brought about his death soon after the close of the war, made him a brigadier general. Fanny Orme died in Washington, D. C. in 1920, and upon her death the Lincoln letter was given to the present owner, Mrs. Bernadine Smith Smith of Normal, Ill. (the "twin city" of Bloomington), whose husband is a grandson of General William W. Orme and Nannie McCullough Orme.

Good St. Valentine, According to Legend

Saint Valentine, ancient legend says, was a Christian martyr of the reign of the emperor Claudius. He was beaten to death in the year 278 A. D. His festival was observed on February 14. The custom of sending valentines had its origin in a heathen practice connected with the worship of Juno.

The first valentines ever penned, tradition asserts, were about 60 lore poems composed by Charles, duke of Orleans, grandson of Charles V of France, father of Louis XII, as mementos of Francia I, during his 25 years' imprisonment in the Tower of London. It was at the battle of Agincourt in 1415 that he was taken after a fierce charge in a vain attempt to retrieve the fortunes of the day—dragged wounded from among the dead"—and kept a prisoner in the Tower of London until ransomed for 200,000 crowns.

An American writer, Miss Esther A. Howland, made the first fancy paper valentine in this country and thereby started the fashion for a business representing hundreds of thousands of dollars.

Fancy valentines were made in England about 1825, and one of these was sent to Miss Howland in 1840. Miss Howland lived in Worcester, Mass., where her father and three brothers conducted a large stationery business. She and her friends were so well pleased with the valentine that Mr. Howland determined to import a few of them from England. When they arrived Miss Howland became convinced she could improve upon them. She made a dozen or more designs and asked her brother, who traveled for the firm, to take the samples with him on his next trip and see if he could obtain orders for them. He surprised his sister by handing her orders amounting to $5,000 on his return. That was the beginning of a large valentine business.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE

COPYRIGHT BY GROSSET & DUNLAP

CHAPTER VII—Continued

—15—

He took one step forward as we halted, and his right arm went up in the graceful Iroquois salute.

"Qua, Ta-wan-ne-ars!" his voice boomed out. "You are welcome home. O my nephew. I can see that you have been brave against our enemies, for you carry a string of scalps at your belt. I can see that you have been honored, for Corlaer walks with you. I can see that you have been fortunate, for a strouge white man walks beside you who has friendship in his face.

"Enter, O my nephew, with your white friends. We are eager to hear of your experiences and the deeds you have done. Enter!"

He turned on his heel and walked before us, and those who had accompanied him fell into single file behind us. So we paraded through the village—or rather I should say town, for it contained many thousand people—built we reached a house in the center where burned the tribal Council Fire and where ambassadors were duly welcomed guests were made.

The ruy-ee-ehs, chiefs and elders filed into it at our heels and arranged themselves around the fire in the center. Then squaws fetched in clay dishes of meats and vegetables of several kinds, as well as fruit, which they set down at intervals around the circle, and at a signal from De-ne-ho-ga-weh everybody began to eat, each one dipping his fingers into whichever dish was nearest or most to his liking, but all governed by the utmost deference toward the wishes of their neighbors.

At the conclusion of the meal De-ne-ho-ga-weh lighted a ceremonial pipe, carved of soapstone, with a long wooden mouthpiece decorated with beads and small, bright-colored feathers. He blew one puff toward the ground, one puff toward the sky and one toward each of the four quarters. Then he passed it to Ta-wan-ne-ars on his right hand, and Ta-wan-ne-ars gravely puffed it for a moment, and handed it to me. I did likewise, and gave it to Corlaer, who handled it to the next man, and so it went the rounds of the fire.

There was a moment's silence, and then Ta-wau-ne-ars began the account of his travels, speaking slowly and without gesticulation. Of course we told me what he and the others had said. Up made me a prodigious liar, but I am anxious to afford some alleviation of your present distress. Perfect relief is not possible, except with time. You can not now realize that you will ever feel better, do not this so? And yet it is a mistake. You are sure to be happy again. To know this, which is certainly true, will make you some less miserable now. I have had experience enough to know what I say, and you are ready to believe it, to feel better at once. The memory of your dear father, instead of an agony, will yet be a sad sweet feeling in you heart, of a pure, and holier sort than you have known before. Please present my kind regards to your afflicted mother.

Your sincere friend,

A. LINCOLN.

COPYRIGHT BY GROSSET & DUNLAP

strong. He has the protection of the forest. The white man foolishly has given him guns to fight with, and steel axes and knives. But the Indian grows weaker; the white man grows stronger, in the end the Indian must go."

He leaned forward until his face was close to mine.

"When all else fails the white man will use fire-water, what you call rum and the French call brandy. The red man cannot resist it—and it ruins him. He becomes a red animal."

"But—"

He would not let me speak.

"And your missionaries told me I must believe in their God?" he went on accurately. "A God who permits white men to do things the God of the Indians forbids! I said to them:

"No. I am an Indian. A good Indian is better than a good white man; he is a better Christian, as you call it. And between bad Indians and bad white men there is only a difference in kinds of evil."

The next day we started upon the march to Jagara. We had not gone very far on the morning of the second day of our journey when I began to hear what sounded like a muffled roar, not thunder, but the bellowing of some gigantic monster, whose breath could ruffle the trees of the forest. Ta-wan-ne-ars smiled at my obvious bewilderment.

"Tis the voice of the Great Falls, brother," he said. "The Thunder Waters."

"Does water make that noise?" I exclaimed.

"Nothing but water."

"I'm impossible."

"So many have said; and, indeed, the missionaries told me 'twas one of the greatest wonders of the world."

In the early afternoon a mist appeared, overhanging the treetops on the horizon and shot with gorgeous rainbows. The volume of noise increased. When we stepped from the trees and the panorama of the cataract lay before us, a vast, seething wall of water that swirled and smoked and tossed and fumed in an endless fight for freedom, I was amazed, staggered by the magnitude of the spectacle.

I stumbled behind Ta-wan-ne-ars into the trail of the portage which led around the falls. Canoes and goods were transported by this route from the Cadaraki lake to the Lake of the Iroquois, where I poured this endless stream; it was a main-traveled road between the French posts in Canada and their outlying establishments in the farther wilderness.

We followed it northeastward until twilight, the roar of the falls gradually diminishing behind us, and came at length into an open space upon the banks of the swift-running river which carried the shattered waters into the Cadaraki lake. Close to the bank stood a flagstaff, and from its summit floated the white ensign of France.

At the foot of this staff, as if resting secure under the folds of the flag, rose the walls of a substantial log house. Behind it was a collection of smaller huts and lodges of bark.

A large, stout man, with very greasy, jalsky black hair, hailed us from the log house as we approached.

"Hola!" he shouted in French. "Who comes so free from the westward without cause or far-parley?"

"A poor, miserable, rascal of a forest-runner," I called back gayly.

"And who might this poor, miserable rascal of a forest-runner be?" he demanded. "These are the king's grounds, and we must know who comes and goes."

"Mon Dieu!" I appended in mock consternation to the stars. "That it is a hard man to deal with! Will you have an objection, monsieur, in the name of Jean Courhevels?"

"None in the world, Jean," he returned promptly, "if you have your trading permit with you. But who is the good savage with you?"

Nobody had told me anything of a trading permit, and I fought for time.

"You call him good with justice, monsieur— By the way, what is your name?"

"They call me Joncaire," he said with a bow of mock politeness.

"Joncaire! Mort de sa vie! The very man I have been searching for!"

"What? How is that?" he asked.

"Ah, but that is a tale! I cannot believe it yet! Am I in very truth on French soil once more?"

"This is the Magasin Royal," he returned. "As for French soil, monsieur, I have no idea. I do not see how you could have been off it."

(TO BE CONTINUED.)

Your lips are red but not as red
As roses I have grown;
Your eyes are blue but not as blue
As seas that I have known;

The full-blown rose will quickly fade
And blue seas change their hue,
But always you shall be my love
And ever I'll be true.

Day Devoted to Tender Thoughts

An old idea is that observed February 14 because of an ancient belief that birds began to mate on that date, hence the practice of sending missives of an amatory or satirical nature.

Today's antidote asserts that if this is true, the birds that started the habit must have been cuckoos.

Other doubts prevail as to the origin of the name, Saint Valentine.

It is something over, a gallant, or a dangler, reference books state when constructed about the venerable old saint, whose name sprang into being about 475 B. C.

Miss Modernity, 1926 sport model, alleges that dangler is the correct word. She, it seems, keeps them dangling on a "line," to quote modern slang. Whether or not she lands them is problematical, sheiks and asphalt arabs declare.

Be that as it may, this same refrain, "I'm wanting a lover, a gallant, or a dangler, reference books state when constructed about the venerable old saint, whose name sprang into being about 475 B. C.

Dickens Not Fine in Delienation of Women

Dickens had no theories about women as a sex; he had no theories about mankind. He did not try to account for his women characters by reliance on a formula. They appeared to him as individuals, and the most successful of his women characters are those with some heavily underlined peculiarity which enabled him to keep up an incessant excitement about them, is the comment of a writer in the Westminster Gazette.

Mrs. Nickleby and Betsy Gamp live vividly because Dickens' imagination was working at high pressure when he created them, and his excitement infects his readers. The women about whom he felt no incensery are human; and therefore credible; but Dickens never worked dispassionately or for enough sustained time to subject to analysis women universal. In creating Miss Wade he felt the pathos of the love-lorn spinster. But he had to make a jest of the elopement with Jingle, whose rascality alone saves the scene from complete reality. Dickens ran away from Miss Wardle's emotional tension because she was a good woman and for women of her type to give way to emotion was a little improper.

For with all his imagination, sympathy, and acute sensibility, Dickens could never persuade himself that women have the ordinary feelings and failings of humanity.

St. Swithin's Day

July 15 is St. Swithin's day. According to an old superstition, if it rains on St. Swithin's day it will rain on the forty succeeding days. The legend of St. Swithin, bishop of Winchester, who died in 862, desired to be buried in the churchyard in order that the sound of the feet of heaven might fall upon his grave." When he felt the pathos of his request he was canonized the monks thought they would honor St. Swithin by removing his body into the choir, and they set July 15 as the day for the ceremony. But it rained on that day and continued to rain every succeeding day for forty days, which the monks interpreted as disapproval of their project by the saints, and accordingly abandoned it. The story is mythical, at least in part, for St. Swithin was never actually canonized by the church.

Female Spiders Rule

The spiders have long had "woman's rights." The females run things and do all the work. The males don't amount to anything and, being smaller than the females and not so strong they have to look sharp not to be eaten up, for the mother spider likes nothing better than a juicy male spider for dinner.

FAIRY'S VALENTINE

I saw a little elf
Who was sitting by himself
In a hollow that was warm and sunny.

He had made a little pan
Of a feather of a wren
And he dipped it into golden honey.
And he wrote with all his might:
"Oh, my darling little sprite,
You are sweeter than the clover
That the bee is busying over.
And I love you, I adore you,
And I'm always growing dearer.
You are quite the sweetest fairy
But I'm yours, and yours forever
If you want it or not!"
And he ended with a blot.

Then I copied out his letter
(Since I couldn't write a better),
And I'm slanting it and send it to you.
For it's true.
—Arthur Guiterman, in Gallenator.

All in the morning bellme,
And I a maid at your window—
To be your Valentine.

"Hod dnwg," quoth the office shelk, who happened to see this, "then's the days I wonder they ain't lived. Wouldna hadda crank Ol' Liz up and go get her. She'd have been on hand for sure, she's."

The custom of observing the day, however, has fallen into disuse in England, while in France, where it is once prevailed on the first Sunday in Lent, the sending of valentines almost has disappeared from folktraits.

But in Amerlca Kid Kupid is making a heavy fight. Today is the day when the pink and white creations, bought with carefully hoarded pennies by little Jimmy, will find their way to Betty.

And the day when the older folks also will dream of other days, when they, too, eagerly watched the village mail man, waiting for the tender missives that quicken to capital letters—

"I LOVE."

Quotation for the Day

Is there anything more interesting than Failure, or anything duller than Success? The eminent Success county all is over. The occupation has vanished. Ambition and Will depart. The fun nothing else to do but live it down. But with Failure all things are possible.—Boston Transcript.

A VALENTINE

A lonely lover, in quiet place,
I found a quaint, old valentine,
A thing of gilt and paper lace,

And lovers' vows in faltering rhyme,
And on the margin faintly trace
The sender's name in faded line.

How easily we smile and sigh
At love and fashions long outgrown,
And yet perchance her heart beat high,
His hopes were valiant as your own—
The girl who held it carefully by.
The boy whose fate must be unknown.

Changes in Customs

Probably the real reason for the lack of formal valentines of lace and tinsel lies in the fact that the girls nowadays demand something less symbolic and considerably more expensive. They can't eat or wear paper hearts. With the coming of the new order, another feature of the old has almost disappeared—the so-called comic valentine, by which one could, with impunity, insult one's foes. Thus the world has forfeited an excellent way of getting back at trafic officers, school teachers, editors and other people. And it is not because old Saint Valentine himself did not approve of the custom, for the learned say that he had nothing to do with the custom that features his holiday.

Inoculation of Legumes Helps

Increases Palatability and the Percentage of Protein in Plants.

When properly done, inoculation of legumes is highly profitable in about 95 out of 100 cases, it is reported by W. R. Carroll, assistant in soil biology at the college of agriculture, University of Illinois. This practice of inoculating either the seed or the soil with proper root nodule bacteria at the time of planting may markedly improve the quality of leguminous crops largely by increasing both the palatability and the percentage of protein in the plants, he said.

Increased Protein Content.

"In 25 of 29 comparisons with canning peas, inoculation brought as high as 10 per cent increase in the protein content. On a highly fertile ncld acll, inoculation produced an increase of 1,339 pounds of shelled peas an acre, or a return, at three cents a pound, of $40 an acre. Inoculation increased the yield of vines 7,857 pounds an acre.

"The protein content of the vines also was increased 35 per cent. This extra amount of nitrogenous material made them much more valuable for either hay or manure. Similar comparisons with inoculated and uninoculated soybeans showed increases of 240 to 1,108 pounds dry weight an acre and increases of 7 to 16 per cent in protein content in favor of the inoculated beans.

Favors All Legumes.

"Inoculation has shown marked favorable influences on practically every species of cultivated legumes. Tests with the alfalfas, the clovers, and the vetches have all shown enough improvement in quality of the crop to warrant the conscientious practice of legume inoculation.

"The effectiveness of inoculation, however, depends somewhat upon: (1) the amount of available nitrogen in the soil, (2) the reaction of the soil, (3) the number of nodule bacteria already present in the soil, and (4) the number of viable nodule bacteria added with the seed."

Wheat Scab Causes Big Loss to American Farmer

Wheat scab claims more than five million bushels of wheat a year in the United States. It is a fungus that attacks the wheat heads about the time they bloom.

For a long time the disease was a mystery. No one knew where it came from or how it started. Farmers and plant pathologists who watched the disease noticed that the attack was most severe on wheat that followed corn. Experiments that followed these observations showed that the fungus grew on both corn and wheat. On corn it causes root, stalk, and ear rot; on wheat it causes the scab.

It has been found that the fungus lives through the winter on dead corn stalks. These overwintering spores attack the wheat. It is a robber that lives in the cornfield but steals wheat.

Inoculate Alfalfa Seed With Soil or Culture

Alfalfa seed can be inoculated with the proper kind of soil or with commercial culture, with but little difference in results when the seed are sown an abundance of the proper bacteria and the commercial culture is good and fresh. Perhaps, when the culture is fresh, a good inoculation of the seed is more likely to occur, than with the soil as usually used.

The soil can be made into a creamy consistency and added to the seed while stirring well for all seed to get some of it. Scattering inoculated soil over the field will usually secure good results, but as a rule inoculating the seed gives as good inoculation and is much easier done.

Pruning Blackberries

The blackberry may be pruned in practically the same way as the red raspberry. The number of canes left to grow next year should be somewhat less—four or five. Strong-growing canes may branch somewhat the first season. It is a good practice to leave some of these side branches, provided they have come through the winter in good condition. The tips of such branches should cut back somewhat. The cutting may be done in the fall, but spring is best.

Good Feed Needed

Many dairy calves are neglected during the winter months and many farm owners feel that feed is too expensive and that it does not pay to give the calves proper care. Calves should have skim milk at least until they are six months old. They will come through the winter in fine shape when this is available along with a limited amount of grain and good alfalfa hay.

Hustle Along Fall Pigs

Fall pigs are harder to deal with than spring pigs unless they have equipment for them. It seems that pigs that are "rough-fed" along develop more trouble than the fast growers. The best results usually come from having them right from the farrowing house as fast as they will gain. Pigs that are on full feed during the winter, get along very well if they have dry quarters, although the quarters may be cold.

New Japanese Pest

Infestation of an entirely new American pest in New York and New Jersey have been received by the United States Department of Agriculture. The species is a scarab or beetle of Japanese origin, and is the third scarab that has been introduced from Japan. It is suggested but entomologists be on the lookout for it. Unlike the other two species which have been introduced, it is not of striking appearance. It is a small, brown scarab which superficially resembles a number of the species of the genus Serica.

The Fencing Bout
ACTIVE play makes snappy appetites. And what satisfies them as well as Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches! So quickly and easily made, too. You can always be ready.

"Freaks" of Nature

Nature presents many puzzles, and though one frequently reads about the curiosities of many of the larger animals, some of the lesser-known "freaks" are more interesting. The great increase in weight of animals, such as the elephant and hippopotamus, is often recorded, but the privet-hawk moth increases its weight 11,000 times in its 32 days of feeding, says London Tit-Bits.

Even the privet-hawk moth's unusual growth is surpassed by that of the goat moth, which increases its original weight 72,000 times, though it takes three years to do so. Some butterflies have no mouths and take no food during their lives.

LINCOLN WAS AGENT OF DIVINE PLAN

An eloquent and at the same time unique tribute is paid to the great Emancipator in the February number of the National Republic by Dr. Herbert Work, Secretary of the Interior in an unusual article entitled "Lincoln; An Agent of the Divine Plan." It is probable that Dr. Work had his inspiration from the beautiful Lincoln Memorial, which is within plain view of his office window in the city of Washington. In conclusion Secretary Wolfe says of the great War President:

"It may be that we are purposely limited in vision so that we may measure that which is human. Our minds wander if we attempt to discover the border line of the spirit as they do when we ourselves approach it. Otherwise we might attribute to Abraham Lincoln a divinity designed as an instrument to meet human needs. Or it may be we are yet so near to him that we cannot see him. Or because the manner of his death, although it broke the heart of a nation, was less tragic than a crucifixion. I do not know. But he did implant beliefs in immortality in the human heart as no other man save that of the lowly Nazarine.

Perhaps it was the likeness to our human condition, and because of its limitations, that we cannot understand his spiritual relations. That belief which asserts the divinity of Christ to be one of degree only and that the spirit of God is within us in not without its appeal, and the life of the Great Emancipator would support it. The silent figure of a President of the United States, obscured from public gaze by the draperies of a pulpit, seeking counsel and consolation from the prayers of the church when the crisis of a civil war pended, was not far removed from the Master in the garden of Gethsemane.

Two thousand years from now, when human trials attributed to Abraham Lincoln and regarded as frailities have been forgotten, then the world may see him also as an agent of the divine plan."

Trained Elephants

When Gen. "Chinese" Gordon took an Indian elephant and imbued to Africa for the purpose of training the African elephants he was only repeating history, says the Philadelphia Public Ledger. For antiquarians believe the African elephants which were used by Hannibal in his crossing of the Alps were inferior to the Indian breed and that they were for the most part controlled and guided by Indian mahouts. Philo is quoted as saying that at the battle of Raphia, Antiochus had Indian and Ptolemy African elephants. These animals, depicted on Carthaginian coins, are clearly of the African type, as shown by their large ears. The indications are that the art of elephant training in early days originated in India and was brought from there to Africa.

Lottery's Golden Days

In the naughty Eighteenth century, before the British people became so virtuous as they are today, a public event almost more palpitating than the lord mayor's show, "Tooley," writes Swift to Stella in 1710, "Mr. Ashton, Colonel Frelad and I went to see the million lottery drawn at Guild hall. The jackanapes of bluecoat boys gave themselves such airs in pulling out the tickets, and showed while hands open to the company, to let us see there were no cheat." In 1711 a son of Lord Abercorn won £4,400 in the lottery. Today it flourishes most magnificently in Spain, but in England, also, in a modest way, at church bazaars; for lotteries are not wicked at bazaars."

Sundials Told Mayans of Passage of Time

Recent discoveries in the ruined Mayan city of Copan have proved that the Mayan method of counting the passage of time was of a highly accurate nature. The inhabitants of the city had in reality a form of gigantic sundial for obtaining the necessary data by taking observations from the eastern hilltop to a pillar of stone or stela erected on a prominent western hill approximately four and a half miles away across the valley in which lay the city. Clear evidence has been found that a correction was made at some date after the western stela had been set up, by the fact that the column was moved from its original position in the center of the stone base to another position farther north. The correction was made when the movable New Year's day fell on the same date as the commencement of the Mayan agricultural year. In the first place the sun set directly behind the western stela on April 9 and September 2, but after the removal the dates were altered to April 5 and September 6.—Illustrated London News.

Ancient Spanish City Holds Open-Air Court

Justice, swift and certain, is meted out every Thursday morning at the Tribunal de las Aguas, or the Court of the Waters, in the Spanish city of Valencia. The courtroom is the pavement, open to the blue sky, and has been thus for five centuries. The judges' bench is a sofa, appearing from some mysterious hiding place, and a portable iron railing provides the bar of justice. There are seven judges. The plaintiff makes his case first, then the defendant states his side of the case. Any interruption brings a fine. One judge announces the verdict and there is no appeal from the decision. Neither the government of Spain nor that of Valencia has any part in the court, yet they honor its decrees. None of its sentences is ever recorded and no lawyers are permitted to appear before the judges. —National Geographic Society Bulletin.

Search Merely Bluff

"Simple truth," said Hi Lo, the Chinese philosopher, "is something we all pretend to seek, yet something we all endeavor to evade."

ALIEN INTRIGUERS

In the Saturday Evening Post of January 15th Garrett Garrett tells the American people much of what they ought to know about international propaganda: how foreign nations successfully connive to put over on this country ideas which serve their interest rather than our own.

Prior to the World War the American people knew little of the deep and devious methods of political propaganda as it has long been practiced in Europe, where an expert system of betrayal and befuddling of public opinion in the interests of the ambitions of certain nations had been developed.

With the beginning of the World War this system was transferred to the United States. If it were in the open, it would not be dangerous. But it is carried on under camouflage so clever that Americans accustomed to deal above the table have fallen easy victims to its deceptive influence.

In the name of peace, international amity, altruism and other highly ethical causes, insidious attack is made on proper national preparedness, on a tariff protective of American political and industrial independence, and on the very principles and ideals underlying the institutions of the United States.

We need more propaganda in behalf of American ideas, ideals and interests, and more public understanding and resentment against alien propaganda. The politician or the newspaper engaged in serving any foreign cause antagonistic to the interests and welfare of the American people is little less than a traitor. The type of newspaper and politician that in every important controversy between the United States and any foreign power, always assumes that his country is wrong, should fall beneath the scorn of every American who believes that the first concern of every patriot should be his own country.

To the Voters of Charlevoix County:

By appointment to fill the unexpired portion of Miss Stewart's term, I became the County Commissioner of Schools. Four years ago you elected me to that office. I am a candidate for re-election, and, if you consider me worthy, I shall appreciate your votes at the primary and spring elections.

ARCHIE C. BELDING

Branch Manager

The Same Old Rubber Check

CLIPPED COMMENT

Newspapers of the country are still playing up editorially the complications with Nicaragua and Mexico and are paying some attention to China. The preponderence of opinion is that the administration should be permitted to work out foreign problems without any partisan interference. Says the Kansas City Star:

"The president is trying to work out a difficult situation. Everybody knows he has not the slightest intention of forcing a war on Mexico. He is simply attempting to live up to his obligations to see that the lives and property of American citizens are protected. Incidentally he is concerned that the same protection be given other nationals in Mexico so that there can be no excuse for intervention by a European power. In these endeavors he should have the support of Congress and the country without regard to party lines. As Senator Lodge said, partisanship should terminate at the national boundaries. Only the persistent following of an unwise and dangerous course by an administration warrants interference. There is never justification for the partisan sniping in emergencies that unscrupulous partisans so often engage in."

The Minneapolis Journal finds fault with the plan to hold an election in Nicaragua, declaring this will not solve the problem and says:

"But if an election is to be held, who is goin gto see that it is a fair election? No one else but the United States marines. Unless they supervise the balloting there will be bloodshed and no decision. But if they do supervise it, who is going to see that what the people of Nicaragua decide on is to be carried into effect? No one else but the United States marines. If they don't, the defeated side will take up arms and fight to prevent the victorious side from taking office and the country."

The Providence Journal in objection to the proposal to turn federal lands over to the states, commends the policy of the present Secretary of the Interior. The Journal declares:

"The Coolidge administration is very properly opposing the attempt of Senator King of Utah to have the federal public lands conveyed to the states in which they are located. Although there has been considerable dissatisfaction on the part of the western cattlemen with some phases of federal control in recent years, their complaints have been taken cognizance of by the federal government. There are in process of being remedied as a consequence of an extensive investigation conducted by the Senate committee on Public Lands during the past summer.

The conservation and reclamation policies of the federal government have been worked out on the theory that the public lands would remain indefinitely under its control. To permit the several states to acquire title to the unallotted public domain would seriously interfere with the execution of these far reaching policies designed to promote the general welfare. The Interior department, therefore, is justified in registering its emphatic disapproval of the program of Senator King and others from the Far West."

Origin of Enameled Tiles

The first enameled tiles were perfected by Luca della Robbia, the celebrated Italian sculptor, who worked at Florence and Rimini in the early Fifteenth century. He adorned the Italian churches with tiles as well as with altar pieces.

Artist's Inspiration

The English painter, Sir Joshua Reynolds, was the first artist to represent a scene from the "Divine Comedy" in his picture of Count Ugolino della Gherardesca, whose horrible death is recorded in the twenty-third canto of "The Inferno."

Consolation

They were on their way home from the football game. He broke the silence by remarking sadly, "Well, too bad we lost the game." "Isn't it," agreed the girl. "But never mind, Bob; we had the best looking cheer leaders."—Boston Transcript.

THE THEATRE

The Phantom Bullet— There is a certain glamour about top-notchers in every profession, but especially so it is true of movie celebrities. One of the greatest western stars is Hoot Gibson, who will appear in his latest Universal-Jewel production, "The Phantom Bullet," at the Palace theatre, Wednesday Feb. 16.

Hoot is a young man, yet in a few short years he has risen from the ranks of the long range riders to the foremost western luminary of the screen. After a thorough schooling in the craft of the cowboy, he began to develop the specialties of the cattlemen and before long he was the best rider, roper and brander, not only in his own outfit but of the entire surrounding country.

His reputation grew as he defeated challenger after challenger, and he finally entered professional competitions and rodeo exhibitions. In this line of work he far outdistanced his closest rivals. And in 1914 he climaxed his adventurous career by capturing the title of World Champion Cowboy at the celebrated round-up at Pendleton, Oregon.

It was but a step from the western shows to the movies and before long, the daring youth had made an impression on the hearts of Western movie fans. From short reel subjects he graduated to five-reel photoplays, then into features and now he is a prominent member of the galaxy of stars who appear in Jewel productions.

In "The Phantom Bullet," he appears to the best advantage. It is probably the first Western feature in which a star is given opportunities to do more than fast riding and roping and Gibson demonstrates that he is an actor of more than ordinary ability. Were he not a Western champion, he would probably be gracing the screen as a farce comedian, at which type of entertainment he excels.

The Sporting Lover—Conway Tearle, popular screen lover, makes his latest screen appearance in "The Sporting Lover," at Palace theatre, next Saturday and Sunday. This is an adaptation of the famous Drury Lane stage hit, "Good Luck."

"The Sporting Lover" gives Tearle the character of Jasper Dane, a wealthy Connecticut, who has inherited a rusticated Irish castle and a lot of mortgages and debts from his eccentric father. There are plenty of scenes in the war and of making his own living. The picture unfolds a story of romance, horse racing and wartime sacrifice.

The English Derby showing arrival of the king and queen, an exciting real Derby race, same tensely dramatic scenes in an army field hospital during an air raid, a splendid comedy element and other scenes are said to make "The Sporting Lover" an entertainment for the enjoyment of the most discriminating.

Barbara Bedford is seen opposite Tearle as Lady Glendolyn Cavens, a war nurse who becomes his officers sweetheart during the period of his convalescence, only to be separated from him when a German bomb wrecks the hospital and buries them under the wreckage. Miss Bedford will be well remembered for her work in "What Every Man," "The Desert Healer," and "Tumbleweeds."

Ward Crane, who was prominently cast in Cecil De Mille's "Classic" assumes the character of Captain Silly Barton brother officer to Connaughton and his rival in romance.

"The Uplifted Christ, Object of All Faith"

By REV. F. T. CONNER
Designed expressly, Study for Institute, Chicago.

Rev. F. T. Conner

TEXT—And I, if I be lifted from the earth, will draw all men unto me—John 12:32.

Christ clarified the text by His own interpretation—"This spake He signifying what death He should die," v. 33. The cross was no apology to the Son of Man, although it was a great crisis. It was the pivotal point of His redemption. John saith used for for removed facts and wove them into the consummation of a great purpose, viz., that of God's eternal plan for man's complete restoration, and crystal's "deliverance from the bond age, same tensely dramatic scenes in an army field hospital during an air raid, a splendid comedy element and other scenes are said to make "The Sporting Lover" an entertainment for the enjoyment of the most discriminating.

Barbara Bedford is seen opposite Tearle as Lady Glendolyn Cavens, a war nurse who becomes his officers sweetheart during the period of his convalescence, only to be separated from him when a German bomb wrecks the hospital and buries them under the wreckage. THE POWER OF PUBLICITY

No more striking illustration of the power of advertising and publicity can be cited than the telephone company. Here in a business which the individual who boasts about his "conservative business judgment" would say had nothing to advertise, "If anybody wants telephone service they know where to get it."

The telephone company has demonstrated the fallacy of such an opinion. Largely as a result of consistently advertising in the American press over a long period of years, it has popularized telephone service in the United States as in no other nation in the world. The people would never use the telephone like they do today, if they had not been continually "sold" to the telephone idea.

There are narrow-minded individuals who claim that the cost of publicity is not a legitimate expense of public service corporations. Publicity which encourages the widest use of an article is the most potent influence to reduce the expense of that article to the consuming public. Without publicity, the demand for an article is small and the cost of production is high. With the proper publicity, the demand for an article becomes universal and the cost of production drops to a minimum.

That is why American enjoy the best public utility service in the world—Such companies are consistent users of advertising space. The telephone has proved this fact beyond the question of a doubt.

Porpoises Visit America

In the month of the mighty St. Lawrence river, and often, when it is very stormy, in the Gulf of St. Lorenzo, may be seen the huge slow-moving porpoises.

About the color of dirty sea water, these huge fish, some of them six to eight feet long, slowly appear on the surface of the water and slowly dive with the motion of a big revolving wheel.

Porpoises are now chiefly prized for the oil and leather which they yield, although they, as well as their cousins, the dolphins, were once an article of diet.

A Janitor of Arts

Charlie Jenkinson left for several years served faithfully as the caretaker of the "South building," one of the dormitories at the University of North Carolina. One day he came into the president's office and presented his resignation.

Doctor Battle expressed some regret, saying that he hated to lose him.

"Yaas, sir," replied Charlie, "but you see it's dis way, Mr. President. You know Poe is a preacher, and de bishop at de las' conference has done sent me down to Turboro, N. C., cause he says dat change needs a university man!"

Jealousy to Order

"Now look jealous!" commanded a director of a movie actor he was testing in a close-up. The young actor tried his best; he looked pained, disgusted, angry, but the facial expression of jealousy eluded him. "I guess you can't do it? grumbled the director. He called another actor.

The discomfited youth sank into a chair and watched his rival step in front of the camera. After a moment the director turned sharply to the youth in the chair. "That's it!" he cried. "Hold that expression!" And he grabbed the youth and forced him in front of the lens.

Trapping the Deceitful

The finest artful maneuver is to pretend to fall into the trap that is laid for us; for we are never so easily deceived as when we think we are deceiving others.—La Rochefoucauld.

A Fiction Disproved

You can't convince any doting mother of a new baby that all men are not fools and equals. She knows right well that hers was born vastly superior.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Feb. 12-13

"The Sporting Lover," with Conway Tearle and Barbara Bedford. The kind of a man every woman loves, and the kind of picture you'll cheer all through. When the drums of war threaten to shake the courage of most men this man comes fighting through—through to love. Prize mounts of England in the most spectacular horse race you've ever seen. Neck and neck struggles down the the track; hoof beat; heart beat; it beats all for thrills.

Also Educational comedy, "Wife Shy."

Wednesday Only, Feb. 16

Hoot Gibson in "The Phantom Bullet." Remember the "Calgary Stampede" and the "Arizona Sweepstakes," more action and speed than either with an absolutely new kind of thrill. "The Phantom Bullet"—its quicker than the eye, swifter than the fastest airplane, surer than a mountain goat and will give you a supreme thrill with Hoot behind it solving the mystery of the ghostly bullet that laid his father low. Hoot shoots and rides, fights and loves, and the gorgeous picture moves fast as lightning. It's a hair raising story but with Hoot in it—well Hoot is there all the way from the Jack.

Also "Flaming Fet" and Fox News.

Coming—Richard Dix in "The Quarterback."

Coming—Harold Lloyd in "The Kid Brother."

Coming—Eddie Cantor in "Kid Boots."

CHURCHES

Congregational Church

Rev. B.G. Mattson, D.D., Minister

First of all: This Thursday night, February 10th, the day this paper is issued, our families and friends are invited to attend the monthly church night fellowship pot-luck supper. Bring no money, only a basket with dishes and silver, sandwiches and one small dish of prepared food. We shall sit together, sing together, eat together and think together of the meaning of our covenant of fellowship. This will be the topic of a brief address by the pastor. Mrs. Stelter will lead us in fellowship singing.

Sunday morning sermon "Christ Conscious." Subject, "Soul."

Sunday school 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Olelo.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Soul."

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

Registration Notice!

To the Qualified Electors of the City of Charlevoix, State of Michigan:

Notice is hereby given that in conformity with the Michigan Election Law, I, the undersigned city clerk, will, upon any day except Sunday and a legal holiday, the day of Primary Election, receive for registration the name of any legal voter in said city not already registered who may apply to me personally for such registration. Provided, however, that I can receive no name for registration during the time intervening between the second Saturday before the day of election, or the day of primary election.

You are further notified, that I will be in my office, February 14th and February 19th, 1927, from 8 o'clock a. m. until 8 o'clock p. m. of each day for the purpose of registering such of the qualified electors in said city as shall properly apply therefor.

By Charles H. Lamphear,
D. S. Payton, Deputy. City Clerk.

Chest, Lisle Ance, Fear, Drew Young, Anger, Marie Novak; Honor, Junior Hardy; Love, Helen Miller; Courage, Clare Tomlinson; Children and Fairies.

Services held at the Chapel on West Hurlbut Avenue:

Morning service at 10:30.

Sunday School at 11:45.

Evening service at 7:30.

Prayer Meeting, Wednesday evening at 7:30.

We extend a cordial invitation to you to come and hear the gospel messages of peace and consolation. Christ extends his right hand of fellowship to all. "Come unto me all ye that labor and are of heavy laden, and I will give you rest." We would be seeking for soul rest. The most neglected part in all God's creation. The internal satisfaction which is everlasting. Of this the Master says: "Ye shall never thirst again." Come get your part.

The Sewing Circle will meet at 213 West Upiight avenue, at Archie Chew's next Thursday afternoon. All are welcomed.

Methodist Church.

C. E. Pollock, Pastor.

Sermons:—

"Enriched Goodness" 10:30 a. m.

"Abe Lincoln and Jeff Davis" at 4:15 p. m.

The service at 4:15 p.m. next Sunday will be another great vesper service with features of interest and great profit. A wonderful set of pictures will be shown, dealing with a subject dear to the heart of the great emancipator. Music, sermon, pictures and worship will make this Lincoln vesper hour memorable.

Epworth League meets at 6:00 p. m. the topic will be "In Village, town and country."

Dr. F. F. McMillan will be the speaker next Monday evening at the Men's Meeting. His subject will be "Abraham Lincoln." The men will have a very splendid treat. A good supper and twenty minutes of fun are on the program, beginning at seven o'clock.

Tuesday evening the young people's prayer meeting comes at seven and lasts one half hour.

Social meeting Tuesday at seven.

Prayer meeting Thursday evening at seven thirty.

—) PERSONALS (—

The Busy Bees will meet with Mrs. Frank Allison Friday afternoon.

W. C. Palmer of Clarion, was a business visitor in Charlevoix last Saturday.

Martin Ruhling of East Jordan, was a business visitor in Charlevoix early this week.

Attorney E. N. Clink of East Jordan, spent Monday and Tuesday in Charlevoix on business.

The W.C.T.U. members will meet with Mrs. F. F. McMillan, 219 Park avenue, Friday at 2:30 p.m.

Dexter Relief Corps will serve a dinner on Thursday, February 17th, at the Moose hall at 12 o'clock. Bill 50c. 1-t

Mr. and Mrs. Chas. Hamlin left for Niles, Mich., last Tuesday, where they contemplate spending several weeks.

Dwight Smith of Washington, D. C. is spending a vacation with his parents, Mr. and Mrs. Joseph Smith of this city.

Ralph N. Washburn was a visitor in Traverse City last Tuesday night where he was interested in a K. of P. function

Edward Smith made a business trip to Grand Rapids early this week in the interest of the firm of Wyers and Smith

Mrs. Wm. Fochtman of Petoskey, was a guest at, the home of Mr. and Mrs. Joseph Foster for several days recently, returning to Petoskey Saturday.

R. E. Rosenbrook of Grand Rapids, is acting as station agent at the P. M. station temporarily at least, succeeding Archibald Russell to the position.

Emmet county has but one candidate this spring for the office of County Commissioner of Schools. Mr. A. M. Hootman who is commissioner at this time.

Renovation work and refinishing of fixtures at the L. P. Adams cigar store is in progress this week. All making for a new and neat appearance in the salesroom.

Thursday morning, Feb. 10, no clouds visible, bright sunshine, wind southerly and moderate, just a trace; thermometers at seven o'clock registering 13 above zero.

Dr. J. Leahy of Petoskey, spent Monday and Tuesday here on professional business, one day longer than usual being double no complete his work on the day advertised.

Miss Mary Finucan is taking a vacation from her duties at the post office for a time and started for Buffalo, N. Y., Wednesday where she will visit relatives for a short time.

Dwight L. Hammond a long time resident and official of Boyne City, went to Ann Arbor last Monday to enter the state hospital for medical treatment, the trip being made by automobile.

Late reports indicate that several entries will be made in the various sports planned for Friday and Saturday by athletically inclined persons from Petoskey, Boyne City and East Jordan.

Fuller Orchestra, a Traverse City organization, will furnish music tonight at one of the series of dancing parties that have been given popular functions this winter given by the Local K. of P. order

Dr. F. F. McMillan and Miss Berth Larson left for Rochester, Minn., Monday where they will spend a short time at the Mayo Brothers institution taking some special work along medical lines.

W. S. Richardson made his start for California last Tuesday with the expectation of spending the next two months on the Pacific coast, returning to Charlevoix accompanied by Mrs. Richardson, some time in April.

Mrs. Clarence Heise entered Charlevoix hospital last Friday night suffering with a case of appendicitis. An operation followed the same evening which was successful and Mrs. Heise is showing evidence of quick recovery.

Banking hours and a large number of business places will be closed Friday and Saturday afternoon during the winter sport events scheduled for those periods, while the banks will remain closed all day Saturday as it is a legal holiday.

The Charlevoix debating team will according to present schedule meet the Harbor Springs team tonight at Harbor Springs. Harbor citizens are solidly back of their team and as a whole hope that Charlevoix does not get the decision.

Captain John and Harold McCann motored to Cross Village last Saturday, Harold returning to Charlevoix and Capt. John continuing his trip to St. James to see his aged father, James McCann, who for some time past has been seriously ill.

Friday evening, Feoruary 25th, members of the Local K. of P. will give an old time dance at their hall with Merritt Miller's orchestra furnishing music for the same. Dancing parties given by the K. P.'s are delightful events always well attended and thoroughly enjoyed.

Skiing and tobogganing was prime at Mt. McSauba last Sunday and a large number of local enthusiasts out of door sportsmen and women spent hours at their favorite sport enjoying to the full the excellent day; the exhilerating healthful sport; some few of whom took occasional tumbles of a minor nature and in the process became more or less entangled with snow, skis and shrubbery

Ben J. Gallagher of Marinette, Wisconsin, spent Tuesday night with relatives in Charlevoix. He is making a trip by automobile and returns by way of Chicago, thereby taking the drive around Lake Michigan during the midwinter months. Mr. Gallagher is a cousin of Mrs. Alson Smith, 304 State st

Members of Charlevoix Chapter No. 141, R.A.M. will entertain members of Local Charlevoix Lodge No. 282, F. & A. M. at the Masonic temple Monday evening, February 14th. Music, talks and a banquet will be the form of entertainment all of which will go far toward making the evening one of interest and pleasure.

Mrs. E. E. Cross had the misfortune to fracture her left leg between knee and ankle last Friday afternoon, when going from her home to the residence of her daughter who resides nearby. A nice path covered by a slight amount of snow and which was frequently followed in passing back and forth between the two houses, heretofore with safety, was the cause of the injury which will keep Mrs. Cross confined to her home for an indefinite period.

Lawrence R. Chase went to Battle Creek last Monday for the purpose of entering the American Legion hospital for observation and treatment. Mr. Chase has been given some government hospitals since his return from France at the close of the world war and thus far the opinion of such as those of his physicians to effect a cure or to any great extent improve his physical condition has been entirely unsatisfactory results—there being but little if any improvement in his health.

A letter from the Kalamazoo Loose Leaf Binder Co. under date of February 7th, states: "We are interested in advertising manager, a copy of which was furnished the Sentinel by Charles H. Lamphear with the intention of interviewing their salesmen at the Inn during the first week in September—which has been set aside for 4,000 years or more, is still the common money in the interior of China.

Expensive Suit

The first bit of gold discovered in Australia was found by a native bushman. It was a very large lump and he had an idea that it was worth something but he did not realize its full value. Seeing his employer counting some gold pieces he said he would bring him a lump of the yellow metal in exchange for a suit of corduroy. The exchange was quickly effected and the native brought a lump weighing more than 190 pounds and valued at more than $25,000.

Time Lost in Effort to Capture Happiness

For many years now I have been watching the pursuit of happiness. What a beating of bushes! What a scurrying hither I have spent! It would appear that most people regard happiness as a kind of wild rabbit which they must hunt and capture. They pursue it with horses and hounds and ships and high-powered motor cars. They stop at no expense. Yet I have not known a pursuer to capture happiness. They return to their homes disappointed. Often they have found the Angel of Happiness, after searching the world for her, waiting for them on their own door steps and she has welcomed them and for a day or two they have been filled with the light of her countenance.

"At last," they say, "we have captured her."

Then, suddenly, she is gone.

"What we need is more money and a bigger house," some of them have said.

And this has been a too common plea: "If I had another husband or another wife—none one who really loved me and my great purpose—then I should be able to find happiness and I am sure that she would stay with me."

All these heliphuts of the chase have witnessed and the tragic failures which have followed them. I have come to think that no one who pursues Happiness can ever hope to entch her. And here I am in accord with good authority. Mr. Robert Spencer has said that life consists in being in correspondence with environment. What then is happiness but a full correspondence with a good environment? How may one achieve it if the environment is forever changing? — From "Opinions of a Cheerful Yankee," by Irving Bacheller.

Lure of City Holds Even Poorest People

The hopelessness of life in the large people to move from the crowded cities to the serenity and beauty of the country, according to the Literary Journal, was brought home to a Los Angeles who was asked for a copper by a hobbling old man. When he asked why he did not live in the country, where his age pension of only ten shillings a week would go much further than in the city, the old fellow was ready with his reason. "I should be miserable there," he said, "without the refinements of London life. Being pressed for particulars he said that these were the music in the parks and the benefit of the public libraries and the very fund of the British museum. George Bernard Shaw was his favorite author. And there you are. It reminded the banner of the old people in Shoreditch workhouse who didn't want to be sent to the country. They would have London and didn't want to be kept awake by the nightingales. One of them liked best of all sounds the chill, clip clip, clop and the jingle bells on the lonesom cabs. What is the humanitarian to do with people who are as human as that?

Faded Superstitions

When her ship was really upsetting tions or not, the bride of fifty years ago was sure to observe certain little details that were ignored by those from one to another. For instance no bride dared to leave home without "something old, something new, something borrowed, something blue." To day they pay no attention to that or any other similar notions. "There was a time," says a venerable clergyman who has officiated at more marriages than he can remember, "when brides were superstitious, but I find none of it now. Brides coming to the church to be married when repairs are going on in the building will mount the ladders with a laugh. But forty years ago, however, I walked at the altar by vain on one occasion, the bride refusing to go on with the ceremony because a black cat had crossed her path as she entered the church door."

Decorative Shoes

Most shoes of the Middle ages had soft uppers, sometimes closed to the ankle, at higher, but more usually down the front and laced over with decorative straps. Stocking boots, wooden galter shoes and simple sandals or soles sewed to the end of tights were also worn. Tops of high shoes and boots were often folded over or trimmed with fur. During the Thirteenth century pointed toes of shoes increased in length, when the points were sometimes turned up and held and tied to a garter just below the knee. High wooden clogs were worn to increase the height. In the last quarter of the Fifteenth century pointed toes began to be succeeded by round ones that later became broad and almost square.

"Go to Jericho!"

When he wished to be free from disturbance Henry VIII used to go to a house in the manor of Hackpenny, about seven miles from Chelmsford.

As a disguise, this place was given the name of Jericho, and when anyone inquired for the king while he was seeking peace it was customary to say that he had "gone to Jericho." The place usually goes by the name of the "Jericho estate" or the "Blackmore priory," and a brooklet running through the village is called the Jordan."

The popular saying may have been originally a rebuke to young upstarts; a verse in the second book of Samuel reads: "Tarry at Jericho until your beards be grown."—London Tit-Bits.

Last Eastern Wilderness

Great Smoky mountain in North Carolina, recently created a national park by congress, constitutes the last remnant of American wilderness of any size in the eastern states.

Women Severe

"One finds the fair sex far more severe than the old-fashioned jury," was the opinion expressed by Sir Henry Berkeley Neild during a discussion in the British house of commons.

Cow Has Triplets

Denison, Texas.—Triplets were born to a cow owned by J. C. Martin, wealthy delegram. Each is of normal size and in good condition.

Good Roads Notes

Planting trees along the roads is a good plan if the horse-thief-auto can develop a tree with a bumper.

* * *

At the present time it is estimated that in the United States there are no fewer than 44,000 miles of concrete roads, as against only 300 miles in the United Kingdom.

* * *

Twenty times around the world! Such, at any rate, is the distance American motorists could travel on their 500,000 miles of surfaced roads.

* * *

Traffic problems are just as baffling in the Alaskan cities of Ketchikan and Juneau as they are in large American cities. The difficulty is not in overcrowding but in unpaved streets.

Condition of Nerves Cause of Stammering

Almost every movement of our body is due to the involuntary obedience of our muscles to the directing will of the brain. This generally happens with our talking. We will to make certain sounds, and the proper muscles automatically force the wind from the bellows of our lungs here and there, against the roof of the mouth, through the teeth, and so on.

It sometimes, however, happens that the nervous connection between the brain and the various sets of sound-making muscles is weak or has been damaged by some shock.

Then the brain must either give its orders very slowly, something like playing an organ with one finger, or it'll goes faster must risk playing the wrong notes or getting the whole machine so tied up as to make gaps between the movements. In other words, the sufferer stammers and stutters more and more when he is excited and tries to "play" quickly. Nor will he be cured till his nervous system is strengthened and he has educated his speech muscles to obey him without question.

Salts Fine for Aching Kidneys

When Back Hurts Flush Your Kidneys as You Clean Your Bowels

Most folks forget that the kidneys, like the bowels, sometimes get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean and the moment you feel an ache or pain in the kidney region begin drinking lots of water. Also get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast, for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and is intended to flush clogged kidneys and help stimulate them to activity. It also helps neutralize the acids in the urine so they no longer irritate, thus helping to relieve bladder disorders.

Jad Salts is inexpensive; makes a delightful effervescent lithia water drink which everybody should take now and then to help keep their kidneys clean.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in trying to correct kidney trouble while it is only trouble.

Millions for Religion

For endowment of chairs of English Bible and departments of religious education in Presbyterian colleges, funds amounting to $2,000,000 have been provided in the last ten years.—School Life.

Sniffles!

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

Our climate is a series of surprises, and among our many irregularities of the weather, the only trustworthy one that I know is that, when it is warm it is a sign it is going to be cold.—Ralph Waldo Emerson.

FOR BREAKFAST

As 85 per cent of the housekeepers in the land are mistaken, it is wise to prepare as much of it as possible the night before, so that a satisfying breakfast may be quickly prepared.

An alarm clock to insure the right time of rising will give ample time to arrange the meal unhurriedly. He who goes mornings from a quiet, comfortable and well-ordered home is twice as capable as a business man who leaves with a hasty breakfast, perhaps prepared by himself, often leaving home with the unpleasant memory of a disordered house.

A cozy, warm breakfast is a most convenient one, as it saves brain fag, and you know just what you are to prepare and they know just what they will have; however, the most of us like to avoid monotony and like an occasional break in the daily round. The usual fruit, cereal, bacon, eggs or toast with a cooky or doughnut to finish off with, with the cup of coffee, is usually served but we all know how to prepare such a breakfast, providing we have the food.

A pleasing change is secured by serving a variety of cereals as well as those which need no cooking. By serving a variety the food is never monotonous, and the favorites may be more often.

Broiled or baked mackerel, codfish balls, finnan haddie, smoked fish are all admirable for the first meal of the day.

Of the meats, the favorites are hacon, ham, chops, sausage, corn beef hash, fricted beef and ajiffs besides.

Eggs are usually a favorite breakfast dish for the majority and are served in such a variety of ways that they need never become monotonous.

Omelets form an especially desirable dish and they, too, are of an endless variety, Scrambled, fried, poached and cooked in the shell, cooked in ramekins with cream, and eggs in combination with rice and other foods too numerous to mention, are all desirable breakfast dishes.

Good Everyday Foods.

The use of leftovers is a daily problem in most homes. How to serve them without appearing to be leftovers is not always easy.

Baked Codfish Puffs.—Put a cupful or two of shredded codfish in a bowl, add boiling water to cover and let stand to cool, then drain and add to a pint of mashed potato, then add a cupful of white sauce, one teaspoonful of onion juice, two teaspoonfuls of butter, salt if needed and plenty of paprika. Beat until light, then put into a baking dish, brush with fat and bake twenty-five minutes or until brown.

Ham Loaf.—Put three cupfuls of boiled rice and two cupfuls of cold boiled ham through a meat chopper, add one-half cupful of white sauce, one-half cupful of mixed parsley, one tablespoonful of onion juice, salt, pepper to taste, one teaspoonful of worcestershire sauce, and a well-beaten egg. Mix all together and press into a brick-shaped pan. Bake thirty minutes in a moderate oven. Serve with a sauce or sliced cold.

Scalloped Onions With Peanuts.—Peel and cook six onions, chop two-thirds of a cupful of roasted peanuts. Cook two tablespoonfuls each of fat and flour, add seasonings and a cupful of milk. Put the onions and peanuts in layers in a buttered baking dish, cover with buttered crumbs. Bake until brown.

Raisin and Apple Salad.—Wash one cupful of raisins, add one-fourth of a cupful of apples and one cupful of mayonnaise. Line a bowl with lettuce, pile in the diced apples and raisins, cover with the mayonnaise. Serve with neufchatel cheese balls and garnish with cubes of tart red jelly.

Eggs a la Suisse.—Heat an omelet pan, put in a tablespoonful of butter and when melted add one-half cupful of cream. Slip in four eggs one at a time and sprinkle with salt and pepper, with a few grains of cayenne. When the whites are nearly firm sprinkle with two tablespoonfuls of grated cheese. Serve on buttered toast.

Cauliflower With Cheese Sauce.—Cook the cauliflower broken into flowerets in boiling salted water until tender. Prepare a white sauce with one cupful of milk added to two tablespoonful each of flour and butter cooked together, add salt and pepper and a cupful of grated cheese. Cover the cauliflower with the sauce and bake in a hot oven until well heated.

Grapenuts Pudding.—Dissolve one package of lemon jello, add one cupful of steamed raisins, one-half cupful of sugar, one cupful of grapenuts, six walnut meats cut fine. Mix all together and mold. Serve with whipped cream.

Nellie Maxwell

"Avocation" and "Vocation"

The definition of "vocation" is "a minor or irregular occupation, side interest, diversion." The word has been confused with "vocation," but does not have the sanction of good writers as a synonym for "vocation."

Protected Swans Multiply

Wild swans are protected under a federal law prohibiting killing them. The birds are increasing under this protection and are numerous now along the Gulf and Atlantic coasts.

NOVEL GOODS FOR SPORTS WEAR; SMILE APPROVAL ON FLOPPY BOWS

It's to be a gay, gay time in fashion town this coming season, according to signs and prophecies. Especially is this true in respect to clothes of sports classification, where color and design are conspiring to join in a giddy whirl of fascinating novelty.

As to the term, sports wear, the mode is making a very free use of it these days. The trend is to wear so-called sports attire for almost every occasion except the most formal. Surely, a sports frock as fetching as either of the models in this picture would give the woman of fashion perfect poise in the consciousness of being

Two Fetching Sports Frocks.

in gay Rumanian colors will animate many of the forthcoming frocks, blouses and wraps.

The reign of the soft fabric frock is to continue, according to the foreword of leading fashionistas. Which means that self-trimming will play an important part in the dress-styling program for spring. The gown of sheer and supple weave which expresses "beauty unadorned" in so far that it interprets style and grace solely through fabric manipulation, has captivated the fancy of women of fashion. Now that the new dress-goods showings include so many materials which are exquisitely supple or alluringly sheer, the vogue for the self-trimmed frock bids fair to outrival its past record.

Among self-trims heralded as important for spring, the big floppy bow takes precedence over almost every form of fabric-manipulation. "When in doubt" either the net, yielding fabric foto a huge bow at the front or the sides of the gown promises a smile of approval. This theory was happily put into practice by the creator of the charming afternoon dress of beige crepe shown to the right in the accompanying picture. As is just such artfully tied bows as is this one which one sees on the new Paris gowns sent to our shores for the gratification of milady who plans to winter under southern sunny skies.

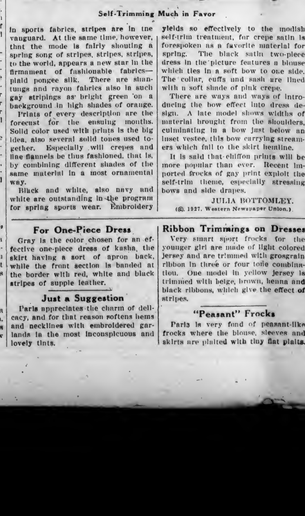
Fortunate is it that crepe satin

Self-Trimming Much in Favor

in sports fabrics, stripes are in the vanguard. At the same time, however, that the mode is fairly shouting a spring song of stripes, stripes, stripes, to the world, appears a new star in the firmament of fashionable fabrics—plaid pongee silk. There are stunning tugs and rayon fabrics also in such gay stripings as bright green on a background in high shades of orange.

Prints of every description are the forecast for the coming months. Solid color used with prints is the big idea, also several solid tones used together. Especially will crepes and fine flannels be thus fashioned, that is, by combining different shades of the same material in a most ornamental way.

Black and white, also navy and white are outstanding in the program for spring sports wear. Embroidery



yields so effectively to the modish self-trim treatment, for crepe satin is foresposken as a favorite material for spring. The black satin two-piece dress in the picture features a blouse which ties in a soft bow to one side. The collar, cuffs and sash are lined with a soft shade of pink crepe.

There are ways and ways of introducing the bow effect into dress design. A late model shows widths of material brought from the shoulders culminating in a bow just below an inset yoke. This bow carrying streamers which fall to the skirt hemline.

It is said that chiffon prints will be more popular than ever. Recent imported frocks of gay print exploit the self-trim theme, especially stressing bows and side drapes.

JULIA BOTTOMLEY.

(©, 1927, Western Newspaper Union.)

For One-Piece Dress

Gray is the color chosen for an effective one-piece dress of kasha, the skirt having a sort of apron back, while the front section is banded at the border with red, white and black stripes of supple leather.

Just a Suggestion

Paris appreciates the charm of delicacy, and for that reason softens hems and necklines with embroidered garlands in the most inconspicuous and lovely tints.

Ribbon Trimmings on Dresses

Very smart sport frocks for the younger girl are made of light colored jersey and are trimmed with grosgrain ribbon in three or four color combination. One model in yellow jersey is trimmed with beige, brown, henna and black ribbons, which give the effect of stripes.

"Peasant" Frocks

Paris is very fond of peasant-like frocks where the blouse, sleeves and skirts are plaited with tiny flat plaits.

THE WORLD'S GREAT EVENTS

By ALBERT PAYSON TERHUNE

Oliver Cromwell

A MIDDLE-AGED farmer—red and swollen of face, slovenly of dress, dirty of linen, harsh of voice and woefully lacking in dignity—was so disgusted with political conditions in England in the first half of the Seventeenth century that he decided to emigrate to America. King Charles I refused him and his companions permission to go. In doing so the king virtually signed his own death warrant and the death warrant of "the divine right of kings." For the would-be emigrant was Oliver Cromwell.

It was a crucial time in England's history. Queen Elizabeth had been succeeded by James Stuart, son of Mary Queen of Scots. James, "who never said a foolish thing and never did a wise one," was succeeded by his son, Charles I. Charles inherited enough of the vile traits of his grandmother, Mary Queen of Scots, to make him thoroughly untrustworthy, despotic and inconsiderate of the people's rights.

He set aside the wishes of his subjects, as expressed through parliament; levied heavy and unjust taxes; pursued an unpopular foreign policy; was suspected of conspiring against the established religion of England.

In 1642 king and parliament came to an open rupture, and civil war swept England. Oliver Cromwell—farmer, legislator and staunch Presbyterian—was made captain in the parliamentary army. He was an eloquent preacher, but had no knowledge of war. Yet he was quickly promoted to a colonelcy and raised a cavalry regiment of Puritans (nicknamed "Ironsides"), whose powers of prayer and exhortation were only exceeded by their zeal for slaying royalists. With Bible in one hand and sword in the other, Cromwell led his invincible band of psalm-singing fighting men to victory after victory. The king's followers were known as "Royalists" or "Cavaliers"; the parliamentary army, from their close-cropped hair, being dubbed "Roundheads." Little by little, at Marston Moor, Naseby and elsewhere, the Roundheads broke down the royal power, until at last in 1646 Charles fled for refuge to his father's people, the Scotch. The thrifty Scottish lords promptly sold him to parliament (Cromwell being largely instrumental in the "purchase"), and he was brought back to England a prisoner.

Now that the king was captured, parliament did not know what to do with him. Cromwell and others sought for means by which Charles could still nominally reign while parliament should actually direct the government. But they could not trust the stubborn monarch.

So his adherents were cleared out of parliament, the house of lords dissolved, a special court was chosen and Charles was tried, condemned and in January, 1649, beheaded; Cromwell's name appearing first among the signers of the death warrant. Scotland, Ireland and Wales rebelled against this drastic act and Cromwell successively crushed the three revolts.

Parliament's methods did not wholly suit him, so he disbanded that body by force and formed another composed of his own friends. Two years later parliament made him sole governor of the British commonwealth with the title of "Lord Protector." He ruled wisely and well, winning the approval of the people at large by giving them added liberty. The nobles and the clerical element hated and feared him.

Parliament, wholly under his control, offered him the title of king. But the offer met with scant popularity in the nation at large. Wishing to feel the popular pulse and doubtless fearing to share the fate of Caesar, Cromwell refused, to accept the proffered honor.

In 1658—in his sixtieth year—Oliver Cromwell died. His son Richard—weak, amiable incompetent—succeeded him as lord protector; but anarchy at once broke out, and General Monk, Cromwell's right-hand man, became instrumental in bringing Charles' son, Charles II, back to England as king. After this restoration, Cromwell's body was dug up from its grave in Westminster Abbey and beheaded. The head was stuck on a pole in front of the abbey and the trunk was hung in chains on a London hill gibbet. A regulsion of feeling set in. England was tired of long laws, puritanism, plain dress and piety. Forgetting that those things had saved her from corruption, perhaps from total ruin, the nation swung to the other extreme. Under Charles II gayety, frivolity and extravagance held sway, and Cromwell was denounced as a usurper.

It is hard to form a just idea of Oliver Cromwell. He was the first great republican, and the first Englishman to exploit successfully a government for and by the people. He also built up a political machine and system of bossism that is unsurpassed. His severity may be partially forgiven when one remembers that through that severity alone he was able to hold in check the many inquiet elements in his realm. He was the last and greatest of the Puritans; and with him died the physical power of puritanism in England.

He and puritanism were the strong, distasteful medicine which alone could cure his country's debilitated "body politic." His treatment of Ireland was unjustifiable. His government of England was almost ideal.

Chronometers' Correctness

Time-measuring instruments have now attained extraordinary perfection. Some years ago even the finest chronometers could not be relied upon implicitly, and after traveling a few weeks from land the captain of a ship could not be certain of his longitude within a margin of about fifteen miles or so. Today these instruments are made so accurately that after a journey right round the world they show no greater variation than one second a week and sometimes less.

In Later Years of Life

Good Elimination is More Than Ever Important.

As we grow older, there is apt to be a gradual slowing up of bodily functions. The kidneys are the blood filters. Proper function cleanses the blood stream thoroughly. Sluggish function as apt to permit some retention of uric acid and other poisons. This tends to make one tired, listless and achy —to have drowsy headaches and dizziness and perhaps a touch of backache. That the kidneys are not functioning properly is often known by scanty or burning passages. Elderly people recommend *Doan's Pills* in this condition. This tested diuretic is endorsed the country over. Ask your neighbor!

Tanlac Responds to Call For Relief From Pain

Amazing Improvement in Miss Haberbush's Health Surprises Friends. Boils and Other Troubles Caused by Nervousness and Upset Stomach Relieved. Gains 15 Pounds

Thousands of Illinois men and women suffering from nervousness and run-down condition may discover the surest way to get quick relief in the experience of Miss Mary Haberbush, 2021 Prairie Avenue, Chicago, whose marvelous recovery from a long siege of suffering surprised everyone.

If you are tired and fagged out; if your stomach rebels at taking food and you spend miserable hours doubled up with pain caused by indigestion; if you do not sleep soundly and dizzy spells attack you when you stoop over; if you are losing weight and feel old—watch out!

"Three years ago I was in a run-down weakened condition," says Miss Haberbush, "suffering from indigestion, being unable to sleep and getting up in the morning after a long night of tossing and turning, tired, sapped of my strength. Poisons swept through my system and bad blood caused boils that pained terribly and compelled me to carry my arm in a sling.

"I sought relief but failed. Then a friend told me of Tanlac. The first bottle gave me an appetite. Indigestion and boils gradually disappeared. I began to sleep better and arise refreshed. Soon my nerves calmed down. I took seven bottles in all of Tanlac. It restored my health."

Thousands have found happy relief from pain and gained new strength by taking Tanlac. It usually builds up the body, wipes out causes of poison. Head their advice. Keep well, keep youth and health—take Tanlac. Get your first bottle of Tanlac from your druggist today! Over 40 million bottles sold.

The man who smiles when everything goes wrong soon finds that things are not as bad as he thought.

Thinking about his thoughts instead of his shoulders makes a man stoop-shouldered.

French King First to Employ Sealing Wax

The first gummed envelopes were made in 1840 in England and three years later a machine was invented by Warren La Rue and Edwin Hill for folding and gumming the envelopes. Sealing-wax was not used until 1118, when Louis VI sponsored it in France.

Before that, all letters and documents were sealed with the impression of a ring in clay. This device was superseded by the use of a lump of pitch, wax and plaster. Yellow beeswax was next used and was succeeded by sealing-wax mixed with other substances. This made a white, or nearly white, seal.

A century later red wax appeared and, some time after that, green. Bluish-colored wax was next secured with yellow, brown, rose and blue wax. Black also was used at this period, but was mostly employed by the religious orders.

Waters for seals were first used in Italy and were brought to France by French army officers, who thus were instrumental in introducing them to the rest of the world. The first wafers were cut from a thin sheet of dough, moistened and applied to the folded missive.

Tender Notes Burned by Mrs. Washington

After George Washington's death his widow burned every letter that she had received from him, with the exception of three or four that escaped apparently by accident.

No sensible historian ever doubted the motive behind this letter burning episode. Martha Washington knew at the time, indeed, the whole world knew, that George Washington was a star of the first magnitude in the field of history and that every scrap of his writing would be treasured and printed. Did she think that his letters to her were so sacred in their intimacy that posterity had no right to read them?

But there are other and more sensible hypotheses. She was suddenmortale and susceptible in an extreme degree. Considering her as surrounded by such limitations of perspective, one may readily conceive that her native modesty have been simply one of aristocratic seclusion.

In destroying his letters she effectually effaced herself, for she lived only in his reflected light. But that may have been what she wanted. The highest form of pride is a disdainful humility.—The Nation.

The Other One

The captain saw a young recruit trying to cook his breakfast with an unaccustomed fire. He showed him how to make a quick-cooking fire.

"Look at the flame you're wasting," he said. "When I was in the Himalayans I often had to hunt my breakfast. I used to go about two miles in the jungle, shoot my food, skin or pluck it, then cook and eat it, and return to camp under half an hour. Then he added: "Of course, you have heard of the Himalayas?"

"Yes, sir," replied the recruit, "and also of Ananias."

Goldfish Aid Light Plant

Now the goldfish enters the ranks of man's dumb servants. Spray ponds, where water is cooled at small transforming stations along electric transmission lines, are being kept free from clogging moss by stocking them with the sparkling fish, says the Popular Mechanics Magazine. An interesting balance in numbers and food was maintained at one pond. When the moss was exhausted, some of the goldfish turned cannibals and devoured the others. The survivors kept the vegetable growth from accumulating around the nozzles.

Little Left to Be Said

The discussion about the origin of the word "carping" as used frequently in the expression, "carping critic," lends us to pick up an unused ear for a moment. The word is from the French, but from the fish, and is so called because the carp is scaly much, smacking and full of bones. In the limnin variety the bones are most ly above the ears. The carp is also of the sucker variety, and will steal your bait. It is considered of abso lutely no value. When caught it will try and flop back in the water.—Wichita Eagle.

Baby Wasp's Feast

The wasp, whose nest frequently is found under the eaves of a building or behind the blinds, is an expert spider catcher. She selects a spider of proper size, pounces upon it, thrusts her stinger into the most vulnerable spot, and paralyzes her victim, rolls or lug it to a helpless state without killing it outright. The spider then is taken to the wasp's nest and placed on the under side, the cell is closed and apparently forgotten. Soon after world the egg hatches and the infant wasp is provided with a supply of food.—St. Nicholas Magazine.

Unlucky Saints

English artists in stained glass have been perturbed by the complaint of the churchwarden of the diocese of Chester that ecclesiastical windows do the artists scarce justice in presenting these holy and wearing beards. Artists in stained glass retort that they aspire to present their subject with as much accuracy as possible, and that history shows most of the saints were beards, especially as they labored in countries where conditions rendered shaving difficult and unusual. Thus, despite protests of the offended churchwarden, stained-glass windows in churches will in future, as in the past, present views of saints "bearded like the pard."

The Higher Life

What I know is that there is more life than anything and can do or say, that there is an immortal spirit whose history, whose struggles, whose victories and defeats give the whole meaning to this life which is only one short paragraph in the book of that greater life. These are fleshy conditions and we must obey them, but through them, always, we must be waiting, listening, for ever at attention to catch the movement of that other life. Your honor, your courage, your sacrifice, your gentleness, kindliness, if you love these things you have as well be a sheep's carcass hanging in my butcher's.—Hugh Walpole.

Might Reasonably Be Called "Fixed Income"

A negro was arrested at the instance of his wife for nonsupport and refusal to work. He was being cross-examined by a young lawyer, who was the law partner of a local politician, called Colonel Benson. During the examination of the negro the young lawyer asked:

"Dick, have you any fixed income?"

The negro was puzzled by the term. Counsel explained that the expression meant a certainty of money paid, not for odd jobs, but for steady employment; in other words, a compensation at stated intervals on which one could absolutely rely.

Upon the conclusion of the colonel's remarks, the negro's face brightened.

"Ah done fix Ah hab a fixed income, sah," he said.

"And what is this fixed income?" was the next question.

"Well, sah," he answered with a broad grin in the direction of Colonel Benson, "de colonel dar allers gibs me fo' dollahs an' a sack oh flour on election days."—Everybody's Magazine.

ROAD BUILDING

LINCOLN HIGHWAY BEST IMPROVED

The Lincoln highway between New York and San Francisco, 3,142 miles in length, has been improved by the states and counties on all but 41 miles of its entire distance. This 41 miles is located in Utah. Moreover, its entire length is uniformly marked with the characteristic Lincoln highway signs, examined in red, white and blue on a steel background.

Beyond the 41 miles is 1.2 per cent of 3,142 miles, hence a motorist is now offered a road between New York and San Francisco 98.7 per cent improved.

In an address delivered by the secretary of agriculture before the American association of state highway officials at Pinehurst, N. C., the secretary pointed out that by following a more or less circuitous route between Washington and San Diego one could find a road 97 per cent improved. In his article the secretary says that the route he describes is merely a collection of improved roads and does not coincide with any of the United States routes. Neither is it identified with any of the various trails which have been promoted in the past.

The secretary of agriculture points out three other transcontinental roads, one of which is 88 per cent improved, another 75 per cent improved, the third 68 per cent improved. In his calculations apparently he has inadvertently overlooked the improvements that have been made upon the Lincoln highway, which leads all other transcontinental routes as the shortest and most improved between the two coasts.

The fact that the Lincoln highway is best improved is generally well known to motorists as evidenced by the fact that during the touring season it carries the largest amount of travel. Moreover, it is the route that has always been selected to establish transcontinental records—for the simple reason that one attempting to make a rapid drive across the country carefully selects the best improved road. One of the great advantages the motorist has in following the Lincoln highway is that it is not adversely for him to make inquiry; the constant procession of permanent, uniform signs assures him that he is on his road all the time. It is the only transcontinental route that is uniformly marked.

Road-Building Activity Seen in Various States

Feverish road-building activity in many states is the result of a laudable desire to keep the highway up with the automobile, Pennsylvania recently sold a $10,000,000 block of a $50,000,000 bond issue to be used for highway improvements, and construction goes on steadily. In New Jersey, the state highway engineer has recently submitted a 12-year progress for the development of 1,900 miles of modern roads—not an inconsequential task for a small state.

These programs are the result of extensive surveys, but the question arises: Are they adequate? It is doubtful whether any man in government ago could have foreseen the tremendous increase of motor travel. It is also doubtful whether any present-day surveys can quite encompass the future.

The growth of the modern highway system makes a striking story. Before the automobile came into general use little attention was paid to the roads. If they were passable, they would do; smoothness was not a great factor in the horse-and-buggy days. But with the advent of the automobile better and smoother highways were demanded. Highway commissioners were created and millions of dollars in appropriations and taxes were exchanged for surveys, labor and materials to increase the speed and comforts of travel. Such are the struggles of an intensified. Possibly the highway will catch up with the automobile when universal air routes begin to lessen some large proportion of the modern transportation burden.

Great Writer's Dark Days

Not many know that the author of "Little Women," when a young woman, went out to do housework from sheer poverty. It was in 1851, when she was in her twenty-first year, that she wrote in her journal:

"To-day, when school was closed, I went to do as a second girl. I needed the change, could do the work, and was glad to earn my $2 a week. Home in October with $52 for my wages."

The family certainly needed the $52. It was about this time that Bronson Alcott went west to make his fortune lecturing or something and came back with exactly $1.—Boston Transcript.

LEGAL NOTICES

Order for Publication—Final Administration Account.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 25th day of January A. D. 1927.

Getting Ahead

The man who gets ahead is the one who makes decisions instead of asking for them.—Columbia News.

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.
IN CHANCERY.
Saul Peters, Plaintiff.
vs.
Maud Peters, Defendant.

Suit pending in the circuit court for the county of Charlevoix in Chancery, in the city of Charlevoix, in said county, on the 22rd day of December, A. D., 1926.

In this cause it appearing from affidavit on file, that the defendant, Maud Peters, is concealed within the State and her whereabouts cannot be ascertained.

On motion of R. L. Lewis, plaintiff's attorney, it is ordered that the said defendant, Maud Peters, cause her appearance to be entered herein, within three months from the date of this order and in case of her appearance that she cause her answer to the plaintiff's bill of complaint to be filed, and a copy thereof to be served on said plaintiff's attorney within fifteen days after service on her of a copy of said bill and notice of this order; and that in default thereof, said bill be taken as confessed by the said Maud Peters, defendant.

And It Is Further Ordered, That within forty days the said plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that such publication be continued therein at least once in each week for six weeks in succession, or that he cause a copy of this order to be personally served on said Maud Peters, defendant, at least twenty days before the time herein prescribed for her appearance.

Fred C. Pillsbury and
Lillian C. Pillsbury, Plaintiffs.
vs.
John S. Dixon and Phebe S. Dixon, Charles P. Bush, Charles A. B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above; and Charlevoix Manufacturing Company, Defendants.

County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county on the 15th day of December A. D., 1926.

Present: Honorable Parm C. Gilbert, Circuit Judge.

In this cause it appearing by affidavit on file that the defendant, Charlevoix Manufacturing Company, a corporation, has ceased to exist and that there is no officer or agent in this State upon whom process may be served: and that the remainder of the said defendant, to-wit: John S. Dixon and Phebe S. Dixon, Charles P. Bush, Charles A. B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above named residence is not known to the plaintiffs or either of them and they are deceased.

On motion of Lisle Shanahan, attorney for the plaintiffs:

It is ordered that the appearance of the said defendants be entered in this cause within three months from the date of this order, and that in case of the, her or their appearance, that he, she or they cause his, her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiffs within fifteen days after service on him, her or them or his, her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants in default.

And it is further ordered that within forty days the said plaintiffs cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiffs cause a copy of this order to be personally served on the said defendants, individually, at least twenty days before the time prescribed for their appearance.

The bill of complaint in the above entitled cause is filed for the purpose of quieting the title to Lots ten and eleven in Block twenty of Newman's Addition to the village (now city) of Charlevoix, Michigan, in the above named plaintiffs as tenants by the entireties.

MINOR COASTING ACCIDENT

Two Young People Injured when Bobs Collide with Big Bus

A set of coasting bobs ran wild for an instant last Saturday afternoon and a few minutes later two members of the coasting party, Miss Mary Ellen Campbell, daughter of Mr. and Mrs. Allen Campbell and Franklin Olmstead, son of Mr. and Mrs. Miles Olmstead, were taken to Dr. R. B. Arm-strongs office where first aid treatment was given to the injured parties before being taken to their homes.

The accident was caused by the driver of the bobs losing control with the result due to a collision with Mr. Fowler's big bus. It all happened quickly and at the time the bus driver was made only two of the large number of coasters were injured and in a minor way only—just bumps and bruises that may cause annoyance for a short time.

A vast number of people have enjoyed the excellent coasting for many days and nights. Thousands have spent hours and hours on the toss track specially provided by the city for public pleasure. This is the first time during the season that we have been called upon to record any near accident and indicates that the practices of safety first is generally observed.

THE ASSET OF SCHOOL MUSIC

31 Michigan High Schools Contribute in National Survey

The violin and the horn are being heard in more public high schools today than are the old-time rounds and choruses that used to brighten up Friday mornings. This statement is based on the findings of a survey of 772 high schools in 48 states, which showed that 80.2 per cent of the high schools have an orchestra or band, or both, while only 80.4 per cent report having general chorus work. Thirty-one Michigan high schools were among those contributing their experience to this survey.

According to the survey 47 per cent of the high schools reply in the have both bands and orchestras, in addition 40.8 per cent have orchestras only, while 1.4 per cent have only bands. The remaining 10.8 per cent have neither. Forty per cent of the schools participating have courses in music history and appreciation. That the percentage of these courses is not greater requires the purchase of instruments and formal instruction should so much exceed that of general chorus work is significant and would point to a recognition of the superior merit of such training from the standpoints of character development and general culture.

Know No Profane Words

Blasphemous and profane speech is impossible in the language of the Dakota Sioux Indians.

Young Woman Injured While Coasting on Hill

Miss La Rue Lemieur of Detroit, who has been visiting relatives and friends here for a short time was slightly injured last Friday forenoon while sliding down Mt. McSauba with a party of girl friends. At first it was thought that her injuries were serious, but taken to the hospital for examination it developed that aside from several minor bruises that the young woman was sound and that she would be ready to continue with her winter sports with pleasure the same as before the accident.

TENNIS CHAMPIONSHIP GAMES

Charlevoix Interested in the Schedule Western Mich. Tennis

According to reports made by Mr. W. G. Parker, representing the Western Lawn Tennis Association, the Western Michigan Tennis championship games will be played on Charlevoix courts with the opening games scheduled for Monday, August 8th, that being the first day for association and coming as it does at the height of the resort season, makes the time satisfactory to local players taking part in the contest and all other interested parties.

From the same source we learn that State Championship meet will be held in Grand Rapids, commencing with Monday, June 6th and the Junior Michigan championship games at Muskegon Monday, June 20. The National championship games, considered the big tennis events of the season, go to Detroit and the play will be concluded during the week of July 4th. Parties interested in the Saginaw Valley championship games can see the contests at Saginaw September 3-4-5, while on certain dates city championship games will be played in Grand Rapids, Battle Creek and Detroit.

At this time there is every evidence that tennis is making rapid advancement in public favor and that the year 1927 will see more enthusiasts, more players and more games locally than during any past season.

In recent meetings of the association held in Grand Rapids and Chicago this city was represented by Mr. Parker who is in full touch with both officials and expert players and in his opinion has a great tennis season is opening not only in Michigan but through the entire middle west.

SPECIAL RUG SALE

A special Rug Sale is being put on at the store of S. M. See & Sons. The sale opens today and continues one week only. The sizes with regular and the reduced prices are quoted in their advertisement in this paper. The stock is on display in the sales-room of the company. At the cut prices a considerable saving can be made by customers taking advantage of the sale offering.

From Josh Billings

Some marry for duty and never discover their mistake; this is lucky.

SEVEN YEARS THEIR MAYOR

Central Professor Seeks the State Superintendency.

Mt. Pleasant, Feb. 15—Entrance of Professor Webster H. Pearce in the race for the Republican nomination for state superintendent of public instruction was a pleasant surprise to the students and alumni of Central Michigan Normal and the townspeople of Mt. Pleasant. Prof. Pearce might be called the "Fred Green of Mt. Pleasant," for he is now serving his seventh year as mayor of this city.

Combining the highest political office of the city with the responsibility of being head of the mathematics department of Central Normal is considered by his friends as a unique achievement. Prof. Pearce assumed charge of the mathmatics department of Central Normal when he came here from Ypsilanti Normal ten years ago.

Thirty years of teaching is the record of Prof. Pearce. Starting in the rural schools of Washtenaw county, he then was superintendent for five years at Springport, thence he went to Albion as principal of the high school and then to Adrian as high school principal. He was in the mathmatics department et Ypsilanti for eight years before coming to Central Normal.

As an orator, Prof. Pearce is well known through the lower peninsula. He is constantly in demand for teacher's institute programs, P.T.A. rallies, commencements and similar gatherings. He also is active in religious work.

AUSPICIOUS ENTERTAINMENT

Local Players at the Theatre Tuesday — Pleased with Results

The Pilgrim Players presented two delightful plays at the Palace theatre on Tuesday evening of this week. The entertainment was well patronized and the audience very appreciative. During the intermission Mrs. Ira A. Adams sang, Mrs. Stelter accompanying, and this also was much enjoyed.

The "House of Joy" the first number, was a story play by the children assisted by some grown-up people. The scene was laid in the Fairies woodland glen where the elves and brownies were busy preparing to music as the curtain arose. The tiny children did some clever little stunts to the delight of the audience.

The following are the participants in this play:

Fitherald ..... Jean Campbell
Lad ..... Bernice Lamphere
Father Time ..... Vincent S. Madison
Endeavor ..... Georgia Kelderhouse
Truth and Falsehood ..... Irene McCann
Service ..... Irene McCann
Nature ..... Myrtle O'Neill
Nature ..... Gwendolyn Miller
Art ..... Lola Fessenden
Beauty ..... Mildred Parker
Childrens Leader ..... Dudley Mattson

Fairies—Shirley McCann, Jimmy Hilton, Eleanor Russell, Martha Craig, Stella Livingston, Isabel Parker.

Brownies—Bobby Craig, Jimmy Miller, Teddy Mattson, Jimmy Lewenton, Ben Tillotson, Bobby Wood.

The second play, Sona Gale's Neighbors, was presented by the following cast:

Grandma ..... Mary E Burns
Mis' Diantha Auel ..... Ida Marvis Sterritt
Ezra Williams ..... Horace R. Fowler
Peter ..... Oscar P. North
Inez ..... Elizabeth Higman
Mis' Elmira Moran ..... Mary J. Dean
Mis' Trot ..... Florence King
Mis' Carrie Ellsworth Cora Kelderhouse

The scene is the kitchen of Mis' Diantha Abel, when all the characters appear as Mis' Abel irons and grandma sits by the window and makes carpet rags. There is plenty of gossip as the story hinges on the coming of a little orpoan boy to his aunt, Mis' Ellsworth. Much neighborly kindness is shown in preparations for helping the aunt, who is poor, to provide for the little fatherless boy. Finally comes word as another relative has decided to keep him. The romance is provided by Inez and Peter, the bashful lover, who "courts like a stick of wood," and his happy culmination ends the play. All through is a delightful strain of humor which is very appealing and the audience was in a constant roar of laughter.

Le-tter of the usual royalty permission has been granted the players by the author to plant a community Christmas tree in Charlevoix, and this will be done when the right season comes.

See Little of Reality

How little do they see what really is, who frame their hasty judgment upon that which seems.—Southey.

Howard School Wins Prize

TO THE Howard school taught by Miss Elizabeth Clogg goes the honor of having made during the recent sale of tuberculosis Christmas seals, the seals with the double-barred cross, the highest per capita record of any school in Charlevoix county, according to an announcement just received from the Lansing headquarters of the Michigan Tuberculosis Association. Each of the fifteen pupils in the school sold an average of a trifle more than 33 seals. As a prize for their good work the school was awarded a copy of the new health book called, "A Health Education procedure."

WINTER SPORTS MEET A SUCCESS

Big Crowds Witness the Several Events Friday and Saturday

The program arranged and carried out Friday and Saturday, winter sport days in Charlevoix, can be pronounced a success by local citizens and visitors, as so proclaimed, not only in numbers and variety of sport events but in the expert demonstrations given by the several participants in the sports scheduled, all making for an exceptional regional event, one that places Charlevoix on the winter sports map and through the interest exhibited by local citizens insures future regional events—annual winter sports—on a larger and more magnificent scale such as will interest experts and professionals from a greater distances in succeeding years.

In point of attendance the vast number of sport events greatly exceeded the expectations of every one and fully demonstrates the fact that the public as a whole are taking an interest in the events and by their attitude and expressions that they were getting a full measure of pleasure out of the several sports put on during the two days meet.

As to which was the main event and of greatest interest we do not, nor does any others say. Dog fanciers, and this is also was much enjoyed by, while experts and enthusiasts along other lines of sports whether skiing, snowshoeing, sliding hockey or events support the particular one in which they are more specialty interested.

The entrants in the dog races, and there were several of them, furnished entertainment for a large crowd of spectators as it proved to be a double event, a part of the time showing a combination of the speed of the dogs and the keen up with the regular race program.

In the exhibition of fancy and stunt skating put on by Allie Moore, the public met with no disappointment, for Moore graphically demonstrated his clever class and expertness, showing splendid form and ability as the master of the art of ice skating. In this he was closely followed by "Bob" Foster, a fourteen year old lad, whose work showed directness in executing and his work dextrously performed won for him admiration from the vast crowd that was interested in and watching his performance. The demonstration given by "Bob" was one of no mean ability, places him in the first rank as an amateur and a person to be reckoned with in future contests.

Prizes were awarded to the several contestants as follows:

Tobogganing—1st sweater, S. Gear; 2nd scarf, G. Rodecker; 3rd, Boyne City.

Skiing—1st chamois jacket, R.Williams; 2nd Northland skin, D. McCann; 3rd sport cap, R. Bergmann.

Jucior Girls—1st shoe skates, K. Edwards; 2nd Sweater, 2nd sport cap, M. Gilbert; Petoskey; 3rd B. Lamphere.

Junior Boys—1st sweater, D. Livingston; 2nd knife, N. Anse.

Potato Race—1st stick-puck; C. Saubers, Petoskey; 2nd stick, B. Gear.

Senior Boys—1st fountain pen, C. Gordon, Petoskey; 2nd gloves, C. Saunders, Petoskey; 3rd, G. Bergmann.

Men's free-for-all—1st shoe skates, J. Sharrow; 2nd, D. Marshall; 3rd, T. Bird Boyne City.

Dog Races—1st harness, G. LeBlanc; 2nd sled, G. McKinzie.

Coasting—1st gloves, F. Bird; 2nd scarf, B. Bellinger.

Special Boys Race—1st zip ons, D. Marshall; 2nd sport cap, Sterritt.

Special Skating Race—1st, D. Marshall, 2nd, B. Gill.

March of Progress

A mechanical dryer, in use in the West, does away with the necessity for making hay while the sun shines. It is understood experiments are also under way which will enable one to strike the iron while it is cold.—Detroit News.

STUDY STATE TAX PROBLEMS

Methods of Hoosier State Were Discussed at Meeting

East Lansing, Feb. 15—Local taxation within the state and ways and means of insuring more efficient use of such taxes will be the subject of special inquiry by a "citizens" committee appointed here last week as a result of a tax conference held at Michigan State College.

Many of the tax paying interests of Michigan had representatives at the Feb. 9 meeting, which was addressed by authorities from Indiana. Methods by which the Hoosier state had been able to reduce local tax levies were discussed by Philip Kercher and Harry Meisse, members of the Indiana Tax Commission.

The representative committee of Michigan taxpayers, appointed to study local tax questions, includes the following: Chairman; Melvin H. Mc-Pherson, Lowell (Farm Bureau); Frank Peterson, Rockford (State Supervisors Assn.); W. H. Burnham, Adrian (Manufacturers Assn.); C. E. Bement, Lansing (League of Municipalities); C. L. Glasgow, Nashville (Retail Merchants Assn.); Lent D. Upson, Detroit (Bureau of Government Research); Carlos J. Hood, Detroit (General Motors).

Dr. Whitney Coombs, who is doing research work in taxation for the U. S. Department of Agriculture, is co-operating with R. Wayne Newton of the M.S. C. staff, in the preparation of reports based on recent tax studies made by the college.

THE DOMESTIC OIL BURNER

Home Heating is Discussed in New Department —Bulletin—

A new bulletin, The Domestic Oil Burner, issued by the U. S. Dept. of Agriculture as Dept. Circular 405-C, should be secured by everyone considering the installation of an oil-burning plant.

Many types of oil burners designed especially for home heating purposes are now being offered on the market within the last few years. The new method of heating appeals to many home owners because of the relief from uncertainties of coal supply, from furnace attendance, and from dirt. The possibility of automatically regulating the heat is another attractive feature.

To meet the demand of prospective purchasers of this type of heating equipment for reliable information, the U. S. Dept. of Agriculture has tested a number of oil burners of different design and has prepared this bulletin, based on the results of the tests, in which an attempt has been made to give the information necessary to help the home owner to make his own selection of an oil burner.

The tests conducted by the department and the study of many installations, indicate the character of performance that may be expected of the several types of burners, the adaptability of existing heating plants, and

National Crime Commission Studies Guns

Thirty or more cities were represented at a conference of the National Crime commission held in Chicago to devise means of preventing gunmen from getting guns, especially submachine guns. Above are some of the leaders. Left to right: J. Weston Allen, former attorney general of Massachusetts; Newton D. Baker, secretary of war in President Wilson's cabinet; S. M. Stone, head of the Colts Firearms company, New York; Gen. C. Ringler, representing the War department; Jay R. Benton, attorney general of Massachusetts; ex-Gov. Frank O. Lowden of Illinois, and Mayor William E. Dever of Chicago.

This Blaze Gave the Firemen a Real Fight

For two days the fire department of Rochester, N. Y., fought to subdue a fire that swept through the building of the Upton Cold Storage company. The walls were covered with ice, and 30 firemen were overcome.

Stars in Feast of the Lanterns

When the Chinese residents of San Francisco prepared for the carnival in celebration of the Feast of the Lanterns these three young ladies, Rose Chew, Ruby Chan and Mary Chu, were selected for stellar parts.

Stubby Now in Red Cross Museum

Sinclair Lewis, famous novelist, is suffering from a nervous collapse as a result of overwork on his latest novel.

All the Symptoms

Two cowboys were employed in a certain circus. A week after they arrived at a new town, one of the cowboys went to see a doctor. He said he had a bad cold and a pain in the side. He was examined.

"Good heavens," exclaimed the doctor, "you've got two broken ribs."

"Is that so?" drawled the cowboy. "I've had a pain in my ribs ever since we opened here, but I thought it was the climate."

Knowledge Worth While

It is very much better to know a little and believe in it than to know so much that you cannot believe in anything. Knowledge is power only when it is sure of the ground it seeks to occupy.—Grit.

Building Character

Yes, yourself, have forged every goldish fetter that binds you today. You, yourself, have sowed the seed of all nobility and beauty that blossoms in your heart.—Annie Besant.

OF INTEREST TO EVERYBODY

Mice are deadly enemies of the silkworm.

Cacao beans were used as coins by the Aztecs.

Paper money was made in China 500 years ago.

Services are to be broadcast from Westminster abbey.

Oaks are, generally speaking, the most useful of all trees for roadside planting.

The oldest living sequoia trees in California are about four thousand years old.

The process of electro-plating rubber on metal and wood is being applied to tanks, pipes, screens, mills and valves.

Use of motion pictures in medical classes makes it possible for students at sixty more carefully the technique of surgical experts.

Sande Is Again Leading Jockey

Earle Sande, America's noted jockey, captured 22 stakes races last year ranging from a $3,000 claiming race to the rich Ridge Memorial handicap, worth $22,450 and the Fairmount derby, valued at $24,725, netting his employer $240,275.

Alfred Johnson, who rides for Bardley Idle Hour stables, brought his master $230,010 for the year, although not winning half the stake races that Sande did.

Sande led Crusader to the tape first in the Cincinnati derby, and "unsaumented" Eric Hilind to put Haste in front of Buggenbaggage, a use to two favorite in the Fairmouth derby. Astride Haste, he also captured the Withers stakes.

George Eastman of Rochester, N. Y., camera magnate, receiving the cross and title of knight of the order of the crown of Italy," presented by Consular Agent Cesare Scuntelli.

NOVELIST IS ILL

GETTING START IN BASKET BALL

Getting Into Action Quick Is Best Plan.

Start on the basket ball floor. Any technique that gets you into action fast is the one to use. Dodging, pivoting, turning, are the things you'll need to work on, writes Mitchell S. Charnley in the American Boy Magazine.

Many fellows find the proper execution of a pivot difficult. It is to my mind, really, what it requires is a firm, well-balanced stance, a good grip on the floor with the toes, a rapid whirl on one foot that gives you a new facing. There are a dozen kinds of pivots. The legal block pivot is the one in which you throw your hips into the hip of an advancer just as you wield. A three-quarter pivot takes you almost all the way around and lets you pass in the direction you originally faced. Circumstances govern the kind of pivot you use, and you can pretty well suit your footwork to the exact case. But practice on footwork.

There are two kinds of stops, one from a regular running stride which consists of planting the forward foot and throwing the body back—it may be combined readily with a pivot or turn—and another which is effected by a short forward jump bringing both feet down flat, body bent back.

A "set-up" which gives all-round footwork practice comes in well in training periods. Here is a good one: Put a guard at the foul line and advance an offensive man dribbling at the basket. When the man reaches the guard he may stop, feint, or whirl on a pivot and pass to a man trailing him. Another "set-up" has a guard to cover a man dribbling to the sideline; there the man may either execute a pivot or pass to a team-mate.

Good basket defense depends on every other branch, and a player can't be at his best in shooting if he's below his best in passing, or footwork, or dribbling. That's why personal per cent has to be developed all-round—why you must be a master of effective value to your team unless your own personal per cent is. Branch is up just about as high as you can possibly bring it.

So work on all. But don't think that, because you've developed offensive ability, you're necessarily all you'll need to be.

Last year Coach Louis G. Wilke, down in Hardinsville, Ohio, had nothing but small men for his high school team. Pretty good small men, some of them—fighting and hard-working. But Billy Julian and Buddy Foster, the two first string forwards, had serious defensive weaknesses, and probably, if Coach Wilke had had capable substitutes at the end of the season, he'd not have used Julian and Foster.

The difficulty with these two men was that they had a habit of rushing their opponents on defense. When they saw the ball they either side charging their way with the ball, they lunged out toward him at a terrific rate—and, therefore, made it an easy opponent dribbler or dodge past safely.

Dunne, Harvard Coach

Here is a pic-tograph of R. J. "Duke" Dunne, the former Michigan captain who has been an assistant to Glenn Thistlewaite at Northwestern university the past four years, and who has signed an agreement to become head line coach at Harvard. Harvard tried to secure Dunne's services last year.

Compete for Gold Mashie

The classiest field in history will compete for the fifth annual gold mashie at Newport, R. I., it is announced by T. Suffern Tailer, over whose private links the golf tourney will be held August 5, 6 and 7.

George von Elm, national amateur champion, will lead a fast field of amateur stars which will include Jess Sweetser, Max R. Marston, Francis Ouimet and Chick Evans.

The meet as is customary will be over 72 holes.

Return of Two Prodigal Stars

The past season witnessed the return of the two prodigal athletes, Babe Ruth and Grover Alexander, to ninth fame and money.

Ruth and Alexander had been the "Wreck's Bad Boys" of baseball. The Babe didn't take his baseball very seriously in 1925. Alex didn't take his any different until the season of 1926 was well on the way.

Last winter Babe saw the error of his ways and settled down to business. The result, one of his best years, climaxed by a record-breaking performance in the world series.

Once more he is baseball's greatest hero.

Alexander, after being cut loose by Chicago because of a laxity in training, so the report said, turned over a new leaf and pitched St. Louis to a pennant and world series.

The bad boys were simply very good.

Modern Football Needs More Than Mere Tonnage

Many are the old football players who regret the basket ball turtles of modern football and who loudly extol the virtues of the old lone-crashing game. They imply that football is not the be-all and end-all that it used to be, and point triumphantly to the growing number of injuries which now occur during an encounter, with the explanation that the modern player is soft, writes Charles C. Buell, former Harvard captain in The Sportsman. But it just possible that the very openness of modern football is the cause of these injuries? The old, crashing, head-on tackles of former years and of the present day rarely result in more than a few scars and bruises. The open-field tackle, so common today, requires speed and perfect coordination. Seldom is the runner checked or thrown backward. The old urge to hit hard and low is still very much in evidence, but it must be tempered with accuracy if the runner is to be brought down. The open-field ball carrier comes to the tackler, he comes hard, and it is only natural that minor injuries occasionally develop.

"Glorified basket ball" is the term often used by the old "die hards" when referring to modern football. Let them play or teach others to play it. Experience is a great teacher and they will find that it takes both skill and nerve to throw a forward pass in the face of a fierce line-charging line. They will discover that it requires a deftness of hand, quickness of eye, and more courage to jump for a pass and catch it when there is a determined defensive back intent on knocking it down, than it does

A DANGEROUS MOVEMENT

There is constant pressure to force the state into business. Just at present, attacks seem to be centered on casualty insurance, not because private companies are failing to render suitable service, but because the number of people who are safeguarded by casualty insurance is growing so rapidly, and is a tempting bait for political manoeuvers.

A few years maintain a monopoly of workmen's compensation insurance to the exclusion of private companies. In other states, such as California, where competition in furnishing workmen's compensation insurance is permitted, an effort is being made by the Industrial Accident Commission to create a monopoly to the exclusion of private companies. Already the drive is on in many states fo follow the lead set by Massachusetts and establish compulsory automobile liability insurance. It will only be a step from that to an agitation for the state to maintain the insurance fund, and exclude private companies from competing for the business. This is in line with the present program of the Industrial Accident Commission in California to make a state monopoly out of that type of liability insurance.

There is no reason for these socialistic tendencies, as the people generally are not asking for such a program. The movement emanates in practically every instance from officeholders, bureaus or commissions which seek to enlarge their control over the actions of the individual. The great majority of our states have stood impregnable against the attacks of the socialistic and paternalistic forces, recognizing that the foundation and strength of our government is not in such preachings.

The drive against insurance is filled with danger for every private business, because it is the entering wedge to control many lines of private activity.

PROSPECTOR GIVES ORPHANS MILLIONS

Small Part of Great Estate Is Left to Kin.

Tulsa, Okla.—Less than $1,000,000 of the $12,000,000 estate of the late Walter Page, multimillionaire oil philanthropist of this city, will pay the annuities provided in his will for his wife, daughter, and other relatives. The rest will carry on his philanthropic work for the poor.

The lobby of the Oklahoma "tither" to care for parentless children orphans and widows was more than a lifetime thing, for by his will his work at Sand Springs, a suburb of Tulsa, will go on.

Sand Springs was built by Page. He established there an orphanage for 100 indigent children and a widow's colony for dependent mothers. In addition there was a hospital for the poor. It was for this work that Page gave $11,000,000, while his own kin got a million from his estate.

Years ago after Page had gone broke as a prospector he became a tither. He said God was his partner. A tenth to per cent of his earnings was to go to God's work. He regarded his orphans and his dependent widows as his religion, and he cared for them bountifully while he lived.

His 100 children were adopted legally and reared in the great orphanage at Sand Springs. He built an amusement park for them and other children of Tulsa. The dependent widows lived in cottages built and maintained by him.

To his wife Mr. Page left an annuity of $2,000 a month for her lifetime and their home at Sand Springs. He provided for upkeep of the home. When his daughter, Mary, now fifteen years old, becomes twenty-one she is to receive $200 a month.

Hydrogen Is Returning to Favor for Balloons

Washington.—Helium, one of the youngest members of a large family of gases, but very useful to Uncle Sam because it fills balloons, is looking to its laurels. Hydrogen, an older brother, is returning to favor.

Because of its high inflammability, hydrogen left especially to be desired which helium was subsequently found to possess. Helium, however, was exceedingly rare as opposed to the abundance of its rival, and it was expensive to manufacture.

Recently the experience of a British airplane visited by lightning during a storm led to the conclusion that hydrogen was more to be respected than disdained. If they could eliminate an additional hazard, that of the combustible fumes generated by the gasoline motors, engineers believe they could re-establish hydrogen as premier for gas-bag inflation.

Development of an engine utilizing crude oil for fuel has monopolized their efforts.

Decoys Cobra From Her Ankle; Saves Guests

Trincomali, Ceylon.—Strategy of the hostess saved a party of dinner guests here from a dangerous snake.

A British dockyard official was giving the dinner to a few friends. Half way through the meal every one was horrified to hear the official's wife order a servant to place a bowl of milk on the floor near her feet. Instinctively every one knew that a snake was in the room.

No one moved. All peered apprehensively about. Presently a large cobra was seen to glide from under the table and go to the bowl of milk, an irresistible bait. The woman fainted. The cobra, deadliest snake in the world, had been coiled about her ankle.

APPRECIATION

In behalf of the Charlevoix Association of Commerce and the citizens of Charlevoix, we wish to extend to the winter sports committee our appreciation of your efforts in carrying out the winter carnival program of February 11th and 12th to such a highly successful conclusion.

The affair was executed without material expense to the city as the city boosters are donating to the fund to care for the purchase of prizes awarded to the winners of the several events.

We hope that sufficient interest will be manifested in the conclusion of this line of endeavor so that Charlevoix next year, will foster the largest winter sports carnival ever pulled off in Michigan. The co-operation exhibited this year has proven to us that it is possible to attain that position. ARTHUR BERGEON,
Mayor.

CHARLES H. EMERY
Pres. Assn. of Com.

Parent-Teachers Assn.

The Parent-Teachers Association will meet Wednesday, February 23rd, in the high school auditorium. Mrs. Clarence Bridge and Miss Vanderhagen have the program in charge. The high school faculty will serve refreshments. All members urged to be present.

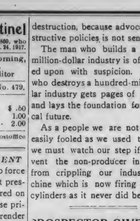
MRS. McMILLAN,
Sec'y pro tem.

YOU READ the Other Fellow's Ad

You are reading this one. That should convince you that advertising in these columns is a profitable proposition; that it will bring business to your store. The fact that the other fellow advertises is probably the reason he is getting more business than is falling to you. Would it not be well to give the other fellow a chance

To Read Your Ad in These Columns?

Going Full Speed



Great Russian Had Hair-Trigger Temper

Turgenev found himself involved in futile arguments with his young friend, which only ended in sullen rage. Thus we hear Tolstoy shouting with a flash of his smoldering steel-gray eyes "I stand in the doorway with a dagger and a saber and I say, 'As long as I live, no one shall enter here.' That I call conviction. And you—you're trying to hide your real thoughts from each other and you call that conviction."

Turgenev, in the rich falsetto of rage, jeers irrelevantly: "Why do you come here? This isn't where you belong. Go to Princess So-and-So."

"I don't have to ask you where to go, do I? Anyway, idle talk won't turn into conviction because of my saying."

"Darling Tolstoy," says a friendly witness, trying to make peace, "do calm yourself. You know how ill-tempered and loves you."

But Tolstoy, with dilating nostrils, only growls:

"I won't stand for it! He does it to tease me. It's on purpose that he's raving up and down and wagging his destructive branches."—From Yarmolinsky's "Turgenev."

Mayfair's Romantic Days

Mayfair, which is now one of the most fashionable residential districts in London, was originally a plot of land set aside by King Edward I as a fair ground, but later a complaint referred to it as "one of the most prolific nurseries of impiety and vice and one of the most outrageous occasions of riot and disorder." Under James II's license the May fair was built, not for trade and merchandise, but for music, drinking, gaming, raffling, stage plays and drolls." The gallants of the day built houses so as to be in reach of the fair, and Mayfair became the center of London's social life.

Thoughtful Burglar

A man convicted of burglary recently in Australia is reputed to be the most obliging member of his craft. He broke into the home of a store owner, extracted the keys to the safe and store from the owner's pockets, walked a mile to the store, where he looted the safe of $200, and then went back to the owner's home, replaced the keys and departed, after having closed the window he had forced open on his first entry.

OIL AND GAS NEWS

I want to impress on the owners of land in Hayes township the necessity of getting their leases signed up, so that we can have no delays on that account.

Have arranged with both banks at Charlevoix, so that all you have to do is to go to your own bank, have them make out the lease, and you and your wife sign it, and instruct the bank to hold it until the well is actually drilling in good faith in Hayes township.

Other townships are getting busy and arranging to sign up their leases, and it stands to reason that the operator is going to spend his money in the township which offers the best inducements.

I will do everything I can to get a well going in every township, and the owners must help out by facilitating the the lease deposits.

It costs, about $25,000 o drill one of these wells and the operator is taking all the chance. The owners have nothing to do except give proper permission by signing and depositing in their own bank the oil and gas lease. The owners will receive one-eighth of all production. If you want the natural resources of your township developed, you must do your part.

There is absolutely no argument against the development and production of natural resources. Production brings prosperity to the community so that the individual can make a living.

FRED H. MLRRITT,
Petroleum Geologist.

Meeting of Association of Commerce

There will be a meeting of the Charlevoix Association of Commerce at the Council Rooms Friday evening, February 18th, at 8 o'clock. A report will be rendered at this time by the Winter Sports Committee, covering the Winter Carnival held last week.

Also Mr. Fred H. Merritt, petroleum Geologist, of Minneapolis, Minnesota, will address the meeting relative to oil leases and oil well possibilities.

All members are urged to be present, and any citizen who is interested in joining the Association of Commerce is welcome to attend and become a member of our booster Association.

CHARLES H. EMERY,
President.

THE THEATRE

Shore Leave—During the making of "Shore Leave," Richard Barthelmess' new picture which come to the Palace theatre on Saturday and Sunday, the United States government paid an unusual tribute to the popular young star.

Barthelmess won the confidence and esteem of government officials during the making of his big screen success, "Classmates." This was filmed at West Point with the co-operation of the United States Military Academy and the War Department. It was screened with the utmost care and fidelity to military details and traditions. In fact, it was highly commended in government circles and has been shown before many governmental departments and at various army posts.

When Barthelmess decided to film a story of a United States sailor the government put its full resources behind the plan. The star was invited to make a trip from Cuba to New York as the guest of the navy. This was done to get the right atmosphere and feeling for his role.

Then Uncle Sam offered the use of the United States battleship Arkansas during a cruise from NewYork to Newport News. Many of the scenes of "Shore Leave" were filmed on the Arkansas.

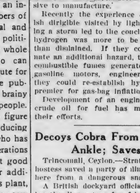
Sam, too, loaned a squad of some fifty sailors from Brooklyn Navy Yard for many of the studio scenes.

Work to Know

Property thou hast no other knowledge but what thou hast got by working; the rest is yet all an hypothesis of knowledge; a thing to be argued of in schools, a thing floating in the clouds, in endless logic vortices, till we try to fix it.—Carlyle.

Old Stuff

Hindus at Mysore, India, during a religious festival, lowered down before an automobile instead of an elephant. A lot of white men have been there to it.—Minneapolis Journal.



Obstacles to Growth of the Kingdom

By REV. JOHN C. PAGE
Superintendent of Rev. Moody Bible Institute, Chicago.

Rev. John C. Page.

"TENT—Blessed are the pure in heart for they shall see God—Matthew 5:8.

The Methodist press recently offered a prize for the best answer to the question, "What are the Chief Obstacles to the Christian Religion in America?" Over 6001 persons sent in their answers. The prize winner mentioned four major obstacles:

1. The reluctance of Christian people to face the great social sins, such as war, race hatred, and industrial injustice.

2. The spirit of materialism which engrosses people in the ordinary and every-day things of life.

3. Denominational selfishness.

4. The loss of that spirit which is born only of fellowship with God.

The last mentioned obstacle is the biggest one and demands the fullest consideration. What are the losses sustained through lack of close fellowship with God?

First of all there is the loss of clear vision. The clouds of self obscure the sun of righteousness. Night settles down over the soul. The winds of adversity batter and buffet us. Doubt usually curls in the heart for "he that wavereth is like a wave driven and tossed." Vision is essential to safety, certainty and success. "Where there is no vision, the people perish." Vision is born and clarified through fellowship with God. Without it we can be only blind leaders of the blind, which is now straying from the paths of rectitude because the vision of the high and holy has been lost. The light and glare of the world blind. The glitter and glare of the great white way startle and destroy. There is no room for the glory of God and no thought of the great white throne of judgment. Men have lost the very spirit which is born out of close fellowship with God we groups in the darkness of our finite knowledge.

The loss of clear vision leads to an other loss, even that of a correct estimate of values. The Century Magazine had an interesting article entitled "Grading the Ten Commandments." The grading was done by five business men and women. They "agreed in intelligence, education and social background." The Ten Commandments were usually divided into two sections, the first four containing duties toward God and the remaining six comprising duties toward man. In other words there are four religious mandates and six social mandates. In determining the relative value of these Commandments the five hundred men and women placed the social mandates far above the religious. Why did they thus put the cart before the horse? Because they have lost that spirit which is born only of fellowship with God, the spirit of clear vision and correct values. They are content with the spirit born out of social fellowship. When the Savior was asked the question, "Which is the great commandment in the Law?" he replied, "Thou shalt love the Lord thy God with all thy heart, with all thy soul, and with all thy mind. This is the first and great commandment." According to the Master's estimate God comes first and mankind second, both in love and in duty, but according to the great majority of the five hundred men and women referred to, God comes last and mankind first, in love and duty. How shall we explain the difference between these two estimates, that of Christ on the one hand, and that of the five hundred on the other? Is it not that the latter have lost that close and clear fellowship with God was, out of which is born the spirit of clear vision and correction of correct values?

Eight relationship with God projected into and maintained by fellowship followed by right relationships with others. Put a man right at center and he will be right at circumference. The reverse is not true. Christ put a premium on the things of the spirit and on a right relationship with God.

The third loss that arises from the lack of close fellowship with God is that of a courageous attitude toward the circumstances of life as they arise. Courage is the result of communion with God. We are challenged on every side by need and opportunity. "Whom shall I send, and who will go for us?" is the divine cry now as in the long ago. "Here am I, send me," is the answer of those who through close fellowship with God are able to take the courageous attitude in view of the world's need of light and truth. Courage is necessary in order to make the venture of faith and to step out as did Abraham and the heroes of faith. History abundantly confirms this. Carey, Morrison, Duff, Hudson Taylor, George Mueller, Moody, and a host of other lesser lights have demonstrated that clearness of vision, a correct estimate of values, and a courageous attitude of soul, all spring from close fellowship with God.

And if anyone shall say "How may I enter into this fellowship?" the answer is to be found in John 14:6, "I am the way. No man cometh unto the Father but by Me".

Trace Link Between Wickedness and Age

Hygiene and eugenics will combine to extend the natural term of human life in the opinion of Professor Huxley. The birth rate will continue to fall. As a result the not distant future will be confronted with a notable change in the relative number of young and old people. The elders will suit it we can be only leaders of the blind, which is now straying from the paths of rectitude because the vision of the high and holy has been lost. The light and glare of the world blind. The glitter and glare of the great white way startle and destroy. There is no room for the glory of God and no thought of the great white throne of judgment. Men have lost the very spirit which is born out of close fellowship with God we groups in the darkness of our finite knowledge.

The loss of clear vision leads to an other loss, even that of a correct estimate of values. The Century Magazine had an interesting article entitled "Grading the Ten Commandments." The grading was done by five business men and women. They "agreed in intelligence, education and social background." The Ten Commandments were usually divided into two sections, the first four containing duties toward God and the remaining six comprising duties toward man. In other words there are four religious mandates and six social mandates. In determining the relative value of these Commandments the five hundred men and women placed the social mandates far above the religious. Why did they thus put the cart before the horse? Because they have lost that spirit which is born only of fellowship with God, the spirit of clear vision and correct values. They are content with the spirit born out of social fellowship. When the Savior was asked the question, "Which is the great commandment in the Law?" he replied, "Thou shalt love the Lord thy God with all thy heart, with all thy soul, and with all thy mind. Important Notice

Beginning February 7th and continuing until April 1st, or until the spring breakup, the State Department, bridleh offices Boyne City, for distribution of Automobile License Plates, will be open Wednesdays and Saturdays 8:00 to 12:00 a.m. and 4:00 to 6:00 p.m.; Mondays, Tuesdays, Thursdays and Fridays, 8:00 to 12:00 a.m.

Mail application given prompt attention. Look up your titles. No license can be issued from the local office on title that have not been transferred to present owner within 10 days of the date of purchase. CHAS. McCUTCHEON,
Branch Manager

Registration Notice!

To the Qualified Electors of the City of Charlevoix, State of Michigan:

Notice is hereby given that in conformity with the Michigan Election Law, I, the undersigned city clerk, will, upon any day except Sunday and a legal holiday, the day of Primary Election, receive for registration the name of any legal voter in said city not already registered who may apply to me personally for such registration. Provided, however, that I can not receive for registration during the time intervening between the second Saturday before the day of election, or on the day of primary election.

You are further notified, that I will be in my office, February 14th and February 28th, 1927, from 8 o'clock a.m. until 8 o'clock p. m. of each day for the purpose of registering such of the qualified electors as said city as shall properly apply therefor.

By Charles H. Lamphear,
D. S. Payton, Deputy. City Clerk.

CHURCHES

Congregational Church
Rev. B.G. Matteson, D.D., Minister

Morning sermon topic, "The Conservatism of Progress."

The evening announcement is for six o'clock at which time we are combining the young people's meeting and the evening service in a Young People's church hour to which the older people and all friends of young people are invited. Those who heard the first installment by the pastor of the life story of a great leader of young people will want to hear the continuation of the story. New comers will not miss the connection by listening in next Sunday. But come at six, not at seven.

Junior Endeavor meeting at six in the room down stairs.

The pastor has resumed services at Ironton Sunday afternoons.

Church of God
Rev. Paul L. June, Pastor

Service held at the Chapel on West Hurlbut Avenue.
Morning service at 10:30.
Sunday School at 11:45.
Evening service at 7:30.
Prayer Meeting, Wednesday evening at 7:30.

The Sewing Circle meets at the parsonage Thursday p. m. All are requested to be present. Come!

Sunday morning the subject will be "Life's Grinding," taken from oriental and present day methods. Applications contrasts being given to show the spiritual significations. Come, it will be good. We extend a cordial invitation.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Mind."
Sunday School 12 o'clock.
Wednesday evening service 7:45
Reading room, Tuesdays and Saturays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 9:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelo.

PRIMARY ELECTION, Monday, Mar. 7.

Do your duty on that date by casting your ballot for the candidate, who in your judgment will best fulfill the duties of that office.

Permit me to announce for your consideration, my candidacy on the republican ticket for Commissioner of Schools in Charlevoix county.

I am 41 years of age, a college graduate, with the degree of Bachelor of Arts; I also hold a life certificate from the Department of Public Instruction and am now in my tenth year's teaching experience in Rural schools. This is my fifth year in the Grammar room at Clarion.

The year our schools were organized into the Township Unit System, I served as secretary of the board.

I am a teacher because I am a lover of children, and want to see them get the best, and be the best in every way.

Yours for faithful service and the highest citizenship.

WILLIAM CHARLES PALMER.

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Feb. 19-20

Richard Barthelmess' latest, "Shore Leave," with Dorothy Mackaill. Dick's in the navy now! for your delight! Hop aboard Uncle Sam's biggest battleship; look down the line, there he is! Our Dick in uniform, a regular jackie. And he's adventure bound on the high seas of life and love. They fight together in battle; and now on the sea of love. It's the best Dick ever made, by one. Screened by the assistance of the U. S. Navy.

Also Fox Comedy, "Lickpenny Louis."

Wednesday Only, Feb. 23

"Why Women Love" with Blanch Sweet, Robert Frazer, Dorothy Sebartian. Adopted from the famous play, "The Sea Woman." Scenario by Lois Leeson. Directed by Edwin Carewe. A First National picture.

Also Felix the Cat and Fox News.

Coming—Eddie Cantor in "Kid Boots."

Butterfly Alive After 4,000 Miles in Mails

Winnipeg, Man.—On opening a newspaper sent him from Honolulu, Col. Thomas Conlon, Greenwood place, found that the paper was empty and was surprised to see a beautiful blue-and-white butterfly drop out and flutter round the room. The paper was sent by Capt. A. Mitchell, who is in command of a branch of the army's work in Honolulu, and the butterfly secured from the master of the barracks.

New School of Art

New York.—Clurcoat and pastel are forming a new school of American art which will smother replace that of the oil portraits, asserts William Van Dresser, eminent American artist.

Out of Prison, He's a Man Without Country

Baltimore, Md.—Lawrence Wolfer Sheehan left Maryland penitentiary recently a man without a country. Yoders age he prided his British citizenship for allegiance to the country he now must leave if he is to stay out of prison, and British authorities have warned him he will not be allowed to live in Ireland.

Sheehan, who says he has estates awaiting him in Ireland was paroled by Gov. Albert C. Ritchie on condition that he leave the United States immediately. He had served six years of a ten-year sentence for hotel thefts.

Notice to Electors

I am soliciting the support of my friends during the primary campaign, and desire your votes at the city primary election and trust that electors will favor me in my candidacy for nomination as City Treasurer. In return for same it will be my aim if nominated, to serve the city zealously and in the interest of the public.

Yours truly,
JOHN COOK.

Notice to Electors

I am a candidate for nomination at the city primary for the office of City Treasurer and as such solicit the support and votes of electors.

Yours resp'y
A. J. HAMILTON.

"IT PAYS TO ADVERTISE"

Senior Class

AT

Palace Theatre,

March 1st

—PERSONALS—

Mr. and Mrs. M. B. Hooker made a trip by auto to Evart last Sunday.

Mrs. M. O'Brien, of Detroit, is a guest at the home of her mother, Mrs. John F. Carberry.

Miss Maggie Colter who has been with friends in Detroit for some weeks, returned to Charlevoix a few days ago.

Tuesday, Feb. 22nd banking houses will be closed on account of Washington's birthday anniversary—a legal holiday.

Mr. and Mrs. Thomas Wetzel motored to Cheboygan last Saturday in response to a message announcing the illness of Mr. Wetzel's sister.

Captain and Mrs. James Sanford, visitors for several weeks past at Muncegon and other southern points, returned to Charlevoix last Thursday.

Mrs. Harry W. Widdifield left for Chicago last Monday to spend a two or three weeks vacation with her three sons all of whom are located in that city.

The M. E. Ladies Aid invite every lady to their Colonial Tea Party Friday, February 25th, in the church parlors, down stairs—program at three o'clock sharp.

Following a coasting party early this week the members to the number of a dozen or more were entertained by Mr. and Mrs. Robert Bridge at their home on Dixon Avenue.

Mr. and Mrs. J. J. Hallet, following a session of several weeks spent at French Lick and other southern points, returned to their Belvedere avenue home a few days ago.

John F. Carberry left for Waukesha, Wisconsin, last Monday where he will spend a few days for the benefit of his health. A trip taken two or three time a year by Mr. Carberry.

Messrs. James Wyers, Fred Coon, Harry Porter and Mont Withera motored to Grand Rapids Wednesday and will drive back with several new cars for the Wyers & Smith agency.

Several robins have made their appearance and are to be seen in various localities in the city with the largest number making their headquarters on the grounds of the Chicago Club.

Mr. John Roen started out on a business trip through the east last Friday that will probably take him to Washington D. C., Norfalk, Va. and New York City before he returns home.

Members of local I. O. O. F. will give a dancing party at the Temple Friday evening of this week. Just a continuance of the splendid series that have been regular events during past weeks.

John Hallett, for some time past annoyed with some stomach derangement, left for Rochester, Minn., last Monday where he will enter Mayo Brother's institution for examination and treatment.

H. A. Craig is in Grand Rapids this week on business and will take advantage of the opportunity to attend Conistory meetings while there, as the mid winter meetings are in session this week.

Elmer Johnson went to Grand Rapids last Monday to attend the winter meeting of both Consistory and Shrine which continues through the week with the finish of the shrine meeting Saturday night.

Contractor William J. Bogart made a trip to Kingsley last week with his motor truck, delivering a load of contract goods consisting of house trim and some furniture manufactured in his Charlevoix shops.

Deputy Collector of Internal Revenue, W. S. Darling, will be at the Hotel Charlevoix Friday and Saturday, February 25th and 26th, for the purpose of assisting tax payers with their 1926 income tax returns.

A. E. Mitchell, with the Kinsey & Buys Company, of Grand Rapids, spent Friday, Saturday and Sunday in this city and though he was here on minor business matters took advantage of sport days to make his visit.

Ladies of St. Mary's church are laying plans and making preparations for serving one of their famous dinners March 17th. The time and place has not been decided at this time but announcement as to these features will be made later.

Mr. and Mrs. William J. Bogart left for points south early this week and will visit friends in Plainwell, Kalamazoo and Grand Rapids. During their stay in Grand Rapids Mr. Bogart will attend the Consistory meeting scheduled for this week.

Mr. and Mrs. M. A. Levinson are spending the major part of the week in Grand Rapids. Business and visiting will be in cluded in the program, with the main attraction for Mr. Lavinson being the Consistory meeting scheduled for the week at the Masonic temple.

The Republican County Convention is called for today at Boyne City where delegates will be chosen to represent Charlevoix county at the State Convention called for Grand Rapids Tuesday, March 1st, to place in nomination certain candidates for state office and elect new officers and members of the Republican State Central Committee.

Some fellow with the wrong kind of brains for his mental equipment is causing annoyance in various residence districts due to peeping Tom procivities. He has been seen by several persons and tracks in the snow close to windows evidences the character of the visitor. Complaints of like nature have been made periodically but as yet the individual has when discovered, made a speedy get-away.

A program of winter sports will be put on at Petoskey, Tuesday, February 22nd according to present plans, with fourteen events on the program for the day. Watson Snyder heads the sports committee in charge of the event. Prizes for each of the events will be awarded to those winning first place. Skating, ski racing and jumping and distance tobogganing are principal events for the days sport.

Methodist Church.

C. E. Pollock, Pastor.

We are highly enlogistic of the Winter Carnival so carefully planned and directed by the people of Charlevoix. Occasions of this kind are wholesome and contribute real values to a community. Old and young and everybody participated in the fun. All played together and youth had a fair show for recognition. The fun was clean and everybody was in good spirit. Even the dogs were full of frolic. Good fellowship was much in evidence, and the right thinking people had made the whole affair above reproach. No occasion deserve many good words, and reflect much credit upon any community whose leaders and people sponsor clean community fun in the great out-of-doors.

"Colonial Home Day" next Sunday is the church's day in the observance of the day Washington's birth anniversary will receive recognition in two highly interesting and profitable services.

The "Colonial Home" is the general theme at 10:30 a. m., and at this service the following features will be presented: Orchestra, processional, choir composed of elderly people, older people will sing anthem, message to juniors by Mrs. Edward Stewart, prayer by Mrs. A. Edwards, talk on home religion by Mr. A. Edwards, sermon, "Practical Religion" by pastor. Mr. Olaf Nordrum will have general charge of the service, giving the readings and making any necessary announcements. A souvenir booklet will be given each home represented at the service, and it is expected that every junior will be present. Juniors are invited to stay through the entire service in the auditorium. Places will be reserved for them. Everybody is invited, and all elderly people are specially urged to attend. If such will notify Mrs. A. Edwards, conveyances will be provided to bring them to and from church. Colonial costumes will be used, and the children will be very comfortable and fittingly decorated.

"Washington's Religion," sermon at 7 p. m. The pastor will preach at this service. Motion pictures will be shown, presenting "The Midshipman," a picture of our government war school at Annapolis. This film is government sponsored and will be shortened so the service will not be unduly prolonged. While it is educational, it is also romantic and dramatic, and a fitting film for a Washington birth anniversary occasion. No charge for admission will be made, of course, but a generous offering from all is expected to care for all expenses.

Epworth League meets for devotional hour and study at six o'clock next Sunday.

Sunday School with increasing interest and numbers, next Sunday at 12 o'clock.

Dr. F. F. McMillan gave a fine address to men at the Men's Meeting last Monday at the First Methodist. An unusually interesting program was enjoyed by a large group of men. The fellowship supper was served promptly at seven. Rev. C. E. Pollock gave a bible exposition of a portion of next Sunday's Church School lesson, his subject being "Salt." Dr. F. F. McMillan gave a very well prepared and clearly presented address on "Washington and Lincoln," in which he compared and eulogized these two great leading Americans. Earl Shapton had charge of twenty minutes of real fun, which sent all the men away with a good laugh.

Next Monday evening the men will meet at six-thirty for their supper and program. Note the change of hour. This change is made to accommodate some who desire to come earlier. Dr. L. B. McMillan, of Onaway, who for two years was in government service in the Philippines, will give the special address. The doctor took a large number of pictures of actual scenes in the Philippines and will show them with the stereopticon to illustrate his address. This promises to be a unique opportunity for the men to get first hand information of conditions in this island possession of the United States, at a time when it is somewhat in the limelight. All men are invited.

The date of the Father and Son banquet is February 28th. Judge Parm C. Gilbert will be the special speaker for the banquet occasion. Get your tickets early for the number will be limited.

An enthusiastic Epworth League affair at the First Methodist. The young people of the Epworth League celebrated the finish of an Epworthian contest with a supper in the parlors of First Methodist Church last Friday at six o'clock. The losing side in the contest furnished the eats and the program. Rev. and Mrs. C. E. Pollock were guests of honor for the occasion. It was a very happy affair and was well attended. Some very progressive religious work is being done oy these excellent young people.

The Colonial Tea Party date is Friday afternoon of this week at 2:30 at the First Methodist Church. A novel program has been arranged and refreshments will be served. Uncle Sam and Miss Columbia have been secured for the occasion, and George and Martha Washington will be present and greet the guests. All Charlevoix ladies are invited to come. The fee is only two bits, and just to see the distinguished people who will be present will be worth many time this amount. Just leave it to those enterprising ladies to think of interesting programs.

OPEN DEATH VALLEY TO MOTOR TOURISTS

Winter Months in Sink Permitted to Sightseers.

Salt Lake City, Utah.—Death valley, noted as the most desolate, the most dangerous and one of the strangest places on this earth, the lowest point on the American continent, is opened up to tourist sight-seeing trade. Automobile busses criss-cross the great sunken desert and transcontinental tourists may, in comfort, cross the mysterious valley which used to mean death to the emigrant who, hoodwinked by its innumerous mirages and its stretches of salt, which looked like real water, attempted to cross its desert wastes.

May 15 is to see the last tourist of the season out of the valley. Hereafter, the season will open in the fall, but always by May 15 the last tourist must be out of the place. For Death valley, so pleasant in the winter, becomes a perfect inferno with the return of the summer sun and temperatures run up to well above 120 degrees and more. A modern hotel has been built at Furnace creek, and this will be headquarters for the tourists.

Pullman cars are operated to Death valley junction, and gasoline motor cars on the Death Valley railroad go to within 25 miles of the entrance to the valley itself. From this point automobile busses operate to and through the valley of death. The Death Valley railroad, Tonopah and Tidewater railroad and Union Pacific railroad is the combination that has opened up Death valley to tourist traffic.

Many Perished in Valley.

Death valley's significant name was given it by the very first party of emigrants to look down upon it from the surrounding mountains. There were 30 men, women and children in the party. They thought they saw a silvery stream of water and attempted to cross. When they reached the stream it was just white salt and not a drop of water. With the full fury of the summer sun beating the sandy furnace to 140 degrees, and no water, the trek became a panic. Wagons, cattle, everything was abandoned and groups spread along the Panamint mountain range at the western edge trying to find water or escape from the valley.

About a dozen of the party got through Emigrant Wash, found water and survived. That was in 1850. In 1860, ten years later, a prospecting party under Dr. Darwin French, found wagons, guns, cooking utensils, children's toys, etc., lying just where they had been abandoned. They also found human skeletons, some within 300 yards of the United States trail. They were buried by the party.

There are many graves scattered over the desert. Few names are on the markings. "He ran out of water" is the usual lettering.

But when one of that first party of emigrants got to water he found in his hand a piece of pure silver ore. He remembered breaking the side "rock" from a ledge of the same material.

That little piece of silver was undefinto a sight for the finder's life. And since that time Dad Iost either mine has been known as the "Gunsight" mine. Hundreds of prospectors have searched for it. None have found it. Many have found death instead.

Dad Lost Mines.

But still there are prospectors in Death valley, and tourists there will see some of them—for in fact, we are certainly be asked to "grubstake") some old desert personality. "Dad" Fogle's butte of gold is just over the mountains here somewhere," the tourist will be told. "I saw it one day a-shining in the sun, but I couldn't get to it. But I'll find it some day. Worth more than all the gold coin in the world, too."

And the "Dad-Fogle" legend is but one of many. There are many lost mines of fabulous richness still awaiting rediscovery in Death valley.

Three hundred and ten feet below the level of the sea is the floor of its deepest point, and from this point up 11,045 feet above sea level rises Telescope peak, and a little farther on is Mount Whitney, 14,501 feet to elevation, the highest point in the United States. From the same point the tourist will see the lowest and the highest points in the country.

Paris Night Life Cost Up Despite Franc Rise

Paris—The cost of night life in Paris remains high despite the mounting exchange value of the franc.

A small holiday supper for two at one of the less expensive Montmartre resorts costs: Convert charge 10 francs; consomme, 25 francs; fole gras, 60 francs; two bottles champagne, 300 francs; government taxes, 120 francs; total, 575 francs. That recently made about $22 in American money, of which the luxury tax totaled $4.61.

Last year, with the franc at approximately the same exchange value, the cost of the supper would have been about $12.30.

Sambo—Yas, deedy. Sometimes Ah cain't get to sleep on de job as quick as Ah need to.

IT ALWAYS PAYS HIM

Muggins—"I don't see why people always speak of a physician as paying a visit." Bill—"Why, not?" Muggins—"Because a visit always pays him."

Neglected Opportunity

"What did you discover in that ancient tomb?"

"Gems and precious metals," replied the explorer.

"Yet the royal inmate was forgotten."

"He didn't have sense enough to start a jewelry store."

Girl Regains Buoyant Health

Wrecked by a Cough, Worn Out by Sleeplessness, With Strength Undermined, Charming Belleville Girl Restored to Good Health by Tanlac, Gains 22 Pounds.

The amazing recovery of Miss Catherine Dugas, 400 South Second St., Belleville, Ill., has excited a great deal of comment among her friends. "But it is not so surprising," says Miss Dugas. "A severe and persistent cough exhausted me so completely that I became alarmed, fearing that my health and strength would be completely undermined. I seldom slept, and tossed and turned all night, then I would get up tired and worn-out.

"Now all the ambitionless days of drowsiness, sluggishness and exhaustion are gone. I feel and look better than ever before. I have a hearty appetite and my weight has increased 22 pounds. I give Tanlac all the credit for my marvelous recovery. Every woman should take it, regularly."

This tonic made from roots, barks and herbs according to the famous Tanlac formula, usually builds up weak bodies, puts flesh on scrawny bones, frees the system of poison and drives out causes of pain. Get your first bottle from your druggist—today!

CORNS

Washingtoniana, 1927

WASHINGTON CROSSING THE DELAWARE
Painting by Emanuel Leutze

By ELMO SCOTT WATSON

THE whole history of the American Revolution revolves around one man—George Washington.

So it was eminently fitting that the one hundred and fiftieth anniversary of that tremendous event in the history of the world should find the nation's interest centered again on that man. What were the outstanding events in the year 1926, the anniversary of the high point in the American war for independence? Certainly it was not the sesquicentennial celebration in the city where the Declaration of Independence was signed, for that celebration was a dismal failure. Undoubtedly the outstanding events were those which put upon the lips of all Americans once more the name of Washington and caused them to take part in a discussion, which has not yet ended, as to the "real Washington."

So 1926 will go down in history, not only as the one hundred and fiftieth anniversary of the Declaration of Independence, but also as the year in which an immense store of information was added to the available Washingtoniana and which promises well for further accession to that national heritage in 1927. As the result of the events of 1926, we come to another celebration of Washington's birthday with our knowledge of him enriched and, despite—or perhaps, because of—all the controversy that has raged over what was or was not the "real Washington," a better appreciation of just how much we owe to the man we call "The Father of His Country."

An arrangement of the 1926 Washingtoniana items in chronological order rather than attempting to consider them on the basis of relative importance shows the curious fact that this man, dead these 127 years, started off the year as a newspaper "headliner." This cause about when Rupert Hughes, the novelist, in January gave an oldtime before the Sons of the American Revolution in the national capital and not only aroused the ire of that organization, but stirred up a nation-wide controversy, when he told the truth about Washington, as he saw the truth. Although it turned out later that the speaker was misquoted, even at that some of his statements were too strong for some persons to accept without protest. So the tempest in a teapot, which the affair seemed to be, took on greater proportions as Hughes was successively attacked and defended and others took a hand in the row.

The net result was that, paradoxical as it may sound, George Washington became a "national figure" once more, at least so far as the newspapers were concerned and on New York daily pointed out that Washington's birthday was celebrated as never before because of Hughes' effort to represent Washington "as a man and not a statue."

One event of considerable significance connected with the celebration of Washington's birthday was the "rediscovery" of what has been termed the last portrait of the "great leader." This was reproduced with this article. The story of this portrait is a romantic one. In 1761 a twenty-three-year-old Frenchman named Charles Baltimore Julien Fevret de St. Memin came to America from the city of Dijon and settled in Philadelphia. There he invented what he called a "physionotrace and pantograph" with which he was enabled to outline a human head on paper with mathematical exactness, reducing or enlarging it to any size for reproduction on a copper plate. The original was finished on crayon and the copper in mezzotint.

In 1798 Washington went to Philadelphia and while there he sat for the Frenchman for what is said to have been his best portrait. There is authentic record of the fact that St. Memin loaned the original pantographic portrait to Gilbert Stuart, the most famous of all painters of Washington. St. Memin never recovered the portrait from Stuart, for some unknown reason, and Stuart gave it to J. Carson Brevoort of Brooklyn, N. Y. Brevoort, it seems, lent some money to Rev. J. D. Phillip, an Episcopal minister of Brooklyn, taking as security the pastor's library. In some way the portrait came into Phillip's possession and he passed it on to a nephew, J. S. Phillip, who, probably little realizing its value, gave it to the wife of his son, George W. F. Phillip.

In 1886 the Phillip family removed from Brooklyn to Riverside, Ill., and George Phillip went into the fuel business in Lombard, Ill. A few years later an aunt from Brooklyn came to visit them and spoke of the St. Memin portrait. Some time after this Mr. Clare's Magazine contained a story about the St. Memin portrait of Washington and made the statement that the original had been lost. Whereupon the sons of George W. F. Phillip, remembering their aunt's statement that a St. Memin portrait was owned in their family, began searching for it in the attic of their home and found the precious pantograph. Its authenticity was established by officials of the Chicago Historical Society. That was a number of years ago, but so far as is known the portrait was never reproduced in print until it appeared in a Chicago newspaper upon the occasion of Washington's birthday, 1926.

Although the anniversary of a number of Revolutionary events during the year 1926 served to bring the main question of Washingtoniana from time to time, it was not until September that the controversy which arose from Hughes' speech was revived. This came about with the publication of two books—George Washington—The Image and the Man, by W. E. Woodward (Boni and Liveright, N. Y.) and "George Washington—The Human Being and the Hero, 1732—1762," by Rupert Hughes (William Morrow & Co., N. Y.). While Hughes' biography dealt with only the first thirty years of Washington's life, Woodward's covered his whole life from 1732 to 1796. The aim of both was to reveal the "real Washington," but by widely different methods. Hughes, covering less than half of Washington's life, backed up his statements with documentary evidence, his effort being, as he stated, to "let Washington tell his own story as fully as possible in his own words." Woodward's book was a study not only of Washington, but more broadly of the era in which Washington lived, and it was more of a personal interpretation of the man and his time than the other. He interpreted Washington more as a business man than in any other role and asserted that Washington is not really the best understood of our great men, but the less understood, because "the was the American common denominator, the average man deified and raised to the nth power. . . . Here we see the typical explain of industry attitude."

The effort of these two books, both attempting to substitute the living, breathing Washington for the marble statue Washington, was to revive interest in the whole subject and whatever the verdict of critics on both volumes may be, it is perhaps not too much to say that, the publication of the Woodward and the Hughes biographies may well be regarded as among the outstanding events in relation to the Washingtonian of 1926.

If there is one which may challenge that claim it is the celebration which took place in Trenton, N. J., last December when the anniversary of the battle of Trenton was observed. With President and Mrs. Coolidge and thirteen governors, the present executives of the original colonies, as their guests, the citizens of the New Jersey capital staged a series of mass meetings, parades and special church services in keeping with the importance of the where eight hundred and fifty years ago when Washington and his continentals made their famous crossing of the Delaware to defeat the Hessians and to present to the struggling young Republic the finest Christmas gift that it could possibly desire—a victory at an hour when the hope for the cause of independence seemed dim.

Whatever the new school of historians may eventually accomplish in showing that Washington was not the demigod that he has so often been painted, but that he was a human being with human frailties—that is to say, however much they may take away from some of us our belief that he was a paragon of all the virtues,—it is doubtful if they will ever be able even if they desire it, to dim the glory of Washington, the military leader. And in all of his record there is no more brilliant achievement than that which celebrated at Trenton in December or that other victory in the same campaign, the battle of Princeton, which was appropriately observed on January 3 of this year.

Of this campaign Cyrus Townsend Brady has written "There are three things which determine the relative values of military enterprises—the plan, the method and the result. From these points of view, Washington's Trenton and Princeton campaigns ranks among the most brilliant in history, and its execution the most effective. Following, as he stated, to "let Washington tell his own story as fully as possible in his own words," Woodward's book was a study not only of Washington, but more broadly of the era in which Washington lived, and it was more of a personal interpretation of the man and his time than the other. He interpreted Washington more as a business man than in any other role and asserted that Washington is not really the best understood of our great men, but the less understood, because "the was the American common denominator, the average man deified and raised to the nth power. . . . Here we see the typical explain of industry attitude."

The effort of these two books, both attempting to substitute the living, breathing Washington for the marble statue Washington, was to revive interest in the whole subject and whatever the verdict of critics on both volumes may be, it is perhaps not too much to say that, the publication of the Woodward and the Hughes biographies may well be regarded as among the outstanding events in relation to the Washingtonian of 1926.

Following, as he stated, to "let Washington tell his own story as fully as possible in his own words."

LAST PORTRAIT OF WASHINGTON

Inspired Always by Desire to Do Right

Two qualities seem specially to enfold out in Washington's character, moderation and self-control. As a result, he was always master of himself. He strove to soften, if not to kill, party spirit, which he regarded as most dangerous. As commander-in-chief of the republic's armies, he revered without pay. His only ambition was at all times to do what was right. He was never moved, or influenced in the slightest degree, by considerations personal to himself. He never sought office—on the contrary, he laid it down, though, as far as one can see, he might have been President as long as he lived. But for him it is most improbable that the war for independence could ever have been won. But for him, again, it seems doubtful whether the Constitution could have been agreed on in the convention and ratified by the states, or that the new government, so enormous were its difficulties, ever could have "marched." There are not many indispensable men, but if there are any this great, high minded man and public servant belongs in their company. He may never have read Wolsey's advice to his successor, but he lived up to it in word, thought and deed:

Corruption wins not more than honesty.

Still to thy right hand carry gentle peace.

To silence envious tongues. Be just, and fear not;

Let all the ends thou aim'st at be thy country's,

Thy God's and truth's.

With it all, Washington, as John Fiske shows, was a great nobility, and is competent with none of the ambitions or other infirmities of the conqueror. So we do well to keep his birthday and cherish his fame as one of the nation's proudest possessions.

Luck is the fool's trump card.

Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys If Bladder Bothers or Back Hurts

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys. Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder disorders.

Jad Salts can not injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help keep the kidneys and urinary organs clean, thus often avoiding serious kidney disorders.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Ernest Sutton and Addie Sutton, his wife, of Charlevoix, Michigan, unto to James F. McGeagh, of Charlevoix, Michigan, dated January 24th, 1914, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 26th day of January 1914, in liber 79 of mortgages on page 497, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage, dated September 5th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 10th, 1915, in liber 83 of mortgages on page 350; which mortgage was afterward sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 85 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises hereinafter described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 19th day of February, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres more or less.

Dated January 18, 1927.

MARTIN BLOCK,

Attorney for Assignee of Mortgagee.
Business Address: Charlevoix, Michigan, 108 Clinton Street. 39-13t

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.

IN CHANCERY.

Fred C. Pillsbury and
Lillian C. Pillsbury, Plaintiffs.

vs.

John S. Dixon and Phebe S. Dixon, Charles J. Bush, Charles A.B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa M. Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above; and Charlevoix Manufacturing Company, Defendants.

County of Charlevoix, ss.

At a session of said court held at the court house in the City of Charlevoix, in said county on the 15th day of December A. D. 1926

Present: Honorable Farm C. Gilbert, Circuit Judge.

In this cause it appearing by affidavit on file that the defendant, Charlevoix Manufacturing Company, a corporation, has ceased to exist and that there is no officer or agent in this State upon whom process may be served and that the remainder of the said defendant, to-wit: John S. Dixon and Phebe S. Dixon, Charles J. Bush, Charles A. B. Pratt, J. P. Woodbury, Edward Woodbury, William C. Newman and Louisa Newman and Harriet L. Clifford, or his or her unknown heirs, devisees, legatees and assigns of each of the above named residence is not known and it is not known as to whether or not they are deceased.

On motion of Lisle Shanahan, attorney for the plaintiffs:

It is ordered that the appearance of the said defendants be entered in this cause within three months from the date of this order, and that in case of his, her or their appearance, that he, she or they cause his, her or their answer to the bill of complaint to be filed and a copy thereof served upon the attorney for the plaintiffs within fifteen days after service on him, her or them or his, her or their attorney of a copy of the said bill, and in default thereof that the said bill be taken as confessed by the said defendants in default.

And it is further ordered that within forty days the said plaintiffs cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix, and that such publication be continued therein once in each week for six weeks in succession, or that the said plaintiffs cause a copy of this order to be personally served on the said defendants, individually, at least twenty days before the time prescribed for their appearance.

The bill of complaint in the above entitled cause is filed for the purpose of quieting the title to Lots ten and eleven in Block twenty of Newaunk's Addition to the village (now city) of Charlevoix, Michigan, in the above named plaintiffs as tenants by the entirety.

FARM C. GILBERT,
Circuit Judge.

Examined, entered and countersigned by me:
GEORGE A. RODERICK,
County Clerk.

Charles H. Soelke
vs.
Louisa Nettleton Cole, and
Lee F. Cole.

State of Michigan: In the circuit court for the County of Charlevoix, in Chancery.

Upon due proof by affidavit that Louisa Nettleton Cole and Lee F. Cole, defendants, in the above entitled cause pending in this court reside out of the State of Michigan and in the State of Illinois, and on motion of R. L. Lewis, solicitor for Complainant, it is Ordered that the said defendants do appear and answer the bill of complaint, filed in the said cause within three months from the date of this order, else the said bill of complaint shall be taken as confessed: And further, that this order be published within twenty days from this date, in the Charlevoix Sentinel, a newspaper printed in the said county of Charlevoix and be published therein once in each week for six weeks in succession; such publication, however, shall not be necessary in case a copy of this order be served on the said defendants personally, at least twenty days before the time herein prescribed for their appearance.

Dated this 31st day of December, A. D. 1926.

FARM C. GILBERT,
A true copy; attest, Circuit Judge.
Charles H. Emrey, Register.
R. L. LEWIS, Attorney for Plaintiff.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by William Slough and wife Clara L. Slough, of Ellsworth, Michigan, unto the First State Bank of Central Lake, Michigan, a Michigan Corporation, dated June 15th, 1920, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, November 20th, 1925, in liber 65 of mortgages on page 310, on which mortgage there is claimed to be due at the date of this notice the sum of $2,397.75, including the principal sum due with interest and taxes paid by the mortgagee, together with attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises hereinafter described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the City Of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 19th day of February, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of South Arm, County of Charlevoix, and State of Michigan, described as follows, to-wit: The southwest fractional quarter of the northwest fractional quarter and the northwest fractional quarter of the northwest quarter, all in section seven, ewship thirty-three North of Range seven west.

Dated November 15, 1926.

NOTICE OF
MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described by the non-payment of the three amortization installment of forty-eight and 75-100 ($48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen an 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy and 76-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to the Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1927, in Liber 62 of mortgages on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and attorney attorney fee, be sold at public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E¼NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof; Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 ($1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK
OF SAINT PAUL, Mortgagee.
Dated, Dec. 27, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney for the Mortgagee.
Mt. Pleasant, Michigan. 36-13t

HUNTERS FAIL TO THIN OUT WILDCATS

Little Hope of Clearing Forest of Beasts.

Olympia, Wash.—Not in one hundred years will the cougar, or bobcat, be banished from the forests of the northwest states is the opinion of state and government predatory animal hunters.

Scores of these are killed in every section of the Northwest each year, yet every spring fills the depleted ranks with playful kittens, potential game and livestock destroyers. For a long time to come the cougar will continue to flourish in the rugged wooded parts, chiefly because that, catlike, it is the king of stalkers; dines on a great variety of meat, and can only be successfully hunted by the use of cleverly trailed trailing dogs.

The destruction of cougars by paid hunters varies widely over the western states. In Whatcom county, Washington, last year, 129 were brought in for bounties; 135 were slain in Wasco county, Oregon, in 11 months, while provincial agents in British Columbia report the destruction of 1,087 the last 12 months.

In Shariel county, Oregon, Bathaven Jones, hunter and trapper, claims to have killed over 100 mountain lions in his time, while Lester Wagner of Skagit county, Washington, has claims to prove the destroying of 187 bobcats.

No matter what name the cougar is called in various parts of the West, it is the same animal, stealthily invading domestic herds or preying cunningly on deer, young elk, small animals or game birds. In Washington and Oregon the animal is called the cougar; California and New Mexico use the title mountain lion; Canada, the catamount; Colorado and Texas the puma; Montana and Idaho simply designate it as the wildcat.

Potato Seed Not Used

Both the Irish and the sweet potato produce true seeds, but in neither case are they used for propagation. The sweet potato plant produces seed only in very warm climates, while the Irish potato produces seed only in cool climates.

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.

IN CHANCERY.

Saul Peters, Plaintiff.

vs.

Maud Peters, Defendant.

Suit pending in the circuit court for the county of Charlevoix in Chancery, in the city of Charlevoix, in said county, on the 23rd day of December, A. D. 1926.

In this cause it appearing from affidavit on file, that the defendant, Maud Peters, is concealed within the State and her whereabouts cannot be ascertained.

On motion of R. L. Lewis, plaintiff's attorney, it is ordered that the said defendant, Maud Peters, cause her appearance to be entered herein, within three months from the date of this order and in case of her appearance that she cause her answer to the plaintiff's bill of complaint to be filed, and a copy thereof to be served on said plaintiff's attorney within fifteen days after service on her of a copy of said bill and notice of this order and that in default thereof, said bill be taken as confessed by the said Maud Peters, defendant.

And It Is Further Ordered, That within forty days the said plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that such publication be continued therein in at least once in each week for six weeks in succession, or that he cause a copy of this order to be personally served on said Maud Peters, defendant, at least twenty days before the time above prescribed for her appearance.

FARM C. GILBERT,
Circuit Judge.
R. L. LEWIS,
Attorney for Plaintiff. 39-7t

Order for Publication—Final Administration.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 29th day of January A. D. 1927

Present: Honorable Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Sarah Emrey deceased.

Mack Lisle having filed in said court her final administration account as special is iministrator and her petition praying for the allowance thereof.

It is Ordered, That the 24th day of February, A.D. 1927, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
Judge of Probate. 41-3t

Paris Uses Blood Test as Gauge for Drunkard

Paris.—A blood test is the really modern way to determine whether a staggering gentleman is really drunk. Striking proof that this is more certain than the old-time police method of making a suspect walk a chalk line has been accepted by the Paris courts.

It is true that the experiment in this case was on a dead man, but chemists say the method will work as well on a live one. A motorist ran into a pedestrian who staggered into the car's right of way. The man was killed. There were no eye-witnesses, but the driver demanded an autopsy.

Leon Bonn, an expert chemist attached to the courts, analyzed the victim's blood and found alcohol in sufficient quantity to indicate the man had drunk about four quarts of wine of 10 per cent alcoholic content. That made four-fifths of a pint of pure alcohol, which, the judges agreed, was enough to make the hardest drinker disregard traffic regulations.

Standardizing Utensils Hope of German Woman

Berlin.—Asserting that the business of housekeeping, while employing the largest number of "hands" of any "industry," is the most disorganized in Germany, Dr. Marie-Elizabeth Lenz-Kes, feminist and democratic reichstag deputy, has started a campaign for the standardization of household utensils as the first step to greater efficiency and less drudgery in the home.

"There are seventy-two different coffee mills on the market," Doctor Lueders said by way of illustration. "Six machines would gratify every whim of housewife and manufacturers concentrated on putting out just six mills, prices would fall and a better product would result."

SAW CHARGE OF "SIX HUNDRED"

Veteran Fighter Rounds Out Eventful Life in Quiet Retreat

Captain Walpole Roland, campaigner in half a dozen wars, celebrated his hundredth birthday recently in St. Joseph's Home for the Aged, operated by the Little Sisters of the Poor, in Detroit. Captain Roland was honored by the Veterans of the Foreign Wars who decorated him with the honorary medal of the Veterans.

When a young officer, Capt. Roland stood on a hill and watched the famed charge of the Light Brigade during the Crimean War. At that time he was attached to the Turkish Army as military advisor. He was born in Boorkee, India, the son of Col. Walpolo Roland, of the British forces. He has seen service under five flags, in the Crimea; India, China, the United States and Mexico.

Graduating from the Royal Military College, at London, Capt. Roland went to a military school in Saxony, where one of the instructors was a son-in-law of Omer Pasha. While a little persuasion Roland was induced to join the Turks. He served through the Crimean conflict and fought at Balaklava, where the light Brigade made its famous charge, at Alma, Inkermann and at the seige of Sebastopol. He fought in Persia and then went to India, where he aided in the supression of the Indian mutiny, in 1857.

In China he served during the Boxer uprising under "Chinese" Gordon at Taku Forts and the Seige of Pekin. During the civil war, in the United States Capt. Roland was commissioned in the Union army and served under Custer; Meade at Gettysburg; and Grant at Petersburg. At the close of the war he sailed for Vera Cruz, where he joined the Bonapartists.

In 1898 he was refused by the United States army but in the World War he served as an inspector of supplies in Pittsburgh, although 90 years of age. His experiences he has recorded in his book "Under Four Flags." When not fighting, Capt. Roland followed his profession of mining engineer and has prospected all through the west and Canadian northwest.

Records show that hump railroad yards were maintained at Spelldorf, Germany, in 1876, and also on the Paris, Lyon and Mediterranean in France in 1888. The first summit yard in America, as far as can be learned, was constructed by the Pennsylvania railroad in 1892 at Huffs station, two miles south of Greensburg, Pa.

CIRCUIT COURT OPENS MONDAY OF NEXT WEEK

Circuit Court convenes next Monday with a total of thirty seven cases on the term calendar of which fifteen are criminal actions, seven issues of Fact and Law, four Chancery cases other than divorce and eight divorce cases noted for hearing and action during the court session.

The calendar is not a heavy one. Practically all criminal cases are of a minor nature, requiring but little time of the court for their disposal. The outlook for a short court term with but few annoyances to court attaches is very favorable.

FATHER KREBS, THUMB MISSIONARY, BURIED

Beloved Priest Founded Parishes in Many Michigan Towns

Nearly 100 priests from Detroit and the surrounding district gathered in SS. Peter & Paul's Cathedral, recently, to pay their final respects to the Rev. Fr. Clemente T. B Krebs, veteran missionary of the Thumb district, who died following an illness of several weeks.

The Rt. Rev. Joseph C. Plagens, D. D., auxiliary bishop of Detroit, pontificated the funeral Mass and the sermon was delivered by the Rt. Rev. Msgr. Francis J. Van Antwerp, V. G., whose friendship with the late missionary extended over a period of half a century. Fr. Krebs founded parishes at Cagetown, Port Huron, Reese, Imlay City, North Branch, Clifford, Bad Axe, Ubly, Caseville, Sheridan and Pigeon.

He was born in Westphalia, Germany, in 1851. In 1879 he was ordained at Sandwich, Ont., by the late Bishop Borgess and for 35 years braved the dangers and discomforts of the then sparsely settled Thumb district. Other services were also held at Sebewaing, Port Hope, Caggetown, and the interment was made at Cagetown, the scene of Father Krebs first labors as a priest.

Traced to Greenbacks

Flat money was the name given to greenbacks issued by the government during the Greenback agitation after the Civil war from the claim of the Greenback party that the right of the government could give value to a circulating medium.

Ended Humane War

"The invention of gunpowder," said Hi-Ho the sage of Chimstown, "put an end to our comparatively humane era, when war consisted largely of pushing fiaky faces and throwing bombs of evil odor.

Steamers Manitou and Puritan to Run Regular Schedule This Season

Captain George Johnson, manager of the Michigan Transit company steamship line, was a business visitor here early this week. Though the company has been close on the financial rocks recently, the captain is authority for the statement that matters are easier with the Transit company and that the S. S. Manitou and Puritan will be placed in commission at the usual time and that northern Michigan ports will be served the past years with a schedule that will practically be the same as in former years.

LOCAL BUSINESS MAN

Passes—Robert T. Mears—Was Ill But a Short While.

A report freely circulated last Monday that Mr. Robert T. Mears had passed away during the forenoon, came as a shock to local Charlevoix people, but few of whom aside from his family members, were aware of his illness. None of whom considered his condition serious until a few hours before his death.

Some days prior to his death Mr. Mears contracted a cold, later pneumonia developed to an alarming degree. Saturday evening the patient was taken to Petoskey for special treatment at the local hospital, but in this case medical skill could not conquer the disease. The patient grew rapidly worse and passed away during the forenoon, Monday, February 21st.

Mr. Mears came to Charlevoix about 10 years ago, and this has been his permanent residence since May 1908 and his place of business during the succeeding years. During these years he has attended faithfully to his business activity, without great outward display and in a manner that won for him many close personal friends who testify to his honesty of purpose and strict integrity in his business transactions.

Mr. Mears was about sixty-two years of age. He was born in Ottawa county, Ohio, June 23, 1865. He was united in marriage in 1890 to Miss Mabel Dickinson at Kingsville, Canada, by whom he is survived. He is also survived by one daughter, Miss Vera Mears, and one sister Mrs. Harmon Orr, the latter of Toledo, Ohio.

Funeral service was held at the family home, 112 West Upright avenue, Wednesday afternoon, this service being in charge of Charlevoix Lodge No. 382, F. & A. M. of which deceased was a member; with Rev. B. G. Matson D.D., pastor of the Congregational church, officiating.

A. N. CHASE, PIONEER

Passes at the Home of His Daughter Early this Week—Nearly 80 Years of Age

Funeral service was held at the First M. E. church Monday afternoon for Mr. Asher N. Chase, the pastor of the church, Rev. U. E. Pollock, officiating at the service.

Mr. Chase was a pioneer of Charlevoix county where he has resided since 1868. Place of birth is given as Uxbridge, Canada, February 11, 1847; therefore at his age at the time of his death fell but little short of 80 years.

He was united in marriage with Miss Isabelle Jane Baker April 17th, 1881, by whom he is survived also by two daughters Mrs. Merle Trimble of Bluchier, Canada, and Mrs. Albert Howard of Ludington, with whom he was making a visit at the time of his death.

ACED WOMAN PASSES

Mother of Dr. F. P. McMillan, Aged 75 Years—Body Taken to Berlamont, Mich.

Mrs. Susan Mcmillan, 75 years of age passed away at the home of her son, Dr. F. P. McMillan, 219 Park Avenue, last Saturday night. A brief funeral service was conducted at the residence Monday morning at 12:30 p. m., Pastor C. E. Pollock of the M..E. society officiating.

Following the house service the body was taken to Berlamont, Mich., under charge of the deceased, for interment, accompanied by her sons and daughters all of whom were at the bedside during the end. Those from Charlevoix; Mrs. Edward Cluff, Chickago; Miss Mary McMillan, Ann Arbor; H. P. McMillan, Ann Arbor; and Mrs. H. F. Dagwell, a niece, of Cheboygan.

Four Sets of Twins Born Out of Total of 23 Births

Moberly, Mo.—A new record for a rural community like this one was established in November when four sets of twins were born out of a total of 23 births, breaking all previous records along that line. The twins were born to Mr. and Mrs. J. H. Grove, Mr. and Mrs. John E. Smith, Mr. and Mrs. Earl L. Bloss, and Mr. and Mrs. Warren Denton.

Invents "Railplane"

Glasgow.—George Bennis, a Scotch engineer, has invented a system of "railplane" transport, by which cars on an elevated track are propelled by electrically driven airplane propellers.

Co-eds Lead

Ann Arbor, Mich.—Women students outranked men students at the University of Michigan last year. The scholarship average for all women was 78.111 and for all men 78.62.

HOUSE EXCLUDES LOBBYISTS FROM DAILY SESSIONS

Capital Punishment Provoke Fiery Debate, Draw Big Crowds

Lansing, Feb. 21—These are thrilling and busy days at the State House. The session has now reached that stage when the daily meetings are growing longer and the measures of importance are being reported out of committees for consideration and debate on the floor of the Senate and House of Representatives. Capital punishment, control of lobbyists and finance measures are some of the big issues that are being threshed out by the lawmakers.

A capacity house is assured for the House of Representatives gallaries and sidelines for Thursday, Feb. 24, for that is the date set for the final debate and vote on the Armstrong capital punishment bill providing that either life imprisonment or electrocution would be the legal penalty for first degree murder in Michigan.

In considering this bill in committee of the whole the House adopted an amendment providing that capital punishment would not be inflicted in cases where the conviction was wholly on the basis of circumstantial evidence. The House defeated by a vote of 39 yeas to 47 nays a proposed amendment which would have made capital punishment compulsory for first degree murder, without the optional sentence of life imprisonment.

LOBBYISTS OUTLAWED

Will have to Forsake the Cushions which Line the Sides of Legislative Halls

Lobbyists will have to forsake the soft cushioned, leather davenports which line the sides of legislative chambers and peer down on the backs of the lawmakers from the gallery according to amendments hooped to the bill by the Senate and the House. It didn't take the Senate long to adopt the amendment to its rules proposed by Sen. Norman B. Horton of Fruit Ridge.

However, when a similar provision was proposed in the House by Rep. Burton G. Cameron of Charlotte, the representatives made it a special order of business and fired off a lot of rhetorical fireworks before the resolution was finally adopted! Just what is meant by the term "lobbyist" provoked considerable discussion and difference of opinion.

One of the strong speeches in favor of the amendment to the rules to debar lobbyists was that of Rep. John P. Epsie, who declared. "This body of men should place themselves above suspicion. The people of Michigan have in no uncertain terms demanded day-light government in Michigan. The representatives of such an organization as the Michigan Manufacturers' Assn. are entitled to be heard on matters of interest to their organizations, but they should voice their views before legislative committees at public hearings upon invitation and should not be allowed upon the floor of the House when we are in session."

The lobbyist bill was opposed and ridiculed by Rep. Ate Dykstra of Grand Rapids, who said, "It's not worth the paper it is written on. Its only purpose are to please the governor and to send back to our constituents thru the newspapers for home consumption. The present rules of the House are adequate, if they were enforced. If we can't live up to them, why ask for more?" The danger is not from the men who sit on the side lines, but from those fellows who haunt the hotels and influence the members during the midnight hours. This resolution is a sham in the name of the members of this House. I haven't seen any moral dirt around here that needs cleaning out." Finally the resolution was adopted by a vote of 69 to 22.

WOULD AMEND MARRIAGE LAW

Repeal of the Five-Day License Law is Proposed—Many Preachers Favor the Bill

Repeal of the present law which requires that a marriage license cannot be granted until five days after the application has been made for it is proposed in a bill by Sen. Frank S. Cummings of Centerville. The repeal of the five-day provision is said to have the backing of the county clerks of the state who feel that the present arrangement makes them a lot of extra work. Many preachers are reported to be in favor of the abolition of the five-day feature of the present law because it is losing them considerable business. Michigan citizens are reported to be going across the state boundary when they wish to get married in a hurry or without undesired publicity.

Monday, March 7th, is the date when Dr. Leahy, the Optometrist, will be at the Hotel Charlevoix.

BOYS' SUMMER CAMP

Camp Charlevoix, Near Ironton, During July and August

Camp Charlevoix, "A Character Camp for Boys" is being established on Sweet Briar Farm, near Ironton, this summer, by a group of Ann Arbor men who are interested in giving boys the best that camp life affords.

The camp which will be conducted during July and August will be directed by Lewis C. Neuman, governor of Michigan Kiwanins and now a director of religious work at the U. of M. Mr. Neimann for the past ten summers has directed successful boys' camps and was the originator and director of the U. of M. Fresh Air Camp that now takes care of 400 boys.

The camp consists of 78 acres and 14 buildings on the south shore of Lake Charlevoix, where mosquitos are unknown. Thousands of dollars are being expended in improvements which include tennis courts, baseball field, basket ball and volley ball courts, tracks, docks and diving piers, sanitary toilets, artesian water system, art studio, handicraft shop and many other things.

MEMBERSHIP IS LIMITED

Only Boys of Good Character, Ages from Nine to Fifteen will be Accepted.

The camp staff consists of Mr. Neiman director; LeRoy C. Dahlberg, A.B., director of activities; Prof. Robert Craig Jr., head of the University Forestry dept; Prof. J. Raleigh Nelson, who will be advisor of dramatics; Angus McDonald Babcock, associate art director of the Fireside Industries, who will teach making baskets, modeling and decoration of gifts and toy articles and simple design; Geo G. Alder, U. of M. handicraft and nature study; Albert McDonald, teacher in Archery in the U. of Y; Philemon Barbock, U. of M. athletics; Earl Oldham, aquatic and Red Cross tests; Dr. Emory W. Sink, sanitary and health arrangements; Mrs. Grace Johnson Kondel, Redpath artist, will give concerts and bring friends for musicales; and Judge J. C. Pray will give a series of campfire talks and Chief Jo Donatus of Harbor Springs will teach Indian craft and put on an Indian campfire program.

All councellors will be university or college men of graduate and students. The membership in camp is limited. Only boys of good character will be accepted, ages from 9 to 15. It is Mr. Reimann's intention to make this one of the finest boys camp in America.

A camp mother will be on the staff to give special attention to the young boys. An expert dietician will plan the meals. A camp library will be on hand. Many interesting trips will be made to places of interest. Speakers from the Bay View Assembly will address the boys at camp fire and on Sundays.

A booklet about the camp may be secured by writing to Mr. Reimann at Ann Arbor, which as the central office of the Sweet Briar Resorts corporation which is sponsoring Camp Charlevoix.

PETOSKEY BUILDS FINE NEW PAROCHIAL SCHOOL

Brick and Stone Fireproof Structure to Cost $82,000

A contract for the new $82,000 St. Francis parochial school building, at Petoskey, Mich., to replace the present frame structure, was awarded recently. Work on the new building will start immediately according to an announcement by the Rev. John Curry, pastor, and it will be ready for occupancy next autumn.

The new school will be of the most modern brick and stone fireproof construction throughout. Eight class rooms, assembly room, cloak rooms dining room, a gymnasium and a room and kitchen for the teaching Sisters have all been provided for. For the past two years, members of the congregation have been working on a financing plan for the new school and it is hoped to have the obligation well in hand by the time the building is completed.

The present building will be removed and the structure erected on its site. The new school will accommodate about 300 pupils.

Plans for a $60,000 parish convent home to be built by St. James Parish, Perndale, were recently announced. According to the Rev. Fr. James O'Brien, pastor, the convent will be of modern brick and stone fireproof construction throughout and will accommodate the 24 Nuns who are teachers in the parochial school.

Built Up by Thought

Each is building his own world. We both build from within and we attract from without. Thought is the force with which we build; for thoughts are forces.

LOCAL MEN TO VISIT AT LAKE PLACID, N. Y.

Winter sports at Lake Placid, New York, are being observed this week by D. T. McHugh and Earl Young, they having left for the east Sunday morning to make a study and survey of the sports program and witness the events that attracts the attention and furnishes entertainment to thousands of winter sport seekers, a successful and annual event which to some extent is followed by other winter sport centers.

HIGH SCHOOL GIRLS CONTEST

Conducted by National Live Stock and Meat Board.

More than 10,000 high school girls of the United States are entered this far in competition for university scholarships which are offered as prizes in an essay contest being conducted as an aid to the study of meat in home economics classes.

Schools in 18 Michigan cities are represented, according to the National Live Stock and Meat Board: Elk Rapids, Williamston, Owosso, Hamtramck, Petoskey, Lake Linden, Olivet, Hastings, Mt. Clemens, Montague, St. Louis, Bay City, Menominee, Escanaba, Ishpeming, Lapeer, Mancelona and Otsego.

The event is known as the National Meat Story Contest and is held annually under the auspices of the National Live Stock and Meat Board with the cooperation of educational institutions of the country. The present contest is the fourth. Stories or essays prepared by contestants will be judged by a committee composed of prominent home economics authorities.

March 15th is the closing date.

A number of cash prizes are to be awarded in addition to the scholarships. Awards have been arranged so that girls in every state will be among the winners.

High schools are being added to the entry list daily. It is predicted that the final enrollment will far exceed that of previous years. The number was given as about 10,000 for last year.

Delegates to State Convention, Grand Rapids, Tuesday, Mar. 1st

Delegates to the county republican convention held at Boyne City last Thursday elected five Charlevoix county residents to represent the county at the state convention called for Grand Rapids, Tuesday March 1st, as follows:

J. M. Harris, Boyne City; E. N. Clink, East Jordan; Charles Novak, Charlevoix; W. J. Gallagher, St. James; H. E. Myers, Boyne Falls.

Alternates named were: J. R. Furman, Boyne City; O. D. Hammond, Charlevoix; L. G. Balsh, East Jordan; W. J. Pearson, Boyne Falls and D. C. Vaughn, Charlevoix.

Sight of Animals

The biological survey says that the crystalline lens varies somewhat in the eye of different mammals. Magnification of the object may sometimes result, but it is impossible to tell the comparative impression on the retina and the optic nerve. Should man appear three times his normal size to animals, all other objects would also be magnified three times.

DEER ARE wintering well on the Upper Peninsula, is the word sent by the northern conservation officers. In the neighborhood of Hulbert, Chippewa county, lies one of the large yarding areas of deer in the U. P.

Practically every year it has been necessary to haul hay and forage into this yard to help the animals thru the win

Selected for the Temporary White House

The Patterson mansion, located on Dupont circle in the heart of Washington's fashionable district, has been selected by President Coolidge as the temporary White House while the present one is undergoing repairs starting March 4, 1925, which will last for a period of about two years. This home, one of the showpieces of the national capital, was built for the late Robert W. Patterson, long the editor of the Chicago Tribune. It is now owned by his daughter, Mrs. Elmer Schlesinger, wife of a former member of the United States shipping board.

New Rum Chasers Christened with Ginger Ale

Illinois and Virginia families of prominence were united in Naples, Italy, when the marriage of Miss Elizabeth Davis Stevenson of Bloomington, Ill., and Kinnard Linwood Ives of Norfolk, Va., took place. Lewis Green Stevenson, formerly Illinois secretary of state, father of the bride, was present and gave her away. Mr. Ives is first secretary of the American embassy in Constantinople.

Mr. Jardine Greets Cotton Champion

New portrait of William Phillips, who has been selected as the American minister to Canada. He has been serving in the department of treasury and before that was undersecretary of state.

CANTONESE "QUEEN"

Mrs. Sun Yat Sen, Wesleyan college graduate, widow of the former Provisional President of China, who is said to be leading the Cantonese, or southern forces, in their march northward. The troops look on her as a sort of queen.

They Were Married in Naples

MINISTER TO CANADA

SHORT ITEMS TO REMEMBER

About one person in 3,000 in India has leprosy.

Rubber applied to machinery in Canada is found to outwear metal.

The United States census bureau took its first special census of eligibles in 1920.

White street lines to guide motorists cost London hundreds of pounds monthly. Snow, fog and rain cause the paint to wear rapidly.

One silk company in this country uses 50,000,000 cocoons in a day.

Salt mines of Galicia have been worked since the Thirteenth century.

The loss in iron escaping from the blast furnace amounts to 3 per cent of the iron mined.

Plans are being made for the showing of colored show-motion pictures of surgical operations in medical colleges.

Romance in Diplomatic Circle

The latest diplomatic romance in cosmopolitan Washington will cause Miss Anita Ravenscroft Henry, daughter of J. William Henry and prominent in Washington society, the bride of Edward von Setzmann of Darmstadt, Germany, secretary of the German embassy in Washington.

Amateur Nights Fast Dying Out

Most Amusing Feature of Theater Will Soon Be but Fragrant Memory.

St. Louis.—One of the most cherished institutions of the stage is passing, and it is only a matter of time until it is entirely in the discard. Amateur night, that most amusing feature of the theater, will soon be a fragrant memory, a memory redolent with the aroma of sterling "hams" who indistinctly persuitted themselves to be "put on the pan" for the edification of an audience that laughed with devilish glee at the crude antics of those who would be actors and were willing to pay the price of public harassment to attain the goal.

Amateur night is an institution as old as the theater itself. As its name suggests, it affords an opportunity for those who have ambitions for the stage to display their talents, no matter how sympathetic audience sits as judge and jury and by its token of approval or disapproval denoting the degree of success with which the neophyte has put over his act. Over there were resounding bravos and tumultuous applause, and for others a silence that damned.

The Announcer's Speech.

The theaters at amateur nights are virtually the same. The regular program is rendered, and some one steps out of the wings to the center of the stage. His speech is always the same:

"Ladies and Gentlemen: We have a little something for you this afternoon tonight, something that we think you will appreciate. We will ask you to give an encouraging reception, and we shall take a vote at the end of the performance as to whether he is the best. First on the program tonight is little Margaret Brisk. Step out, Margaret. I thank you."

He retires and little Margaret slips toward the footlights. Margaret, it appears, is a mother's darling who is supposed to have a rare voice. So, he child supposes, she sings about "Ti the birdies in the trees," and for an encore—she takes it whether she earns it or not—she vocalizes again on the influence a full moon has on the spooning propensities of the sterner of the sex.

Wide Variety of Acts.

Five or six other acts follow in succession. Elmer, the chosen hoofer from the levee district, does a buck and wing. The McGoffin sisters do a double—Cecilia at the piano, Molly with her mandolin. They both try to sing, too. Tom and Jerry do a tumbling act and narrowly escape death as they essay a going somersault in midair. Arthur Tremont is a versatile chap. He sings tenor; he plays the saxophone; he juggles six balls simultaneously, and he can clog dance. Arthur is pretty much of a vaudeville show in himself.

Sylvester and his crooning troubadours conclude the bill—an ambitious gang of syncopaters who may be commended for talent, but who lack the harmony they discourse.

The announcer again steps out of the wings and raises his hand for silence. He requests all the performers to come back on the stage, and they self-consciously line up in a semi-circle behind him. He is speaking:

"Ladies and gentlemen: Well, you have seen the boys and girls perform, and now we will see who gets the big prize. I will pass behind the performers, and I will ask you to show by your applause whom you think is best." (only he doesn't say "whom"—"who" is better.

Picking the Winners.

He places his hand on little Margaret's head. A burst of handclapping. Margaret smiles and sticks her thumb in her mouth. Mother, in the front row, is gesturing wildly for her not to swallow it. Elmer apparently didn't register much with his hoofing—or maybe he didn't bring many of his friends to the theater. He doesn't do so well. The McGoffan sisters likewise get a lukewarm reception, and they make a sudden shift from dental discipline to sullen gloom.

Tom and Jerry are remembered for that remarkable swing in midair and get a big hand. Arthur Tremont, the boy with the curly blond hair and the Ascot tie, goes over big, clearly outdistancing Sylvester and his crooning troubadours, who are obviously pissed at the inability of the audience to appreciate their syncopation.

Unable to Decide.

The announcer is standing again:

"Ladies and gentlemen: Well, I can't quite decide who wins the big prize. Seems like Margaret and Tom and Jerry and Arthur Tremont are the favorites. So I'll ask you to vote on these three."

He places his hand on Margaret's head. The audience is accordingly making this time and she gets just a ripple of applause. Tom and Jerry also fail to make their first quota, and Arthur Tremont wins in a walk.

"Arthur Tremont is the big prize," says the announcer. "Who wins the second prize?"

He points to Margaret. A few friends remain faithful, but she loses to Tom and Jerry. The announcer tells the audience as much and cheerfully is satisfied with the showing of Margaret's mother, who quite volubly insists that her daughter didn't get a square deal and that she was robbed.

Reason for Elimination.

Such is the show put on nightly at St. Louis showmen are to be believed, such nights are passing from the theater never to return. The reason for their demise is simple, if one may take the word of the musical and stage director of one of the theaters.

"There is no longer an excuse for amateur actors to make a public show of themselves in order to get a berth," he says. "The reason is found in the motion-picture theaters, which, within the last two years, have enlarged their field to include acts more than the mere cinema presentations.

"Take St. Louis, for example. Originally all the motion-picture houses in the city were just that, theaters in which motion pictures were shown with an orchestra to furnish incidental music. But a great change has come over the profession. As soon as a theater ceases to be more than a mere neighborhood playhouse it goes in for stage production.

Stage Management a Problem.

"The best of theatrical talent is obtained for these shows. Stars from the legitimate willingly go to the movie houses because they have to work harder. Stage management, strange as it may sound, has been a big problem for motion-picture theater managers for some time, and the field has by no means been expanded to its limit.

"All of which being true, the question is, what does that have to do with the passing of amateur night?

He answers the question readily:

"Because of the fact that all the large motion-picture theaters are making stage presentations, they are naturally trying to recruit as much of their talent as possible right at home. Economic reasons, if no other, would prompt such action. The result is that in our theater, for instance, I hold semi-weekly auditions at which talented performers are given ample opportunity to show just what they can do on the stage. The same is done elsewhere in the city."

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then set fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink. Drink lots of soft water.

Steamship Captains Have Queer Hobbies

Tucson, Ariz.—Believe it or not, a ship captain is not a ship captain! When he is raising silk worms, collecting rare beads, making fancy tapestries or painting marine pictures. Sea skippers are supposed to be busy most of the time taking observations or writing up the log, but masters of automenta Frenchi, liners touching ports here have various hobbies.

Captain Corbin of the Marseilles has a hand loom in his cabin upon which he weaves out delicate, valued lace tapestries, defying intricate and beautiful designs.

Captain La Baron of the Georgia is a talented artist, exhibiting numerous marine paintings here recently. His ocean colors are true and his technique striking.

Captain La Roche of the Hamburgue collects rare species of wood to incorporate into small pieces of furniture.

Captain Corbin of the Alaska raises silk worms on his farm in France under subsidy from the government.

Captain Sisson of the Mississippi has a bent for raising chickens and carries an incubator on board to hatch out special collection of eggs. A collection of world-wide butterflies adorns the quarters of Captain Dufresne of the Dorian de Fourchevere.

Several other skippers carry with them monkeys, canaries, parrots, turtles, goats, dogs, and cats.

Store Man Puts $215 in Bag; Goes With Order

Savannah, Ga.—C. L. Brown, manager of a branch store here, has had $215 in an unsaid way. During a rush Brown took the amount named from his cash register and put it in a paper bag. The bag got mixed up with an order of groceries and was packed away in a basket of the purchaser. Now nobody in the store knows who carried off the money. All that Brown knows is that it is gone and that he had to make the loss good to the company.

Scout Saves Father

Worcester, Mass.—Isadore, fourteen years old, practiced the first-aid lessons of his boy scout troop when he returned from school to find his father unconscious from gas. Hospital surgeons say the father would have died otherwise.

Stop Apple Stealing

St. Paul, Minn.—Apple stealing days in Minnesota would be ended and also the terms of a bill now being considered by the state legislature. The bill makes it grand larceny in the third degree.

Pigeons Come for Meal Same Time Each Day

Milwaukee, Wis. — Thomas Corbett, an assistant in the city building inspector's department, is certain that pigeons think.

For a year he has been feeding the birds that hover about the building, perched at times on the window ledge. He has noticed that the birds start cooing to the window just before the clock in St. Mary's church, a block away from his office, strikes the noon hour.

They seem to know, he says, that noon is time to eat and he has found the pigeons as good as a watch in marking the noon hour.

Keefert was curious to see whether or not the birds counted around on Sundays, and made the test on the office on the holiday. The birds did not appear either time.

Poor Man's Judge Bars Lawyers From Court

Wichita, Kans.—A court in which no lawyer is admitted, except as a spectator, where there are no court attaches, no office equipment, no permanent records and which meets at the time and place most suitable to the litigants, is conducted here by David H. Leahy, veteran newspaper man.

The jurisdiction of the court is limited to the city, and to sums of money not to exceed $20. Often cases involving less than a dollar are heard. Ordinarily after Judge Leahy has rendered a decision, payment is made on the spot. When a judgment is not paid he sends notice of it to the clerk of the district court and it is executed in the same way as any other judgments are executed.

The court was created by the legislature. "About ten years ago Judge Leahy took it over. In less than a year he has heard more than 300 cases and not one of them has been appealed.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating.

Your stomach may be so disfended that your breathing is short and gasny. You may belch and pray for quick relief—what's to be done.

Just one tablespoonful of Bare's Mayr's Wonder Tonic, generally the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentho Pepsin, a pleasant elixir, to help you or money back.

WE PAY YOU CASH for gold teeth, broken sets, jewelry, diamonds, watches. Mail today. Free information. Goldsmith Refining Co., 2 N. Wabash Ave., New York City.

BOBBED HAIR SEEMS DOOMED, BELIEF OF UNIVERSITY GIRLS

Indications Point to a Return to "Sophisticated Coiffure" With Its Braids and Hairpins.

Boston.—This year may see the swing back to long hair. Indications in that direction are seen throughout New England colleges where once bobbed hair girls are turning to the braid and the hairpin. Reports from Simmons, Radcliffe, Wellesley and Smith, strongholds of feminine independence, show that the lock is on the wane and that the "sophisticated coiffure" may supplant it.

Numerous reasons are given for the change but the most prominent one is that "we are sick of seeing ears, ears, and bristly necks." Many complain of too many trips to the barber shop; others "don't want to look like every girl we meet;" some say that long hair has more individuality, while one intends to let her hair grow because the "boy friend" likes it so.

The conversions among these college girls seems to be that they consider bobbed hair not as good as they first thought. Many were of the opinion that the day of mannish fashions for women had passed, and having had their fling of freedom, are willing to revert to former standards.

Various modes of fixing the hair in the "in between" period are now being employed. This period has produced almost a new sort of coiffure in itself. The "awkward" stage has revealed the real ingenuity of the college girl to meet the change in hair styles, and in this case she has come through successfully.

Though many admit that the very thought of letting the hair grow presents a trying problem, they are willing to pass through the ordeal to regain their crowning glory.

Beauty Secret Revealed

Helen's Figure Is Perfect, Says Fuller

The fear of Suzanne Lenglen, as expressed at Atlanta that Helen Wills, young tennis star, is permitting herself to get fat and is thus jeopardizing her chances on the court, has no foundation in fact, W. C. (Hop) Fuller, coach of the former national champion, said.

"Helen's figure is mathematically perfect," Fuller said. "Her weight and height are in exact unison according to all charts. She is 5 feet 7½ inches tall and weighs 135 pounds and she has not varied from these figures for many months."

Better Sportsmanship on Turf Today Than Before

There is better sportsmanship on the turf today than there was in the supposedly "good old days," writes Peter Burnaugh, racing expert, in the first issue of the Sportsman, a publication which dedicates itself to "sport as something done for the fun of doing it, not as a business."

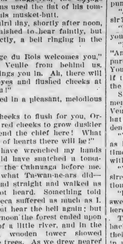
The turf is growing more sportsmanlike, Mr. Burnaugh contends, because "it is rapidly being taken over by men who can thoroughly afford to be fortunates. It isn't easy to be a sportsman on a slow string. Finances will, of necessity, be a powerful factor in the very spirit of conduct of a racing stable."

During the past year, Mr. Burnaugh testifies that he found the turfmen quite willing to accept the verdict of fractions of the quality of their horses. "Back of that frankness lay the fact, of course, that quite many of them are heavy bettors, none of them depend on the fruits of betting to support the stable," writes Mr. Burnaugh in the Sportsman.

"Such owners are interested more in establishing the quality of their horses, where the competition is keen, and the glory of winning bisected fixtures than in winning large wagers.

"All sportsmanship did not bloom and die with the old boys," Mr. Burnaugh concludes.

Red Rookie Is Star



Walter Christensen, utility outfielder for Cincinnati, has developed into a star. He was one of the three comebacks for batting honors in the National league last year.

Sport Notes

Olympia fields, Chicago, is the world's largest golf club.

* * *

Baseball is rapidly threatening to become a gossip and game.

* * *

Upward of 10,000 men in the United States play professional baseball.

* * *

It's almost time to begin selecting the all-American football team for 1927.

* * *

Charles Chang, a Chinaman, is golf professional of the Redlands (Calif.) Golf and Country club.

* * *

The largest football score on record was made at King college, Bristol, Va., 206 against Lenoire's 0, in 1922.

* * *

Finale fans in Paris make it a practice to reward unusually game exhibitions by boxers with a gold medal.

* * *

Pennsylvania is anxious to hold the annual intercollegiate track and field championship on Franklin field in May.

* * *

Clarence Brooks, veteran catcher, has been signed as manager of the Binghamton (Ill.) team in the Three-I league.

* * *

The Seattle Soccer league will present a gold medal to the player who displays the finest sportsmanship during the season.

* * *

In order to stimulate horse breeding in Tennessee, application has been made to place Nashville in the grand circuit of harness horse racing.

* * *

The professional baseball team manager who fails to lend his men to first place in 1927 will have no excuse. He can easily turn low to win the pennant by attending any session of the Winter Stove league.

* * *

The longest forward pass ever thrown in a football game was made by Harold (Brick) Muller of the University of California, against Ohio State in 1920 at Pasadena. The ball went 70 yards.

* * *

President Barry Williams of the Pacific Coast league, completed his umpiring staff for the coming season by signing Perle Casey. Last season, Casey was coach of the Hollywood club, and for seven years previous to last year, Casey was an umpire in the Coast circuit.

Appealed to R. L. S. to Help Out Bazaar

R. L. S. was writing hard one morning when the door was pushed open and a much excited lady rushed in.

"Oh, Mr. Stevenson!" she exclaimed. "I won't really keep you long; but I do want you to help me out of a difficulty. I have to take a stall at a bazaar, and there is not nearly enough material to sell. Somebody told me the other day that you are getting so celebrated that even a scrap of your handwriting would bring in quite a lot of money. Please give me one or two of your manuscripts. We would put them up to auction!"

When the lady at last paused for breath Mr. Clettin replied that it was not in his power to oblige her; he had no manuscripts to spare, either for her bazaar; nothing whatever that would be worthy of such a fate.

"Oh, Mr. Stevenson, don't say that!" she replied with kindly condescension. "Any of your queries would do nicely. My friend told me so; she said anything of yours would sell. Please don't disappoint us: it doesn't really matter how stupid it is, or how badly written!"

How ills lady was finally deported it does not remain to have heard. But she at least paid her footing by supplying R. L. S. with one of his best anecdotes, one that he refused with sheer delight.—(W. L. S. and His Slue Qua Non." By "The Gamekeeper.")

Government Was in Luck

When the whites and Indians signed their first treaty in Minnesota, at Fond du Lac, now the extreme western end of Duluth, 100 years ago, the Chippewa gave the white man the right to explore and remove any minerals found in what is now the great Arrowhead mining country. The whites had their eyes on the splendid copper prospects and were unaware that the adjoining country contained the world's greatest iron ore deposits. Hopes of discovering copper in sizable quantities soon faded, and it was not until half a century later that intrepid prospectors uncovered the first vein of iron. The provision in the treaty which so fortunately granted the government the right to the iron was made at a time, says W. R. Culkin, publisher and historian, in the Duluth News, when there was no real knowledge of that metal.

Atlanta and Atlantic

Atlanta, Ga., was named to designate its relationship to the Atlantic ocean by means of a railway running to the coast. The Atlantic ocean was named from the Greek word which means "sea beyond Mount Atlas."

Around Orchard

IMPORTANCE OF PRUNING GRAPES

A small crop of fruit may be expected the third year after planting from grapevines which have been subsequently pruned during the first two years in the vineyards, says J. H. Clark, assistant pomologist at the New Jersey College of Agriculture. Any time during February or early March will be suitable for this important operation.

All vines should be pruned when pinsited so that only two strong buds are left on each plant. After one year's growth it is desirable to prune back to two buds again. If both buds grow, the weaker shoot should be rubbed off so that the plant will use all its energy in developing one good strong cane, which will become the permanent trunk. During this second growing season the vines should have some support. This may be a stake such as an ordinary bean pole, or the regular Kniffen trellis may be erected at this time. Even where stakes have been used the trellis should be up by the beginning of the fourth season at the latest.

At the end of the second growing season the cane which is to become the permanent trunk of the vine should be pruned back to five and one-half or six feet, or to the top wire of the trellis.

After the third growing season the regular four-arm Kniffen type of vine can usually be formed by training one vigorous cane from the permanent trunk in each direction on each of the two wires. Canes on the top wire will grow about six buds this year, whereas those on the lower wire should be pruned to four or five. All other canes should be removed entirely. Another year may be necessary before weak vines are large enough to carry the four arms.

Advice on Fruit Pests Saves Growers $200,000

Fruit growers in western New York were saved about $200,000 by spraying and dusting material during the past season by spray information, according to an estimate made by the New York State College of Agriculture at Ithaca, N. Y., and the Geneva experiment station. The largest saving which ensue from the spray information was on material ordinarily used for the control of aphid or plant lice. Last spring the college saw that this pest was almost absent in most western New York orchards and that spraying for them would be unnecessary.

In previous seasons the use of an aphid killer was usually considered necessary, for although aphids are scarce in the spring, under favorable conditions, they multiply rapidly and, unless controlled, soon become destructive.

It was determined also that San Jose scale was not important enough in certain localities to need the strong limesulphur sprays to control it. The information about these two gasp ment all average saving of about $45 to the grower, according to figures obtained from Wayne and Monroe counties.

The college states that this spray information could not have been used as well had it not been for the organization of the farmers in the counties, and in local communities, and that this saving was made as much as the year's cost of the farm bureau in the fruit counties.

Mechanical Devices for Protecting Young Trees

Cylinders of woven wire netting are among the best mechanical contrivances for protecting young trees from rabbits, W. R. Martin, horticultural specialist in Kansas State Agricultural college, believes. Poultry netting of one-inch mesh made of No. 20 galvanized wire is recommended. Rolls 18 inches wide may be used for cottontails, and the material cut into proper lengths. One of the sections is rolled into a cylindrical shape about the trunk of each tree and fastened at several places by bending and twisting the projecting ends of wire.

Guards should be left on the trunks as long as the trees require protection. They may be adapted to protection from both meadow mice and rabbits by using wire of finer mesh and by passing the lower edge into the ground.

Veneer and other forms of wooden protectors are popular and have several advantages when used for cottontail rabbits. When left permanently upon the trees, however, they furnish retreats for insect pests. The inner of removing and replacing them is considerable but they have the advantage, when pressed well into the soil, of protecting the trees from both mice and rabbits.

Propagate Fruit Plants

Some farmers are able to propagate their fruit plants successfully, and this eliminates the cost of purchasing new ones. In general, however, this is an unwise procedure. Particularly so for farmers who are not acquainted with the various propagation methods. This is a day of specialization, and the nurseryman who makes a business of propagating fruit plants is usually able to grow much better nursery stock than the farmer.

Cut Out Poor Branches

One can train himself to recognize the weak and unproductive branches that were once fruitful but now, because of the natural overgrowth of the developing upper branches, are no longer able to get sufficient light and consequently plant food for their nourishment. These, and the interlocking branches throughout the whole tree need to be removed and a trip through the orchard will do more to convince the orchardist of this fact than any lecture we can listen to.

Plowing Under a Heavy Coating of Fresh Straw

Injurious effects sometimes follow the plowing under of a heavy coating of fresh straw or other crop growth. As a result, the following crop is stunted in growth in many cases.

Investigators who have looked into this problem believe that the straw serves as an attractive medium for certain kinds of bacteria which multiply rapidly and which use up the nitrogen supply which would ordinarily be used by the growing crop. It has been noted that when nitrogenous fertilizers are applied to the land along with the straw or crop growth, harmful effects to the following crop do not result.

The specialists believe also that such heavy crop growth, when turned under, introduces certain poisonous materials into the soil which affect the tender seedlings of crops which may be planted. This effect is particularly conspicuous in sandy soils. In ordinary soils there is sufficient rich bodied material in the soil to counteract these harmful subsiyions.

Investigators at the New York agricultural experiment station are studying the problem in the hope that it may be possible to find a means of safely utilizing straw and other crop growth to supplement the diminishing manure supply. If results to be seen whether a practicable method of solution of this problem can be found.

Five Essential Parts Complete Hen's Ration

A complete ration consists of five essential parts:

1. Grains and their by-products. 2. A protein concentrate, as skim milk, tankage, meat scraps, soybean oil meals. 3. Minerals, as supplied by milk, meat scraps, bone meal, or a mineral mixture. 4. Vitamines, as found in yellow corn, green feed and sunshine cut direct or alfalfa hay. 5. The unidentifiable factor, as supplied by direct sunlight, cod-liver oil, and to some extent by green feed and immature ear clover or alfalfa hay.

When it comes to the vitamines and unidentifiable factor the path is straight and narrow; either the birds must be permitted out of doors where they can get direct sunlight and green feed, or if confined indoors, cod-liver oil and direct sunlight admitted into the house as possible. If profitable egg production is to be maintained and high mortality of birds is to be prevented.

Good for Chick Mash

Ground suits and bran would be good ingredients for a chick mash, especially if you wetted the balls out of the oats which can be done by sifting through mosquito netting. Rolled oats are also acceptable, but should be rubbed in the hands to break the flakes. It would be better to use steel-cut oats. The addition of corn meal to the mash would make the mash a little more palatable and would improve it. Keep it before the chicks all the time.

Lamb Is Easily Killed

A young lamb is very easily killed. Exposure to cold, especially cold rains, is nearly sure to prove fatal. Another frequent cause of loss is the failure of the lamb to get milk. The lamb may be too weak to stand and suck; there may be wool on the udder or belly that prevents sucking; or sometimes the mother does not want to own her lamb. All of these difficulties may be easily overcome if someone gives just a little more attention to the flock.

Treat Oats for Smut Control

Good Plan to Sprinkle Seed With Weak Solution of Formalin.

The most diseases of nuts can be largely controlled by treating the seed before planting with a weak solution of formalin. The treatment will insure clean oats and bigger yields. There are nine important points to observe when treating the nuts and disease as outlined by G. W. Faut, extension plant disease specialist at North Carolina State college, are as follows:

1. Seed to be treated should be placed on a hard surface floor (concrete or wood) where the moisture from the treating solution will not be injurious.

Solution Required.

2. One-half gallon of treating solution is required to treat each bushel of grain.

3. The amount of solution needed for treating the seed is calculated from the amount of seed to be treated.

4. Prepare the solution in the proportion of 1 pint of commercial formalin to 40 gallons of water. If, for instance, 10 bushels of seed are to be treated, 5 gallons of treating solution will be needed. Prepare this by adding ¼ pint of commercial formalin to 5 gallons of water (proportion the plut to 40 gallons water).

Sprinkle on Grain.

5. The solution should be sprinkled on the grain as it is shoveled from one pile to another. Use the ordinary sprinkling can and scoop shovel for this purpose. See that all the grain is wet in the sprinkling.

6. After the sprinkling is over, stir the seed with a shovel so as to insure all the grain being wet.

7. Cover with sacks for one to two hours in order to hold the fumes. Then spread the seed out in the air to dry.

8. The treating solution's grown together with age because of the evaporation of water. Do not use a solution which has been allowed to stand for several days.

9. Make allowance for the swelling of the grain by regulating the drill so as to sow the proper amount per acre.

Plowing Under a Heavy Coating of Fresh Straw

Injurious effects sometimes follow the plowing under of a heavy coating of fresh straw or other crop growth. As a result, the following crop is stunted in growth in many cases.

Investigators who have looked into this problem believe that the straw serves as an attractive medium for certain kinds of bacteria which multiply rapidly and which use up the nitrogen supply which would ordinarily be used by the growing crop. It has been noted that when nitrogenous fertilizers are applied to the land along with the straw or crop growth, harmful effects to the following crop do not result.

The specialists believe also that such heavy crop growth, when turned under, introduces certain poisonous materials into the soil which affect the tender seedlings of crops which may be planted. This effect is particularly conspicuous in sandy soils. In ordinary soils there is sufficient rich bodied material in the soil to counteract these harmful subsiyions.

Investigators at the New York agricultural experiment station are studying the problem in the hope that it may be possible to find a means of safely utilizing straw and other crop growth to supplement the diminishing manure supply. If results to be seen whether a practicable method of solution of this problem can be found.

Five Essential Parts Complete Hen's Ration

A complete ration consists of five essential parts:

1. Grains and their by-products. 2. A protein concentrate, as skim milk, tankage, meat scraps, soybean oil meals. 3. Minerals, as supplied by milk, meat scraps, bone meal, or a mineral mixture. 4. Beware of the Couturier

Paris couturiers, we read, want men to spruce up by taking off their long pants and wearing silk knee breeches. Fellier citizens, be warned. As H. H. suggests, "those same couturiers started taking clothes off the women several years ago, and now look at the darn things."—Philadelphia Inquirer.

It is more shameful to mistrust your friends than to be deceived by them.—La Rochefoucauld.

Keep Eliminative System Active

Good Health Requires Good Elimination.

ONE can't feel well when there is a retention of poisonous waste in the blood. This is called a toxic condition, and is apt to make one tired, dull and languid. Other symptoms are sometimes toxic backaches and headaches. That the kidneys are not functioning properly is often shown by scanty or burning passage of secretions. Many people have learned the value of *Doan's Pills*, a stimulant diuretic, when the kidneys seem functionally inactive. Everywhere one finds enthusiastic *Doan's* users. *Ask your neighbor!*

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE

COPYRIGHT BY BRENTANO'S

CHAPTER VIII—Continued

—17—

"Here," he said, "you may find my warrant from the king himself to exercise what powers I deem necessary along the frontier. Only the governor-general may overrule me."

Joncaire studied the paper.

"That is so," he admitted. "But I tell you this, De Veulle, you have a bad record on the frontier for a trouble-maker. But for you I should have had the Senecas and Onondagas in our interest before this. I write to Quebec by the first post, demanding a check upon your activities. We have too much at stake to permit you to jeopardize it."

"At Ta-wan-ne-ga-e it is known that Ta-wan-ne-ars and his brother Ormond Sorreyed to Jugars," interposed the Seneca in his own language. "Does Joncaire think the Senecas will be quiet when one of their chiefs is given up to the Keepers of the Doom Trail for torment?"

"The Seneca will be told that you never reached Jugara," replied De Veulle before Joncaire could speak.

Joncaire turned to me.

"Well, my Jean," he said soberly, "whatever your name may be, you have gotten yourself into a nasty mess. You will be lucky if you die quickly. My advice to you is to pick the first chance to die, no matter how it may be. These Ken-tos are artists in torture. They are artists in torture. They are artists in torture. 'Tis part of their religion, which I will say they still practice, even though Pere Hyacinthe were to excommunicate me."

As he was about to climb the stairs De Lery had ascended, De Veulle called him back.

"One moment! Speaking officially, Monsieur de Joncaire, I desire you to send out belts to all friendly tribes, announcing them to a council-fire which will be held here by the king's command in August."

Joncaire frowned.

"It shall be done," he said.

"Now then"—De Veulle addressed me—"we will consider your case. Are the hands sufficiently tight?"

I had been bound with strips of rawhide which cut into every muscle. The question was unnecessary.

"Pick them up," he said to the Cabinagans. "We will get back to the canoes."

Despite the tightness of my bonds and the numbness they induced, I fell asleep, rocked by the easy motion of the canoe as it was driven along by the powerful arms of the Cahinagas.

CHAPTER IX

La Vierge du Bois

A dash of cold water awakened me. One of the Cahinagas was leaning down, his hideous face close to mine, his fingers wrapped in the skin thongs in the rawhide bonds.

"Your canoe is ready, Monsieur," called De Veulle from his place at the stern. "You must keep up, Dry."

As the rawhide strips were unwound I was able to sit up and look over the frail bark side. We were out of sight of land, and a moderate breeze was raising a slight swell, the crest of which occasionally broke over our bow. In the other canoe Ta-wan-ne-ars already was at work with a bark scoop.

All of the men were inclined to the restless surface of the huge inland sea. Just before dusk of the second day we sighted a dark line, which sheered away from it. On the sixth day we came out of the lake into the narrow channel of the great river, and landed in the evening at a palisaded post on the northern bank.

So far I had been treated fairly well. My captors had shared with me their meager fare of parched corn and jerked meat; and if I had been compelled to help paddle the canoe incessantly, it was equally true that they had labored at the task night and day. But now everything was changed. My legs were left unbound, but with my arms still the savages lashed back my arms still well-nigh every bit of circulation in my shoulders, and at each movement I was forced to make heroic efforts to suppress the cries of torture. The one recompense for my sufferings was that for the first time since our capture I had the company of Ta-wan-ne-ars, and I was able to profit by his stoical demeanor in resisting the impulse to vent my anger against De Veulle.

"Say nothing, brother," he counseled me when I parted my hate, "for every word you say will afford him satisfaction."

"I wish I had stayed in the canoe in the middle of the lake," I sentimed bitterly. "What is this place? Where are we?"

THE SAME RESULTS

According to the Universal, one of Mexico's leading newspapers, Mexican radicalism has changed the thriving city of Vera Cruz into an idle town. The paper declares that street car service has been suspended and the company has paid off its employes while the terminal company is suffering a great depression and most industry is idle. The newspaper continues:

"No other city in the Republic has suffered from radicalism like Vera Cruz. Capital has flown and labor has abandoned the city, leaving it a ruin. The case of the Terminal company is typical. The screws of radicalism in Mexico has been so tightened that the machinery has broken down and ruin is visible. There is no work, no business.

The problem of the republic is the restoration of its possibilities, and the only basis on which it can be solved is that of definite suppression of radicalism and the installation of a just system that will protect both capital and labor."

Here is food for thought for some of our own statesmen who have fondly professed to believe that the red menace in Mexico is only a mirage conjured up by the American state department to frighten them.

What has happened in Vera Cruz and other Mexican cities looks suspiciously like some previous occurrences in Russia.

WHY THE DIFFERENCE!

When the American marines went into Nicaragua we heard a great deal from some of our internationalists in the way of protest. They told us that the United States was committing a great outrage, that we were interfering with the internal affairs of another county. They quoted from the utterances of British and European newspapers declaring that we were now unmasking before the eyes of the world our selfish and imperial demands. That there were American interests with American property to protect in Central America counted for nothing against this newly founded sentiment for our Latin-American brothers.

Now Great Britain is sending an army to Shanghai. This army is going there to protect British lives and British property in the Orient. There are internationalists who criticised us for sending marines to Nicaragua are strangely silent when this action of Great Britain gets into the headlines.

Now our interests in Nicaragua with its prospective canal site are just as vital to us as are the British in China to Britons. And Nicaragua is just as near the Panama canal as China is near India.

WASHINGTON RELIED ON DIVINE PROVIDENCE

Washington's faith and courage during the trying days of the Revolution were sustained by his belief in a Supreme Being, according to Quaker O'Taylor, who has an interesting article in the current issue of the National Republic, relating incidents which show Washington's belief in Divine guidance.

According to Mr. Taylor all thru his illustrious life Washington referred to the Providence of God. In a letter to his brother, a few days after Braddock's defeat, he said:

"By the all-powerful dispensations of Providence I have been protected beyond all human probability, or expectation; for I had four bullets through my coat, and two horses shot under me, yet escaped injury, although death was leveling my companions on every side of me."

In a letter to Governor Trumbull of Connecticut, in 1775, he said:

"As the cause of our common country calls us both to an active and dangerous duty, I trust that Divine Providence, which wisely orders the affairs of men, will enable us to discharge it with fidelity and success."

About the same time he wrote General Gage, of the British army, in answer to a letter from him:

"May the God to whom you then appeal judge between America and you. Under His providence, those who influenced the councils of America, and all the other inhabitants of the United Colonies at the hazard of their lives, are determined to hand down to posterity those just and inalienable privileges, which they received from their ancestors."

In a circular to his officers, in 1775 Washington said:

"The success of such an enterprise depends, I well know, upon the All-Wise Disposer of events, and it is not without the reach of human wisdom to foretell the issue."

A letter to Joseph Reed, January, 1776, reads:

"How it will end, God, in His great goodness, will direct. I am thankful for His protection at this time."

Valley Forge, May 30, '78, was the date line of a letter which read:

"To paint the distress and perilous situation of this army, in the course of last winter, for want of cloths, provisions, and almost every other necessary essential to the wail-being I may say existence of the army, would require more time and an abler pen than mine; nor, since our prospects have so miraculously brightened, shall I attempt it, or even bear it in remembrance, further than as a momento of what is due to the Great Author of all the care and good that have been extended to relieving us in difficulties and distress."

To Benjamin Harrison, Virginia, December 30, 1778, he wrote:

"Providence has heretofore taken us up when all other means and hopes seemed to be departing from us. In this I will confide."

MINNESOTA ROAD PLAN IS LAUDED

That Minnesota has a road plan in advance of many other states is evident from a study of the address given by Secretary of Agriculture W. M. Jardine before the annual meeting of the American Association of State Highway Officials at Pinehurst, N. C., recently. Mr. Jardine pointed out three obstacles which stand in the way of the most efficient use of available road funds and the completing of the federal program, in some states. Not one of these obstacles exists in Minnesota.

After discussing the great advance made in road building through research and application of scientific management during the last decade, Mr. Jardine said: "Not all the exact information it is possible to obtain, however, will suffice to provide an orderly and systematic improvement of the main roads in the states which still rely upon the financial assistance of the counties to carry out the state programs. Certainly there has been experience enough to prove that complete connection of main arteries is practically impossible so long as there is dependence upon county financing. There must be a still greater improvement in the maintenance of all roads and especially of the federal-aid roads, he said. "While unquestionably there has been great improvement in this respect during the last decade, the failure to make proper provision for the repair of roads upon which large sums of public money have been invested is the sheerest of economic folly. Unless there is positive assurance that means will be available for the constant and continuous care of the roads after they are improved, I am convinced that it would be better not to improve them at all."

One of the primary conceptions of the federal aid plan, Mr. Jardine said, was to expedite the completion of an adequate system of interstate highways. "It is my feeling that the progress in the completion of transcontinental roads is gratifying, but I do not lose sight of the fact that the role of trans-state routes in the agricultural states of the Mississippi valley is not in keeping with the development, east and west. In specific states this condition is brought about more largely by the feature referred to above, that is, dependence upon county financing, than upon any lack of need of such roads or lack of response on the part of the state highway departments."

In Minnesota United States numbered routes are kept in shapefor good going, from one state line to the other. Nearly all the central western states except Minnesota depend on the counties for financing primary roads. Minnesota is also recognized as having one of the best state-wide maintenance systems in the Union.

Notice to Electors

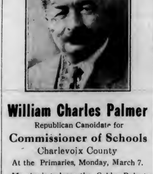
I am soliciting the support of my friends during the primary campaign, and desire your votes at the city primary election and trust that electors will favor me in my candidacy for commissioner as City Treasurer. In return for same it will be my aim if nominated, to serve the city zealously and to the interest of the public.

Yours truly,
JOHN COOK.

Notice to Electors

I am a candidate for nomination at the city primary for the office of City Treasurer and as such solicit the support and votes of electors.

Yours resp'y
A. J. HAMILTON.



William Charles Palmer
Republican Canoidate for
Commissioner of Schools
Charlevoix County
At the Primaries, Monday, March 7.

My aim is to keep the Golden Rule, to treat others as I would like to be treated.
Yours for service,
WILLIAM CHARLES PALMER.

THE THEATRE

Kid Boots—When Paramount cast about in search of a new comedy and a new comedian, "Kid Boots" was on the glib tongue of the theatrical world.

"Kid Boots" too Broadway by storm and fun-thirsty NewYork supported Florenz Ziegfeld's production for three years. Now, Paramounts film version, advertised for showing at the Palace theatre on Saturday and Sunday, is heralded as the mirth provoker of the season.

Eddie Cantor, ace of musical comedians, the Kid of "Kid Boots," enacts his original colorful role. Opposite Cantor is Clara Bow, alluring portrayer of flapper characterizations, whose recent triumph in "Mantrap" was the talk of filmdom.

New York's picturesque east side, where second-hand stores reign supreme and keen competition develops at a gay methods, offers wide scope for the opening scenes. Cantor as the "some-on"Ida" himself up to his neck in difficulties. Then a rapid sequence of riotously funny situations, Eddie is thrust into an exclusive golf club as a caddy—and he has never seen a golf ball!

His predicament becomes more involved with the entrance of Clara and the villainous would-be lover. Further color is lent by their conflicting loves.

Sally—Leon Errol, comedy star, whose eccentric legs and antics were the sensation of both the stage and screen versions of "Sally" is the first great stage comedian to gain stardom in films.

As a result of his scene hit in Coleen Moore's "Sally," First National signed him to be starred, and he will appear with Dorothy Gish in the headline role of "Clothes Make the Pirate," which will be shown at Palace theatre on Wednesday only.

Errol has been a New York stage star since 1911, when he first joined the Ziegfield Follies. The collapsible legs which made him famous on the Broadway rialto were discovered in "Clothes Make the Pirate," in which he has the role of a henpecked Yankee sailor who runs away from his nagging wife and becomes a pirate.

Good Roads Facts

The new bridge over **Black river**, 12 miles south of Poplar Bluff, Mo., on highway number 55, was completed early in December and is the largest vehicle bridge in the state.

* * *

Nearly 18,000 miles of road in the several state highway systems was surfaced in 1925, according to the bureau of public roads of the United States Department of Agriculture.

* * *

Signs have been posted at all cross roads along state highways in Illinois to caution motorists that they must bring their cars to a full stop before crossing or driving onto the state road.

* * *

Good roads are a fine thing, but it is well to remember that they tend away from the farm as well as to it.

* * *

A viaduct is being built where the Lincoln Highway crosses the North Western right-of-way at Denison, Iowa. Many persons have been killed at this crossing.

* * *

America's 20,000,000 motorists travel 190,000,000,000 miles each year in their cars. They average between 9,000 and 10,000 miles per car and spend more than $10,500,000,000 in operation costs.

Each Day's Struggle

The average day begins with struggle, the struggle of beginning it at all.—Constance L. Smith.

Somebody—Nobody —God

By REV. C. EDW. LA REAU
Extension Department, Moody Bible Institute, Chicago.

TEXT—This Moses, whom they refused . . . did God send to be ruler and a deliverer by the hand of the angel which appeared to him in the bush.—Acts 7:35.

How simple the life story of any man! How brief the outline of human experience between the cradle and the grave!

Rev. E. C. LaReau.

From a brief sketch recorded in the book of God, of an nearly perfect a man as can be found in this life, I want to point out three separate and distinct epochs of human existence which divide the whole story of his life.

The man is Moses, whose life story divides into three distinct periods of forty years each—prince, shepherd, lawgiver—each separate experience being a sort of pattern-picture of average human life.

A Period of Preparation.

A single verse tells the story—"Moses was learned in all the wisdom (sophistry) of the Egyptians." (Acts 7:22.) This means he was so instructed and corrected—given such skill and insight into all that pertained to the affairs of Egypt, as to make him by his every speech and action, distinguished and eminent among men—even among the wisest.

As heir to the throne of Egypt, Moses was carefully educated and trained, not alone in secular and governmental affairs, but in the various cults and practices of the Egyptian religions as well. He knew the secrets of the priesthood—the power behind the throne. Tradition, science, astrology, the interpretation of dreams, a knowledge of the hieroglyphics, the most complete understanding of all the intricate names of the pyramids and temples, were an essential part of his culture.

As the adopted grandson of the mighty Pharaoh, he might easily have become the greatest of all Eastern lovers, as well as the mightest of all the mighty Pharaohs. But he chose otherwise—deliberately. Forty years at court, a student ever learning, in fellowship with the mightiest of earth, training for leadership—fitting out he was somebody.

A Period of Decision and Testing.

First, there is the recognition of a divine mission. "He supposed his brethren would have understood how that God by His hand would deliver them."—Acts 7:25. That is, he intended to use his position, when he should be ready, to help his brethren (race of Israel. But such a course was contrary to the purposes of God. The result would have been the keeping of God's people, as a nation in Egypt; whereas, long before God had said to Abraham, the Hebrew, that Canaan was to be the home of His separated children. And so Moses, the chosen leader, must be cut off from civilization, and his people from God, that he must pass through a period of practical experience, with plenty of time for meditation. There he must learn the geography of the great open spaces, the wilderness, the location of roads and voices, even while he listened for and to the voice of God.

And so he makes his choice—the Great Decision—the Great Refusal. "Choosing rather to suffer affliction with the people of God." (Heb. 11:24-25.) What a descent! From a noble of high estate to the place of a humble shepherd.

Yet, the desert can teach, and so can the sheep—lessons that never can be learned in Egypt. Tenderness and sympathy, self-reliance and hardness, helplessness and dependence—all these are in the school, and more. Forty years in Egypt finding out he was somebody. Forty years with the sheep to find out he was nobody.

A Period of Leadership.

Service follows preparation and testing. Three things are to be noted: *First*, the Revelation and Commission. (Acts 7:30-34). Second, the Return to Egypt and Victorious Deliverance (Acts 7:35-36). Third, the Faithful Servant and Desert Leadership (Acts 7:37, 38; Heb. 3:2, 5).

Who commissioned Moses. From whence came the deliverance and salvation? Who led the people through all the weary wilderness? Will the world ever learn? When the power and glory of God in the burning bush was revealed, Moses stepped aside to see, and only then was the real mission of his life made clear. It is only as men "step aside to see" that God can speak and reveal Himself, and only with the vision upon them and girded with the power it brings, are they able to accomplish.

Is not the lesson this—Training, Experience, Service? Forty years learning he was somebody; forty years finding out he was nobody; and then through forty years proving God was All.

What a fall! What debasement! What destiny! What salvation can temptated! Somebody, to nobody. Then God "All in All"—what attainment! But such is God's way—sacrifice and suffering—the way of Christ's cross, and redemption.

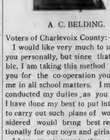
Has Biblical Sanction

Capital punishment as a lawful procedure has existed since the history of mankind. It will be found laid down in the Mosaic law in the books of Leviticus and Deuteronomy.

Effective Silence

Under some conditions a man can make more noise in the world by keeping his mouth shut than in any other way.

[Political Advertising.]



A. C. BELDING.

Voters of Charlevoix County:—

I would like very much to meet each of you personally, but since that is impossible, I am taking this method of thanking you for the co-operation you have given me in all school matters. I may not have conducted my duties as you would, but I have done my best to put into force and to carry out such plans of work as I considered would bring best results educationally for our boys and girls.

I have spent twenty-three years of my life in the rural, village and city schools of Michigan, most of which time I have been acting as superintendent. I have tried to keep abreast of educational times and to so direct our county schools that they might be second to none.

School work has always been first with me and shall be as long as I any your commissioner. If you feel that Charlevoix county schools are safe and progressive under my leadership, I shall greatly appreciate your vote at the Primary Election March 7, '27. ARCHIE C. BELDING, Com. of Schools.

Might Have Changea History of America

The first congress of the American colonies was convened in New York city about one hundred sixty-one years ago. The purpose of the convention was to consider the stamp act, Grenville's obnoxious scheme of taxation. The Knights of Massachusetts was chairman of the congress, where delegates from nine states met.

In its two weeks' session the congress adopted a "Declaration of Rights," written by John Cruger; a "Petition to the King," by Rob Living-ston; and a "Memorial to Both Houses of Parliament," from the pen of James Otis.

Had the powers that misruled England at the time paid more attention to the words of these eminent men history might have taken a different turn, but the figureshead on the English throne and the ministers of state turned and cocxomba, who served him, were deaf to the almost dumb cry of America—and "lost a world."—Chicago Journal.

Horses Bred to Utilize Tails for Violin Bows

Elma, Wash.—A farm has been started near here for breeding of white horses for the long, smooth tail hairs used exclusively in the manufacture of violin bows. There has been an acute shortage of this material in Siberia and Manchuria, whence the bulk of the long hairs formerly was obtained.

White hairs are used because the bleaching of black or colored ones weakens the structure cells. The horses' tails are clipped in spring and autumn, six months being required for the full switch to grow again.

Registration Notice!

To the Qualified Electors of the City of Charlevoix, State of Michigan:

Notice is hereby given that in conformity with the Michigan Election Law, I, the undersigned city clerk, will, upon any day except Sunday and a legal holiday, the day of Primary Election, receive for registration the name of any legal voter in said city not already registered who may apply to me personally for such registration. Provided, however, that I can not and will not administer oaths during the time intervening between the second Saturday before the day of election, or the day of primary election.

You are further notified, that I will be in my office, February 14th and February 28th, 1927, from 8 o'clock a. m. until 8 o'clock p. m. of each day for the purpose of registering such of the qualified electors in said city as shall properly apply therefor.

By Charles H. Lamphear,
D. S. Payton, Deputy. City Clerk.

The pleasing light gray color of concrete dresses up any street

Money Saving Facts About Concrete Highway Pavements

Concrete is durable.
It will not shove, roll or rut. It remains as true and even as built.

Concrete pavement is now satisfying taxpayers in many counties and every state in the Union.

Maintenance cost is low. It does not require periodic resurfacing.

Wet or dry, concrete provides the safest surface for traffic.

Oil drippings will not cause concrete to disintegrate.

Concrete pavements are clean, smooth, dustless, free from stickiness and usable twelve months in the year.

6,000 miles of concrete pavement were placed on highways in the United States in 1926.

Concrete gives you more road surface value for each dollar invested than any other type.

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Feb. 26-27

Florenz Ziegfield's "Kid Boots" starring Eddie Cantor with Clara Bow, Billie Dane and Lawrence Grey. A comedy of golf, as refreshing as sunking a hole-in-one. Bevies of Ziegfield beauties. You'll vote them real screen cuties. Ziegfield's girls. Ziegfield's magnificence of gowns and settings. A Ziegfield personally supervised de luxe picturization of this greatest musical comedy success. The $8.80 a seat (and try and get one) extravaganza that convulsed and dazzled the Broadway public for over a year. Also an educational comedy, "Sloth Shock."

Wednesday Only, Mar. 2

Leon Errol and Dorothy Gish in "Clothes Make the Pirate." Tremendous comedy sensation with Nita Naldi, Tully Marshfield and Edna Murphy, 1927's comedy supreme. Captain Kidd and Ol' Morgan joined the Boy Scouts when Errol went to sea. He was so tough, his pet goldfish jumped overboard and tried to pick a fight with a shark, because Leon frowned at it. Also Hodge Podge and Pep Novelties.

Coming—Zane Grays "Forlorn River."
Coming—Harold Lloyd in "The Kid Brother."

TELLS OF FINDING RUM CACHED IN 1594

Found 310 Years After Being Left in Arctics.

New York—The isle of nine bottles of rum, cached in the Arctic in 1594 by Jue Dutch explorers, and recently officially ended their subsistuntus career as four-ounce, 310 years later, is told by Robert H. Davis in the New York Sun.

The story, says Mr. Davis, was told him by Dr. John C. Vaughan, a prochieling surgeon in New York city, who in 1903-1905 was physician to the Americus, of the Ziegler north pole expedition under Anstocy Pluto.

Barents, after whom the Barents sea was named, says Davis, cached the rum with his stores and recorded when his ship was frozen in at Ice Haven, off the coast of Spitsbergen. Barents and four companions perished, while the others of the party were picked up in Lapland.

Liquor Cache is Found.

The rum, together with the other stores, remained undisturbed until 1894, when the old Barents camp was visited by the yaobt Iris of the Leigh Smith expedition.

"Smith, being an Englishman," says the story, "was a stickler for the unwritten laws that protect one explorer's cache from the hand of another except in extremity. "The' temptation to annex the nine bottles was strong indeed, but he found an order that two bottles, for medicinal purposes only, be taken.

"The Iris then sailed to Franz Josef land, where she was nipped in the ice at Cape Flora and went down in a few minutes. The doctor dragged the medicine chest ashore. The next spring the party left everything behind them, got away in a whaleboat and reached England."

Bottles Encased in Ice.

The Ziegler party came to Cape Flora in the summer of 1903, after they had lost their ship at Teplitz bay. The following spring when the ice melted they found a few torn pages of a diary kept by the Iris' doctor. These told of the finding of Barents' rum.

Pierre le Hoya, a seaman, and a friend determined to find the ancient cache. Finally, when they almost abandoned, the chest was found, a solid cube of ice. This was melted down and the rum saved, but only a small bottle containing four ounces of liquid was found, labeled, "Barent's Rum. Four Ounces."

"The four ounces were equally divided," says the story, "and Hoya and his friend drank it 'on the spot.'"

And the "friend," says Mr. Davis, was Hector Vaughan, who vouches for the tale and the quality of the rum.

Stolen Ruby Run Down in Heel of Woman's Slipper

Berlin—Only a few weeks ago the Countess Cosel-Dzierzon was found concealed in an apple in a Paris hotel when a maid bit into the fruit, and now a valuable ruby stolen more than a year ago, has been traced by the police to a cavity in the heel of a dancing slipper.

In November, 1925, a ring, set with this same cut ruby, was stolen in broad daylight from the principal jewelry shop of Berlin's largest suburb, Schoneberg. The other day a detective noticed a costly ruby ring on the hand of a woman he knew to be the sweetheart of a notorious burglar.

Two detectives hurried to the woman's apartment and searched it. But the ring was not found. Certain clues then, however, the detective returned next day with a policeman and renewed the search. After four hours of minute examination the ruby was found in the hollow heel of a graceful satin slipper.

Russia to Send Moslems on Pilgrimage to Mecca

Odessa.—Although the soviet government is avowedly atheistic, the authorities have decided to facilitate pilgrimages of devout Mussulman residents of Russia to Mecca, Jeddah and other holy places. The move is intended frankly as a measure to win the favor of this section of the population, which numbers about 15,000,000. The first group of pilgrims will sail early in March, and provision has been made to transport 1,000 monthly.

Wise Judge

Camden, N. J.—Wives would be better off if they talked less, in the opinion of Judge Samuel Shaw, so he dismissed a separation suit.

—) PERSONALS (—

George T. Hawthorne of Bay City, was a business visitor here Wednesday.

Clarence Hunt of Bellaire, is spending a few days here this week on business.

George La Blanc, for some time past in Milwaukee, returned to Charlevoix Tuesday.

Representative J. M. Harris, of Boyne City, was a Charlevoix visitor early this week.

Monday, March 7, is the date when Dr. Leahy, the optometrist, will be at the Hotel Charlevoix.

Mrs. D. T. McHugh went to Kalamazoo last Monday where she will visit friends for a short time.

Mrs. George W. Weaver for some time past a visitor in southern Michigan, will return today.

Mr. and Mrs. Thomas H. Routley of Bellaire, spent the week end with Charlevoix friends, returning to their home town Tuesday.

Mr. and Mrs. Mat Routley motored to Grand Rapids Wednesday and will spend a few days in that city and other southern points.

Mat Routley purchased a new Chevrolet coach early this week, delivery being made through the Simmons and Block local agency.

Mrs. Thomas Wetzel was called to Saginw yesterday to attend the funeral service of a sister who passed away earlier in the week.

Mrs. C. J. Winder is taking a short vacation from her duties at Hotel Charlevoix, leaving for Eaton Rapids and Chicago last Thursday.

Mr. and Mrs. John Coverdale and daughter of Cheboygan spent Sunday at the Hotel Charlevoix guests of Superintendent George H. Coverdale.

A goodly number of Charlevoix citizens—winter sport lovers—motored to Petoskey last Tuesday to witness the athletic contests scheduled for the day.

A small fire was discovered at the E. J. Hiller residence, 301 Antrim street, last Monday forenoon. The damage to the property is not excessive and is given as nominal only.

Ray W. Faulkner slipped Tuesday and lost some of the ligaments loose in his right leg, making for a painful injury. He is attending to his usual work at the postoffice but under a handicap.

Wonderful weather conditions prevail throughout the entire region, a continuance of the weather during preceding months, making for most ideal conditions pleasant, and satisfactory to everyone.

Some fifteen members of Charlevoix Lodge No. 328 F. & A. M. made the trip to Petoskey Wednesday evening where they were royally entertained by members of the fraternal order in our neighboring city.

Clyde Tilley, eighteen year old son of Mr. and Mrs. C. E. Tilley, of St. James died last Monday, his death following an illness of long duration. Funeral service was Wednesday with Fr. McMannon officiating.

Messrs. Captain John McCann and Leroy Aliers made the trip from Saint James to Charlevoix Tuesday, the entire distance by automobile, thereby shortening the travel time between the two points by several hours.

The mail contract for the Charlevoix-St. James route was recently awarded to John W. Chambers, manager of the Charlevoix-St. James Transit Co. This award is for a four year period the usual time for contracts of this nature.

Mr. and Mrs. James Martin and son Charles, of Saint James, made the trip across the ice from Boyne to Cross Village by automobile early this week. They were on their way to Boyne City to visit relatives and friends for a few days.

A regular meeting of the Pythian Sisters is scheduled for Monday evening, February 28th, at K. P. Hall. Following the meeting refreshments will be served and games of various kinds will be part of the entertainment program.

Harry McHugh left for Jackson this morning following the receipt of a message that his mother, Mrs. N. Jane McHugh, had passed away. Mrs. McHugh has been a frequent visitor in this city where she has a large number of personal friends who will mourn her passing.

Members of the M. E. Aid Society are putting on a sale of baked goods and hot soup at the H. B. Jacobs sales-room next Saturday, for the benefit of the Aid Society. Experience as to how they raised the funds with which to finance the sale will be made public at some later date.

The Misses Gertrude Young and Elsie Vanderwal entertained with a Washington dinner at the Hotel Charlevoix last Tuesday evening, to the following young ladies: Mrs. L. Mckinley, Misses Secord, Little, Hood, Sieburger, Thomas, Wilson, Lamb, Stewart and Vander Haagen. After hearing the Plantation Singers they returned to the hotel and spent the remainder of the evening at bridge.

Henry Nowland, a pioneer of Charlevoix county, for many years residing at Ironton, passed away at the home of his daughter, Mrs. L. Clark at East Jordan, Tuesday night. Mr. Nowland was about 88 years of age and a veteran of the Civil war. Funeral service was held at East Jordan today and the body brought to Brookside for interment. Mrs. Robert R. Ronthron and Raymond Nowland of Charlevoix, are niece and nephew respectively of the deceased. He was the father of Mrs. Henry Block of this city, and for a long time made his home with her.

Judson Harmon of Cincinnati, well known in this region, having been an annual visitor for many years, and connected with the Chicago Club of Charlevoix, on the grounds of which he owns and occupied during the summer season, a fine cottage, passed away last Tuesday morning according to messages received here announcing his death. He was eighty one years of age and throughout his long lifetime was found frequently serving in some official capacity—city, state or national—as mayor of his home city, Judge of court of common pleas and circuit court, attorney general of the United States, twice governor of his own state—Ohio, and in two campaigns advocated by his democratic supporters as a presidential candidate. In the legal profession he was a lawyer of note and as a statesman of international reputation.

PASTORS' CHILDREN TO HONOR PARENTS

Memorial Takes Form of Tuberculosis Sanatorium.

Chicago,—"Silver keys to golden memories." In these five words are epitomized a national movement, with headquarters here, which is known by its objectives:

"To honor, as a sunshiny, life and health-giving memorial to the spirits of thousands of America's best-loved pastors, their wives and children."

A lasting and complete refutation of the old slander, that the majority of ministers' children are ne'er-do-wells.

The "golden memories" are those which all as treasure of the family administrations, the heart-felt sympathies and the helping hands extended to us in times of stress by pastors or our acquaintances.

The "silver keys" are the dollars that are pouring into the Methodist Ministers' Sons' and Daughters' association for the memorial which that organization has planned and on which construction is expected early this year.

Plan Great Sanatorium.

That memorial is to be the Methodist Ministers' Memorial sanatorium at Colorado Springs, Colo. It is planned as the principal unit of the National Methodist Episcopal Sanatorium for Tuberculosis—a project endorsing almost a million dollars in buildings and equipment.

"Our unit," says Rev. J. W. Irish D. D., executive secretary of the association, "will cost $200,000 and will afford us—the sons and daughters of Methodist ministers—an opportunity to help some of the many stricken mothers, but also to assist in curing the more than a million persons in America who are afflicted with this dread disease. The service will be non sectarian and will be provided without cost to those who are unable to pay the cost of their fights for health."

Doctor Irish added that probably a movement in the history of Method ism has ever struck such a responsive chord of appeal and that the success of the venture is assured. In lists of fices at 740 Rush street, he already has the names and addresses of 10,000 sons and daughters of Methodist ministers.

"Our greatest concern now," he continued, "is that of obtaining as nearly as possible a complete list of the sons and daughters of Methodist ministers and their wives. The opportunity which our association affords these folks of memorializing their parents is such that we have issued a general appeal to the public everywhere to send us names and addresses of any known sons or daughters of our pastors.

"So great is the interest in our activity that the Chamber of Commerce of Colorado Springs donated 23 acres of land within the city limits for the location of our buildings. The site adjoins that of Beth-El General hospital, nationally known for its achievements in surgical and general medical treatment.

"One unit of our sanatorium, a heating plant and laundry large enough to provide for future expansion, already have been erected on our site."

Ministers' Sons Rank High.

Development of the hospital memorial to children of preachers, has brought to light an almost startling array of prominent personages who were the sons or daughters of ministers.

John Hancock, first signer of the Declaration of Independence, was a preacher's son, as were eight others who signed that document. One of every nine of the Presidents of the United States have been ministers' sons, while in one of every four administrations, America's Presidents had daughters of ministers as the nation's first lady."

One of every five persons in the Hall of Fame in New York city is the son or daughter of a preacher.

In the industrial field, in science, invention, literature and the arts, many of the outstanding names are those of ministers' sons.

Bishop Edwin Holt Hughes of Chicago is president of the association; Rev. Merle N. English, D. D., of Oak Park, Ill., is vice president. Other officers, besides Doctor Irish, the executive secretary, include L. O. Jones, Lincoln, Neb., secretary, and Dr. C. S. Woods, Cleveland, Ohio, treasurer.

Card of Thanks—We wish to express our appreciation to friends and neighbors for their kindly assistance and many expressions of sympathy during our recent bereavement.

Mr. and Mrs. Barney Herrington and Family.

FRENCH RAILROADS ADOPT ELECTRICITY

Scarcity of Domestic Fuel Causes Change.

Washington.—"France is making a strong bid for leadership in mileage of electrified railroads," says a bulletin from Washington headquarters of the National Geographic society.

"More than five hundred miles of French railroads, formerly traversed by the steam engine, have been electrified. This is about one-third of the mileage of electric railroads in the United States.

"Almost simultaneously with the celebration of the electrification of a section of the Illinois Central in the vicinity of Chicago, recently came the report from Orleans, France, that the first through electric train arrived from Paris, 75 miles northeast of the 'City of Joan of Arc.' The train was drawn by an American-made electric locomotive.

"Electric trains are not new to the inhabitants of either Paris or Orleans, for the P.-O. (as the Paris-Orleans railroad is familiarly known to the Frenchman) has been electrified for 62 miles in the dense traffic sections in the neighborhood of both cities for several years, corresponding to the section of the New York Central in Pennsylvania, and the New York, New Haven & Hartford railroads running into New York city.

"The completion of the remaining 15 miles and purchase of new equipment was made possible by loans from the United States.

"The rapid increase in electrification in France is largely due to the scarcity of domestic fuel and the high cost of transportation, particularly on the railroads and industries of the South and West. France imports large quantities of coal.

"In Germany, Switzerland, Norway and Sweden, where electric railroads are owned by the government, power is generally cheap, and the desire to free France plans to install equipment which will also supply light and power to cities and villages along the right of way, thus saving the enormous tonnage of coal used in electric power plants.

"Paris has long desired to bring about economies in coal consumption by making use of the water supply of the mineral springs. The desire dominated the movement to begin the completion of the Paris-Orleans line."

Mad Prairie Dog Runs Amuck, Bites Children

Austin, Texas—Not infrequently patients are treated at the Pasteur Institute here for serious treatment to prevent rabies after having been bitten by mad dogs, cats, and even coyotes, but not until the other day was it thought a prairie dog ever are subjected to the dread malady.

Ordinarily a prairie dog is a meek creature. When one of these little animals which was kept as a pet by T. T. McKeever, Leonard, Texas, broke out toward the New Mexico line 500 miles from Austin, became fero cious and ran amuck at a ranch, exhibiting more than a dozen children, the matter was immediately reported to the Pasteur institute.

The head of the prairie dog was sent here for examination and it was found to be afflicted with rabies. Three children of Prof. and Mrs. J. W. Wells and a child of Mr. and Mrs. W. C. Cogburn, all of whom were bitten by the mad animal, were brought here for treatment. Several other children who were bitten did not take the rabies treatment.

Airplanes Aid Drive Against Malaria in Cuba

Havana, Cuba.—Airplanes will be used to assist in stamping out malaria fever in eastern Cuba, where several thousand cases have been reported, if plans of Dr. Fernando Hensoll, director of sanitation, are put in force. The airplane will be used for spraying the breeding places of mosquitoes.

Doctor Hensoll also plans a general drainage of swamp land and the free introduction into rivers and streams of larva-destroying fish. A campaign slow with full power to act in the cases of handicrafts affected by malaria will be recommended.

The plan calls for a yearly appropriation of $3,000,000 to carry on the work.

Bar Fat Men

New York.—Fat fellows can't be firemen. A 245-pounder lost court proceedings for his reinstatement.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Next Sunday:—
Worship, with sermon 10:30 a. m.
Church School at 12 noon.
Epworth League at 6 p. m.
Sermon, "Trust You Eyes" at 7 p. m.

The evening service will have as its special feature the showing of a set of pictures direct from the office of the National President of the Anti-Saloon League, who is the resident Bishop of the Detroit Area of the Methodist Episcopal Church. The pictures are just newly produced, and show the present condition of the anti-liquor crusade. Next Sunday is Temperance Sunday and all who are interested in law enforcement are invited to attend this evening service.

Father and Son banquet next Monday evening at 6:30. The men are getting their tickets and selecting their boys for the occasion. If any man wants a boy provided for him let him confer with the pastor. Circuit Judge Parm C. Gilbert will be the speaker, and the address will be delivered in the dining room at the tables. Space is limited in the dining room so better get tickets early.

The Rev. Mr. Linnell, of Boyne City, the Presbyterian pastor, was the special speaker at the men's meet Monday evening. His subject was "A Man's Duty to the Church." It was well presented and much appreciated by the men.

The Ladies Literary and Sewing Club met with Mrs. C. E. Pollock Thursday afternoon this week.

The Colonial Home service was enjoyed by a large number of people at the First Methodist Church. Several members of the church participated in rendering the program. Mr. Olaf Norlum had general charge of the service

Don't Fuss With Mustard Plasters!

Don't mix a mess of mustard, flour and water when you can relieve pain, soreness or stiffness with a little clean, white Musterole.

Musterole is made of pure oil of mustard and other helpful ingredients, and takes the place of mustard plasters.

Musterole usually gives prompt relief from sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

DEMPSEY'S KIN NOTED PUGILIST

Required Court Order to Keep His Grandfather From Fighting.

Charlotte, N. C.—Did you know that Nathan Dempsey, progenitor of the celebrated Jack, was also a two-fisted fighting man; that he at one time lived in North Carolina, and that during that period he remained undisputed champion of four counties by reason of the strength in his mighty arms? Did you know that it required an order of court to restrain the fighting instincts of the grandfather of the man who recently lost the heavyweight championship of the world?

When Jack Dempsey was in training in Hendersonville early in the year for his disastrous bout with Gene Tunney, he remarked that he believed his grandfather had once lived in this state. Investigations revealed that the captain of the mighty Nathan are well remembered by the older inhabitants of Asheville. Nathan waged his battles on the village green, now become the public square, accepting the challenges of any and all who dared to try an issue with him.

Seventy-Five Years Ago.

It was seventy years ago that this Dempsey held a championship in Yancey county, and the people still talk about his fame. The territory covered by the pugilist of the early days was by their contiguous counties, and he ruled by the power of his good fist until an outraged court stepped in and put his fist under a peace bond. Nathan licked every man who had the temerity to stand up to him. There were no referees and few rules used in those early encounters, and there were no gloves to soften the blows.

The strongest man of his day in these parts, credited with choking a bear to death with his bare hands, Nathan was a part of a fence rail on one occasion and dispersing a mob, intent on punishing him, in such a manner that all the assembled medical attention of Burnsville was called upon to repair the damage, and with other similar feats, Nathan Dempsey came drifting over the mountains, staying long enough to establish his reputation in Yancey and then moved on to the West.

It was these legends of the Burnsville fighting man that led Jack himself to the belief that the old pioneer was his grandfather. He undertook, he said on his recent visit here, to find the paternal ancestor and find for a time in North Carolina. Anyway, his partner in Yancey county has been talking about this first Dempsey for 75 years—since long before Jack stepped into the limelight—and we still talking now that he has been acclaimed. But nobody knows of a fist meeting the world champion with the crooked scraper of the mountains until Jack himself advanced the idea that resulted in the investigation.

No inheritance goes for anything then Jack Dempsey came by his prowess legitimately, for the mighty Nathan had all of western North Carolina—or at least that part of it that came under his immediate jurisdiction—subject to the power of his fist, until the majesty of the law took hold of the situation, and forbade him longer use of his fist for sanguinary encounters.

It is interesting to note that the law specifically mentioned his right to fist as the one put under the ban—it does not mention the left. History does not relate that the peace bond restraining his right resulted in any appreciable number of challenges being showered upon Dempsey; his left seems to have been almost equally effective.

Old Court Record.

The law designated that he could strike only with the palm of his right hand, but left the left fist free to be used in any manner the pugilist might choose. The old court record is probably still in existence unless it was destroyed during the days of the war between the states. The wording of the document was studied meticulously in order that some way might be found for Dempsey, and the nature of it still is recalled by the older people who also recall that turbulent and hectic period when Dempsey stood four-square to all the world and fought any man who desired a fight for the pure love of fighting, holding his battles at appointed times as they all might be present to witness the encounter.

There are several people in Burnsville—the old-timers—who recall the days when Nathan used to go to it fist and knife on the public square. That was before his fame became so well known that he had the opportunity. There are those who still contend that he was a "superman," pointing out that he did not have ribs, but a solid bone chest that protected his cavernous lungs. He is credited with having been a tall, upstanding fellow with the black eyes and handsome appearance. What became of him is not known. After a time he became soiled with the "wanderlust" and resumed his pilgrimage over the mountains. Later the man who became the grandfather of Jack Dempsey showed up in the West.

The story of the bear is well remembered, and is related with gusto by the more aged citizens of Yancey county. The tree to which the animal brought home by Nathan, was supposed to have been tied, still is standing. It is called Dempsey tree to this day. The story goes that Nathan brought home the bear, chained it to a tree and, to the delight and amazement of the younger generation, kept it for some time.

In due course of time the bear took a notion to make a meal off of one of Nathan's calves. There was a terrific struggle under the tree, to which the unfortunate lovlie had wandered. In the midst of it Dempsey came home. He entered the fight and soon found himself grappling with the bear, who, having had a taste of blood, was of a mind to get in a few more pick this human who was about to come between his bearship and a delicious dinner. The bear was choked to death by Dempsey with his bare hands.

Was a Superman.

"Uncle Dave" Algell, a Civil war veteran, now eighty-two years old, was a boy of ten when Nathan was in his prime. He saw him make his famous charge with the fence rail. That was when some of the neighborhood boys undertook to accomplish by force of numbers what not one of them could do single-handed. When the fracas was over, there were a large number of fellows in sore need of a doctor and a nurse. But Nathan himself still stood upon his two feet, with no visible marks of violence upon him.

"I never saw such a man," Uncle Dave says. "Why, he was a giant. He was a superman. There wasn't a man in all western North Carolina that could whip him. I guess there were not five all put together that could have done it. Johnny McIntire, an unusually strong man, challenged Dempsey to a fight once. But the two never came off. Dempsey knocked Digsby Mac unconscious in the meantime and McIntire never set a definite date for the encounter."

A few relics of old Nathan still are left at Burnsville. There is the bear tree on the land of James F. Hyatt; the public square where the majority of the fights were held, now beautified and ornamented with paved streets leading through it, and the site of the Dempsey cabin, now buried somewhere under the Miller hotel, where the ancient logs serve to form the supports for some of the inner walls. Yancey county, in those days included what is now Avery, Mitchell, Madison and the present Yancey county. But the memory of this mighty man remains clear in the minds of those who knew him—three boys of ten and twelve years, who drank with avidity the stories of the prowess of this mighty fellow.

"You just couldn't hurt him," Uncle Dave declares.

But apparently he could be pestered. Enough of one thing, evidently, was enough. When the crowd gunged him one day in the belief that co-operation was accomplish what individual bravery had not, Dempsey reached down and got a fence rail in one hand and charged into the crowd of his tormentors. A short time thereafter the injured were carried home by their friends. Dempsey was not among them. The fence rail was ruined for further service to be used as firewood. Uncle Dave witnessed this fight with his own eyes.

In all his career, however, Dempsey never killed a man, and never beat his wife. This last was unusual, for wife-beating was a well part of the game in those days, and not much fuss was raised about a little thing like wife-beating, according to Triple Dave Mrs. Dempsey, he says, was a tiny little wisp of a woman and perhaps the happiest one in all Yancey county. Nathan was good to her. Rough tough he may have been, he left his fighting and drinking off when he went home. Or perhaps he was under the same sort of dominion that some of men of the present day are. The battle does not always go to the strong, especially when a woman takes a hand in it.

What Nathan Dempsey followed as a profession nobody remembers. He wouldn't hardly expect the boys to remember what he did. We were interested in his fighting," they say around Hurnsville. And they are still talking about it after 75 years, particularly since they have learned that the redoubtable Jack has accepted him as his grandfather.

Taking a Chance

Marrakech, Morocco.—Thousands of mounted sheiks in white silk robes have been here for a wedding and they brought presents valued at 15,000,000 francs. After the befit to the autumn wee portend by slaves he was married to the daughter of El Glaoui, pasha of Marrakech, and then saw the bride's face for the first time.

Actress by Night Is File Clerk by Day

New York.—By day a blonde gnome burrowing among files of a downtown public office and at night an aspirant to stardom in the theatrical firmament are the dual roles played by Miss Mae Noble, twenty, of Brooklyn, in her present act on the stage of life.

But the present is by no means the last act, she says. She is ambitious and an arduous worker. Her circumstances spell struggle if she is to achieve, for she is the prop on which her parents, a widow, leans for support. So by day Miss Noble is a clerk in the Board of Health of the county of Pearl street, and by night the humble gnome becomes metamorphosed into a figure behind the footlights. She is Nustasia in "The Humble," now being presented at the Neighborhood playhouse.

Milan Makes Road

The "Milan Laboratory" motor road, an ultra-modern highway of 58 miles in Italy, is operated by the builders. Tolls are collected, varying from 15 lire for cars up to 17 horse power to 90 lire for cars up to 20 horse power, for a distance of about 30 miles. Rates differ according to the length of the journey. The company has erected a series of toll-gate houses, which also handle all the necessary automobile supplies, gasoline and oil. Needed repairs are also made.

"IT PAYS TO ADVERTISE"
Senior Class, Palace Theatre, Mar. 1

GOOD ROADS

IMPROVEMENT OF ROADS REVIEWED

(Prepared by the United States Department of Agriculture.)

Federal-aid road projects completed during the fiscal year 1926 contributed over a million dollars to the value of the mileage of improved roads in the federal-aid system, according to the annual report of the bureau of public roads of the United States Department of Agriculture. Added to the mileage improved with federal assistance in previous years, the above brings the total length of improved federal-aid roads up to 55,902 miles.

At the close of the year construction was in progress on 10,062 miles and projects involving the improvement of 2,469 miles additional had been approved, including the mileage of projects in these latter stages, all of which are included in the federal-aid system, the total mileage improved, or in process of improvement, with federal aid was 69,353.1 miles. With the exception of a few hundred miles improved prior to the designation of the federal-aid highway system in 1921, all of this mileage is included in the system.

The system now has an aggregate length of 182,134 miles. All this mileage has been selected by the state and federal highway officials as essential links of a system adequate for the accommodation of interstate traffic. Considerable work has been done on the system by the states without federal aid so that it is now not far from three-fourths initially improved. The work of improvement, however, is not three-quarters done, as increasing traffic will make it necessary to improve to a higher degree a considerable mileage of low type road such as graded earth, sand clay and gravel.

The report states that the improvement of several transcontinental routes is approaching completion. There is now a route extending from Washington through St. Louis, Texarkana and El Paso to San Diego which is 97 per cent improved. The route from Atlantic City, N. J. to Astoria, Ore., is seven-eighths improved and from Boston to Seattle the northern tier of states is 73 per cent improved and 69 per cent surfaced.

Twenty-five states have continuously improved highways entirely across them in at least one direction and thirteen of these have completed transcontinental routes in two directions.

The report contains a short discussion on national forest road construction, the relation of federal aid and forest road work, and also a review of the more conspicuous accomplishments in highway research. Among the investigations which have been of most practical value is that which has directed toward the increase of efficiency of various road construction operations, a field in which savings of from 25 to 35 per cent in earth-moving costs have been shown to be generally possible and in which it has been found that as much as 20 per cent can be saved in the cost of grading on some jobs, effected almost entirely by changes in grades.

Progress in federal aid construction in the various states is shown in the following table:

Total cost, federal aid and mileage of federal-aid roads completed to June 30, 1926, by states.

State	Total Cost	Federal Aid	Miles*
Alabama	$20,752,385.99	$ 9,881,434.48	1,413.7
Arizona	11,597,325.07	4,295,194.02	767.1

ACQUIRED SIX WIVES; YOUTH HELD INSANE

Scion of Wealthy Family Victim of Leisure.

Fort Worth, Texas.—Married six times during the last year and a half without having obtained a divorce, Thomas W. Wharton, twenty-three years old and scion of a wealthy Texas family, has been declared insane by a jury, which recommended his incarceration in an asylum. Wharton is a son of A. B. Wharton and a grandson of W. T. Waggoner, multimillionaire banker and rancher.

Both father and grandfather were in the courtroom of Judge Bennett Moore when the jury returned its verdict. Attorneys and physicians had been employed by the family in its effort to prove that the young man is mentally unsound. His mother was the late Electra Waggoner Wharton, several times married and divorced. Only a few days ago Mrs. Dorris Edna Long of Abilene, Texas, latest of his six wives, filed a suit against Wharton for $150,000 damages.

Testimony developed that Wharton's first marriage was to a California girl in 1925, whose name was not disclosed, while the other marriages were to his wife, June 1, 1926, at Palm Beach, Fla.; Mary Mellon, November 3, 1926, at Dallas; Irene Rolfe November 24, 1926, at Hartford, Conn.; Edna Long, Murray, October 15, 1925, Colorado Springs, Col.; Doris Edna Day, December 4, 1926, at Abilene.

Unmoved by Trial.

Young Wharton, appearing at least ten years older than his twenty-three years, apparently took little interest in the proceedings. He unpolished his fine manner of entertaining from walks at intervals along the streets. Thousands of men would be thrown out of work if modern methods were substituted for the old practice.

The Horticultural pullers' guild and the wheelbarrow-pushing water-pedlers' league the encroachments of street cars and waterworks upon their business.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Emore Stiles and Addie Stiles, his wife, of Charlevoix, Michigan, unto to James F. McCaugh, of Charlevoix, Michigan, dated January 24th, 1914, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January 1914, in liber 39 of mortgages on page 457, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage, dated September 8th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 10th, 1915, in liber 53 of mortgages on page 350; which mortgage was afterwards sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Five Hundred Thirty-Two and 85/100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof, now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 16th day of April, 1927, at eleven o'clock in the forenoon of that date.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres, more or less.

Dated January 18, 1927.

Volume 57 — Charlevoix, Michigan, Thursday, March 10, 1927 — Number 46

CITY PRIMARY OVER

But Few Changes in City Officials.

Arthur Bergeon was nominated Mayor to succeed himself at the primary held in this city last Monday. Ray Hamilton succeeds to the position of city clerk and like the mayor unopposed. In this he takes the position for several years held by Charles Lamphear who for personal reasons would not accept the position, retiring voluntarily.

The city treasurer, for which something of a contest was made, went to Mr. John Cook, who works with a substantial majority and who with Mrs. Cook, has been in charge of this branch of city business for a long term of years. Mr. and Mrs. Cook alternating as official custodian of the funds of the city of Michigan and in the above named capacities as treasurer by the entire electorate.

Ray Ashdon with the beginning of the term will be officially known as "your boss" and for the term people will dispense laws, pronounce sentences and declare the amount of fines and costs to be collected from defendants upon convictions procured in his city court.

Capt. Frank Partridge was nominated and will act as a member of the City Park board.

In the Ward ward electors paid their respects to candidates and by their votes they will be represented by H. A. Craig, supervisor; Henry Gunderman and W. J. Weikel, constable.

The vote throughout the city was moderately light, many electors neglecting to visit the polls.

DICKENS CLUB ENTERTAINED BY TWO MEMBERS

Mrs. Harley Ochs, and Miss Minnie Payton, dressed as Signor Jupe and his daughter, Sissy, entertained the Dickens Club Wednesday afternoon with a one o'clock luncheon at the home of the former, 302 Clinton-st Mr. Barkis, Little Nell, Captain Cuttle, Clara Peggotty, in fact the members of the Dickens family residing in Charlevoix attended this family reunion.

Two tables were decorated in the Club colors of Chinese Blue and Yellow. The license tag on "Merrieyes," the white dog who was tied with ropes from the circus pole directed the guests to their places. A four course luncheon was served with a centers at each table.

Signor Supe disappeared as usual but returned with a kodak, taking pictures of the guests whose costumes afforded much merriment.

Early Typewriter

On December 7, 1880, a patent for a typewriter was issued to John Pratt of South Carolina. He had been in England during the Civil war and there purchased his machine, completed in 1866. It was first recognized in England.

MRS. JULIA PAUL HARRINGTON PASSES

Funeral Service Wednesday, March 9th, at the Home on Antrim Street

Mrs. Julia Paul Harrington was born in Germany, February 2, 1868, and passed away at her home in Charlevoix, March 6, 1927, at mid-night.

When she was five years of age she came with her parents to America, making her home near Port Huron, this state. In the year 1898 she was united in marriage with Mr. Thomas Harrington at Black River, Mich. They made their home in Frederick for fourteen years, removing to Boyne City for three years, and then making their residence in Charlevoix where they have since lived. Two children were born into this home, Paul and Earl, twins. Pearl passed away three years ago.

Mrs. Harrington was reared in the Lutheran church, later uniting with the First Methodist Episcopal Church of this city.

She was an excellent wife and mother, an industrious worker for her home and others, a devout christian and a highly respected and worth loved woman by all who knew her best.

The funeral service was conducted by her pastor, Rev. C. E. Pollock, Wednesday at 2:00 p. m.

GIRL BABIES NOT WANTED IN AFRICA

Joy in Moslem Household Is Reserved for Boys.

When a son is born to a North African Moslem, joy reigns. Every one says to the father: "God has increased thy good." If it is a daughter, the father cries: "A misfortune is born to me." But, in spite of that, the birth is celebrated on the seventh day in the presence of Cadi, the parents and their friends, and the baby is named Zohra, the flower; Saadya, the happy; Zina, the beautiful, or Aniza, the beloved.

Yet, even if it hangs the prophet's picture, "May the succotor to women," and it is the phrase that stops all civilization and checks all progress. While the daughter is a child her father troubles himself not a whit about her, and she is lucky if her mother, his instrument for pleasure and for work, finds any time to watch over her.

As the girl grows up she is trained, taught silence, discretion—and coquetry. Poetic phrases about beauty are sung to her. Later on, in spite of the Koran, which describes listening as "the devil's writing," she is tattooed.

When the girl is of marriageable age she is also ready for her prince. Her father begins to think about the dowry—which he will get back—and the gift he will receive from the husband, which practically amounts to a price for selling his daughter. At ten or twelve, then, the girl is handed over to her husband, whether she likes it or not. For a father can impose marriage on an unmarried girl. It is what is called the right of Djebr, which is recognized by law and custom.

The father may consult his daughter, but she must not reply except by a sulks or by tears. If she sulkes it is because she is glad to be married; if she weeps it simply means that she disagrees to the marriage, though regretting to leave her father's house—a convenient bit of duplicity. If she should categorically refuse the man who bought her, the father would apply the Djebr by blows of the nutmeque, or Arab club.

The consent of a widow or a divorced woman is a necessary, though that does not prevent her being sold by her father or her brothers, or even by her children; for in all these relations of her civil life she is represented by a proxy or ouali, who is practically her master.

The same law also permits polygamy, which is often necessary, especially among the poor; though they usually have but one wives, who are used for all kinds of work, relieving one another, since one wife would hardly be enough for the day's tasks.

Meanwhile the husband does his bit by putting on a more or less torn burnoose and going—very much like an ancient Roman senator—to drink his kaoua at the Moorish cafe or to discourse at the Djemaa or else to look for news in the market. It is not unusual to see old men of sixty marrying girls of twelve.—Colonel Godchot in La Revue Mondiale.

BATTLING FOR HUGE FORTUNE

Bank Teller's Wife Claims She Is Daughter of Bonanza King.

San Francisco.—Weaving an amazing life pattern on the fabric of old memories, old scandals, and the heyday of California since the era of the Comstock boom, tangled threads of evidence are being gathered together at San Francisco in anticipation of one of the most astounding legal battles in the history of the West.

At stake are some four millions of dollars—dollars from the Comstock lode—and the secret of a woman's birth.

The millions are a two-ninth portion of the estate of the late James L. Flood, California capitalist, son of James C. Flood, "bonanza king" of the days that made the names of Mackay, Fair, O'Brien and Flood immortal to California history.

Placed in Convent.

The woman is Mrs. Constance May Gavin, thirty-two-year-old wife of John F. Gavin, Los Angeles bank teller.

Asserting that she is the daughter of Jessy Flood by his first marriage, unrecognized, she declares she was having been taken from the lap of Jessy Flood's first wife, Jessy Bosque, by the Floods and spirited away to the cloistered halls of convents. Mrs. Gavin makes her plea.

Mrs. Smith's maiden name was Nancy M. Bagley. December 13, 1870 she was united in marriage to Willard A. Smith, and to this union were born on the 24th day of September, 1917. Immediately following their marriage Mr. and Mrs. Smith came to Charlevoix where the husband was engaged in business as owner and publisher of The Charlevoix Sentinel, in which he continued from the initial number until his death, a period of forty-eight years for Mr. Smith and fifty-seven for Mrs. Smith, without change of residence, a period of nearly two generations of time so far as residence is concerned.

Mrs. Smith was one of several children, the elder daughter of Mr. and Mrs. Sidney Bagley. She was born September 25th, 1850 at Ellenburgh, New York. In early life and through girlhood she was a typical pioneer girl, home and community builder and as such was recognized by the element that supplied the refinements and moral influence. She was freeminently a christian character from the time of her early girlhood until her death, a lovable and loving woman, endowed with that something that creates, fosters and promotes confidence, establishes eternal friendship and to the utmost discouraged hypocrisy, frailties and tendency toward human deceit.

Hers was always the ready smile; the sympathetic expression and sincere action. She had all these noble attributes in unknown upward multiplication. In regard and due appreciation in the public she was loyal in the superlative degree. In readiness to serve and assist in the amelioration of the sick, afflicted and distressed her work was carried on in proportions that were far true greatness and must so be considered by the keeper of personal records at the golden gate of eternity, where, if she has not, none other has a balance on the heavenward side of God's Ledger.

Neither man nor woman has lived without making some lasting impression for good or evil during his or her sojourn on earth's stage of action. Mrs. Smith's impression for good or evil during his or her sojourn on earth's stage of action. Mrs. Smith's impression for good was openly, courageously, the memory of whom is an inspiration for others to follow and climb to greater heights—whose lifes work commands admiration and respect by reason of observation and personal contact in their every day life, have done nobly and attained the zenith of life's choicest blessing.

For more than a half century of time—fifty-seven years—in the Charlevoix home Mrs. Smith has most inspiringly demonstrated each and every of the finest characteristics in human life. Fidelity was her watchword. In this she pursued no shadows. Her aim in life, was righteousness, and there is no witness but such as will openly attest her virtues and exemplary faithfulness to her early established christian creed. She was a lover of nature; of buds and blossoms; of plants, shrubs and trees, but above all her love for humanity was something beyond—something supreme, something divine.

She was self-sacrificing; devoted in her duties to her family, neighbors and friends and zealous in her religious belief; not narrow, but free from superstitious theories, always making a generous allowance for views and opinions of others. Her life work was devoted and consecrated to human helpfulness and duty. Her ideals of the higher order. Nor did she fall short of her ideals of christian charity and righteousness. In her everyday life she practiced and remained true to the principles inculcated during the years of childhood.

Mrs. Smith has been an invalid for nearly two years. She suffered a stroke of apoplexy June 7, 1925 from which she failed to recover. Her death came unexpected due to heart failure from which she expired in an instant, at home without warning, at 3:30 p. m. Throughout the day she was as well as usual, spent some time sitting up during the day, being refused at a late time she was stricken with the attack that terminated her life.

Mrs. Smith is survived by two daughters, Mrs. Florence Smith Adams of Charlevoix, Mrs. Ruth St. Smith of Toledo, Ohio, and by Willard Smith, Jr., of Detroit, and one sister Mrs. William Coulter of Burlington, Michigan.

Funeral service was held at the family home Sunday afternoon, Rev. H. G. Mattson D. D. officiating.

Use New Rays as Aid to Man

Scientists Employ Them in Radio, Surgery and Many Inventions.

Washington.—The same sky's news carried in strong, liberal doses by the ultra-violet rays are making the inhabitants of the tree tops enamored, and a story from Camden, New Jersey, that seeds and tubers treated with X-rays produce greater yields, bear out the old-fashioned evidences of the world's debt to rays, many of them little known. A bulletin from the Washington and Lafayette quarters of the National Geographic society deals further with this subject.

"Rays are not abbreviations of physicists or unusual phenomena to be dealt with only in laboratories," says the bulletin, "They are more truly the raiment of the earth, making life in all its forms returnable. And we

Make Life Possible.

"The sun's rays are the prerequisite for the world as we know it. But for the warmth and light flowing to us through 93,000,000 miles of 'space,' the earth would be a lifeless cinder, without vegetation and without even the lowest animate forms. As it is, the rays or waves of heat and light that flow to us in a mighty stream, for all practical purposes vanish, and in this continual bath of life-giving rays we very truly 'live and move and have our being.'

"Our essential diet of rays is fresh as well as potent. Because of the almost inconceivable speed of light and heat waves (186,000 miles per second), the sunbeam which strikes you this instant left its faraway source only eight minutes ago.

Plants Need Rays.

"It is not only by changing us directly and by keeping our seas and streams from being eternally frozen that the sun's rays have been a good thing that we have, except some of the minerals and ores, can be traced to their beneficent work. The soil upon which our plants live has been washed from the mineral cliffs by less lump of ash and stone by the rain while the sun's rays lifted from the seas and east down on the land.

"Plants which grow in the soil can themselves draw rays hurried into sunshine. Plants not only exist because of heat and light waves from the sun, but, directly or indirectly, mankind and the animals, they construct millions of years ago an ingenious trap for extra energy from the rays which they store away. This trap is a mysterious substance called chlorophyll, the green coloring matter in all soil-growing plant leaves. When the rays strike chlorophyll they manufacture cellulose, starch, and sugars—and on these products the life of the animal world is built. Every plant, then, is in reality a separate factory, operated by waves of energy from a 'power house' 93,000,000 miles away, through its chlorophyll 'motor.'

Each Plant a Factory.

"These factories turn out directly various commodities that man must have: vegetables, fruits, and nuts that make up a large part of our diet; cotton, flax and other fibers which contribute largely to our clothing and draperies; the woods which help to build our houses and implements; and many other subsistences which are necessary in our daily life. Indirectly, these 'factories' supply our remaining food and clothing; for our food and nuts produce our meat from a vegetable diet, and so, too, our wool and silk module are the indirect products of the ray-built vegetable world.

"It is not only the rays of the green cent that contributo to our well being. Sunbeams that millions of years ago built tropical vegetation which was fossilized into coal today warm our houses and turn the wheels of our factories. The rays that left the sun weeks or months or at most years ago are helping us to still another way. They evaporated water from the sea which fell as rain and was stored up behind dams. When this hydro-stored water is made to turn turbines the electricity that comes to us over wires to light our homes and toast our bread is only the beneficent sunbeam in another form.

Ultra-Violet Rays.

"Even the little known ultra-violet waves, shorter than those of light, are now doing their bit to push man's civilization forward. The ultra-violet ray has for many years played an important part in photography. Now its value in improving human and animal health is being recognized. Ordinary window glass does not permit ultra-violet rays to pass through; so that in reality our windows, made to admit light and warmth, are barriers against one of Nature's chief life-giving forces. Special glasses which permit ultra-violet rays to pass are coming into wider use, especially in hospitals where patients may thus be given the benefit of one more force to help them to health.

"Since its discovery a generation ago, the X-ray has performed innumerable services, chiefly in permitting photographs to be taken of flesh, covered bones and internal organs, and in the direct treatment of certain diseased conditions. But the X-ray is so potent that it can bring harm as well as good, causing tissues to wither away or become inflamed when exposed too long to the powerful waves. Man has learned to tame this ray, however, and is even finding new uses for it as is indicated by recent experiments which show that seeds exposed to X-rays produce greater yields than those untreated.

Tiniest Ray Most Penetrating.

"One of the rays to become known most recently is the γ-Gamma-ray thrown off by radium. This is in reality a super-X-ray and has found its greatest field in carrying further the work of its cross relative.

Heat and Radio Waves.

"How we turn heat rays to account is well known. They fly from our radiators to us and we are comfortable in winter; they cook our food; they produce steam for many of our power houses; and to numerous other ways they are harnessed for man's benefit. Within recent years we have learned to connect another group of waves which, before this time, since the beginning of the world, were unused by man. These are the Hertzian or radio waves which now all over the world are carrying their burden of music and the spoken word, and even are transferring photographs. Inventors are seeking to place other burdens on the strong young shoulders of the radio waves and to wrest thus it is only a question of time until they will carry motion pictures by word only which may turn wheels far from the source of energy.

Using Rays to Kill Germs.

"Even the little known ultra-violet waves, shorter than those of light, are now doing their bit to push man's civilization forward. The ultra-violet ray has for many years played an important part in photography. Now its value in improving human and animal health is being recognized. Ordinary window glass does not permit ultra-violet rays to pass through; so that in reality our windows, made to admit light and warmth, are barriers against one of Nature's chief life-giving forces. Special glasses which permit ultra-violet rays to pass are coming into wider use, especially in hospitals where patients may thus be given the benefit of one more force to help them to health.

"Since its discovery a generation ago, the X-ray has performed innumerable services, chiefly in permitting photographs to be taken of flesh, covered bones and internal organs, and in the direct treatment of certain diseased conditions. But the X-ray is so potent that it can bring harm as well as good, causing tissues to wither away or become inflamed when exposed too long to the powerful waves. Man has learned to tame this ray, however, and is even finding new uses for it as is indicated by recent experiments which show that seeds exposed to X-rays produce greater yields than those untreated.

Tiniest Ray Most Penetrating.

"One of the rays to become known most recently is the γ-Gamma-ray thrown off by radium. This is in reality a super-X-ray and has found its greatest field in carrying further the work of its cross relative.

The most mysterious of the rays is that which has come to light within the last year or so, the Millikan or Cosmic ray, which is the ultimate of the present thus in vibratory rate and power stems for many of our power houses; and to numerous other ways they are harnessed for man's benefit. "Within recent years we have learned to connect another group of waves which, before this time, since the beginning of the world, were unused by man. These are the Hertzian or radio waves which now all over the world are carrying their burden of music and the spoken word, and even are transferring photographs. Inventors are seeking to place other burdens on the strong young shoulders of the radio waves and to wrest thus it is only a question of time until they will carry motion pictures by word only which may turn wheels far from the source of energy.

Missouri and Kansas Coeds Let Hair Grow

Kansas City, Mo.—Coeds at the University of Kansas, Lawrence, and the University of Missouri, Columbia, seem to be competing in letting the hitherto popular bobs grow long again.

Girls at both institutions started to let their hair grow, due to the disgust of non-social arbiters in both cities.

A recent check-up on the Missouri campus revealed that 60 per cent of the girls either had long hair or were expecting to have it before the year's end. At Kansas the percentage is slightly lower, and exponents of lengthened tresses are gaining new converts daily.

Drink Water to Help Wash Out Kidney Poison

If Your Back Hurts or Bladder Bothers You, Begin Taking Salts

When your kidneys hurt and your back feels sore don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which helps to remove the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of good water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys may then act fine. This famous salts is made from the acid grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate clogged kidneys; also to neutralize the acids in the system so they are no longer a source of irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink, which everyone should take now and then to help keep their kidneys clean and active. Try this; also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

Odd Complication Due to Immigration Laws

New York.—A complication made possible by the immigration laws was revealed the other day on the arrival of the French liner France, when Mrs. Marie Carroll, who was born in Tampa, Fla., was sent to Ellis Island as an alien, while her husband, Domingo Carroll, born in Spain and not naturalized, was allowed to land.

Mr. and Mrs. Carroll sailed for Spain last spring, accompanied by their five children, and as Carroll was an alien he obtained a return permit. Mrs. Carroll, believing that she is still an American citizen, neglected to do this.

When she attempted to land she experienced that according to the law in force at the time of her marriage she had taken her husband's citizenship. She was taken to Ellis Island, but later was released by Commissioner Day pending a ruling from Washington.

Chinese Exports

The chief exports of China are wine-and-nuts, beans, bristles for brushes, chinaware, earthenware and pottery, cloth, both raw and manufactured, drugs, fish and fishing products, fruit, hemp, hides, mats and matting, medicinal herbs, oil, paper, silk, vegetables, straw braid, sugar, tea, tobacco and wood.

BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother's Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

Galosh Stuck

A woman purchased a pair of galoshes at a Mt. Pleasant (Pa.) store and took them home. Upon an attempted to remove one it was found to be "locked." It was too late to return to the store, so she went to bed wearing the galosh, and it was 36 hours before she was got back to the store. There it was necessary to cut it off.

Her Natural Gait

Louisville Courier-Journal: "Oh, yes; that's just near the Beeches, isn't it?"

BERING SEA ICE FLOES BIG AID IN HUNTING THE POLAR BEAR

Hair Seal Is Favorite Food of These Animals and Natives Helps Them in Chase.

St. Michael, Alaska.—Heavy weather, with tremendously large ice floes, in Bering sea, promises the natives of Kotzebue sound the most favorable polar-bear hunting in a generation.

A good market exists this year for the fine white polar bear skins, and these arctic hounds are plentiful in a good catch is anticipated.

The white king of the Arctic regions is a combined hunter-author-hobo. He has no fixed habitat, but goes where food is most plentiful, coming down with the ice pack of the North when seal, walrus and whale move.

Unlike any other animal, the polar bear keeps to the ice and will seek shore only when cut off from open water. It is the best swimmer of the animal world. Loose jointed, ungainly, silly looking, with a skin that fits badly, the white bear is nevertheless very fleet footed. Often they are not pure white, frequently being killed possessing yellow, brown or dark spots on hips and back. The flanks and legs are covered with hair sometimes twenty inches long.

The much sought food of these aquatic animals is the hair seal, and nature has helped them hunt by providing a coat that harmonizes with surrounding landscape. That the bear might not have an unfair advantage in the chase he has a cool black nose, which he cunningly hides, declare Eskimos, when stalking a victim, by placing a paw over it.

The bears often capture seal in the open sea. Detecting a bunch of seal floating on the surface, the bears dive and swim deep under water. Noiselessly they come up right under the seal, one of which is sure to be bear meat.

Polar bear pelts are of little value in the winter, only the largest and finest colored ones are commercially valued for rugs and furs. From $30 to $75 is the price here in Nome, and to $125 to $250 in Seattle and New York.

The Arctic bears are so greasy that they refuse to eat the flesh except in extreme hunger. There is no scarcity of white bears in the Frigid zones, but they range an area where men seldom go.

Real Realism

Moscow.—This must be real realism. A brilliant film produced by the state film government job because Jo was too extravagant with a picture depicting American extravagance.

Find Stone-Age Village

Kalisz, Russia.—A large village of the Stone age of prehistoric antiquity has been discovered here. Bones of mammoths and many stone implements were unearthed.

CHAPTER IX—Continued
—13—

"Ta-wan-ne-ors has only one regret that he is to die," he said. "That is because he cannot live to find your lost soul and return it to you."

She laughed harshly.

"Ta-wan-ne-ors is a child," she said. "His heart is turned to water. He talks of things which are not. My soul is here." She tapped her left breast. "It does not matter, however, for the Ga-goa-ha Hoonan-na-tas-ta does not need a soul as other mortals do."

She turned on her heel abruptly, and followed the priests into the long dark house from which they had emerged.

The great mob of Indians matted away as soon as she left us. They all but fled in order to reach their bodies before sundown, and so hurried were our guards that in removing us from the stakes to the Council-House in the center of the village they forebore to beat or mistreat us.

In the Council-House they supplied us with a liberal meal of meat and vegetables. Then our bonds were replaced and we were covered with robes, while our guards covered close to the fire in abject fear. They started at the slightest movement. Had we been able to stir hand or foot I think we might have won our freedom but they used cure in binding us, and we lay inert as corpses.

"What do they fear?" I whispered to Ta-wan-ne-ors at length, desirous of hoisting a friendly voice.

"I do not know exactly, brother," he said. "Those Cahunagas are responsible for it. They are Lords of Night."

"But the Moon feast they talk about," I persisted. "What is that?"

"It is some invention of their own," he replied. "Perhaps Murray or De Veulle heard. Please do not ask me. I know nothing of such things."

Through the walls of the house came the weird, minor melody which had attended the appearance of the Mistress of the Moon, now mingled with shrieks, groans, screams and yells. Our guards huddled closer together. They abandoned their weapons and covered their heads with blankets. A chant began to rise and fall, at intervals sounded the wailing chant of the maidens' dance and the thudding of dancing feet.

The uproar increased in violence. Women's shrieks were mixed with the hideous laughter, some in eager ecstasy, some in fear. Gradually the sounds receded, then returned. And occasionally that one shrill, sweet voice which I had heard and was lifted on a note of pagan exultation—only to be drowned in the thrumming of drums.

Our fire dwindled and was rekindled. The night crept on toward the dawn. The monotony of the noises, the endless repetition of the chant, deadened the senses, and we slept. When I awakened, I was to see the skylight trickling through the smoke-hole in the roof.

Somewhere in the darkness a bird began to sing, and my captors yawned and sat up. The squat chief, his fears of the night gone, kicked Ta-wan-ne-ors awake.

"This is the day of the Moon feast," he said. "You will soon clamor to die."

CHAPTER X

The Moon Feast

We were yanked to our feet and rushed outside. Somewhere behind us loomed the narrow, dirty streets between the bark houses and lodges. They greeted us with a howling that set the dogs to howling, and so hurried were our guards that in removing us from the stakes to the Council-House in the center of the village they forebore to beat or mistreat us.

Ahead of us opened the flat expanse of the dancing-place, with the two lonely stakes, flanked by piles of freshly gathered firewood, standing like portents of evil against the dark-green background of the pines which walled the rear of the amphitheater.

Ta-wan-ne-ors looked eagerly in every direction, but the man he sought was not present nor were there visible any of the warriors of the Cahunagas. Only the slighter forms of the negro, Tom, and Sulking, with his tangle of red hair, stirred recollections in that alien, hostile mass.

Our guards hustled us to the stakes as they had the day before, and Ta-wan-ne-ors took a significant glance at me, rallied them with the searching wit of his race.

"The Cahunagas dogs are not used to taking captives," he commented. "They are more used to feeding on the big the field. They do not know how to torment real warriors."

When they were passing the thongs under his arm-pits, the Seneca beat forward and fastened his teeth in the forearm of the incautious guard. The blood spurted and the man yelped with pain. The warrior cursed fluently.

"Unarmed and bound, yet I can hurt you," he cried. "Truly, you are women. The warriors of the Great League scorn you."

Strangely enough, they made no retaliation upon him; but, having securely fastened us to the stakes, withdrew and stood somewhat apart from the encompassing crowds.

The silence continued for more than an hour, when a lane was opened opposite us and Murray and De Veulle sauntered forward.

"I trust you have fared well, Master Jugglers," said the pardon, Master Armorer?" remarked Murray urbanely. "No discomforts? Enough to eat and sufficient attention?"

I profited by Ta-wan-ne-ors' example, and thrust for the one weak spot in the man's armor of egotism.

"You do condemn yourself for what you are," I answered him sternly. "Sure, no man of breeding would descend to the depths you reach. I do assure you, fellow, if you ever return to civilization and attempt to mix with the gently bred, your plowboy origin will out."

His face was suffused to a purple hue.

"Sdeath!" he rasped. "Sir, know you not I am of the Murrays of Colbriehw? I quarter my arms with the Bliehs! I have a right to carry the Bleeding Heart on my shield!, I—"

"No, no," I interrupted. "'Tis easy for you to claim here in the wilderness, but the humblest cadet of the house of Doughs would disprove you. I dislike to speak ill of any woman, and ceries I could weep for the grief of her who conceived you, whatever she was. But I make no doubt she was some Huron squaw."

His face went dead white.

"I was pleaded with overlong to spare you," he said in accents so cold that the words fell like icicles breaking from the rocks. "I am glad I resisted. I shall give orders now that your tongueis be the most ingenious our savages can devise."

"I doubt it not," I said.

"You will die in much agony," he continued placidly. "Nobody will ever know of your inmate. And I"—his vanity lured up again—"I shall die a sorgeuis and a duke."

"And a cowardly criminal," I added.

He murmured to De Veulle and walked away, the savages moving from his path as if he were death in person, for indeed they feared him, more even than they feared Black Bobe and their own accursed priests. He was the master of all.

"So you are to be chief torturer, gentlemen to cheveliier?" I remarked to De Veulle.

"Even so," he agreed.

"You could not be a fitter," I said sympathetically.

"I thank you for your appreciation," he replied. "I have instructed the savages to give you the long torment. It will be still alive this time tomor-

row. Think of it! Your Iroquois friend knows what that means—an eyeless, bloody wreck of a man, begging to be slain."

He beckoned to the Cahunaga chief. "Let your people," he ordered, and stepped back.

The Cahunaga put his hand to his mouth, and the high-pitched, soaring notes of the war-whoop resounded through the air. Instantly the dancing-ground became alive with the thuds of moccasined feet, the clashing and shrieking, weapons menacing. They greeted with a hideous howl the promise of some extraordinary dance.

They surged round and round us, the fringe of the crowd pressing closer up to the stakes to mock at us or threaten us with words and weapons. Nobody touched us, but the strain of constantly expecting physical assault was nerve-racking. Ta-wan-ne-ors smiled serenely at them all, and when he could make himself heard, returned their threats.

This continued for a long time. Twilight was at hand before they dropped back, and a select band of young warriors began to establish a drill with bow and arrow, knife and tomahawk. Arrows were shot between our arms and legs—tomahawks were hurled into the posts beside our ears; knives were hurled from the far side of the open space, to quiver almost at their points shaved our naked ribs. Once in a while we were scratched; the handle of a tomahawk, poorly thrown, raised a lump on my forehead. And De Veulle, squatting on the ground with a knot of chiefs, applauded the show.

It went on and on. New forms of mental torture were constantly devised. Darkness closed down, and the fires beside the stakes were lighted. I was in a daze. I had ceased to feel fear or indignity. I was conscious only of a great weariness and thirst.

Of a sudden I realized that the shouting had died down. The guarding figures were at rest. Out into the circle of firelight swayed the hideous column of False Faces, their masks of monstrous birds and beasts and reptiles seeming alive with horrid purpose in the shifting gleam, their feet moving harmoniously in the hesitant step of the dance, their robes aufled in the monstrousness made of their cloth.

They strung a circle, as they had done the day before, and halted, beads wabbling this way and that. There was a brief pause, and I noticed De Veulle, risen to his feet and staring intently behind me, where the wall of human mass a perfect background for the spectacle. A sigh burst from the half-seen throngs of savages.

"Ta-gon-ha Hoonan-na-tas-ta!"

I craned my neck, and as well as the fellow behind me could see, I moved the stake to which I was lashed. A white figure flitted from the posterior of the trees and glided toward us. The False Faces started a queer, rhythmic air, accompanied by gently throbbing drums. The figure commenced to dance, arms wide, like floating free. Beside me Ta-wan-ne-ors choked back a groan of hate and love and fought fruitlessly against the ruvelde thongs.

'Twas Ga-ha-no. She wore again her ceremonial uniform, the fringed deerskin; but this time they were white, fashioned of skins taken from the bellies of young does. Her head and body, too, were coated with some white substance that made her gleam like a delicate marble statue when she postured in the flickering radiance of the fires.

She tossed up her arms in a curving gesture toward the moon, rising low above the treetops. The music of the attendant priests swung into a faster measure; the raising of the dead was one subtly disturbing, commanding.

"Ta-ho-ka-ga-ga-ga," she cried, "I, your servant, the Mistress of the False Faces, begin now the Moon feast we make in your honor."

She resumed her dance, but 'twas only a pretense of motion, for her long steps she had first used. I know not how to describe it, save perhaps that it was like the ardent, passionate appealing to the lustiest instincts in man, indowed with a peculiarly attractive indecency. It was, I think, the dance of creation, of the impulse of life, one of the oldest and the most perverted way one of the truest dances which man ever devised. It could only be danced by a savage people, primitive and unashamed.

There went the measure of the dance. Faster whirled the glistening figure. Now she danced before us, her eyes burning with mockery—I know not what—of Ta-wan-ne-ors. Now she spun around the open space in a series of intricate steps and pos-tures.

The music worked up to a crescendo, her entire body writhed and throbbed. Ga-ha-no leaped high in air and raised her arms toward the moon, her whole shape was no whiter or fairer than she.

The chant stopped in the middle of a note, and as her feet touched the ground again she ran lightly across the amphitheater and threw herself into De Veulle's arms. He tossed her upon his shoulder.

"The Moon feast is over, O my people," she called hurriedly as he disappeared with her into the shadows.

All those thousands of people went mad. The dancing-place became a wild tumult of naked savages, men and women, locked in groups and couples to the renewed music of the False Faces. Decency and restraint were cast aside.

(TO BE CONTINUED.)

Creatures of Mystery in Unexplored China

Strange creatures, said to have been found in the south of China, are more in the realm of scientific curiosity.

The most amazing of these discoveries is a race of "dog-faced" people. This tribe is said to live far in the interior. They have their habitat in caves and hollow trees, and are entirely savage.

There have been reports also of a blue tiger, a creature which is against all known laws of zoology. This beast is not striped like the ordinary tiger, but has a bluish fur resembling the color of coarse dungaree. During the month, a scientist reported, this specimen killed and ate 60 people. The same explorer, Doctor Caldwell, also discovered a badger as big as a bear, and also a sparrow, a very rare animal which is a cross between a goat and an antelope.

All these reports lend color to the theory held by many scientific men that in southern China there are many strange, primitive men and animals to be discovered. Life in this region today is supposed to be very like that in prehistoric times, and many "pre-

Singing Insects

The ancient Greeks kept cicadae in cages for the sake of their songs. They were favorites with most Greek poets. A cicada sitting on a harp was a most melodious music, in expectation of which there was a story of two rival musicians, Eunomus and Ariston, the former of whom broke a string of his harp one day when competing with the latter. A cicada, however, flew to his rescue and sitting upon the harp supplied the place of the broken string and so won him the victory. Fabre thinks the Greek cicadae would be crickets.

The Swamp

The swamp glowed like a turkey carpet. The cranberry vines and huckleberry bushes were pure crimson, the black alder berries scarlet, and the ferns burnt orange. Just beyond us, in the velvet of the swamp, was a pond, across which the wind rifled; living blue, with tawny rushes around it.—Rosalind Richards, in "A Northern Countryside."

HE NEGLECTED TO FOLLOW THROUGH

Important in Almost Any Pass in Basket Ball.

John Dobbin was a forward on the State Center (Iowa) high school team last year, and Dobbin's parents know it fully. His coach, H. C. Johnson, taught him the technique of the various passes, but one thing Dobbin had great difficulty learning. That was the fellow through—to pantomime movement of almost any pass, writes Mitchell J. Charnley, in the American Boy Magazine. The ball is passed from a regular stride. You hold it in your left, fingers pointing downward, grasping it along the side; your elbows are bent and out from the body. Deliver the ball with a snap of the wrist, giving it a natural underspin.

And then—follow through! Your fingers and arms follow through behind the ball, while the rear leg follows through in the next step. The fellow through helps you to give the ball direction, power, speed enough to send it parallel to the floor (not in an arch) until it reaches the receiver.

Another frequently used team pass, and a very fast one, is the push pass. You use this from any kind of position. Hold the ball chest high, your hands slightly behind the axis. Then, with a sudden forward push of arms and hands, shoot the ball away from, finally, following through arms and hands. Often, in scrimmage, this pass is almost a "must pass," for it can be executed very rapidly. It may have speed enough to travel parallel to the floor, like the overhand underhand pass.

The one-hand underhand pass isn't much used, because it's slow—requires readjustment of the hands after catching the ball. And the weakness that comes from above the shoulder should never be used. Don't try it.

If you have enough pass and the two-hand underhand, you'll be able to take care of practically all situations. But suppose you want to make a long pass—too long for one of the tense passes. Then you probably use the shoulder pass. This is a good deal like the catcher's throw to baseball. The ball is held shoulder high in one hand, and shot straight forward with an under-curish that makes it carry more

Motorcycle Pal of Young Enters Movies

William Hastings, pal of George Young on the long motorcycle trek from Toronto, Ont., to California, announced he had signed a film contract for a picture in which the seventeen-year-old winner of the $25,000 Santa Catalina channel swim will not appear.

The contract will put young Hastings a salaried actor at $300 a week with a 50 per cent interest in the profits of the film. The scenario is based on the adventures of the two boys on their way from Canada to southern California in order that Young might compete in the ocean marathon. Young is reported to have a contract for a similar film under consideration.

ORCHARD GLEANINGS

SPRING PRUNING OF BERRY BUSHES

The pruning of blackberries and raspberries at this time of year is most important, since it will affect the size and quality of the fruit produced this summer. It may be done satisfactorily any time from now until growth starts, says J. Harold Clark, instructor in pomology at the college of agriculture in New Brunswick, N. J. If the plants are carefully pruned, they will be more vigorous and although fewer fruits may be produced, the increase in size will be great enough so that there will be no decrease in total yield. Plants that are pruned annually will remain vigorous and productive much longer than unpruned ones. Pruning is also essential if the plantation is to be cultivated efficiently and the fruit picked economically.

Blackberries and raspberries have bloomed on canes which bear fruit the year after they are formed, and then die. The first pruning operation, therefore, will be to remove these dead canes, as well as weak canes which would bear very little fruit. It is recommended that the old canes be removed as soon as the crop is picked, but often it is not done then, owing to lack of time.

Canes of blackberries and black raspberries should be headed back to a height of 2 to 3 feet, and the laterals shortened to a length of 12 to 18 inches, depending upon the vigor of the individual plant. Summer pinching of canes when they reach the desired height is recommended, since it is desirable to have the fruiting area fairly close to the ground and on a stocky cane with several strong laterals, rather than one on a long untrained cane which is apt to lead to the ground under a heavy crop.

Red raspberries do not have these strong lateral branches and should be headed back to 2 or 3 feet, depending upon the apparent vigor of the plant.

Manure Benefits Heavy Soil in Fruit Orchard

Applied to orchards on a heavy soil, the benefits of manures are equally advantageous, or even more so than those on light soils. While the latter are made more compact, the reverse situation is true with the heavier soils. They become lighter and easier to work. The individual soil particles are kept from running together and thus there is less baking of the surface after a rain or irrigation. The larger the proportion of straw in the manure applied, the greater will be the extent to which this will be true. Combining the chemical and physical effects of manure in the soil, it would seem difficult to find a more suitable fertilizer for orchards. Unlike the mineral plant food elements which it contains are not so readily available for the plant's use, as is the case with some commercial fertilizers, it accomplishes the important purpose of adding the limiting element of most soils—humus, in some portions a much more satisfactory cover crop growth—further increasing the organic matter of the soil—is secured following the application of manures.

The rate of application usually depends upon the available supply. Generally speaking, there is no danger of putting on too much. Ten tons per acre, however, every two years is considered a very fair application, although rather that amount will do no harm. Apply in the fall or winter and plow under early the following spring in order that the process or decay may begin before there is a lack of moisture.

Profitable to Buy All Orchard Supplies Early

"The early bird catches the worm" is a saying as widely known as any in the English language. The truth of its application is now apparent.

There is considerable doubt in the minds of most fruit growers at the present time whether they are to make or worse. In fact, the general opinion seems to favor the latter view. It will pay the fruit grower well to buy his supplies early and through some organization that gets the lowest possible prices.

Think about your future requirements now. You may need arsenate of lead, lime sulfur, ammonium sulphate, nitrate of soda or many other supplies. Often big savings can be made by buying now before the peak demand is reached for these materials. It is not uncommon to get large discounts for early payment. Few farmers have all the money they need for working capital but many have borrowing power with their local bank and can thus take advantage of these discounts.

Crown Gall Pest

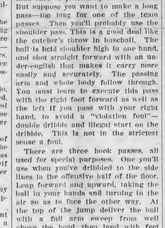
A nursery pest which is sometimes found on young trees is the crown gall. This is a bacterial disease which is harbored by rosiers or seedlings near the crown or at the point where the graft was made or by an immense number of fine hairlike roots growing from the same point. Trees infected with this disease should be burned.

The future growth and health of an orchard tree will average much higher if care is taken to exclude this pest at planting time.

Prevent Mouse Damage

One plan used by orchardists to prevent mouse damage is to rake grass and other rubbish away from the tree trunk for a radius of three feet. After this the ground is thin circle is tramped to make it difficult for the mice to burrow close to the trunk. Another method is to wrap the trees with a fine mesh wire, such as galvanized window screen, being sure to get the wire down into the soil an inch or two. Sometimes repellent washes are effective.

Mushes Own Dogs



Photograph shows Mrs. Edward B. Barker of Pollard Shores (Me.) hotel, with her dog leader, "Spot." Mrs. Bleeker owns and drives her team in all dogsled events.

Grimes Lauds McGraw

Burleigh Grimes, Brooklyn hurler, recently acquired by the New York Giants, expects a big season under John McGraw's leadership. "McGraw," said Grimes, "has sound baseball judgment and all he wants in a player to stay in shape and hustle all the time." Grimes has signed a contract with the Giants. He said it was the first time in his diamond career that he had ever signed such a document the day he received it. He did not divulge the terms.

Skim Milk Good for Farm Stock

Can Be Made Into Concentrated Product for Poultry and Hogs.

(Prepared by the United States Department of Agriculture.)

Surplus skim milk at creameries and city milk plants can be made into a concentrated product suitable for poultry and hog feeding, says the United States Department of Agriculture. Improved methods of souring and concentrating skim milk, developed by the bureau of dairy industry, make it possible to manufacture a product that will keep without spoiling, thus overcoming the chief difficulty experienced in the past in using skim milk in this way. The method is described in department circular 404 C, just issued and now ready for distribution.

Special Culture Used.

Concentrated skim milk must have an acidity high enough to keep it from spoiling. The ordinary lactic bacteria in milk do not produce sufficient acidity for this purpose. In the new method a special culture which develops a high acidity is used. By this method the inventors have been able to develop an acidity in concentrated skim milk of 6 per cent, which is sufficient to keep the product indefinitely without appreciable change.

Many concerns are now making poultry and hog feed from skim milk concentrated by these improved methods. The product usually sells from 3 cents a pound at the factory when sold in our lots to 4 cents in small packages. No difficulty has been experienced in disposing of large quantities, either to poultrymen and hog raisers in the vicinity of the plant or to jobbers who specialize in poultry feeds.

Estimate Cost of Production.

At an estimated production cost of 1½ cents per pound for the product, a price of 3 cents at the factory would net about 25 cents per hundred for skim milk, and at 4 cents the return would be about 58 cents. As a means of disposing of surplus skim milk this product has certain advantages, says the bureau of dairy industry. It is a staple product with an established market. It can be made at any season of the year and stored in supply a uniform demand, as it can be sold to jobbers whenever a sufficient quantity for shipment has accumulated.

Copies of the circular may be obtained, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Three Good Methods of Treating Oats for Smut

Three methods of treating seed oats for control of smuts have been suggested. In the formaldehyde treatment the grain is spread on a clean floor or canvas and sprinkled with a solution of **1 pint of formaldehyde to 40** gallons of water. The solution is applied at the rate of three-fourths of a gallon to each bushel as the grain is shoveled and then the pile covered with a blanket or canvas for two or three hours. After the seed has been spread to dry, it should be sown as soon as possible to avoid injury to germination.

In the dry method, 1 pint of formaldehyde is diluted in 10 gallons of water. This is enough for 50 bushels; only 1 pint per bushel is required and may be spread with a vapor sprayer, after which the grain is covered for two hours and then spread to dry.

The dust treatment, though more expensive, has an advantage inasmuch as the grain may be treated at any time before seeding, without impairing the germination. The dust is prepared by thoroughly mixing and pulverizing together 2 pounds of copper sulphate or blue stone, and dusted on, 3 ounces to each bushel of grain.

Hens Need Green Stuff During Severe Weather

Probably at least three out of every four flocks of hens are suffering from a shortage of green stuff during the green stuff. During the fall they were able to pick up green feed on the range. Sometimes this was not edible material but it supplied their need for food of this kind fairly well.

Sprouted oats are a better but usually the ones who feather most about his hens not only gets the most eggs, but also is least bothered with sickness. It is possible for a flock to get too much green feed, but this is not usually the case, as the most common fault is the other extreme. Too much sprouted oats or other green stuff will cause diarrhea. When such feeds are first given to hens the amount should be limited until they become used to them, the same as with any other new feed. Watching the droppings is a good method of telling whether you are feeding the correct amounts.

FARM NOTES

One of the best uses of waste land is for growing a farm wood lot.

* * *

Soy beans will grow on land too sour for clover or alfalfa, and make two or three tons to the acre of hay that is just about as good as either one.

* * *

Lime is a bulky product. The economical way to handle it is to haul direct from the car to the field. Extra handling means added expense.

* * *

Kill ants in the garden with carbon bisulphide. Thrust a

GOOD NEWS FOR FARMER

Scientists of Chicago University, according to press dispatches, are somewhat worried over what is going to become of the United States in the year 2000. One of them is quoted as saying that we will then have 325 millions for people in the country, packed like sardines. Water power is not being properly utilized, it is declared, soil is being wasted and sewage dumped into our rivers, forests destroyed and rivers of oil wasted.

All of which of course makes a pretty gloomy picture. Maybe our country will have that many people in 2000 and maybe it won't. A lot of things can happen in 74 years, and beside that, there are a lot of wide and open spaces in America. And the situation is not perhaps as serious as it looks. Necessity is generally the mother of invention, and it is likely that our scientists, including those at the Chicago University, will solve the problem set out above, as rapidly as they become acute.

But at any rate the scientist above quoted brings the first word of cheer to the farmer. When the country gets a poulation of over 300 million he is going to have to produce some real food to feed the hungry masses. Prices will go up and wages and in the middle west will sell for $300 an acre again.

There seems to be hope in the future, therefore, for the poor farmer. He can console himself with the knowledge the next 74 years are going to be the hardest.

FOREIGN GOODS MAY FLOOD THE MARKETS

Alien industry, armed with a deadly weapon of cheapness is already beginning to make serious inroads in the American market, despite our present tariff, according to Will H. Wood, in an interesting article on "Industrial Invasion; Shall we Repeal It?" Speaking of our tariff rates, Mr. Wood says:

"Our tariff rates are not what they seem because they are based upon valuations fixed abroad by foreign producer rather than upon the sale price of these imports at our ports. For instance, a thirty per cent ad valorem rate on a given article in European cost may mean only a six per cent tariff on the price at which it is bought by an American jobber from the importer, as against a difference in wage scales of from fifty to five hundred per cent. The American consumer reaps little or none of the benefit from the low purchase price of this commodity abroad. It is sold in the United States just enough below the price which must be charged by American industry paying the American wage scale, and American raw ma-

and No Place to Go!

We find ourselves, almost without realizing it, a nation on wheels.

We drive and ride in more than 22,000,000 motor vehicles.

We pack the paved highways coming in and out of town. We over-run so-called remote regions. And we are pounding to pieces all but permanent roads.

This year probably 3,000,000 new cars will be on the road. Compared to this increase, the mileage of new permanent roads will be insignificant.

We don't want to be a nation on wheels, with no place to go.

The answer is, build more, and where necessary, wider concrete roads and streets —and start building them now.

Not in a long time have general conditions been as favorable for such public works as permanent highway building.

terial prices, to take the market. As our importsincrease, our exports must to an increasing extent slow down. The large scale foreign production encouraged by American and foreign investment in low wage markets is more and more meeting the demands of foreign markets. Instead of our dumping surplus production abroad the alien producer is beginning to dump his surplus production here.

"Now what does this mean? The displacement of American by foreign production simply means the displacement of American by foreign employment. It means the stopping of American pay envelopes in favor of foreign pay envelopes. It means that we must shut up shop in industry or scale or wages, and therefore, our living standards, and therefore, our consumptive capacity, to the foreign level. This process has already started. What is the inevitable finish, unless this process is halted? Disaster. And such disaster as this country has never before dreamed of, despite our several past periods of industrial pafalysis due to this very condition of displacement of domestic by foreign production. Our present personal credit situation has developed on the basis of high wage scale production and steady employment. Halt this, and our prosperity will collapse like a house of cards. Prosperity is an endless chain which passes from consumer to producer and producer to consumer. Break one link in that chain and all the wheels cease turning. Create a condition in industrial America where the worker cannot meet the payments on his house, his motor car, his radio, and the other comforts and fluxuries known only in great quantity in the United States, and we will have an industrial, a political and social crisis more serious than has ever before been confronted in our country."

A Night Alarm

Gen. Sir James Willcocks, in his book, "Romance of Soldiering and Sport," records a startling experience while he was the guest of a native king in India, who invited him to a shoot. He was given a room to sleep in prior to starting at dawn the next day. "I went to bed, fortunately, under mosquito curtains; I say fortunately because an hour later I felt the curtains heaving about, and put my hand up against a horrid lump of cold stuff. Jumping out of bed, I ran outside with bare feet and shouted out. One of my boat's servants came and lit a light, when to my horror I saw two large pythons hanging from about above me, and actually swallowing the mosquito net. I forgot what I said, but the old man quietly remarked: 'Oh, these are quite friendly snakes; you can sleep without any fear.' I did not sleep any more that night; nor did he."

Their Philosophy

"In these days of short skirts we look back with amusement to the time of the crinoline and hoopskirt," philosophically said Professor Pate. "When hoops were in vogue one smiled at the remembrance of the crinoline and waterfall, just as today we find the recollection of the bustle being highly diverting. At any date, from the present back to the time of Godey's Ladies' Book, we can pick up a fashion publication of a few years before and enjoy a hearty laugh. And thus it will ever be; the correct thing of yesteryear is the laughing stock of today, just as the modes of the present will be either humorous or pathetic a few years hence."

"Yes," returned J. Fuller Gloom, the maiden hyena, "except in politics—the Hon. has always been a nuisance, and always will be."—Kansas City Star.

THE THEATRE

"The Man In The Saddle"—Hoot Gibson in the lead role of a western, is the opinion of no less an authority than B. M. Bower, the noted authoress of more than a score of western novels, the most versal recently with Gibson in the famous of which, "Chip of the Flying U," was produced by Universtring role.

Mrs. Bower, now living in Los Angeles, visited Universal City during the production of "The Man In The Saddle." Gibson's latest picture, which will be shown here at the Palace theatre, Wednesday, March 16th, and spent the day watching Gibson playing the breezy, humorous type of the role which has made him one of the most popular stars of the screen.

"Mr. Gibson is a genuine type of the adventurous young man of the real west in which I lived for so long," Mrs. Bower declared. "He is exactly the type which I have always attempted to get into my novels."

Mrs. Bower, while at the studio, signed a contract with Universal Pictures Corporation to write an original story especially for Gibson.

"The Man It The Saddle," another original story written especially for the star, is from the pen of Charles A. Logue, one of the most rominent writers of Hollywood, and was directed for the screen by Clifford Smith.

"Infatuation"—Egypt, land of Cleopatra and cigarettes—figures centrally in Corinne Griffith's latest starring picture, "Infatuation," which comes to the Palace theatre, Saturday and Sunday, March 12-13th.

As is usual with stories allocated in this strange land, the film fairly vibrates with all manner of mysterious and unforseen events. Yet it is said to be not strictly a mystery drama, but rather a drama laced with some of the spice of mystery.

"Infatuation" is an adaptation by First National of "Cesar's Wife," W. Somerset Maugham's stage success. The motif of the play concerns the forced flirtation of a neglected wife and her eventual reclamation by her husband.

Supporting Miss Griffith are Percy Marmont, Malcolm MacGregor, Hobart Olund, Leota Loraine, Mariba Martox, Claire DuBrey and Clarissa Selwynne.

ROAD BUILDING

ROAD PROBLEMS NEARLY ALL NEW

The modern highway problems are virtually all new, and being new, must be met with new solutions, Dr. George K. Burgess, director of the bureau of standards, said in an address to the highway research board, meeting recently in Washington. The Department of Commerce, of which the bureau of standards is a part, has just issued the following summary of Doctor Burgess' address:

Doctor Burgess called attention to the fact that modern highway problems have developed along with the motor vehicle and are therefore of comparatively recent origin. He pointed out that the solution of some of these problems must be sought in the future development of the vehicle, while others, and particularly those affecting highway construction, can be solved only through the use of improved materials and better construction methods.

Knowledge of what any structure must be called upon to stand is a prerequisite to satisfactory design, and it is here that the laboratory can be of the greatest assistance to the practical engineer.

Doctor Burgess outlined the research work of the bureau of standards of interest to highway engineers. This includes work on cement, concrete, and other highway building materials, tests of motor vehicles, engines and tires, assistance in the preparation of regulations governing devices for weighing motor trucks and for taxing vehicles, and a large amount of work in connection with safety appliances, such as brakes, headlights, signal lights and warnings.

OLD DOWER HOUSE HAS REAL CHARM

Handsome Colonial Home of the Lords Baltimore.

Relic of the early days of American colonization and preserving the architectural types of the pre-Revolutionary period, "Dower house," the colonial home of the Lords Baltimore, onetime great land owners and lords of what is now Maryland, is one of the few remaining historical old manor houses of that interesting historical period. Its stands beside the road to Rosaryville, some 25 miles from the national capital, and is owned by Percy David.

The hunting lodge, the first unit of the rambling old homestead, was built by the second Lord Baltimore in 1643 from plans made by Sir Christopher Wren of London, when he was but a fledgeling architect dreaming of the fame which attained to him. In his construction was used a peculiarly tinted blue brick imported from England, of which these seem to be the only remaining examples in use. In general effect the type was Dutch colonial, as it is known today, but unique in that it was composed of three stories.

Virtually all of the lower floor of the original structure was taken up by the dining and lounging rooms, the latter being a sort of combined lounging and library. A feature of the dining room was the huge fireplace, six by eight feet, in which it was customary not infrequently to barbecue an entire deer. The section at the right, with the porch, comprised a kitchen room with sleeping rooms on the upper floor. At the other end was the chapel and on the lower floor with Lord and Lady Baltimore's sleeping rooms above, and the servants' quarters in the rear. A super floor of the main center section.

Through the period of settlement in the Maryland and Virginia territories the second and third Lords Baltimore spent much time at "Dower house" in comfort and delight

Should Say Not

Said the old lady at the sea party, "I was sorry your friend kissed that girl over there in public. Did you ever?"

"Er—no," said the young man, nervously.

Not an Exception

Jerry—I want a divorce. My wife drives me crazy. She talks, talks, talks all day long.

Lawyer—What does she talk about?

Jerry—She doesn't say.

AT THE CONCERT

First Auditor—"As a singer I'm afraid she's gone." Second Ditto—"Don't think so—they're calling her back."

Period Furniture

"She says that some of her furniture goes back to Louis XIV."

"Maybe. It does, and a lot more goes back to the installment house if she doesn't soon pay up."

The ruling family of Abyssinia traces its ancestry direct to King Solomon and the queen of Sheba.

A Joint Bank Account

Grocer—My wife and I have a joint bank account. It saves a lot of trouble.

Traveling Salesman—How's that?

Grocer—All I have to do is to put the money in. She draws it out.

Preparing for the Ordeal

"Now my wife coming out of a necktie the store yesterday."

"What did you do?"

"Hurried into a drug store and bought some beard tonic."

THE STRONGEST LINK

Banker—"We are going to establish a chain of meat stores." Broker—"Sausage will be one of its strongest links, I suppose?"

At Dinner Time

Mae—I want to write a description of a pack of wolves. But where can I find a pack of wolves?

Tom—Come on over to my boarding house.

Houses as tall as five stories have been unearthed at Ostia, the harbor town of ancient Rome.

Chicago Clerk Approves Tanlac

Nervousness and Sour Stomach Following Diphtheria Ravaged Health.

"After a siege of diphtheria I was in such bad shape, so weak and run-down, that I thought I would never regain health," says Miss Viola Powell, 124 E. 20th St., Chicago.

"Food that I ate soured on my stomach. I could not expect myself without suffering from headaches and dizziness, was so nervous that nights were just hours of thinking, restless turning and tossing. I never felt rested.

"Tanlac cleansed my system, gave me an appetite for food, relieved my stomach trouble and soothed my nerves. It has put me in the best of health and I enjoy life, both work and recreation."

Tanlac builds up nerve-weak bodies, drives out causes of suffering and gives the body good health. Made from roots, barks and herbs. Take wonderful Tanlac. At your druggist's. Over 40 million bottles sold.

THE KITCHEN CABINET

©by the Wheeler Syndicate, Inc.

The men of the past overcame because they had convictions. We of the present frequently fail because we have nothing but opinions.

CHOICE FOODS

The following dishes never lose their prestige, as they are choice and deserve their popularity:

Bavarian Cream—Soak two tablespoonfuls of gelatin in one-third of a cupful of cold water, dissolve in one-fourth cupful of hot cream; add one-half cupful of sugar and the whip from a pint of cream, when the mixture begins to thicken. Cut and fold in the cream without stirring. Flavor with vanilla and mold.

Nesselrode Pudding—Cook twenty large chestnuts, or double the quantity of the small ones in sugar syrup until tender. Cut six of the nuts into small pieces, the rest put through a sieve. Cook two tablespoonfuls each of currants and salmon raisins in the same sirup until tender, then add the same amount of preserved pineapple, cherries, plums or other fruit to the pieces of chestnut and let them cool in the sirup. Cook the beaten yolks of four eggs, mixed with three-fourths of a cupful of sugar and a pint of thin cream. Cook until the mixture coats the spoon. Add the sifted chestnuts and pass the whole through a fine sieve. Cool and partly freeze, then add a cupful of whipped cream and finish freezing. Add the fruit and nuts drained from the sirup and pack in a mold. Press the cover in place over a piece of wrapping paper and let stand in ice and salt for an hour. Serve with whipped cream, sweetened with the sirup or fruit juices.

Virginia Spiced Ham.—A two-inch slice of ham is needed for this; rub with a teaspoonful of mustard and two tablespoonfuls of brown sugar. Place in a baking pan, pour over one-half cupful of water with a tablespoonful of vinegar, cover and bake for twenty minutes.

Egg Fuyon.—Fry one onion and one cupful of celery in a tablespoonful of butter or oil until tender. Beat five eggs, add with three-fourths of a cupful of chicken or tuna fish, and to the vegetables with one tablespoonful of Chinese mince. Cook until the eggs are set. Make nests of hot boiled rice well seasoned, and serve with the fuyon.

Layer cakes, rich and luscious, small cakes of various kinds, or sponge cakes baked in pan pans and cut open, the inside crumbs removed and filled with whipped cream, are all well liked. The rolled jelly cake is another favorite with a cup of tea. Cake with a dish of fruit, canned or fresh, a cup of tea, cocoa or coffee, will be a good finish to the light supper.

Seasonable Sandwiches.

There is no season for sandwiches, for they are always in season, but an

certain times of the year we like certain types of sandwiches.

Sandwiches—Cut white bread in slices one-fourth of an inch in thickness, trim off the crusts and spread half the slices with butter and the remaining half with mayonnaise dressing. Chop two dozen or more queen olives very fine, add half their measure of cream nut meats; moisten with mayonnaise and spread generously. Put together in pairs, press edges together and cut in triangles. Garnish with tiny pipes cut from green peppers.

Eggs a la Mexicaine Sandwiches—Chop fine six hard-cooked eggs. Melt one-half cupful of butter, add the eggs and one tablespoonful of French mustard, two tablespoonfuls of vinegar, one tablespoonful each of finely chopped tarragon leaves, chervil, parsley and chives. Toss all lightly together, season with salt and black pepper. Mix thoroughly and spread while hot between slices of bread delicately toasted and well buttered. Serve hot.

Kiddies' Birthday Sandwiches—Cut white bread into thin slices, shape with a rectangular cookie cutter with scalloped edge. Spread generously with pimento butter. Cover with a piece of the same size but from which small pieces have been removed with small fancy vegetable cutters. Pimento butter is prepared with creamed butter and pimentoes, put through a sieve.

Lenten Sandwiches.—Chop hard-cooked egg and peanut to a paste with anchovies, allowing two anchovies to each egg. Season with salt, pepper, a dash of cayenne, moisten with salad dressing and spread alternate slices with the egg mixture and mayonnaise. Pairs of the crusts, press together in pairs and cut into narrow strips. Serve with a dinner salad.

Alchevy, Fish and Eggs Sandwiches.—Take one cupful of finely minced boiled fish, add two finely chopped hard cooked eggs, one-half dozen anchovies skinned and finely chopped, one-half of a medium sized cooked beet, chopped. Season well with salt and pepper. Serve as filling for white bread sandwiches with mayonnaise and sprinkled with sprays of chicory or watercress. Garnish with sliced olives, and pearl onions arranged around the sliced olives.

Pleasant Interview

It would have been a pleasure to interview Adam. "He couldn't boast that he began life as a poor boy."—New York Telegram.

COATS OF NOVELTY WORSTEDS; SPRING HATS FEATURE CROWNS

Still black and white vogue is "carrying on" at a fast and furious rate for spring. Especially is this true in the realm of sports coats, where startling black and white plaids are considered one of the smartest items for the coming season.

Choose a model such as the one in this picture and you will be credited as being clothed most fashionably. The basket weave plaided worsted which contrasts flank with white, selected as the medium for this swagger coat emphasizes the trend toward

Vogue Is for Black and White.

extreme novelty and startling effect. Most of the spring sports coats are for collared. Natural lynx, collurs this time.

The latest coats are noted for their unusual pockets. In the instance of the smart spring mode here pictured, the looping of a wide strap of the fabric from beneath a large button centered in the pocket imparts to it an unmistakable style touch.

Black and white plaids with stripings of brilliant red, green and yellow vapors are the "last word" in clothings for sportswear.

Popular coats also contain black and white combinations, but in a different manner from sports models. That is, they achieve the contrast of black and white in the triumphing rather than in the weave itself. Of such are the patrician looking slim black suede models which are collared with white calfskin. Satin, moire and dat crepe are strongly advocated for the black

Showing Variety in Crowns.

coat for spring, for the style message from across seas places especial emphasis on the silk coat for the coming months. These are variously detailed with white ermine or baby fox and the combining of monkey fur with ermine is an effective new touch.

Black cloth or silk coats with white embroidery are attracting much interest. These are timely for lunedale wear. Later the white coat quilted or hand embroidered in black will make its appearance.

To the crowns of our chapeaux do we pay homage these days, for apparently they are "doing the honors" in conveying the spring millinery style message. Especially do crowns have everything to do with the smartness of the new felts. Such acrobatic feats as these tall crowns do perform—they turn, they twist, they double over, and when all is said and done, they come forth in handsome form. In the manipulation of the fashionable crown, not a trick does the milliner miss in the way of latest "wrinkles," creases, folds and other details which tend to mold into becomingness.

The choice of the Parisienne for the practical hat for immediate wear still rests on felt, and it includes every version from the youthful skull cap types to the imposing tall-crowned effects which are so eminently suited to the matron. As the French milliners see it, the style is all in the felt itself and its manipulation. It needs little or no trimming—a mouish touch of gaucrelle ribbon, a sparkling ornament to distinguish it, or that which is intent of all, a novel fur feather motif.

There is also an inclination manifest to give a springlike aspect to the felt hat with a cluster of flowers cunningly posed either low on the left brim or conspicuously high on the crown. The vogue is especially for violets, either white or purple. Sometimes there is a violet-colored scarf to match.

From the standpoint of draped crowns which spell extreme chic, the hats herewith pictured are fra ight with interest.

An outstanding feature of the first model in this group is that the soft liner makes part of the hat of fait

pleecgoods, using a felt hood for the gently bestirred crown. The brim of the hat of lupessira crown, shown in the two to the right, rolls up at one side, which is a most stylish thing for it to do. The fact that it is velvet-faced, and that the full tabs are stitched row-and-row adds to its "Frenchiness." The crown of the center hat expresses the "last word" of the mode. In the hat pictured below to the left we see a happy combination of style details, such as the beret suggestion for the crown, its multitudinous creases and especially its ribbon trim. The last model in the group is noteworthy in that it reveals the trend toward the cloche silhouette.

Sentimental Moods

Fashion seems to be in a sentimental mood at the moment. One of the new English shades is called "love bird green" while another attractively named color is "tilde blue." A remainder of the Victorian times is a shade known as "forget-me-not."

Vogue of Separate Coat

Despite the still great popularity of the ensemble, the separate coat is very much in vogue at present, especially for more formal occasions.

Shoes Are Smart and Simple

The smartest shoes at the moment are those modeled on the simplest lines. A new one-strap pump that is almost classic in its simplicity has an unobtrusive but beautiful ornament at each side of the strap. It comes in black and brown suede and black patent leather.

Woolen Scarfs

Large squares of the softest wool in striking plaided designs add a touch of color to the sports costume.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

Frederick the Great

ANTIMATPY-boy, imprisoned and in danger of death, was one day forced by his father to stand at the grated window of his cell and watch his dearest friend executed. This boy was Prince Frederick of Prussia, later known as Frederick II, or Frederick the Great. He had a sadder, more unfortunate boyhood than did any beggar in his kingdom. His father, Frederick William, was a stern, harsh king, and a harsher parent. He was military-mad and would allow his young son Frederick to study nothing but the art of war. The boy loved poetry, music and science.

It was, in a measure, the old story of Peter the Great and Alexis over again." And it almost had the same terrible climax. For, at last, wearied by his father's abuse and cruelty, and resentful of the injustice to which he was subjected, Frederick made up his mind to run away from the life he hated and to take refuge with his mother's brother, King George I of England, his most intimate friend, Lieutenant Katt, helped him escape from Berlin; but their flight was discovered and they were caught and brought back. Then came such punishment as few fathers could have decreed.

Frederick was sent to prison and Katt was put to death directly under the prince's cell. King Frederick William then demanded that Frederick renounce all rights to the throne. This the prisoner plainly refused to do. The king in a rage declared he would put Frederick to death, and was with difficulty dissuaded from the plan. He contented himself with exiling his son from court; and, in 1730, when Frederick was but twenty-one, forced him to marry a princess for whom the young bridegroom had not the slightest liking. The succeeding years after that Frederick lived in semi-seclusion on one of his estates, only returning to public life when, on the death of his father, in 1740, he came to the throne of Prussia.

During the forty-six years of his reign Frederick well earned his title of "The Great." He found Prussia a secondary German state with a population of barely 2,240,000. He left it rich in new possessions, territory and power and with a population of 6,000,000.

The fair principalities of Silesia, according to Frederick's claims, ought to belong to Prussia. So, the same year he became king, he set out to acquire them. A two years' war followed, in which Frederick's hardly acquired military education stood him in good stead. For he was victorious, and Silesia was annexed to Prussia. Frederick ruled his new possessions well and with firmness; and, although a Protestant, allowed religious freedom to Silesian Catholics. Knowing the unsettled condition of Europe and having fresh conquests in view, the victor now devoted himself to building up the strength of his armies; and, in 1743, he annexed East-Friesland to his kingdom.

Austria, so Frederick believed, had designs on Silesia; so he formed an alliance with France and other countries and (to keep Austria's mind on matters of defense rather than aggression) invaded Bohemia in 1744. But the Austrians and Saxons combined and repelled the invasion. The campaign dragged on with varying fortunes until a peace treaty was signed by whose terms Frederick still held Silesia, and received $1,000,000 war indemnity.

Eleven years of peace followed, which were spent by Frederick in strengthening Prussia at home and abroad, in promoting arts and industries and in raising his army to 160,000 men. This peace period was broken by a rumor that Russia, Austria and Saxony were combining against Prussia. Fearing lest he might lose his cherished province of Silesia, Frederick forestalled the allies' action by invading Saxony. This started a seven years' war in which Frederick was little except a military organizing and executive genius of high and decisive power in European politics. When peace was declared he had his very private fortune in repairing the ravages made by war.

In the same year he concluded a treaty with Russia and was active in the first partition of Poland. By the terms of this division he acquired all of Polish Prussia and part of Great Poland to the north. Henceforth Frederick's kingdom was divided into West and East Prussia.

The crowning act of Frederick's statecraft, and one that stirred the political system of the whole continent for well as morning Prussia's first open attempt to lead all the German states), was the forming, in 1785, of the "Furstenbund" (league of Princes) of the German kingdoms and principalities into a solid federation; this beginning what, in 1870, his successors completed.

In 1786 Frederick the Great died, leaving his nephew, who succeeded him, a kingdom his genius had increased in area by 23,000 square miles, a population increased by 2,000,000, a treasury containing over $70,000,000 (the richest in Europe), an army of 200,000 and boundless credit with every other nation.

Thus, in his seventy-fourth year, perished the greatest of German monarchs, a man whose father had thought him a fool and unfit to reign.

The Necessary Stroke

A bumptious young member of a London golf club was discussing some of his fellows with the professional. "There's Jones, for instance," remarked the conceited golfer. "I think his play is very much overrated. I reckon I could give him a stroke and beat him."

"Ay," agreed the pro, who hailed from the North; "quite true, sir; but th'm thinkin' it would need to be a paralytic stroke."—From the Boston Transcript.

Buy Your Seeds at the "SIGN OF GOOD CROPS"

Genuine "Pine Tree" Brand Farm Seeds—Clover, *Alfalfa*, Alsike, Timothy—are sold by the dealer who displays the orange and green "Sign of Good Crops."

There's a "Pine Tree" dealer near you. He handles "Pine Tree" brand seeds because they are re-cleaned, reliable, of known origin—safe for you to sow.

It will pay you to talk with him before you buy your seed this Spring.

Watch your favorite farm magazine for an interesting series of "Pine Tree" advertisements showing how re-cleaned seeds are produced.

The A. H. Dickinson Seed Co., Chicago

Kept Old Bell Ringing

Every night for more than 700 years, bells of the church in the village of Hadleigh, England, have proclaimed the curfew hour, but the bell ringer was almost broken recently through a strike of bellringers. A woman organist saved the situation by taking it upon herself to ring the bells for several weeks until the difference over the bellringers' wages could be adjusted.

One of the bells in the church tower has been used since 1198 and the church register dates back to 1538.

Makes Sure of Food

A London restaurant has accepted the offer of a forty-pound man to supply him with two meals a day for the rest of his life for £300 ($2,520). Though the tables of mortality show that the expectation of life at that age is twenty-seven years, which would make his food cost about £85 a year or about $7.25 a meal.

Guncotton From Garbage

Dr. Ernst Berl, engineer of Berlin, Germany, has developed a process of manufacturing guncotton or artificial silk from the garbage of great cities. It is done, he says, by sifting and subjecting all the refuse to ingredients to a special treatment. By distilling the remaining refuse, such as potato peelings and pieces of wood, he claims to produce tar, charcoal and acetic acid.

—Ancient astronomers named the stars and constellations, but the clouds were first named and classified by an Englishman in 1803.

Some prestige is established if one has a butler or even if he can't run it.

LOSE FIGHT FOR VET'S INSURANCE

One Wife Is Declared Divorced and Other Not Legally Wed.

Chicago—Two wives—one divorced and the other never legally wed—a gray-haired father and an "Enoch Arden" who never returned were the central figures in a drama that grew out of the World war and came to an end in the courtroom of Federal Judge James H. Wilkerson when a jury decided that the aged father was entitled to the $10,000 life insurance of Maj. Mark W. Hanna, Jr., who died as he charged a machine gun nest in France an hour or two before the armistice ended hostilities.

The finding of the jury, not only designated the father, Thomas M. Hanna of Iowa, as the rightful heir, but it brought two other matters to a decision by declaring that Mrs. Hollie Schroeder of San Antonio, Tex., the divorced wife, was the legal mate of Hanna at the time of his death, and that Mrs. Corinne Hanna of Kansas City, who married him just before he went to France and drew his insurance until the government stopped it, was never legally married to him, because the previous marriage was still in force.

Involved Veteran's Rights.

The drama is one of the strangest that has come out of the war and the first of its kind that has gone to the Federal court for decision. The finding in it was awaited with particular interest, not only because it would set a precedent, but because it involved the rights of the veterans' bureau to pass upon the morals and personal liberties of beneficiaries under a war risk insurance policy.

The reason the government originally stopped the insurance payments to Mrs. Corinne Hanna, after paying her nearly $2,000, was that she was friendly with Joe Wagner, a Kansas City gang leader now serving 15 years in the Iowa penitentiary for bank robbery, and was therefore not entitled to government money. On this point the jury found her not entitled.

Divorced and Married Again.

The facts, as brought out in court, were that Mark W. Hanna married Mrs. Hallie Schroeder in San Antonio in 1915, then separated from her with a month and later entered the army. Mrs. Schroeder lost track of him, she said, and did not know he was dead when she obtained a divorce in 1919. Then she wrote her letter to the mother of his son's wife, Mrs. Nellie Young of Santa Ana. The letter to his wife was not made public; that to Mrs. Young gave directions for his burial and for notification of relatives, including the son, C. W. Houghtaling, a San Francisco architect.

Whale, Stranded, Dies on New England Coast

Boston.— A 45-foot whale, the first to come ashore along the New Hampshire coast in more than 20 years, was marooned high and dry recently on the rocks of the northern point of Great Boar's Head. When he was seen he was alive, but, presumably suffering from a complication of draughts and exposure, he died.

Just plain hard luck, apparently, he set this monstrous mammal. In the first place, he must have lost his bearings, for he was straying far from his usual haunts of his kind. A whale who can't find his way around in the ocean might just as well quit before any other trouble begins.

This fellow probably was floating, maybe sound asleep, out somewhere on the briny.

The first thing this whale knew he was in the breakers. Being heavy, for his estimated weight is somewhere between 15 and 20 tons, he couldn't get out to sea again.

Then the tide in the usual manner, but our whale was stranded high up on the harsh rocks. He thrashed ponderous tail about and strove mightily to regain his accustomed element, sure, all in vain.

Considerate Man Kills Self at Undertaker's

Orange, Calif.—Never during his life did E. S. Houghtaling, seventy-eight years of age, willfully make any trouble for anybody else. He shrank from causing inconvenience. It was his ruling passion.

Houghtaling held to this principle in his last act on earth, it was testified at a coroner's inquest at the Gillogly undertaking rooms.

Witnesses swore Houghtaling went to the door of the mortuary the other night and rang the bell and that when he heard the rattle of the doorknob in response to his summons he took the sound for a signal to press the trigger of a revolver which he held to his temple. He fell dead into the undertaker's arms.

Two notes were found in his clothing, one addressed to his wife, Mrs. Sarah Houghtaling, the other to the mother of his son's wife, Mrs. Nellie Young of Santa Ana. The letter to his wife was not made public; that to Mrs. Young gave directions for his burial and for notification of relatives, including the son, C. W. Houghtaling, a San Francisco architect.

Ex-Servant Turns Joke Back on Queen Mary

London.—Queen Mary enjoys a joke equally as well as the king.

Returning from Scotland, the queen has been telling friends of visits with some of the retired royal servants whom she has known for years.

In one cottage the queen asked a grandmother about Victoria Mary, age twenty, and was assured the girl was still at home.

"And is there no word of a young husband?" anxiously inquired the queen.

"It ha' heard o' name, your majesty," the "granny" replied, and then, as an afterthought, she asked:

"And, your majesty, is ther' ony word o' a wife for the prince of Wales?"

"Granny's" neighbors say the queen's reply was a negative choke of her head and a broad smile as she walked away.

TRAGEDY FOLLOWED OWNERS OF GREAT CONDE DIAMOND

Recent Theft Recalls Dramatic History of Jewel Owned by French Royalty.

Paris.—Tragedies and misfortunes have befallen the possessors of the "Grand Conde" diamond for many years. They have given added and impressive strength to the widespread belief that no evil influence lurks in the fascinating rays of the gem. And now the "Grand Conde" diamond has been stolen.

About an inch long and half an inch wide, weighing 50 karats, the diamond has been valued at $2,000,000. While there are several larger stones among the famous diamonds of the world there is no more perfect example of a pink diamond in existence.

The audacious theft of the stone from the Chateau de Chantilly, in France, is the latest dramatic event in the history of a jewel that has been followed by unparalleled misfortune.

The diamond received its name of the "Grand Conde" because it was first possessed by the prince of Conde, a member of one of the most illustrious branches of the Bourbon family, the royal family of France.

Exile, suicide, fatal accidents, and death at the hands of enemies has been the lot of those who have possessed the gem. The last private owner of the chateau was the duke of Aumale, son of King Louis Philippe, the martyred President was shot, has been used to store old records of the military general's department, but is considered suitable no longer. For many years after the tragedy it remained unoccupied.

"OLD HEZ" COAXES FISH WITH VERSE

Beguiles Finny Tribe With Talk and Rhyme.

Arkansas City, Ark.—Old Hez says he has never quilled a bass from a stream with half the thrill he has when he trails flint spalls along the bank of Flint creek, north of an old Indian camp and there digs up arrowheads, axes, spearheads and mauls used by America's early settlers.

Who Is Old Hez?

He's an authority on both bass and Indian relics—B. F. Lloyd of Arkansas City, Kans., former newspaper man, printer and painter by trade, fly fisherman by profession, with an insatiable hobby for collecting Indian relics.

Among fly fishermen Mr. Lloyd is known as Old Hez, a dean of bass fishermen in this part of the country. Up and down the streams of Kansas, Arkansas, Missouri, Oklahoma, Illinois and Indiana Old Hez with his fishing equipment is a familiar figure. He has taught scores of young men how to trick wary bass from their lairs; he has caught fish both big and small the winter and summer.

Beguiles Them With Verse.

Talk to 'em, Conx 'em along a little," is the advice of Old Hez on catching fish. "I know their language, and when I step into the stream I begin talking to my fish. All the while I'm pulling him in I'm talking to him, sometimes even in rhymes."

Here's the conversational part of Mr. Lloyd's well-known bass poem, "Song of the Wild," with which he beguiles his fish, with a "Come on, grandpa, come on, and quit your foolin'," thrown in for a refrain:

Good morning, grandpa, good morning—
Hey there! Not so well, did you say?
Why, certainly, if your stomach's out of order,
Take a cathartic. I assure, 't will allay.

Come out from the brush where the willow is leaning,
Out in the open, away from your lair
And measure your wits with me, I dare,
For this is Old Hez. Old Hez of Adair.

Now he turns from the old log den,
As he lunges for freedom on high.
Down he goes and makes for the moss
Index—then
Is stopped in the twink of an eye.

When the bass is finally outwitted, Old Hez always says: "I thank you, Mr. Lloyd has been a fishing since he was a youngster and he's sixty-six years old now. In his words he's the youngest old man that ever followed a stream." He comes by his fishing skill naturally, for he is the son of a well-known fly fisherman, the late Capt. R. W. Lloyd, of the Eighty-third Indiana infantry, in the Civil war.

Much as he loves fishing, however, it's not of his angling exploits that "old Hez" talks of by the hour now, but of flint and rocks, Indian arrowheads and tomahawks. It's not his fishing rod that he carries out on most of his trips to the river now but a pointed cane with which to brush leaves aside and dig into the earth.

Keen on Indian Relics.

Down by the river he goes—the Walnut river, that flows through the flint hills of Kansas—hit not to cast bait to hungry fish. Sometimes he walks miles, sometimes he sits by the hour staring at the ground in all directions before he digs his way into an old cave in the rocks. When he returns it is not with the usual string of fish, but with a hatful of flint or scalloped axe or agate made by Indians before the white man came.

For "Old Hez" has developed a passion for collecting Indian relics and he boasts that his collection of 1,200 pieces is one of the finest in this part of the country and that he has found some of the rarest specimens of Indian implements in existence.

Almost two sides of his bedroom are hung with cardboard plaques on which arrowheads, spearheads, tomahawks, axes and other things are strung with paper wire. On the floor are piled bowler pieces, such as mauls, corn bowls, tanners and pestles.

The pride of all his possessions is a 7-pound fire bowl, the like of which Mr. Lloyd says he has not found in any Indian collection outside his own.

Sheep to Be Raised on Deserted Island

Onancock, Va.—Watts Island, in Tangier sound, deserted some years ago because the erosion caused by tides was making it unsafe for human habitation, is coming into its own again. Once a prosperous community of fishermen and truckmen growing vegetables for Baltimore markets, it degenerated into a wilderness of brambles. Then the tides cut in on the highlands until it was bisected. Since then the islands have been known as Big Watts and Little Watts.

One man feels the tides will not wipe out the island. Charles Harden, burg of Jersey City has taken up a farm on Little Watts in the deserted lighthouse and has gone into the raising of sheep on the big island. The island contains 220 acres of fertile land and it is the intention of Mr. Hardenburg to stock it with high-grade sheep. The work has begun.

Leading Sport

Riga, N. Y.—Wild dog hunting is the leading sport here. Several packs of wild dogs have wandered through the countryside, attacking domestic animals and even chasing people.

Building Used by Booth in Lincoln Tragedy Sold

Washington.—The small red brick building where John Wilkes Booth stabled the horse on which he escaped from Washington after he assassinated Abraham Lincoln on the night of April 14, 1865, has been sold by the War department for $4,500. It was purchased at public auction by Jeremiah O'Connor, owner of the adjoining property. The building, in the alley back of Ford's theater, where the martyred President was shot, has been used to store old records of the military general's department, but is considered suitable no longer. For many years after the tragedy it remained unoccupied.

"GOOD ROADS"

VIRGINIA'S GOOD ROADS PROGRAM

For the last decade the state of Virginia has been paying the penalty of bad roads. Throughout the country she has earned the name of being backward. Rigid sections, because of poor transportation facilities, have been slow to develop. Land values have been checked in their natural tendency to increase, says the Washington Post. Tourists have been warned away from some of the most attractive areas on the eastern seaboard, and what should be a resort business bringing millions of dollars into the state never has had a chance to get started.

Far-seeing citizens of the Old Dominion have been awake to the situations and from time to time attempts have been made to start the good roads movement. Five years ago, for instance, a road-building bond issue was floated before the people. It was badly beaten. Later, however, a tax of three cents was imposed upon every gallon of gasoline sold, the proceeds of which were to be used for road building and maintenance. Other funds for this purpose were and are obtained from automobile title fees, license fees, personal property taxes and, of course, federal aid.

Now it is announced from Richmond that a five-year road-building program to cost $50,000,000 will be undertaken immediately. So sorry is the consumption of gasoline that the "gas-tax" will pay for the good roads program without placing an additional penny of debt upon the state. Governor Byrd, it may be remembered, was elected on a platform containing a pledge that his party would promote the road-building program. This intangible evidence that campaign promises are to be fulfilled.

The Virginia authorities have announced that first efforts will be put forth to complete the north-and-south highway to the North Carolina line. As has been pointed out, Washington and Richmond, is completed or will be shortly. The line highway from Washington to the Shenandoah National park will be pushed.

The highways of the nation have become capital resources. The state without good paved roads is severely handicapped in its relations with the rest of the Union. Unfortunately the building of good roads presents a real problem as affecting his personal interests. The benefits following this development will come in every section of the state, besides increasing the revenues of the state itself.

Each Citizen of Nevada Invests $130 in Roads

Every man, woman and child in Nevada has an investment of $130 in the highways of the state, according to the figures recently compiled by the state highway department.

These figures are based on the cost of construction since the department was organized in 1919, to January 1, 1926, and represents a per capita investment of $80 in the state highway system, under federal aid, and an additional $50 in county and state highways constructed without aid from the government.

The United States government has also contributed $4,000 to the state's construction in Nevada, which is in addition to the per capita cost outlined above.

Senators for some of the eastern states have objected to the federal government participating in construction roads in the Far West. One eastern state show a per capita investment in highways approaching the record made by Nevada?

And while discussing the financing of highways in Nevada, don't forget that your Uncle Sam still owns more than 90 per cent of the area of that state.

Grade Crossing Rules Protect All Motorists

There isn't a dangerous grade or railroad crossing in the United States if crossed with proper care, according to an estimate opinion reaching the public safety department of the Automobile Club of Southern California.

The authority for the statement gives the following recipe to motorists as the method of taking the danger out of grade crossings:

Always make sure your car is in order; never drive over 30 miles an hour; never pass a crossing until you know the way is clear; don't drive in the mud or on slippery roads or pavements; always give the speed maniacs the right of way.

"Of course, the maniacs make you mad, but better be mad than dead," he says.

Use Calcium Chloride

The Minnesota highway department has begun treating the more heavily traveled trunk highways with calcium chloride, oil, or tar. The main purpose of this treatment is to save the road surface and save maintenance expense. Incidentally the treatment lays the dust, and by many motorists this feature is appreciated more than the benefit to the road surface. Houses built near the roads are also benefited, as the dust during the dry season is kept down.

Traced to Greenbacks

That money was the name given to irredeemable paper currency during the Greenback agitation after the Civil war from the claim of the Greenback party that the fiat of the government could give value to a circulating medium.

Greatest of All

All the scholastic scaffolding falls, as a ruined edifice, before one single word—faith.—Napoleon I.

You Say It

If a Hottentot tot taught a Hottentot tot to talk ere the tot could totter, ought the Hottentot tot be taught to say aught or naught, or what ought to be taught her?

Standard Highways Signs on Roads in 22 States

Progress in erecting standard markers and other road signs in twenty-two states has just been reported by the Department of Agriculture. The full text of the announcement follows:

Standard markers and directional, information, danger and caution signs were put up at all or nearly all of the roads in the United States highways system in twenty-two states on November 1. These states were Arizona, Colorado, Florida, Georgia, Idaho, Indiana, Iowa, Kansas, Massachusetts, Minnesota, Missouri, Nebraska, Nevada, Ohio, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Vermont, Wisconsin and Wyoming. In ten other states the installation of the signs were partly completed on the date—Arkansas, Connecticut, Kentucky, Maryland, Montana, New Hampshire, New Mexico, North Carolina, North Dakota, South Carolina and West Virginia. The other eleven states started marking had not been begun at that time.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a mortgage executed by Empire Stiles and Addie Stiles, his wife, of Charlevoix, Michigan, unto James F. McGeagh, of Charlevoix, Michigan, dated January 23rd, 1923, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January 1924, in liber 92 of mortgages on page 457, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by mortgage, dated September 8th, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 30th, 1925, in liber 93 of mortgages on page 350, which mortgage was afterward sold, assigned and transferred by the assignee, Benjamin Brown, unto Martin Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1925, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand Thirty-Two and 82-100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgage, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required to be stipulated for in said mortgage were duly paid prior to the recording thereof, therefore, notice is hereby given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for in said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 16th day of April, 1927, at eleven o'clock in the forenoon of that day.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section twenty-eight in township thirty-three North Range eight west, as per United States survey plat thereof and containing forty acres, more or less

Dated January 16, 1927.

MARTIN BLOCK,
Lisle Shanahan,
Attorney for Assignee of Mortgagee.
Business Address: Charlevoix, Michigan
108 Clinton Street. 39-13c

NOTICE OF
MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described by the non-payment of the three annual instalments of forty-eight and 75-100 ($48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen and 50-100 ($116.50) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy and 75-100 ($270.75) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1923, in Liber 62 of mortgages on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and attorney's attorney fee, sold at public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E½NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof; Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 ($1442.97) Dollars, and accrued interest thereon.

LOST FORTUNES LYING IN BANKS

Owners and Heirs Are Difficult to Find.

New York.—A neat fortune in unclaimed savings lies in the vaults of New York banks awaiting trace of depositors.

The pennies of "floaters" the world over, from diverging sources and in varying amounts, add to the total which, in one bank alone, has climbed to six figures.

Hundreds of depositors have visited banks never to return. They have left their accounts and gone, probably to death, without leaving a record of their movements.

Owners and heirs to this fortune are hard to find, says Herbert K. Twitchell, president of the Seamen's Bank for Savings, which, in 100 years of business, has 2,536 dormant accounts totaling $2,085,057. The trust, however, is a never-ending one and through a department, instituted for the purpose, constant search is made and every possibility of a claimant exhausted.

The Seamen's bank is one of many which have similar accounts whose depositors have not been heard of in 20 years or more. After this lapse the accounts become "legally dormant," interest no longer is paid and the banks have use of the money, but only for individual gain.

Up the winding Bowery, in the twilight of the elevated, wander ageless thieves, men of bearded styles, lurkless foreign women, pale, old-faced children. Such is the clientele of the Bowery Savings bank where the dormant accounts total $100,000.

Once in three months, said a bank official, was Mary Killin, a quaint old crone-woman, seventy years old. She had forgotten scads of her account and was found to have $12,000 deposited with the bank under four different names.

Snapshots of Cruiser Emden Stir Germans

Wilhelmshaven, Germany.—There was excitement among members of the German navy when the former Emden departed on a world tour. For sailors on board a British tank ship were observed to be photographing the German naval vessel as she steamed out of port.

Wild rumors began to circulation on this harbor, describing the network of a big English espionage system.

But these stirring stories were quickly dissipated by the Frankfurter Zeitung, which wrote: "Nowadays there are few jobs for foreign spies. The point of the Emden are known to members of the interalled military control commission better than they are to the builders in Wilhelmshaven."

Dentist Cheaper

Moscow, U. S. S. R.—American toothpaste costs dearly in Russia. Six tubes to be mailed to an American newspaper man here were held up at the soviet post office for minute examination and then the correspondent was assessed a duty of $11 a tube.

Easy Grace

A democratic manner is that easy nonchalance with which a fifty-trunk personage rhakes the hand of the one-trunk citizen. .

Longest Telephone Lines

The second longest trunk telephone line in the world was recently opened by the Australian postal department for public traffic between Perth, in the west north of Australia, and Melbourne, capital of Victoria, a southern state. The line runs almost the entire length of the continent. It is 2,017 miles long, and the New York-San Francisco line is the only line of greater length known to postal officials of Australia. Highly sensitive instruments magnify voice sounds at ten stations along the route. The fee for three minutes' conversation between the two terminals of the line is slightly less than $4 or about half the fee for a similar call over the same length of line in the United States.

Superb Altar Cloth

The cathedral of St. John the Divine, in New York, is soon to have an altar cloth of priceless value, comprising more than 100 pieces of rare gold lace, formerly heirlooms in the homes of as many women of social prominence, communicants in the Episcopal diocese of New York, who under the leadership of Mrs. William H. Sage, Mrs. Henry W. Monroe, Mrs. Haley Fiske and Mrs. Lewis R. Morris, gave the lace pieces, the intrinsic value of which alone is placed at more than $100,000.

HIGH LIGHTS ON SCHOOL PROJECT

Meeting to Discuss the Subject at High School Friday Eve.

The proposed new double school unit will be discussed this week Friday evening at the High School at 7:30 o'clock.

The school board and citizens committee are agreed that the people are in need of a new grade school and gymnasium, and propose a $150,000 double unit that can be constructed and maintained on the present 15 mill tax, which has been levied the past two years.

The gymnasium to be featured with auditorium equipment including a stage. This building to care for civic gatherings such as mass meetings, dramatics, Legion entertainments of a purely amateur nature, as well as school events, drama courses, dramatic and physical training for all school children under proper and scientific tutelage.

We should not attempt to elsepen the building but should attempt to so arrange and construct this unit in conform with any building program that may be hereafter added within the next fifty years.

The matter of closing the north and south side schools will be discussed at the mass meeting and should the sentiment of the taxpayers justify the move these two ward schools will be eliminated. Otherwise one or both can be continued.

It is our belief, however, that the taxpayers on both the north and south side will desire that their children attend the new school because of the additional and improved situation of this new splendid unit, which will include modern heating and ventilating plants as well as the physical culture training classes.—A School Patron.

Long Telephone Lines

The second longest trunk telephone line in the world was recently opened by the Australian postal department for public traffic between Perth, in the west north of Australia, and Melbourne, capital of Victoria, a southern state. The line runs almost the entire length of the continent. It is 2,017 miles long, and the New York-San Francisco line is the only line of greater length known to postal officials of Australia. Highly sensitive instruments magnify voice sounds at ten stations along the route. The fee for three minutes' conversation between the two terminals of the line is slightly less than $4 or about half the fee for a similar call over the same length of line in the United States.

Anatomy of Hindu Lad Seems to Be All Wrong

Bombay.—Medical science is baffled by the strange case of a Hindu lad of thirteen who has just been admitted to the Osmania general hospital at Hyderabad, suffering from a knee joint complaint.

Outwardly nothing is wrong with the boy, but during a routine examination it was discovered that the organs of his chest are completely transposed, the liver being on the left side, heart on the right side, spleen opposite its normal position, while his stomach is in an inverse direction. His intestines lay coiled in the opposite direction.

The boy is healthy, and the phenomenon is believed to have been due to his rolling during the early weeks of his embryonic life.

MRS. ELIZA CLARA HUBBARD STAFFORD

Passed Away at the Home of Her Son, John, State Street

Mrs. Eliza Clara Hubbard Stafford was born in Roscoe Point, Clinton county, New York, Dec. 10, 1839, and passed away at her son's home in Charlevoix March 15, 1927, aged 87 years, 3 months and 5 days.

About the year 1862 she was united in marriage with Mr. John Bugbee. They made their home in Clinton county until the death of Mr. Bugbee in 1865.

In 1869 she was married to Daniel Stafford, and with him made her home in Norwood. Mr. Stafford passed died in 1902. For the last fifteen years Mrs. Stafford has made her home with her son, John Bugbee of Charlevoix. Two children were born to the first marriage, John and Jessie, the former dying about two years ago.

For more than a half century Mrs. Stafford had been a member of the Methodist Episcopal church. She was a woman of faith and religious devotion. The funeral service was held at the Bugbee home on State street, Thursday morning at ten o'clock, Rev. C. R. Pollock officating. Interment was made at Norwood, where the body of Mr. Stafford was laid to rest.

GAMES ON AT PETOSKEY

Basket Ball Teams in Struggle for Supremacy

Commencing with today Petoskey will be the center of attraction for basket ball players and followers of the game.

Contests between twenty teams are scheduled and to be played during the last three days of the week and on the final decision will be championship for northern Michigan.

Aside from Petoskey teams are entered from Manistee, Alpena, Cadillac, Harbor Springs, Charlevoix, Mancelona Cheboygan, Rogers City, Traverse City, Bellaire, Kalkaska, Kaleva, Ellsworth, Bellaire and Mackinaw City.

In the early games Charlevoix will oppose Harbor Springs.

DELAY ACTION DEATH PENALTY

Budget Bills Worry—Appropriation Requests are Huge

Lansing, March 15—While the more controversial issues have simmered in the committee rooms, sessions and boiled in committee rooms, the Legislature has devoted its daily sessions to routine measures quite devoid of extraordinary popular interest. Workmen's compensation bills, highway finance measures and major appropriation requests loom up on the horizon and promise interesting battles in the near future.

The Armstrong-Palmer capital punishment bill, passed some time ago by the House, is still being held in the Senate committee and it is being prophesied that a legislative deadlock will result if this measure is not reported out by the committee in the near future. Representative Palmer is threatening to delay action on all Senate bills until the Senate makes definite disposition of the death penalty measure.

Speculation is rife as to the total appropriations to be made by the present session of the Legislature. Budget requests are on file in excess of those of previous years and the committees seem to have investigated the various state institutions rather thoroughly and many of them are in deplorable condition and need extensive repairs and additions. To further complicate the situation bills carrying appropriations for new projects are numerous. The Senate committee on Finance is expected to meet with Ways and Means are progressing slowly and with considerable caution, but it is evident that they will soon have to speed up their work if the session is to be completed by the end of April, the usual time of adjournment.

TOBACCO TAX DEFEATED

Praised and Condemned at a Public Hearing

Senator Lennon's proposed tax of $2 per 1,000 on cigarettes and 10 per cent on other forms of tobacco was praised and condemned at a public hearing before the Senate Taxation committee, last week. He assured them that it was his purpose to have the revenue from this levy definitely displace an equivalent amount of general property tax. He called attention to his proposed constitutional amendment which would prohibit any general property tax for state purposes and require the Legislature to finance the State entirely by specific levies, such as the tobacco tax. He predicted that his bill would produce more than $9,000,000 per year.

Device May Help Find Ships on Ocean's Bed

Tacoma, Wash.— Forgotten tragedies of the Pacific may soon be revealed by a device adapted from the hydrophone, which detects the grating sound of hulls on the ocean bed. Lieutenant Commander T. J. Meyers of the coast and geodetic survey is sounding the ocean floor up and down the Washington coast and plans to drag a number of locations to establish the origin of strange noises. The geodetic surveyors are working off the mouth of the Columbia river, a graveyard of old sailing vessels.

FIND TWO COMETS IN SINGLE DAY

Scientists Hang Up New Astronomical Record.

Boston, Mass.—Discovery of a new comet on the same day as the rediscovery of an old one by the man who originally found it was the astronomical record hung up by European astronomers recently, according to Dr. Harlow Shapley, Harvard college observatory director, which acts as a clearing house for news of astronomical discoveries.

The new comet was picked up by Dr. J. Comas-Sola, director of the Fabra observatory at Barcelona, Spain, and following the usual custom has become known to astronomers as Comas-Sola's comet.

When discovered, it was in the constellation of Cetus, the Whale, which can be seen in the southwest sky in the evening. It was moving to the southwest, but as it is of the seventh magnitude, a good-sized telescope is now required to see it.

Neujmin's comet was the celestial visitor which returned, and was picked up the same day by G. Neujmin, of the observatory at Simeis, Russia. Doctor Neujmin originally found this comet on February 24, 1916, and calculated that its orbit would bring it back every five and one-half years. In November 16, 1920, he photographed a strange celestial object, which he believed to have been the comet, but as sufficient observations to accurately determine its orbit were not obtained, this is not certain.

When rediscovered on this trip, Neujmin's comet was in the constellation of Leo the Lion, near the handle of the familiar "Sickle," which can be seen in the eastern sky for a few hours before sunrise. It is even brighter than Comas-Sola's comet, as it was of the fourteenth magnitude.

France May Sell Prison of "Man in Iron Mask"

Paris.—Plans of the French government to sell the island of Ste. Marguerite, where the "Man in the Iron Mask" was imprisoned for ten years, have met with much indignation. The report that British capital was planning to turn the island into a model winter resort has forced protestations from every part of the Riviera. The district is already objecting to the numerous odoriferous flowers financed by foreign capital.

The island of Ste. Marguerite, which is about four miles in circumference, is situated at the mouth of the Cannes bay. The "Man in the Iron Mask," made famous by Dumas, was incarcerated in the Ste. Marguerite fortress in 1687. History still disputes his identity. It is reported that the French government has been offered a large sum for the island, but newspapers and societies are fighting the proposed sale.

Education and Vocabulary

The average vocabulary of a business man, or skilled mechanic is around 10,000 words, whereas a college graduate's vocabulary is about twice as large.

H. S. BASKET BALL TOURNEY

Elimination Games Played at Harbor Springs Last Week

Basket ball players and fans journeyed to Harbor Springs last Friday and Saturday to engage in or as spectators of the series of games played in the contest of elimination and for school honors, contests in which the several high schools through the northern part of the state met and battled for supremacy in this branch of athletics.

The games played were in the main snappy and full of pep, interesting alike to players and spectators, well played with the contesting teams fairly well matched in relative playing strength as can be determined by the score of the several games engaged.

The official score follows:

Bellaire 31, Boyne Falls 11.
Ellsworth 24, Pellston 16.
Harbor Springs 17, Mancelona 7.
Alanson 18, Central Lake 17.
Mackinaw City 9, Alba 8.
Harbor Springs 25, Boyne City 18
Ellsworth 18, Bellaire 12
Charlevoix 18, East Jordan 16
Boyne Falls 11, Pellston 9
Mancelona 31, Boyne City 17
Alba 25, Central Lake 10
Mackinaw City 15, Alanson 7
Harbor Springs 22, Charlevoix 12
Mackinaw City 18, Ellsworth 14
Mancelona 23, East Jordan 22

Eskimos Grow Wise; Learn Value of Skins

Seattle, Wash.—Gone are the days when white men could trade a glass rolling pin to an Eskimo woman for a half dozen white fox furs. Today three fox furs equal one radio; six carved ivory cribbage boards, and one sewing machine.

On the schooner Boxer, which arrived from the Far North recently, was a cargo of character. Its native Eskimo products gathered by the teachers of government schools for sale here, the funds derived to purchase needs and comforts for the homes of the Northland natives.

The offerings for sale include 1,000 pounds of polished walrus ivory, 670 pounds of walrus teeth, 500 walrus tusks, 200 pounds bearded seal skins, ivory carvings of gifts and useful articles. The furs include silver, white, white, cross and red fox, ermine, mink, lynx, wolf, bear and wolverine.

HOW TO PRESERVE YOUR GAS STOVE

A New Stove Should Never be Allowed to Get Too Hot

Many new gas stoves are spoiled at the beginning of what should be a long life of usefulness by neglect of certain simple precautions. A new stove should never be allowed to grow too hot the first time it is used. Gradual heating and cooling at this time will accustom the enamel, whereas sudden heating may cause parts of the stove to warp or oven to crack.

Rust in the oven can be prevent ed if the burners be open for a few minutes after lighting the burners. This permits the moisture to escape. Makeshift castiron stoves should never be used in open-burner gas ovens. They not only waste gas but may be dangerous because of carbon monoxide gas through imperfect combustion.

The only proper top is that designed by the manufacturer for the stoves it is to be used on. Pans and other flat tops should be discarded if the stove burners are kept clean and properly adjusted.

Save gas when you cook! There is a big difference between using enough gas and using too much. Water can only be heated to the boiling point, regardless of how much flame is kept under the vessel after boiling starts.

Cook foods in the least minutes after the burner is lighted than it is the first second. Do not light the burner until you are ready to use it.

Old Stuff

Hindus at Mysore, India, during a religious festival, bowed down before an automobile instead of an elephant. A lot of white men have beaten them to it.—Minneapolis Journal.

Kum-eta Lunch—New Restaurant Opens on Saturday, April 2nd

Saturday, April 2nd Mesdames Merlitta Basset and Sylvia Brodin will open a new restaurant, opposite Hotel Charlevoix and operate the same under the name Kum-eta Lunch.

On the opening day they will serve a chicken and fish dinner at 50c per plate from 11:00 a.m. until 2:00 p.m. and from 2:00 p.m. to

Regulars Trying for Entrance to West Point

Brewster (formerly problem in Brewster-Benjamin case), back-pack of 11,000 enlisted men stationed in New York, New Jersey and Delaware who are preparing for entrance to the Point.

Britain to Have New Embassy in Washington

Radio Bill Authors Listen In

WASHINGTON DEB

Colleen Moore, screen star, had the honor of completing the first long distance telephone call from Los Angeles to London, which was up to that day the longest phone conversation ever held in the world. She talked one minute with J. Frank Brockliss, general manager of First National Pictures, Ltd., and the cost was $87.

OF INTEREST TO EVERYBODY

The majority of snow storms deposit only from two to five inches of snow.

A Frenchman has devised an automobile to burn wood instead of gasoline.

The $20,000,000 electric power project on the Sho river, in Japan, will be completed in 1930.

In the past ten years nearly 3,000,000 acres in western Australia have been opened to wheat raising.

The Jerusalem artichoke is an American plant and was probably sent to Europe by John Smith's expedition.

The sennum has few reliable signs of detecting icebergs, a peculiar glint being visible on the ice only when the sun is shining.

The perfuming principle found in castoreum musk, which is an important factor in perfume making, can now be made in the laboratory.

First Photograph of Dr. Sacasa and His Cabinet

This is the first picture to reach this country showing Dr. Juan Sacasa, revolutionary leader of Nicaragua, and his cabinet. Sacasa is seated in the center, behind the table.

Migration of Birds Is Studied

Large Specimens Fly by Day While Small Ones Journey at Night.

Washington.—Scientists can only guess at the meaning or the arrival of the first robin in the spring or the southward flight of geese across the late autumn sky. In the opinion of Dr. Alexander Wetmore, assistant secretary of the Smithsonian institution and president of the American Ornithologists' union, Behind migration lie such a multitude of causes, reaching back through the ages, that they have been unable to ascertain the truth.

Constantly a student of bird life, Doctor Wetmore has made special studies in the Salt Lake valley, the Big Horn basin in Wyoming, the pampas of Argentina, the coasts of Uruguay, the sand dunes of Buenos Aires, and many other vantage points throughout the western hemisphere. Doctor Wetmore has written a book on the migrations of birds, just published, in which he sums up his personal observations and corrolates them with the findings of ornithologists for the last 200 years, with the result that a number of misunderstandings concerning bird life are cleared up.

Migration Is Complex.

"The entire act of migration is so utterly complex that no single factor may be ascribed as the sole cause," Doctor Wetmore states, but he takes as his hypothesis that migration has arisen from changes in climate, due by seasonal and climatic changes in certain, known areas, and has become hereditary instinct, "a part of the life-cycle of the individual," and now actuated by physiological conditions.

"The habits of ages have become so well fixed that weather conditions now have little to do with the movements of birds, except to permit them to travel or hold them back for the time may be. Redstarts wintering in the West Indies, or waglails spending the cold season in central Africa, arrive no difference in temperature or climate conditions between November and April, yet in the latter month they regularly move north toward the summer home.

In such matters as the speed of flight of birds, the time of migration, lines of migration, sense of direction, and mortality among migrant birds, Doctor Wetmore says much remains interesting facts. Large birds, such as hawks, cranes, ducks and hawks regularly fly by day, while the majority of small birds, such as warblers, flycatchers and sparrows fly by night. The chief factor here is the necessity on the part of the smaller birds to seek their food by day, and not fear of attack in day flight. Fasting for a day is no hardship for many of the larger birds.

Migrating birds commonly fly at an altitude no higher than 2,000 feet, although birds of strong flight have been seen at a height above 20,000 feet. Contrary to common belief, flight becomes increasingly difficult as the bird rises above 2,000 feet. Birds commonly fly against or across a wind current, and are upset if they fly with a strong wind. As to the speed of birds, Doctor Wetmore destroys a number of fallacies. The slowest-peeling birds fly at from 20 to 37 miles per hour, while ducks and geese range from 42 to 70 miles. Most birds are probably capable of doubling their normal speed for short distances, but the greatest speed recorded was that of the canada swift of Eurasia, observed from an airplane to be making 70 miles an hour in normal flight.

Sense of Direction.

The ability of birds to maintain direction unfailingly and to return year after year to the same spot from great distances, as many do, is ascribed by Doctor Wetmore to a sense of direction which is no more explicable than a similar sense of direction in some men and other mammals. The greatest traveler among the birds is the Arctic tern, which makes its 11,000-mile journey twice a year from the Arctic to the Antarctic and return. Among others that range widely are tree sparrows, juncos, brown creepers, golden-crowned kinglets, robins, grackles, cowbirds, and various species of ducks, which nest in the northern parts of the United States or in Canada and winter near the gulf of Mexico.

One aid in obtaining data on bird habits has been the banding of birds which was begun scientifically by C. C. Mortensen in Denmark in 1897. Banding in the United States is now under the direction of the bureau of biological survey of the Department of Agriculture. Adult birds are trapped without injury and the young birds are not molested.

Doctor Wetmore concludes that while in the last fifty years many uncertainties have been cleared away in regard to migration, we must look to the future to explain definitely the basic reasons for it, the cause of the varying lengths of the journey made by different birds, and the method of orientation.

Four of One Family in Same University Class

Erie, Pa.—Four students in the university from the same family at the same time is unusual, but when they all four sew in the same class it is more than unusual.

That, however, is the case at the University of Wisconsin, where two daughters and two sons of James Caldwell, lumberman of Erie, are in freshman class.

The two girls, Mabel and Bernice are twins, eighteen years old. They are in the college of letters and science. The boys are Byron, twenty, and Donald, twenty-one. Byron is in the commerce department and Donald majoring geology.

Late Queen Liliuokalani's State Documents Found

Honolulu.—Valuable historical material has been uncovered in collections recently presented to the archives of Hawaii. Among the most important documents are state and personal letters formerly in the possession of Queen Liliuokalani, Hawaii's last monarch. Col. C. P. Iaukea, former chamberlain of King Kalakaua, has placed in the archives a collection relating to the European visits of the king about 1884.

No Wonder Army Officers Resign

Army officers stationed at Camp Meade, Md., say that war was never as hot as it is in the remarkable buildings they are forced to inhabit. With a view to improving the housing conditions of the officers of the army, Hanford MacNider (center), assistant secretary of war, and Maj. Gen. H. T. Cheatham, quartermaster general, visited the camp and are shown at the entrance of the "beautiful mansion" of one of the officers. On the right is Col. O. S. Eskridge, commandant at Camp Meade.

PAUPER GRAVE REVEALS THE FATE OF NOTED PHYSICIAN

Famed Californian Was Picked Up as Derelict by the Police of Utica, N. Y.

Berkeley, Calif.—A title of the strange fate of a once famous scion of one of America's oldest families, came to light in dispatches from Utica, N. Y., reporting the body of Dr. George Hillegass had been taken from a pauper's grave and was to be brought to the San Francisco bay region for final burial.

Doctor Hillegass, one of the earliest settlers here, a graduate of the University of California, and distinguished in civic and medical affairs, dropped from sight in 1913. Old and broken and apparently penniless, he died a public charge in a hospital in Utica in 1925 and was buried in a public cemetery after efforts to find friends or relatives had failed.

The dim beginnings of the story might be traced back to the Revolutionary war when Michael Hillegass rebelled against the power of Great Britain and threw his influence and wealth to the cause of the struggling colonies. His picture adorns some of the $10 gold notes of the country today.

Historians of the family here trace Dr. George Hillegass' ancestry to Michael Hillegass.

Doctor Hillegass, one of the noted physicians of his time, is credited with having given to the University of California much of the land included within the present campus and with having developed extensive holdings in other districts of Berkeley and Oakland. A Berkeley avenue is named for the family.

An extensive search, made after the physician's disappearance in 1913, was unavailing. Then he appeared in Philadelphia in 1922 as a witness in probate proceedings of the estate of Mme. Elmira A. Boullet, a relative. The estate is a parcel of Oakland waterfront property which has appreciated greatly in value.

Early in 1923, when Doctor Hillegass was picked up by the Utica police in a railroad station, a mysterious bit of famous driftwood, he had holdings estimated at $150,000. His wanderings between 1913 and 1922, and in the years between the time he appeared in Philadelphia and at Utica, he kept apparently penniless, disheveled and unkempt, form a mystery that may never be solved. There is no indication he suffered a mental lapse of any sort or that he had any personal habits that would have caused the fall from his high estate.

The search for never diminished its search for the physician and Fred C. Peterson, Oakland attorney, employed by members of the family here, finally traced him to the Utica cemetery vault.

Odd Changes Wrought by Time's Whirligig

The silver alms dish which King George V has given the cathedral of St. John the Divine was presented by Sir Esme Howard, the British ambassador, at special services in the cathedral, and received by Bishop William T. Manning.

In the sermon after the presentation Bishop Manning said:

"In the year 1783 the rector of Trinity church in this city was compelled to resign his office because, in spite of the protest which were then taking place, he insisted upon continuing to pray publicly for the king of England. Today we are here for the presentation of a gift from the king of Great Britain which we shall hold as one of our most treasured possessions as long as the granite walls of this cathedral stand."

Invisible Light

Those mysterious rays of invisible light which constantly play about us, yet which we never see, hold seemingly endless possibilities for usefulness. For example, says Popular Science Monthly, the latest use for ultra-violet rays is in the testing of silkworms. Healthy worms have the strange property of giving off visible light when exposed to invisible ultra-violet rays, whereas unhealthy worms give off weak light or no light at all. Similarly, some dentists now use ultra-violet rays to determine whether teeth are alive or dead.

And How!

"I don't suppose she suffered any after effects of her operation?"

"No, but everybody else did."—Judge.

Your stomach may be so distended that your breathing is short and gaspy.

You are dizzy and you pray for quick relief—to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas passes, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE COPYRIGHT BY BRENTANO'S

CHAPTER X—Continued

—20—

Tom and Bolling rolled in barrels of rum, which were opened and consumed as rapidly as the hands were knocked off; and the raw spirits combined with the hellish chant and the suggestive thrubbing of the drums to stimulate afresh the passions which Ga-ha-no's dancing had aroused.

At first they paid no attention to us. They were preoccupied with the extraordinary hysteria which had gripped them. They apostrophized the moon. The women flung themselves upon the False Faces, for it was deemed an honor to receive the attentions of these priests of evil. The men worked themselves into an excess of debauchery. Groups formed and dissolved with amazing rapidity. Individuals, wearying of each other, ran hither and thither, seeking partners who were more pleasing or attractive to them.

But at last a portion of the drunken mob turned upon us. An old woman with ugly face and long, matted hair smothered in the brutishness the rum had excited, carefully inserted a pine-splinter in the quick of my finger-nail. I gritted my teeth to force back the scream of agony, and managed to laugh —how, I do not know—when he set it alight.

"The brother of Ta-wan-ne-ars is a great warrior," proclaimed my captor rude, swift to counter to my help. "Red Jack and his friends cannot hurt Ormered. We laugh at you."

Bolling ripped out his knife and staggered toward the Seneca's chair.

"I'll make you laugh," he spat wickedly. "I'll carve your mouth wider so you can laugh plenty when we begin on you in earnest. Think this has been anything? We—"

A yell of mingled fear and laughter interrupted him. False Faces and warriors, women as well as men, were pointing toward the background of the pines.

"Ne-ear-ge-ye, the Bear, is come to play with us," they cried.

And, sliding ponderously themselves and called—

"Qua, Ga-go-sa. Ho-nun-na-tane-ta!"

For the second time that night I twisted my neck to peer behind my stake, and once more the sight which my eyes was weirder even than the white figure of the Bear. Now there within the circle of the firelight stood Ga-ha-no again. But 'twas a different Ga-ha-no. On her shoulders she wore a bear's mask, with the fur of the neck and shoulders falling around her body to the ga-ka-ah which draped her loins. In each hand she gripped a knife, and her white limbs staggered under her in pretense of the unsteady gait of a bear walking at the granite walls of this cathedral stand."

The False Faces began their chant, the drums rumbled, and she, too, swayed forward, arms flopping like paws, head poised absurdly upon one side. The savages, keen to appreciate what they knew, applauded uproariously each possibility of her foolishness. For example, says Popular Science Monthly, the latest use for ultra-violet rays is in the testing of silkworms. Healthy worms have the strange property of giving off visible light when exposed to invisible ultra-violet rays, whereas unhealthy worms give off weak light or no light at all. Similarly, some dentists now use ultra-violet rays to determine whether teeth are alive or dead.

"Ga-ha-no!" I shouted. "Ga-ha-no! Ga-ha-no!"

RESPECT THE FORESTS

"Forest Week," originated in the Northwest, is fast becoming of national significance. The last of April will probably be designated as such this year. The big object is to interest everybody in the forests as friends, partners, pals, protectors. Fire-fighting, wood-using, tree-planting, forest-recreation, all come under the general purview of Forest Week.

The forests employ hundreds of thousands throughout this country; they fill the harbors with ships, the freight yards with loaded cars; they build homes and business all over America—even though no tree may grow within 100 miles of farthest user out on the arid plains. The forests conserve the birds, the river waters, the health of a nation; last year almost 3,000,000 people visited the national forests of the two most northernmost states.

This year should set the pace for a new record of fireless forest enjoyment. It will, if every tourist will make it his personal business to respect the forests.

MOVIE INDUSTRY

An interesting story of the wonderful progress made by the motion picture industry in its less than a third of a century of existence is told by Jack Connolly, Washington representative of the Motion Picture Producers and Distributors of America. In commenting on the wonderful growth of the industry, he says:

"The motion picture is thirty years old and one hundred million strong. Thirty years ago, the motion picture as a form of public amusement was shown as the trailer of a variety bill of the Koster & Bial Music Hall on Broadway. Today, one hundred million people in this country alone visit weekly the 20,233 motion picture theatres which dot the continent and which provide the chief entertainment and recreation for our people.

The history of the motion pictures is a fascinating one and it is literally true that no story ever written for the screen exceeds in dramatic merit and significance the story of the screen itself. Born of a toy but reared in an age of progress, the motion picture has developed within an unbelievably short space of time into one of the greatest forces the world has ever known.

Few people dared to dream, when the motion picture was first introduced to them, that it would become the great factor in our lives that it has become, with immeasurable influence upon their lives and habits, their customs and ideals. They saw that it as only a novelty—some thing to be amused by for a few minutes. But they did not reckon well, for as prairie fire, fanned before the wind, the motion picture spread itself around the world and drew to it the hearts of the people. It is true literally that the motion picture is the people's own mode of expression. The people love the motion picture. It is theirs, intimately, and they are jealous of it."

NOT IMPEARLIST

We have heard a great deal during the past few weeks about American" imperialism. Some of this has come from newspapers in European countries which have had imperailistic programs since the middle ages, and more of it has issued from some of our own internationalist statesmen who seem to have adopted the slogan: "My country, be it right or wrong, I will call it wrong."

It is good therefore occasionally to hear a word of good will for Uncle Sam, especially when that word comes from a citizen of a foreign land. It is quite fitting therefore that this charge of implacability should be refuted by Dr. Orestes Ferrara, Cuban minister to the United States, on the 29th anniversary of the sinking of the battleship Maine. He said:

"The men who perished in the explosion are remembered today in Cuba with the same deep feeling that their memory is reverenced here by their fellow countrymen. As long as gratitude exists in the world their sacrifice will be recalled by the people of Cuba, who will ever keep alive in their hearts a fervent and inextinguishable sympathy for those gallant sailors.

On this occasion I feel it my duty to declare that, although we are your close neighbors, we do not feel the pressure of your great power. The accusations of imperialism, on the contrary, find a palpable refutation in the untrammeled existence of the Republic of Cuba, from which no attribute of its sovereignty has ever been withdrawn notwithstanding the statements sometimes made by mistaken friends or deceitful enemies."

Our relations with Cuba are one of the many instances in which America has played anything but an imperialistic part. It is good to know at least that some of our works have not been forgotten.

OWN YOUR OWN HOME

The San Francisco Chronicle, in its campaign for home ownership, recently ran the following editorial:

"When a primeval woman found a drier and safer cave in which to keep her young, and persuaded her savage mate to defend it against intruders, there began the Own Your Own Home movement. There also was laid the foundation of stable human society, of the arts, sciences and all that goes to make up civilization.

The principle is no less potent today than it was in the beginning. In proportion to the ownership of homes, society is stable. The more homes that are owned, the more persons have a stake in the community and the greater the number working for the common good.

And the rule works both ways. For the accumulated benefits of civilized society are shared first by the home owner. They have a permanent lien on the blessings of peace and order and permanency.

Home ownership is a stimulus to thrift, and a material assurance of security in old age. It is a practical training in good business methods for the children of the family."

BE CONSISTENT

Many arguments have been advanced in favor of compulsory automobile liability insurance. While everybody will concede that all possible steps should be taken to reduce automobile accidents and protect the public from injury and death, there is a vast difference of opinion as to whether compulsory insurance would improve the situation. Insurance is a social scheme, not a private auxiliary.

Our laws already make a man liable for injury which he carelessly inflicts upon another's person or property. Simply because these laws are not enforced, is no good reason for passing more laws to further reduce individual responsibility.

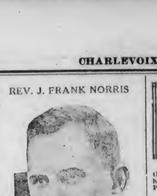
There is just as good an argument for compulsory fire and life insurance as there is for compulsory automobile insurance. A man may die and leave a family destitute, for relatives or the state to care for—in fact this happens much oftener than cases where a person or family is left destitute because of an accident caused by an irresponsible automobile driver. The same situation applies in fire carelessness. At present our enforcement of laws is so lax that a man can carelessly burn down your home and burn up your family and he goes scot-free—the city even spending large sums to put out carelessly started fires, without any attempt to collect for the cost of its work from the guilty party.

If we have cumpulsory automobile liability insurance, why not compulsory life and fire insurance, as the interests at stake are many times greater than in the case of automobiles?

"Hump" of European Origin

Records show that Jump railroad yards were maintained at Sjedsford, Germany, in 1876, and also on the Paris, Lyon and Mediterranean in France in 1888. The first summit yard in America, as far as can be learned, was constructed by the Pennsylvania railroad in 1882 at Huffs station, two miles south of Greenbush, Va.

REV. J. FRANK NORRIS



Rev. Dr. J. Frank Norris, fundamentalist pastor of Fort Worth, Texas, who is to be tried on the charge of murdering D. E. Chipps, wealthy lumberman, who had objected to some of the preacher's utterances. Doctor Norris obtained a change of venue to Austin.

PRESS COMMENT

A Gloomy Prospect—The cost of American cities will rise, and this will result in a decrease in the amount of money wageearners and salaried employes will be able to spend upon luxuries. Carl Snyder, economist for the Fede.al Reserve Bank of New York, predicts for the not-distant future. Prices will rise in the cities, he says, because of the steady drift of the farm population to urban centers. Two and a half million persons have left the farms since 1920, and this, he holds, has decreased the active farm workers by from eight to ten per cent. If Mr. Snyders prediction comes true, it may not be a bad thing. It may serve to solve the farm problem, but it will doubtless create others equally puzzling. And yet when we consider that this country pays eight or nine billions a year for the maintenance and replacement of automobiles alone, it does not appear that a slight economic adjustment caused by a rise in the cost of living would cause a great deal of suffering.—Philadelphia Public Ledger.

A Secret Not Patented—The nine Ohio farmers who each produced more than 300 bushels of potatoes on an acre last season have a farm relief system of their own, but it is not patented, not exclusive. It is available to every farmer. Some farmers produced only one hundred bushels of potatoes to the acre last season, some as few as fifty bushels.

There is no urge at this time for increased food production but a greater production from fewer acres means less investment in land, less plowing, planting and cultivating. Flood, drouth and unseasonable frosts cannot be prevented. They bring bad luck to the best farmers, but selection of the best land for certain crops, certified seed, good fertilizer and plenty of it and scientific methods will spell success in farming in the long run.—Toledo Blade.

Private Industry Fast—The constant virile push of private industry is never found in government owned industries. A government job means an easy chair, plenty of time to talk things over with friends who happen in, plenty of time to escort visiting voters and their families around the plant, plenty of time for private errands—and no time for the job. Here is a sample of how government ownership works:

A prominent member of the British Parliament recently urged that weekly lessons be given in the public schools on the proper use of the telephone. He also urged, as many other Britishers have been doing recently, that the government, which operates the British telephone system, make more strenuous efforts to extend the telephone service. At present, while the United States has 15 telephones for every 100 persons, Great Britain has only 3.—Jefferson Co. Union.

Man vs. Mechanical Power—As one looks at the Chinese Wall, the Pyramids or the Roman Roads, and thinks of the misery and death which accompanied their building, one questions whether the accomplishment was worth the price in human suffering. What a contrast between these ancient methods of construction and the power era which our country enjoys today.

Our American workmen with his power equipment can do more work in a day than a hundred, or in many cases a thousand, Roman slaves could do in the same time. As an example, take the modern tractor in road construction, logging and farming. With one man, it will do more work in a day than scores of helpless slaves. And so with the electric motor. Such mechanical power has changed the position of mere laborers into efficient producers, with corresponding advance in wages and living standards. What a contrast to the ancient man-killing methods of production.

The Treachery of Sin

By C. EDW. LA REAU
Extension Staff, Moody Bible Institute, Chicago.

TEXT—His own iniquities shall take the wicked himself, and he shall be holden with the cords of his sins.—Prov. 5:22.

Treacherous fact—SIN 18! Face it!!
Upon and over all humanity its blight
and curse is seen.
Its power forth its slimy octopus-like tentacles to ruin and degrade.
With befouling incitements,
It touches our fairest as parent, to mar and despoil.
SIN 18! From the reality and curse of its presence, none, however guarded or sheltered, may escape. Between man and man, as well as between man and God, it intrudes.

C. Edw. LaReau.

Sin destroys—that it, it makes solitary. It sets aside that which makes for peace and harmony. It mars happiness. It blights confidence. It destroys love.

Sin is death—dissolution—separation. From husband and wife, from children and parents, and out in the world of men, and in the affairs of nations, sin separates.

Sin pays wages. Its penalty is sure. We'll everyone reap what we sow—and more. Meanwhile built a false bridge to drown Constantine, but was himself drowned. Haman was hanged, and his whole family miserably perished, on the gallows he had prepared for Mordecai.

Sin Holds.

Somehow there is about it a peculiar quality and charm which makes possible, not only the seizure, but also the enslaving of its victims. How true to experience is the text! About all wrong-doing there is that which makes well-nigh impossible the shaking off of the cords by which one is bound. Nothing in the world is so deceptive as sin. Nothing is so cruel or unrelenting. Nothing so ruinous or destructive.

The wicked are taken by their own iniquities. Men first become sinners from choice, more thoughtlessly or carelessly, but at last comes the realization that they continue in sin because they cannot help themselves; they are powerless to stem the tides of their own evil practices.

Sin, it should be remembered, is not a single act, either of short-lived pleasure or of bitter pain, that passes away with the doing. To so regard it is a grave mistake. No act of sin, however insignificant, passes away with the doing. To so regard it is a grave mistake. No act of sin, however insignificant, passes away with the doing. It goes on and on, gathering force and power, intensifying and blighting, unto the ages of eternity. It is not done with the sinner when he is done with it. At its inception, it may appear to be but a little thing, but when it becomes full-grown it is an avalanche—and, alas, how awful the wreckage!

Big Certain Disappointment.

"Be sure your sin will find you out." Upon this fact all history, as well as Scripture, seems to agree. Look at Cain. Look at David. With keener scent than the fabled sleuth-hound, with greater and more consummate skill than that of any detective at law, sin tracks, and its voice cries aloud for retribution.

Sin will bring the sinner to Judgment. He must answer for his wrong-doing and wrong thinking. In the make-up of each individual there is something that declares against his own sinfulness. Before himself, the sinner stands condemned, and out of his own mouth God will judge him.

Sin Carries Its Own Punishment.

In the dream of Eugene Aram—a dream founded on fact—Aram murdered a man and thrown the body into a river. As the ballad puts it:

A slayer—Yesterday black as ink,
The depth was so extreme.
But when next morning, urged by his crime, he visited the place, what a revelation:

I saw the black, accursed pool
With a still, stagnving eye;
And I saw the dead in the river-bed,
For the faithless stream is dry.

He then covered the corpse with leaves; but a mighty wind uncovered it and told the secret here:

Then down I cast me on my face
And first began to weep;
For I knew my secret then was one
The earth refused to keep;
Or land, or sea, though it should be
Ten thousand fathoms deep.

Thus does sin reveal itself. Discovery and punishment are certain. Never can it exhaust itself. Ever and always its power impels to continued and greater sinning, and continued sinning involves continued punishment. There must be eternal hell because there is eternal sin. Enslaved, chained under the dominion and sway of sin, peering out into the hopeless blackness of an unending night—what a picture! Yes, SIN HOLDS AND DESTROYS.

Thank God, there is a remedy. "The Blood of Jesus Christ His Son cleanseth us from all sin." Turning to himself, man turns only to despair. "Himself he cannot save." But turning to the Cross of Calvary and its sacrifice, there is hope. Here, in God's provision for man's need, there is redemption and pardon, freedom from the penalty. He that believeth in the Son of God, hath everlasting life. And there is no other way. It is "The Way of the Cross"—or nothing.

Important Notice

Beginning February 7th and continuing until April 1st, or until the spring is taken up, the State Department, branch offices Boyne City, for distribution of Automobile License Plates, will be open Wednesdays and Saturdays 8:00 to 12:00 a.m. and 1:00 to 6:00 p.m.; Mondays, Tuesdays, Thursdays and Fridays, 8:00 to 12:00 a.m.

Mail application given prompt attention. Look up your titles. No license can be issued from the local office on title that are not been transferred to present owner within 10 days of the date of purchase. CHAS. McCUTCHEON,
Branch Manager

GENERAL KELLER

Brig. Gen. Charles Keller of the Bylesby Engineering and Management corporation, Chicago, was appointed by Secretary of State Frank B. Kellogg as one of the two official representitives of the United States to the Fourteenth International Congress of Navigation in Cairo, Egypt.

THE THEATRE

The Lunatic at Large—A wedding in a dirigible starts off the thrills in first National's latest comedy, "The Lunatic at Large," which comes to the Palace Theatre next Saturday and Sunday, starring Leon Errol and Dorothy Mackaill.

Kenneth MacKenna's twin brother in the picture has Kenna's part placed in an asylum while he crushes away with Ken's girl, whom he is going to wed in a dirigible.

Leon Errol gets hold of a rope ladder and makes his way into the dirigible, and as a result there is no wedding but one of the biggest thrills in pictures when Leon grabs Dorothy around the waist and leaps from the dirigible in a parachute and descends several thousand feet to the ground.

There are enough thrills in this one sequence to satisfy most people for life, for in the end the dirigible blows up and disappears in smoke and a cloud of flame.

The Ace of Cads—"The Ace of Cads" by an English author, Michael Arlen, and made into a Paramount picture with a cast that includes six Englishmen, arrives at the Palace theatre on Wednesday.

To be sure, the star, Adolph Menjou, is an American, as are Alice Joyce and Suzanne Fleming, but the rest of the company are all Britishers.

Norman Trevor—Sir Guy de Gramercy, colonel of the Guards regiment from which Menjou is dishonorably discharged was born in Calcutta, India. While still a youth, he journeyed to England and there laid a foundation for the career which has given him his present popularity on stage and screen.

Philip Strange, playing his first important picture part as Trevor's villainous son, was born in Henly-on-Thames, Oxfordshire. Incidently, his role is that of a young English Guards officer. In real life, Strange was for years a lieutenant in the Grer adier Guards.

The four other Englishmen in "TheAce of Cads" were born in London. Eric Blore who came to New York three years ago, is cast as the star's valet. George Stevens, Trevor's butler, arrived in this country about forty years ago with the Lillie Langtry company.

Reginald Sheffield—Lord Elpherstone abandoned his Eton schooling at the age of eleven to play child parts on the stage. C. T. Davis was a British officer for twenty years.

Both Menjou and Director Reed feel that the proper English atmosphere and manners have been correctly interpreted in "The Ace of Cads." With such a cast of "technical advisors" nothing else was possible.

Sight of Animals

The biological survey says that the crystalline lens varies somewhat in the eyes of different mammals. Magnification of the object may sometimes result, but it is impossible to tell the comparative impression on the retina and the optic nerve. Should man appear three times his normal size to animals, all other objects would also be magnified three times.

Cause of Thunder

It is not believed that thunder is caused by the bursting of air into a vacuum, but by the violent heating and dilotetegration of the air along its path, which produces a sudden and great expansion of the same nature as an explosion.

Formal Opening
OF THE
KUM-ETA LUNCH
Saturday, April 2nd
Chicken and Fish Dinner, 11:00 to 2 p.m.
50c per Plate
Free Sandwiches and Coffee from 2:00 to 5:00
BASSET & BRODIN, Props.
Bridge Street Opposite Hotel Charlevoix

Have We Reached The Danger Line in Taxation?

AMERICAN railroad taxes are mounting to new *Alpine* heights this year, the latest estimate for 1926, being that they will aggregate somewhere between $400,000,000 and $420,000,000, which may be expressed in various ways, although meaning the same heavy load:

That they will average from $1,005,800 to $1,150,675 a day.
That they will involve a charge per hour between $45,659 and $47,945.
That from six cents to six cents and four and a half mills out of every dollar taken in will go towards taxes.
That the railroads in 1926 will have to devote more than the net earnings of one mile out of every four for the payment of taxes.

The national government has *cut down* the national debt from January 1, 1920, to January 1, 1926, by about $4,250,000,000—four and a quarter billions.

In the same interval, the debts of states and local governments have increased by about 6½ billions—$6,750,000,000.

During this period of federal debt reduction, the state and local governments have been incurring obligations 20 times as fast as they paid off the old debt. During this same period, debts of state and local governments combined have been incurred 4½ times as fast as they were before the war.

The total public debt of all forms of government in this country is higher than at the peak of the war debt in 1919.

The national debt is being *reduced* at the rate of three quarters of a billion dollars a year—$750,000,000.

State and local debt is being increased at the rate of more than a billion and a quarter dollars a year—$1,250,000,000.

From January 1st, 1920, to January 1st, 1926, national government expenditures were *reduced* about two billion dollars—$2,000,000,000.

During the same period current expenditures by state and local governments increased more than two billion dollars a year—$2,000,000,000—and they are still increasing.

Rising taxes are one of the initial moving forces of the vicious circle of rising costs, Labor asks for higher wages, Producers and distributors pass along the accumulating burden to swell the family budget of the ultimate consumer. This, too, involves higher rents (or home ownership cost), higher food, fuel and clothing costs, etc.

After all, railroads are like any other industry. The farmer does not look forward to his tax bill with more anxiety than does the railroad.

Have we not reached the *danger* line?

Is it not time to retrench state, county and local expenditures?

MICHIGAN RAILROAD ASSOCIATION

WANT COLUMN

FOR SALE—7-passenger Nash sedan, $225. A. C. Belding, Charlevoix. 47-2

FOR SALE—Resort property, all beautifully wooded. Good sand bottom for swimmers. Will price at $7.00 per foot if sold quick. A big buy. Allen, 547 Colt Avenue N.E., Grand Rapids, Mich. 47-4t

FOR SALE—Large size Victrola, practically new. Peter Nellson, 405 Dixon Ave.

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 30-tf.

FOR SALE—Eight acres with trees, on M11, inside the city, suitable for filling station, store and auto camp. For information call at Sentinel office. tf

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARRY-MERCH CO.
Charlevoix, Mich.

FOR SALE—3800 feet frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. W. J. GLAZA 440 Pearl St., Boyne City Phone 324. 11-tf

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Mar. 19-20

Leon Errol with Dorothy Mackaill in "The Lunatic at Large." Tale of hobo tricked into insane asylum gives musical comedy favorite best "gags" he has ever had; made even shunchanged Scotchman laugh at premiere in Manager Taylor's house. What New York critics say about "The Lunatic at Large": N. Y. World: "A role beautifully idiotic, extremely laughable, entirely without a serious moment. N.Y. Telegraph: A "Lunatic at Large" will leave you weak in the knees from laughter. N.Y. Graphic: Errol riotously funny as "Lunatic at Large." The Hippodrome this week has outdone all previous efforts in the cinema slice of entertainment bill. Compared to the mediocre films which have served as time-killers in the past, "The Lunatic at Large" is hilarious, riotous clever comedy. Also Fox comedy, "Woman of Letters."

Wednesday Only, Mar. 23

Adolph Menjou in "The Ace of Cads" with Alice Joyce and Norman Trevor. The narrative of a dashing soldier lover whose happiness was nearly-wrecked by his closest friend. The same Adolph Menjou as the "Ace af Cads" who wears his sins as nonchalantly as his monocle. Also Felix the Cat and Fox News.
Coming—March 26-27, Harold Lloyd in "The Kid Brother," second sl.owing in Michigan.
Coming—"Cohens and Kellers."
Coming—"Summer Bachelors."
Coming—Richard Dix in "The Quarterback."
Coming—Clara Bow in "It."

Rain-Making Machinery Constructed in Russia

Leningrad.—A factory for building rain-making machinery is under construction here. The Leningrad Meliorative Institute recently sent a rain-making expedition to the remote transcaucasian farming station of Gandi, to make careful experiments in rain production. On the basis of this expedition's report of brilliant success, construction of the factory was begun. Further tests in the Mugan steppe and in central Asia are being made. The nature of the rain-making method and the character of machinery necessary to produce rain on demand have not yet been explained.

360-Pound Snake Caught After More Than a Year

Rio de Janeiro.—A giant "Sucuri" snake, member of the boa family, more than 30 feet in length and weighing 360 pounds, was recently captured in the state of Matto-Grosso and brought to the Rio de Janeiro zoological garden by Ignacio Augusto Xavier-mento, who led a party that pursued the snake for more than a year. Nacimento set out to capture the largest snake ever seen here, and succeeded. Twelve men were needed to handle the boa when it arrived at the zoo.

Otherwise All Right

New York.—Thomas F. Manville, Jr., heir of millions, thinks his wife is "a wonderful kid," but he and she are not suited temperamentally, and so they have separated. He advertises he will not be responsible for her debts, but is paying her $1,000 a month. She was once his father's secretary.

Archeological Treasures

Golden relics of the Fifth century were recently discovered by Professor Morn, director of the Municipal museum of Szeged, Hungary, according to a dispatch in the Frankfurter Zeitung. The professor saw a group of children playing with something that looked like a bullad pista. It turned out to be a portion of a finely chiseled scepter found in a garden. Digging there, he came upon 52 gold coins and several golden cups and dishes, believed to be treasure from the tomb of one of the kings of Engleria, an early Germanic tribe.—Chicago Tribune.

Improved Roads Secure Future of Car Industry

"Every once in a while you run across people who talk about the 'saturation point' in the sale of motor cars, and I cannot refrain from a quiet smile to myself every time I hear such a conversation," says H. F. Branstetter, a Chicago automobile dealer.

"The saturation point in the sale of automobiles can never be reached. If we, throughout the United States, extend our hard roads, widen our city streets and make room for the automobiles to percolate to the furthest corner of our country, this condition can never exist. For every mile of good roads and good streets you are making new customers and new users for motor cars.

"So when state legislatures and city councils throughout the country realize the economic advantages that follow each road and street improvement that is made, the motor car industry will find a ready market for even greater production.

"I am not worrying a particle about the saturation point at long as I can be assured that our legislative bodies are good road enthusiasts."

House of Sinister History

The little villa at Gambais, France, where Bluebeard Landru murdered and burned at least five of the eleven wives for whose deaths he went to the guillotine in Versailles, is falling into ruin. Nobody wishes to live in the place of gruesome memories and the property refuses to go to the expense of demolishing it. Tourists traveling in the neighborhood sometimes desire to look over the place, but they are not permitted to enter. Automobilists turn their eyes for a few seconds from the road ahead to look at the grim dwelling. The villagers who knew Landru slightly do not believe that the mild-looking bearded occupant of the villa can possibly have been guilty of the frightful series of crimes for which he suffered the death penalty.

Panama Tolls

Panama.—Vessels passing through the Panama canal during 1926 paid tolls the aggregate of which is second only to the record year of 1925. The total for the year just closed was $23,-900,590.

PERSONALS

This is the day for the "Wearin' o' the Green," St. Patrick's Day, March 17.

E. S. Stacks of Boyne Falls, was a business visitor in Charlevoix on Wednesday.

Miss Belle Roy of East Jordan, spent a day or two here on business during the latter part of the week.

"The American people love a bargain, but it has to be advertised before they know where to find it."

Mr. and Mrs. James Whitley of Muskegon, spent the week end here, returning Sunday, over the motor route.

Attorney F. R. Williams of Elk Rapids, was a visitor here last Thursday on professional business connected with circuit court.

Mrs. John McCann, who spent several days recently at Greyling with her son, Dr. Charles McCann, returned to Charlevoix last Saturday.

A public supper will be served at Mrs. M. B. Hooker's, by members of the Ladies Aid society, Tuesday, March 22, from 5:30 p.m. until all are served.

Special gathering and tea will be held at the residence of Miss Eva E. Adams, 206 Michigan avenue, Thursday afternoon, March 24th, by the Mary Brewster Circle.

Ray Whitley spent a few days here recently, returning to Muskegon Monday, where he is engaged with the Charlevoix Abstract and Engineering Company on some contract work.

Frank Wilforth left for Conneaut Harbor, Ohio, last Saturday where he expects to take a position on one of the big steamships for the summer season that has the harbor for its home port.

Staley Brothers will have a formal opening of their new store Saturday, March 19th. They are located at 228 Bridge street, in the saleroom until recently occupied by the Emrey Clothing House.

The Harry Block cottage, 214 Park avenue, is being repainted on the exterior and newly decorated throughout on the interior. This job was recently awarded to O. S. Richardson who is in charge of the improvement work.

Edward Hayes, of Detroit, spent the week end with Charlevoix relatives, returning Monday over the motor route accompanied by his sister, Mrs. Henry W. Partridge, who will spend a short vacation with relatives in Detroit.

Mrs. F. W. Smith of Bellaire, spent the latter part of the week here with Mr. Smith, who entered the hospital for treatment. Mr. and Mrs. Smith for a long term of years and until recently were local citizens and have several relatives living here.

The Noble House, 206 Antrim street, after being closed for several weeks during the winter, was opened by the owner-manager, Mrs. Cora Noble, early this week for the season, with the possibility that it will continue as an all-year-round place in the future.

Mr. J. A. Rorabacker of Traverse City, is in charge of the prescription department in the store made famous through the sole of "Pills and Things," during the temporary absence of the owner, F. J. Fessenden and his assistant Master Billy, who are in Grand Rapids for a few days on business.

Rev. C. J. Kruse, pastor of the First Methodist church, performed his first Indian marriage ceremony Sunday afternoon, when he officiated at the wedding of Mrs. Rose McSawby, Charlevoix, and Isaac Nasks, of Lake city. The service was at the home of John White. Rev. Kruse has now officiated at the marriage of Indians, Negroes, Chinese and Whites.—Evening News, Petoskey.

A meeting of the Parent-Teachers association will be held at the high school assembly room Wednesday, March 23, at eight o'clock p.m. Mrs. Raymond, state president of the association will accordig to present plans be present at this meeting. An added attraction will be a concert by the C.H.S. band, their first public performance which we predict will be of interest to music lovers.

Thus far March has been a most ideal month, a fitting conclusion to weather conditions prevailing throughout the entire winter season and this was one of unequaled splendor, as fine as has ever been experienced in this region. Phrophesies made early to the effect that the winter months would be severe with an unusual snow fall and extreme cold turned out to be false proclamations, placing the weather prophets in the class of unreliable prognosticators.

Our short write-up in the last issue of The Sentinel relative to certain choice-ious local features, flagrant violations of statutory provisions and utter disregard for the social moral code, brought about to some moderate degree at least, mild improvement in disgreeful proceedings with which this community for some time past has been afflicted. The objectionable features have not been entirely eliminated. Reprehensible conduct on the part of a certain few continues, but in a more moderate degree, and open disgraceful conduct more secretive, less open than heretofore. We are hoping, perhaps futilly, that the one or more notorious affairs will soon clear away, leaving a pure atmosphere before the opening of the resort season, sooner if possible, thereby cresting conditions greatly needed and desirable, otherwise it will become necessary for us to publish some stringent remarks in order to awaken the conscience of the guilty and awaken the public by exposing the foul conditions that have and to some considerable degree, still continues—conditions or rather afflictions, such as we have annoying to Charlevoix and its good citizens.

George W. Lusk is busy this week transferring his stock of merchandise from the location where he has carried on his business for the past year, to the saleroom formerly occupied by the A. E. Mason place of business, 302 Bridge street, a most desirable change, and one that gives him more space in which to display his line of merchandise, better light and in every way superior to his former place of business.

Rebuilding of the Olaf Nordrum residence, 106 Park avenue, that was badly damaged by fire two weeks ago today is under way, the work being under the supervision of W. E. Parmelee, who has a force of mechanics on the job in numbers that insure quick completion of the residence. Insurance companies have made satisfactory adjustment of the loss sustained, the appraisement of damages being upwards of $3,000 on the building with an extra amount for loss on furniture and personel effects.

Compitent is made that more or less damage is caused by parties driving across the golf grounds and otherwise making trouble, annoyance and needless expense to the club and those in charge. The hope is expressed that further notice to sigh as have indulged in this practice will no longer continue to burden the association with acts that cause annoyance and needless effort and expense in order to keep the grounds in condition. Otherwise summary action will be taken against the parties.

Husband Selected Poor Theme for Kind Words

We walked into a little East side grocery store, my companion and I, and heard the sound of ruinous quarreling. The proprietor and his wife were glaring at each other across the counter, but they abandoned their sharp words momentarily, upon our entrance.

And then the wife's emotions got the better of her.

"I just leave it to these people here," she told her husband, flourishing an arm in our direction. "We've been married seven years and in all that time he's never said a kind word to me until tonight. And now—yes, this is his idea of kind words: listen—he comes in and tells me I done well in ordering his shipment of clean potatoes."

"Well," the husband asserted, sullenly, "you did."

"Sure I did!" his wife returned. "And for seven years I been dressing the way you liked and doing everything you wanted me to do, and keeping the house the way you wanted it kept, and now the first time you show any appreciation you make me for ordering clean potatoes—!"

But, my goodness, we thought, as we stood outside the store and the hysterical voice of the ill-treated wife was left far behind, how like life it is! And how many times we get thanked for just such dumb things as "ordering clean potatoes," when our really worthly achievements are overlooked.

I don't doubt that there was once a mortal strife do a bit further stifling the desire to bestow mutual compliments, but it seems a pity that such a state of affairs has to exist. I suppose, for instance, that this storekeeper's wife would have rewarded with joy had her stern-visaged husband remarked in an offhand manner "Seems to me you look awfully pretty tonight in that dress." But no—he had to pick on the potatoes.—Cleveland Plain Dealer.

Diplomatic Magnate

A theater magnate of the west coast has won the reputation of being a great diplomat and a smart politician on account of the friendly meeting and entertainment provided for all visitors of importance. Anyone of any consequence in the film industry who enters his office will find a picture of himself or herself in a neat gold frame in the theater magnate's desk. The magnate has worked out the following system for putting himself in the good graces of important callers: He has in his private office a complete file of photographs of all the leading movie people. When any one of several hundred stars calls and is announced from the outer office, a quick transition of pictures is made. As the star walks into the inner sanctum his own picture is prominently placed on the desk of the magnate, who boasts of never having any friction with the temperamental film artists.—The Outlook.

Kept Prisoner by Wife

As his wife's prisoner a man has been living in a hayloft on his own farm at Baumholder, near Coblence, Germany, for over three years. The couple were constantly quarreling over the man's incurable dislike of work. The husband vanished suddenly in 1923, and the wife subsequently obtained a divorce on the grounds of desertion. It is now revealed that the faithless woman lost all patience with her husband's listlessness. She bundled him into the hayloft, where she kept him a close prisoner. When the man was at last discovered, he resembled a savage of the Stone age. His unkempt hair hung matted down his back, and his finger nails were two inches long.

Money in Rabbit Farm

Lady Hatchet Flyng four years ago gave up her millinery shop in London's west end to establish the first rabbit farm in the British Isles, and has found her business so profitable that she has been obliged to transfer it bodily clear across England to larger quarters. Accordingly a special train was chartered and her 400 Angora rabbits, which she breeds for their fur, shearing them as sheep are sheared, were loaded on board and sent to Winkfield, near Windsor.

Work to Know

Properly then best to other knowledge but what then best get by working; the rest is yet all an hypothesis of knowledge: a thing to be argued of in schools, a thing floating in the clouds, in endless logic vortices, till we try to fit it.—Carlyle.

Early Typewriter

On December 1, 1909, a patent for a typewriter was issued to John Pratt of South Carolina. He had been in England during the Civil war and had there produced his machine, completing it in 1868. It was first recognized in England.

Far-Eastern Saying

The cuckoo drinks the celestial juice of the mulberry tree, and is not proud; the frog drinks swamp water and quacks with content.—Yamaki.

CHURCHES

Congregational Church
Rev. B.G. Mattson, D.D., Minister

At the morning service the pastor will continue his lenten series with a sermon on "Christ's Mastery of Circumstances."

The Sunday School under the leadership of Mr. A. J. Stelter is continuing its services of this church, at 10:30 a. m. when Dr. Burns will preach, and at 12 m. when the Bible School with a class for each and all, and at 6 p. m. with the B. Y. P. U. who always have a lively meeting, and at 7 p. m. preaching service. At this service next Sunday evening our friend, Allie Moore, will tell us "Some lessons he learned and used while winning the World's championship as a Roller Skater." Every young person in Charlevoix should hear this talk. Let us fill the house to hear it.

The Ladies Aid are meeting today with Mrs. Charles Carey. They are doing a large amount of sewing. Their meetings are an inspiration, and their fellowship a great pleasure.

Church of God
Rev. Paul L. June, Pastor

Services held at the Chapel on West Hurlbut Avenue:
Morning service at 10:30.
Sunday School at 11:45.
Evening service at 7:30.
Prayer Meeting, Wednesday evening at 7:30.

Christian Science Society

Sunday service, 10:45 a.m., Subject "Mind."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 p. m.
Rev. Fr. Odelo.

Baptist Church
Rev. Herman Burns, D. D., Pastor

This church has made no spectacular effort with programs during the winter, but has been quietly forging ahead. Congregations have been of uniform size in the mornings, and the evening congregations have increased more than fifty per cent. It has not been shown that any other attraction has greater power to draw men than the Old Gospel and the Word of God from which it is taken. Sinners—to which class we all belong—secure more help from it than from anything else ever offered them.

If this interests the readers, a pleasant and a warm welcome awaits you at the services of this church, at 10:30 a. m. when Dr. Burns will preach, and at 12 m. when the Bible School with a class for each and all, and at 6 p. m. with the B. Y. P. U. who always have a lively meeting, and at 7 p. m. preaching service. At this service next Sunday evening our friend, Allie Moore, will tell us "Some lessons he learned and used while winning the World's championship as a Roller Skater." Every young person in Charlevoix should hear this talk. Let us fill the house to hear it.

Deserves Credit

Stage Hand—I'm doing a thousand men's jobs for one man's pay.

Manager—Nonsense!

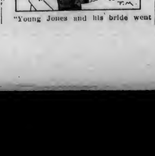
"Is It? Every night I gettis stand in the wings and make a noise like a French revolutionary mob!"—Humorist.

Completing the Record

Young Mother—Oh, Robert, I do believe baby's going to have a tooth.

Young Father—Probably. Seems to be the only thing he hasn't had.

A DREAM?



"Young Jones and his bride went off on their honeymoon in a perfect dream."

"What was the make of the car?"

Good Reason

Little Muriel—Doctor Brown is often at our house, but I never see him at years.

Little Bessie—Of course not. We don't owe him anything.

Teeth of man and prehistoric apes have been linked in an evolutionary series by two American scientists.

A Wise Boy

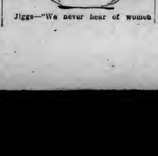
Blinks—What's the idea of stopping in the restaurant for a bite to eat when you are on your way home to supper?

Jinks—This is bridge club day and the can opener seldom gets into action before seven o'clock when my wife attends it.

Tom—Do you ever take your wife to a prize fight?

John—Goodness, no! She knows enough now!—Stray Stories.

TALK ALL DURING MEAL



Jiggs—"We never hear of women as after-dinner speakers." Briggs—"No—they talk all during the meal."

The Cause

Foster—So the minister's sermon made Browne sleepy, eh?

Doyle—No, it was the collection plate. He began to snore when they started passing it.

The United States Department of Agriculture is studying the cost of snow removal in different states to find the best and cheapest methods.

HAPPY memories childhood's sports —coming companions— and the delicious lunches of Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches that followed play-time.

Every genuine Monarch package bears the Glen Echo Trade Mark, which is the sign of the best in everything a conscientious brand (or world's finest food products—Coffee, Tea, Cocoa, Catsup, Pickles, Peanut Butter, Cereal Foods and Vegetables, and other superior table specialties.

MONARCH
Quality for 70 Years

Monarch is the only nationally advertised brand of QUALITY FOOD PRODUCTS sold exclusively through the men who own and operate their own stores.

CORNS

Ends pain at once!

In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this safely by removing the cause—pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle.

Dr Scholl's Zino-pads
Put one on—the pain is gone!

Have Kidneys Examined By Your Doctor

Take Salts to Wash Kidneys If Back Pains You or Bladder Bothers

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forces acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's poisonous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful effervescent lithia-water drink.

Leaves From Queen's Coffin

Among the gifts left to be sent by Mr. Theodore Hall Hull, barrister-at-law, are "the flowers and leaves which fell from Queen Victoria's coffin at Paddington station, and were picked up by me after the departure of the funeral train, and were mounted by me, with their frame and the brass casket in which they are kept."—London Tit-Bits.

Costs 10 cents by mail, but you can get your copy free by calling for it at your "Pine Tree" dealer.

FRINGE EPIDEMIC NOW RAGING; SOME COLOR SCHEME REQUIRED

FRINGE epidemic rages in the world of fashion. What is more, all symptoms point to a spreading of the vogue during the coming months. The mode seems determined to befringe everything as it goes.

At formal functions the woman of smart style literally restwines herself in fringe as she sweeps her slender-toned form in her lavishly fringe-trimmed shawl, such as is the boy, the pride, the envy of the normal feminine heart. The picture shows one way of wearing the beloved fringed shawl. No doubt, this pronounced vogue for fringe found its inspiration in shawls such as this, which by the way show no signs of waning popularity.

Frock and Wrap Trimmed With Fringe.

Ily no means, however is this passion for fringe confined to evening wear, for a review of styles in afternoon frocks reveals fringe as an idol of the daytime hour as well.

A strong argument in favor of fringe is the graceful silhouette which it never fails to achieve. Perhaps this accounts more than anything else for the sweeping inforcement which the mode is giving to fringe this spring.

The latest idea is to dangle fringe from the long tight-fitting sleeve, somewhat after the manner shown in the afternoon frock of black faille silk herewith illustrated. In some instances the fringe is much longer than that here pictured, falling at times from the elbow to exaggerated depth.

The black-and-white vogue finds charming expression in long fringe which alternates strands of each. Very striking is a black flat crepe frock styled with one deep row or tiers of black-and-white fringe. At the simple neckline, pose a white flower for the completion of the black-and-white compose.

Favorite fringed dresses stress a straight narrow model, whose lines are broken by two deep tiers of thick silk fringe, which in color is an accurate match to the fabric it trims. Often this fringe reminisent is developed from a scalloped low waistline.

Fringe placed diagonally in sections also produces an interesting effect. Most popular and most suited to practical wear is the silk fringe which is now being featured in every new color, also black and white. For elaborate effect ostrich fringe also fringes of beads are approved by the mode.

Is is written in the leaves of the mode that the costume must present, from head to foot, a perfect color scheme. Which means that footwear requires a no less fastidious styling than does headwear, and that the details of handbag and other accessories dare not be slighted in the ensemble.

A correct color ensemble is achieved in the spring outfit worn by the young woman here pictured. Her smart sports frock is of heavy beige crepe in the popular two-piece model. The felt cloche is in matching shade, while the dainty oxfords of beige kid lend real distinction to the costume.

Having discovered that shoes, hat and handbag, when fashioned of the same medium, add a compelling style touch to the costume, specialists in leather artistry are accomplishing nothing short of marvelous effects in this respect. Looking for new fields to conquer, these wizards of fine leatherwork are using such strange mediums as sharkskin, lizard and snakeskin, from that of the lean constrictor and python to that of the less formidable water snake. Shoes and accessories of these various snake-skins are worked in combination with solid colored kid into a medley of ornate designs. Notwithstanding their extreme novelty they are making the "hit" of the season. A smart two-tone-strictor compose of but and bag is here shown. Of course to complete the ensemble nicely will choose shoes which have an inlay or applique of this same snakeskin.

For stormy weather kid legetires are the solution. As the picture shows, they are a sure protection to light hose from unsightly mud spots, which, in every woman knows from experience, are next to impossible to avoid. These legetires are obtainable in all colors as well as black.

Leather Footwear and Accessories.

For southern wear, which, by the way, is but a forecast of coming summer fashions, white kid in an accepted mode. The handsome shoes in the picture carry heels of black patent kid with narrow bands of black for trimming.

JULIA BOTTOMLEY.

(©, 1927, Western Newspaper Union.)

Girdles for Stout

The right kind of soft girdle correctly placed on the hipline of a dress and perhaps tied with a huge bow at the side will make the figure seem slimmer. But placed too high or too low, it will accentuate the hip curves.

Bolero Jacket

The bolero jacket has a place on many of the new designs. It is a decidedly youthful thing and must be worn on a figure that is extremely straight and supple. But unless this sort of figure has a starting point the bolero can be one of the most flattering things in the world. It cuts off the height of the taller girl. It widens the figure that is too thin.

Cape Coats for Junior Girl

Girls from the ages of twelve to fifteen look extremely smart if their coats are of flannel made in the fashion of the popular cape models.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

I know not where his islands lift their fronded palms to air, I only know, I cannot drift, beyond his love and care.

WAYS WITH SWEETBREADS

Sweetbreads are perishable meat and as the warm weather of spring comes on, will be more plentiful. When the price is not prohibitive they should be frequently used.

Braised Sweetbreads.—Place in a baking pan a layer of new peas, small carrots and new potatoes; on this bed of vegetables place parboiled sweetbreads with a few cubes of fat salt pork. Add enough of the stock in which the sweetbreads were cooked to cover the vegetables. Cover tight and cook forty minutes. Season with salt and pepper during the cooking.

In almost every method of serving sweetbreads they need the following preparation: Be sure that they are fresh, as they spoil very quickly. Remove all the skin, fibers and tubes without breaking the sweetbreads. Soak in cold water to keep them firm and to extract the blood. Drain and put to cook in simmering water slightly salted and with a tablespoonful of vinegar to a quart of water; simmer for twenty minutes, then plunge them into ice water to keep them firm and white. If they are to be baked, wipe them in a cloth and put under a weight to flatten them.

Sweetbreads in Gelatin.—Cut cooked sweetbreads into small dice, using two cupfuls. Soak a tablespoonful of gelatin in one-fourth of a cupful of the broth and dissolve it in one half cupful of hot broth. Add the sweetbreads, one tablespoonful of lemon juice and salt and pepper to taste. Stand the mixture in a pan of ice water, stir frequently and as it begins to stiffen fold in one cupful of whipped cream and two tablespoonfuls of minced parsley. Turn into molds and chill. Serve cut into slices laid on crisp lettuce, with salad dressing.

Creamed Sweetbreads.—Parboil a pair of sweetbreads, cut into one-half inch cubes or small pieces. Reheat in one cupful of white sauce and serve on toast or in patty shells, or timbale cases.

Sweetbread Salad.—Cut the cooked sweetbreads, mix with celery and mayonnaise. Serve on lettuce.

Stuffed Steak.—Take a nice cut of round steak, prepare the dressing as for fowl, spread the steak with the dressing, lap over and sew together. Place in a dripping pan, season with salt and pepper and strew on top with minced onions and bits of butter; add a little hot water. Roast slowly for an hour or more. Prepare the gravy and serve.

Commonplace Dishes.

When a small amount of meat must supply the main dish for the family it may be placed out in the following manner:

Baked—Sausage With Rice.—Put pork sausages into thin slices; butter a baking dish and fill with cold boiled rice. Moisten the rice with beef broth, gravy or beef extract, spread the sliced sausages over the top and bake in a hot oven until the sausage is crisp.

Kentucky Batter Corn Bread.—Take two cupfuls of corn meal, three eggs (beat well), one teaspoonful of salt, one tablespoonful of fat, mix with milk to a soft batter to pour. Pour into buttered shallow tins and bake in a hot oven.

Hot Cheese Sandwiches.—Break open hot baking powder biscuit, spread with butter and lay in a thin slice of good flavored cheese. Cover with a hot cloth and serve quickly. With a cup of tea and a dish of fruit, this makes a nice lunch.

Baked Hash.—Butter a shallow baking pan and pile in chopped seasoned veal with hard cooked egg or two finely chopped, season with salt, pepper, melted fat and a green pepper finely chopped; moisten with a little gravy or broth and bake until crisp.

Potato Soup.—Peel one-half dozen potatoes and put to cook in boiling salted water to cover. In a saucepan put three tablespoonfuls of butter and when melted add two or three sliced onions; cook until slightly yellow, then add some of the potato water and finish cooking. Mash the potatoes, draining off all the water over the onions and add hot milk, salt and butter with the onions to the potatoes. Serve unstrained, or if preferred the soup may be put through a sieve and then reheat.

Chicken Custard.—Take one-half cupful of strong chicken broth, add one-half cupful of milk, one egg, salt and pepper to taste. Strain into cups and bake in hot water. This is especially good for invalid cookery.

Steamed Brown Betty.—Mix two cupfuls of brown bread crumbs with two cupfuls of chopped apple, add two-thirds of a cupful of brown sugar, one cupful of raisins mixed with two tablespoonfuls of flour and one-half teaspoonful of salt, add one cupful of milk in which one beaten egg has been added and beat well. Steam in buttered molds two hours. Serve with lemon sauce.

Sailor's "Weather"

The sensum often speaks of "sweating" when he has in mind nothing more than wind, says Nature Magazine. "Hazy weather" suggests to the landsman the idea of rain and mud, but in mutiled parlance it means a blow.

Largest Garden Crops

In this country only white potatoes, sweet potatoes and tomatoes of the garden vegetables exceed the lettuce crop in market value.

Experience Will Help Others, Says Chicago Man

Suffering from Indigestion, Nervousness and Run-down Condition, Chicago Business Man Regains Health and Strength, Takes Tanlac

Mr. William E. Simon, 127 No. Dearborn St., Chicago, says: "After suffering from nervousness, run-down condition, I regained good health, new strength and youthful energy . . . Thanks to Tanlac.

"Imagine not being able to eat without suffering from indigestion. I was so nervous and my luncheon suffered because I was always tired, too tired to think. My head always throbbed with blinding pain and dizziness bothered me. Still I dragged along. Then came the moment when I had to get relief.

"I decided to try Tanlac and the results amazed me. I began to sleep better, eat my food with relish and without suffering from indigestion. . . .

"Tanlac made me 100 per cent. I now enjoy robust health, sleep like a child, and work all day without tiring. My head is clear as a bell. Everyone should take this wonderful tonic."

Tanlac has helped many Illinois men and women. It is Nature's remedy made from roots, barks and herbs according to the famous Tanlac formula. The first bottle usually brings wonderful results. Keep up the treatment and you grow stronger, healthier, more robust.

Don't neglect your health, don't suffer from pain needlessly, begin taking this wonder tonic now. Ask your druggist for Tanlac—today! Over 40 million bottles sold.

DR. STAFFORD'S olive tar heals sore throat. Don't cough all night—a few drops gives quick relief. Never fails.

Council Proceedings

Council Chambers, March 10, 1927.

The common council of the city of Charlevoix met on the above date, pursuant to law, for the purpose of canvassing the votes cast at the Primary election held in said city on Monday, the 7th day of March, 1927, with the mayor presiding. Aldermen present—Bridge, Eckinger, Geiken, Partridge.

On motion duly made the council proceeded to canvass the votes.

The total number of votes cast for the office of Mayor on the Republican ticket was 417 of which Arthur Bergeon received 417.

Moved by Ald Geiken, seconded by Ald Eckinger that Arthur Bergeon having received a majority of all the votes cast be declared the nominee of the Republican party for the office of mayor. Motion carried.

The total number of votes cast for the office of city clerk on the Republican ticket was 357 of which Ray S. Hamilton received 357.

Moved by Ald Partridge seconded by Ald Bridge, that Ray S. Hamilton having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of city clerk. Motion carried.

The total number of votes cast for the office of city treasurer on the Republican ticket was 511, of which John Cook received 377, Alexander J. Hamilton 134.

Moved by Ald Geiken seconded by Ald Eckinger, that John Cook having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of city treasurer. Motion carried.

The total number of votes cast for the office of Justice of the Peace for full term was 468, of which Joseph R. Cooper received 175 and Charles Ray Ashdon 293.

Moved by Ald Partridge seconded by Ald Bridge, that Charles Ray Ashdon having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of Justice of the Peace. Motion carried.

The total number of votes cast for the office of park commissioner, full term, for the Republican ticket was 394, of which Frank Partridge received 394.

Moved by Ald Livingston seconded by Ald Eckinger that Frank Partridge, having received a majority of all votes cast, be declared the nominee of the Republican party for the office of park commissioner. Motion carried.

Total number of votes cast for the office of Supervisor of the First ward on the Republican ticket was 65 of which Harry A. Craig received 65.

Moved by Ald Geiken seconded by Ald Bridge that Harry A. Craig having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of supervisor of the First ward. Motion carried.

The total number of votes cast for the office of Supervisor of the Second ward on the Republican ticket was 172 of which John H. Bugbee received 172.

Moved by Ald Geiken seconded by Ald bridge that John H.Bugbee having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of Supervisor of the Second ward. Motion carried.

The total number of votes cast for the office of Alderman of the Second ward on the Republican ticket was 168, of which Archie Alcock received 168.

Moved by Ald Bridge seconded by Ald Partridge, that Archie Livingston having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of alderman of the Second ward. Motion carried.

The total number of votes cast for the office of Constable of the Second ward on the Republican ticket was 157, of which Elmer Johnson received157.

Moved by Ald Partridge seconded by Ald Livingston that Elmer T. Johnson having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of Constable of the Second ward. Motion carried.

The total number of votes cast for the office of Supervisor of the Third ward, on the Republican ticket was 162, of which Archie Alcock received 162.

Moved by Ald Geiken seconded by Ald Eckinger, that Archie Alcock having received a majority of all the votes cast, be declared the nominee of the Republican party for the office of Supervisor of the Third ward. Motion carried.

The total number of votes cast for the office of Alderman of the Third ward on the Republican ticket was 142, of which Henry Partridge received 142.

Moved by Ald Bridge seconded by Ald Partridge that William J. Weikel having received a majority of all votes cast be declared the nominee of the Republican party for the office of Constable of the Third ward. Motion carried.

On motion duly made the council adjourned. ARTHUR BERGEON,
Chas. H. Lamphear, Mayor.
City Clerk.
By D. S. Payton, Deputy.

Council Chambers, March 14, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. Aid present, Bridge, Eckinger, Geiken, Howe, Livingston, Partridge.

Robert Bridge, mayor pro tem, was called to chair.

Minutes of the meeting held March 1 and 12, 1927, were read approved.

The Finance committee submitted the following bills as regating $3,596.21 recommending they be allowed and orders drawn for the same.

To the Honorable Mar 11, 1927.

The Mayor and Common Council of the City of Charlevoix:

Gentlemen:—Your Finance committee, having examined the following bills, find them correct and recommend they be allowed:

ROAD BUILDING

SAVING IN TIRES
PAYS FOR PAVING

Automobile owners in Minnesota saved $3,600,000 last year through the use of the 800 miles of pavement by the trunk highway system. This saving in tire wear alone, says a bulletin from the Minnesota state highway department, is more than double the annual interest on the sum invested in trunk highway pavement.

In estimating the "interest value," the bulletin points out such a charge must be considered for the entire investment, whether pavement is paid for by a bond issue, as was done on county reimbursement projects, or when it is paid by cash, as has been done on all state trunk highway jobs. The total investment in pavements is about $25,000,000 and at 5 per cent the annual interest cost would be $1,250,000.

The estimate on saving in tire wear is based on reports made at the annual meeting of the highway research board at Washington. Reports of tests made by the Washington State college, the Kansas State Agricultural college and others, showed that on a mile of concrete carrying 100 cars per day, $190 worth of rubber would be worn out in a year, while on a brick pavement was 157, of which Chicago used 78, Detroit 77, Akron 76, Fort Worth 75, Cleveland 74, Columbus 73, Indianapolis 72, Milwaukee 71, Cincinnati 70, Los Angeles 69, Minneapolis 68, Kansas City 67, Seattle 66, Portland 65, Oakland 64, Omaha 63, Denver 62, Memphis 61, Dallas 60, Houston 59, Atlanta 58, Birmingham 57, Salt Lake City 56, Spokane 55, Tacoma 54, Duluth 53, Wichita 52, Oklahoma City 51, Tulsa 50, Little Rock 49, Fargo 48, Sioux Falls 47, Jacksonville 46, Miami 45, Tampa 44, Pensacola 43, Mobile 42, New Orleans 41, Shreveport 40, Galveston 39, Fort Worth 38, Waco 37, Austin 36, San Antonio 35, El Paso 34, Phoenix 33, Tucson 32, Albuquerque 31, Santa Fe 30, Cheyenne 29, Boise 28, Salt Lake City 27, Reno 26, Las Vegas 25, Carson City 24, Sacramento 23, San Francisco 22, Oakland 21, Los Angeles 20, San Diego 19, Portland 18, Seattle 17, Spokane 16, Tacoma 15, Boise 14, Cheyenne 13, Albuquerque 12, Santa Fe 11, Phoenix 10, Tucson 9, Reno 8, Las Vegas 7, Carson City 6, Sacramento 5, San Francisco 4, Oakland 3, Los Angeles 2, San Diego 1.

To Beautify Highways

Highways for automobiles are to be beautified in England. The county of Middlesex, through which most routes from London to the north or Scotland pass, is preparing to plant red and white chestnuts, oaks, limes, ash, beeches, Cornish elms and Norwegian maples at the sides of thirty miles of motor roads. The trees will be planted 20 yards apart, and each avenue will be about one mile in length. Nearly 5,000 trees will be required.

Airplanes Help Roads

Airplanes are to be used in roadmaking for the first time. They will carry material for the highest road in the world, which is being built by the Italian aeronautical society, 14,312 feet high, in the Alps near Mont Blanc. On this track, which is impassable for a mule, every pound of material is carried by men. The first airplane transportation will be piloted by Lieutenant Thoret, who has flown over Mont Blanc.

Good Roads Hints

Construction work on the Old Spanish trail in the Mississippi district is progressing rapidly and the motorist finds many miles of excellent highway in this district.

• • •

World highway development has been progressing fast. More than $550,000,000 has been voted by initiative exclusive of the United States during the last 12 months for highway projects.

• • •

There are enough roads in this country to completely girt the earth 120 times, or, estimating the average width at 18 feet, to make a single highway around the world 2,160 feet in width.

• • •

The Connecticut highway department spent $10,508,715 during the fiscal year ended July 1.

• • •

The Japanese government is planning an extensive road construction campaign which will cost 160,000,000 yen and will result in 14,000 miles of automobile roads.

• • •

Highway improvements in the United States for 1926 are estimated to cost $1,600,000,000. There is not a state in the Union whose roads in 1926 cost less than $2,000,000.

Symbolic Japanese Gates

The Torii gates in Japan are archways of two upright posts with two horizontal beams. They were originally supposed to be the perch for sacred fowl that heralded the approach of day. The word "Torii" means either a bird rest or a gateway.

Touch of Real Winter

During the winter of 1903, ice 25 inches in thickness formed in many places in England.

TEACHER SOUGHT FOR FAR NORTH

Government Hopes Some One Will Volunteer.

Seattle, Wash.—Any school teacher who thinks life too easy, or who desires to go world-conquering, is invited to tackle the earth's toughest teaching job.

The invitation is extended by J. H. Wagner, chief of the Alaska division of the United States bureau of education here. And what's more he expects the invitation to be accepted. Here's the layout:

Eighty-eight miles northwest of Nome, in skering sea, is King Island. King Island is four miles around and its sides go straight up. There are white men live there, because those who have tried it invariably fell off.

On King Island live 112 natives, 33 children being included. They're all full-blooded Eskimos. In winter they catch sea lions and walkies.

In summer the entire 112 souls dessert the island in skin umiaks, paddle to Nome, sell ivory and furs, buy kerosene, sugar, coffee, tea, and then hike back to King Island for the winter.

At the top of the island is a small flat spot, say natives say. Nobody has seen it.

Next spring there is to be a school built on top the island. The teacher will build it.

Then he'll go to Fort Davis and get lumber and nails. They to Old Shiock

CHARLEVOIX HARDWARE CO.

Cleaning, Painting, Brightening-Up Time Is At Hand.

All your wants are here under one roof.

Pails, Mops, Scrub-Brushes, the neatest oval mop-pail, can't up-set, with wringer that you ever saw, Sweepers, Hoovers (sale or rent), Floor Wax, (an electric floor polisher for rent)—all things for cleaning.

Paints.

We honestly believe the B. P. S. brand is the best paint to be had or we should not have changed from the line handled for years by this store.

We have B. P. S. Paints, Varnishes, Lacquers for all purposes in all the colors and shades. Call and see the possibilities and combinations.

Muresco and Alabastine and the best line of paint brushes ever brought into town. Some odds and ends of paints and enamels in small cans, enough to brighten up an old chair or table. Everybody's doing it—costs a trifle.

Floor Coverings, Armstrong and Congoleum, piece stuff and rugs and a splendid selection of Wool Rugs. A piece or two of New Furniture, New Shades at the windows and the house is like new.

The whole lay-out is here and the prices are right.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Empire Stiles and Addie Stiles, his wife, of Charlevoix, Michigan, unto by James F. McGeagh, of Charlevoix, Michigan, dated January 20th, 1914, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 26th day of January 1914, in liber 39 of mortgages on page 247, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Benjamin Brown, of Charlevoix, Michigan, by assignment of mortgage dated September 8th, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on page 247, liber 55, which assignment was afterwards sold, assigned and transferred by the assignee, Benjamin Brown, unto Marion Block of Charlevoix, Michigan, by assignment of mortgage dated September 21st, 1915, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 5th, 1915, in liber 55 of mortgages on page 3, on which mortgage there is claimed to be due at the date of this notice the sum of Five Hundred Thirty-Two and 82-100 Dollars, including the principal sum due with interest and taxes paid by the assignee of the mortgagee, together with an attorney fee of twenty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof.

Now, Therefore, Notice is hereby given that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1923, in Liber 62 of mortgages on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, County of Charlevoix, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E¼NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100, (1442.97) Dollars, and accrued interest thereon.

THE FEDERAL LAND BANK OF SAINT PAUL, Mortgagee.
Dated, Dec. 22, 1926. St. Paul, Minnesota.
F. H. DODDS,
Attorney fot the Mortgagee.
36-13t Mc. Pleasant, Michigan.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by Fred Rosa, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A. D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 56 of mortgages on page 242, the description contained in said mortgage being corrected by a mortgage executed by said George Rosa to said Rudolph C. Korth, dated the 4th day of October, 1926, and recorded in the office of the Register of Deeds, of Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 63 of mortgages on page 200, on which mortgage there is claimed to be due the sum of Nine Hundred Six and 73 100 ($1256.73) dollars including interest computed to the date thereof, and also an attorney fee of twenty-five ($25.00) dollars provided for in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage or any part thereof.

Therefore, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Monday the 20th day of June, A. D. 1927, at the east front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and all legal cos ts, together with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows: Commencing at the southeast corner of the southwest quarter of the northeast quarter, Section twenty-three (23), Township thirty-four (34) North, Range eight (8) west; thence west 30 rods to a point which is the starting point; thence north 80 rods; thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

LEGAL MILL SPEEDS ROUTINE MEASURES

Controversial Issues Bottled in Committee May be Strangled.

Lansing, Mar. 21—The legislative mill is evidencing signs of increased activity, the daily sessions are growing longer and each day the Senate and House calendars show a new grist of legislative proposals. It is high time that the lawmakers get busy in earnest because over 600 measures are now pending and it is expected that final adjournment will not be more than a month in the future.

Although a large amount of attention is being devoted to appropriation bills and other routine legislation, most of the controversial issues of greatest public interest are still held up by various committees. The Senate Judiciary committee by a vote of 4 to 3 postponed indefinitely further consideration of the Armstrong-Palmer capital punishment bill. Immediately following this action a petition was circulated among Senators by Sen. Chester M. Howell of Saginaw and Sen. Norman B. Horton of Fruit Ridge, requesting the committee to report out the bill for consideration and vote.

However, this request was ignored and there is every indication that the death penalty bill is buried for this session. Considerable resentment over this action is evident among the members of the House. They are threatening to hold up all Senate bills to force the Senate to take action on this proposition. It is a safe bet that bills sponsored by the four Senators who voted to keep the bill in committee will experience rough sledding in the House.

Highway Fund Bills—One of the most perplexing problems facing the House is that of amendments to the present gas and weight tax laws. All the several midnight conferences have been held behind closed doors by various groups, no definite plan has been reached and the committee has not taken any definite action. A proposal that the gas tax be raised to 6c and the weight tax on commercial vehicles be decreased and permanent licenses be provided for passenger cars has gained a great deal of support, but there is another faction which seems to favor leaving the weight tax as it is and increasing the gas tax 1c. They would distribute the extra revenue so produced equally among the 83 counties in the state to lighten the burden of the general property tax for county highway purposes.

Agricultural Bills Mark Time—Other legislation of special interest to farmers made extremely slow progress during the past week. The Senate committee on Conservation has not taken any definite action on Sen. Horton's bill which would require all hunters and other (Concluded on page 8)

OLD LANDMARK NOW BEING RAZED

Built and Occupied by the Late M. J. Stockman in Seventies

The wooden structure with its addition located at 304 Bridge St., part of the Axres Road holdings are being razed this week by G. W. Lusk and Son who, through a recent purchase become owners of the building, taking the same over on account of the value of the material for use in other construction work, and at the same time removing something of a fire hazard in the center of the down town business district.

With the removal of this structure Bridge street loses one of the few remaining historic buildings on the street as this if not the first was one of the earliest business places erected in Charlevoix, built by the late Morris J. Stockman and for years afterward occupied by him as a retail hardware store and tinners shop in the which he continued until the brick block located at 302 Bridge street was ready for occupancy by him some time in the eighties.

The building now in process of destruction carries with it an element of tragedy, probably the greatest of any in this entire region, as it was in this building that bodies from the ill-fated Champlain was taken after the fine steel steamer burned just off the port of Charlevoix forty years ago next June, when twenty-two lives were lost, making for a tragedy that is well remembered by many local citizens.

HOME NUTRITION PROJECT

Course will be Available for Ladies This Spring

We are pleased to announce that a course in Home Nutrition will be available for the ladies of the county. It will be conducted along similar lines as the Clothing Project of last year and through leaders selected by the various interested communities, who will receive instruction from the specialist in charge, their passing on the information received to classes organized in the local communities. The success of this project depends entirely with the communities who desire this work and their organizing and selecting leaders.

With the early spring, the project will probably start about the middle of April. If you wish more information in regard to the project and would like to have your community organize, phone or write to County Agent Mellencamp, Boone City, and he will lend his assistance.

1905 1927

RESULTS

Results are obtained. They don't just happen, and this applies Particularly to a Savings Account. Persistent saving in youth will certainly bring independence in old age.

Capital and Surplus over $40,000.00

Charlevoix State Savings Bank.
Under State Supervision.

CITIZENS MILITARY TRAINING CAMP

Enrollments Coming in Fast No Preferred Class of Students

The "Doughboy" may be the backbone of the army, but the mounted branches have not lost their appeal for young America if the number of applications to attend this summer's Citizens' Military Training Camps is accepted as a basis of comparison.

Although active enrollment began March 1, fifty per cent of all vacancies in the cavalry and sixty per cent in the field artillery have been filled, leaving 193 enrollments among the "yellow legs" and 119 among the "gunners" out of a total of 4,300 to be trained.

Never before in the history of the Sixth Corps Area enrollment, has there been such a rush to fill vacancies in the mounted branches. Only students who return for a second year are permitted to select a branch; all first year men are required to take the Fifth Course, which deals mainly with fundamentals and lays a foundation for future training in any branch.

General Lassiter advises all young men who are contemplating a month's outing at one of the camps to apply early. These camps are government institutions; the democracy of them is an outstanding feature; there is no preferred class of students. Those who apply early and can qualify, physically and morally, have priority over all others.

ENTER PORT SOON

Captain John Roen Becomes Owner and Manager

Steamship Craycroft, Will Carry Sand and Gravel For Road Work

A new ship will soon enter the great lakes chain, engage in general transportation business with Charlevoix as its home port, and name as the ship can be placed in commission will be brought from the Atlantic seaport by its managing owner, Captain John Roen, who left for Newport, the present location of the steamship, with two or three local sailormen last Monday.

The ship now known as the Craycroft was constructed at Ecorse, Mich., in 1918 for the government and is one of the several ships in charge of the Shipping Board and for sale to private parties. She has a length of 253 ft. 6 inches; breadth 43 ft. 6 inches; depth 20 ft. 2 inches; gross tonnage of 2232 and net tonnage of 1358. She is fully equipped and powered with a triple expansion engine rated at 1240 horse-power and carries a crew of twenty-two or more.

As soon as the ship enters local waters she will be used under charter for carrying sand, gravel and cement and Captain Roen states that a full season's work is ahead of him at this time, with a heavy run of the work being the delivery of sand and gravel from South Fox Island to Muskegon and other ports along the east Lake Michigan coast to be used in highway construction work.

In size this steel steamer compares favorably with the J. B. John, now in this port, in length and breadth, but not as high above the water line. Two large derricks, one forward and one aft will be added to the present equipment in order to facilitate and make speedy work in taking on and off her cargoes.

Her name and also port of hail will be changed in the near future.

GET SOIL-TEX OUTFITS

Can be Purchased for only Twenty Five Cents

Why not buy one of these outfits and one of these days test samples of your soil from each of your fields for soil acidity. These outfits can be purchased for only 25c and have solution and test papers sufficient to test every field in your community.

If your soil needs lime from this test by all means plan to use either lime or marl this year, the sooner you sweeten your soil the sooner you will derive the maximum returns for your investment and labor. When lime is necessary the application of lime or marl should be the first step in improving the soil fertility.

Drop a line to County Agent Mellencamp and he will save one for you, or when you are him ask for one and he will supply you.

Getting Ready for Navigation on the Locks --Island Ranges Lighted

The first official nautical act of the season was performed Sunday when the Round Island ranges were lighted by R. H. Burdeno, who, accompanied by one of the sailors from the Clover, walked in ten inches of water to the island, says the Soo News.

According to Mr. Burdeno, the ranges were in bad shape. The ice around the island was rotting fast. Lighting of the Round Island ranges this early in the season is due to the fact that the lee piles so high in the early spring thaws as to make the island inaccessible after navigation opens.

The hustle and bustle presaging the opening of the navigation season is on at the locks. Preparations for painting the gates were under way today.

Others of the operating building at the locks have been repainted, scrubbed and cleaned and will soon be ready for business season.

Marine men generally see an early opening. They say that even if storms and frosty weather follow the present mild spell, the damage already done the ice in the river cannot be repaired by the March 15th.

PENSIONS ARE DELAYED

Appropriation Bill Blocked in the Senate Last Day

Definite announcement has been made by the Com. of Pensions that after the April 4th pension check go out there will be no further pension payments until July 4th. This means that the monthly payments to all military pensioners of all classes and of all wars, including the blind and otherwise disabled Civil War veterans who are receiving the maximum of $90 per month will be suspended for a period of 90 days because of the failure of the deficiency appropriation bill which was blocked in the Senate on the last day of the session by the objection of Walsh, democrat of Massachusetts.

In July the pensioners then living will receive three months' payments in one, The Administration was fully appreciative of the very real hardship which the delay in the payments will impose on the round half million persons on the pension rolls and considered all sorts of expedients to avoid it after Congress adjourned without providing the necessary money. There proved to be insurmountable legal barriers standing in the way.

The Com. of Pensions in his statement pointed out also that at present the pensioners are dying at the rate of 4,000 per month, which means that approximately 12,000 persons will die in the three month interval without the benefit of the pension due them.

SPECIAL EVANGELISTIC SERVICES

To Be Held at Petoskey Beginning on Sunday, April 9th

Petoskey will have another community evangelistic campaign this year. The meeting will be sponsored as in former years by the Parr Memorial Baptist church. The whole community including many cities and villages of Northern Michigan will co-operate.

The "Bill"W. S. Colegrove party, are to be the evangelists. The party consists of three persons, Evangelist "Bill"W. S. Colegrove preacher, Prof. C. E. Parker singer and director of music, Mrs.W.I let S. Colegrove, young people's and women's worker.

The meetings in Petoskey are expected to be the largest and the best held in Petoskey since the famous Torrey-Alexander campaign when a special trains were run to accommodate the crowds that attended from nearly all parts of the state.

The meetings are to be strictly inter-denominational in the sense that all denominations will share alike in the results of the meetings. All persons signing cards or making decisions will be requested to register their preference and will be urged to join the church of their choice. In a meeting conducted in 1925 names were turned over to churches in six nearby cities and villages and to twelve churches and religious organizations within the city. The meetings will commence Sunday, April 9th.

SEVEN COURTESIES

To Extend to Every Michigan Visitor

With the Host Spirit Toward the Thousands of Vacationists

Courtesy, a small booklet put out by the Michigan Tourist and Resort Association is ready for distribution. They can be obtained free through application to the association at 96 Monroe Avenue, Grand Rapids. In this pamphlet Truth and Greetings are given that are worthy of consideration. These are reproduced as follows:

1 Be Prompt—When tourists come remember they are our guests and should be treated as such.

2 Smile—Be cheerful. Remember that a tourist is away from home and that a friendly smile and greeting are among the things he cannot buy but you can give without cost.

3 Be Fair—When a guest applies for accommodations, do not guess how high a rate he will stand, but try to estimate what's sort of a room he wants and let him know he can have one better or less expensive if he wants it. Next year he will be back.

4 Be Helpful—When a stra nger asks for information, take the time to give him accurate and specific instructions. Go and show him, if possible. Remember how grateful you have been as a visitor elsewhere to receive information in a gracious, unhurried spirit. See that motorists are furnished Western Michigan road maps.

5 Be Thoughtful—Suggest little trips in your locality which you think may add to the pleasure of the tourist's visit; this will keep them at your place, too, instead of moving on.

6 Be Appreciative—Let tourists know that you are glad to have them in Western Michigan and that you value their patronage.

7 Invite them to Come Again—Give the parting guest the same warm handshake when he leaves that you give him when he comes.

THREE DAY SHINGLING BEE

Large Number Gathered at Ironton Last Week

The three days shingling bee at the Ironton church last week was a notable example of good will and hearty team work by the men and women of the neighborhood. The women served dinner on Wednesday, and on Thursday and Friday the coffee for lunch was provided by the Ladies' Aid Society and the preparation of the steaming comfort was kindly provided by Mrs. Ross Alexander, vice-president of the Ladies Aid.

The following men gave their services: Will Bird, Datus Dean, Elisha Jones, W. F. Johnson, Phil Howe, Ed. Cunningham, Matthew Saunders, Robert Sherman, Will Meggison, Ole Nelson and son, Emil Nason, Peter Nason and son, Lolus Peterson, Will Sanderson, Sam Woodworth, George Winkins, Lee Pierce, Oakley Sanders,

Alfred Williams, James Tumoth., Nip Carlson, Marion Jackson and B. G. Mattson.

The sound of hammers was not loud enough to drown the sound of laughter and the clever humor of some of the talented comedians. Everybody had to take his dose of chaffing and most of them were quite capable of giving as good as was sent. A radio broadcasting station would have gathered some gilt edged stuff for the delectation of a million fans if the talent had only been recognized. Politics, religion and chickens were prominent topics of debate and self elected boosters told the others how to do the job right. Meantime every man did his bit and the pastor from an exalted perch astride the roof tree looked down with slides of shining shingled roof with gratitude and thanks for this jolly good fellows who joined forces for this fine good turn for the little church by the lake side.

TELEPHONE SERVICE SUPREME

Talk to London, Four Thousand Two Hundred and 78 Miles

When San Francisco talked to London, a distance of 7,375 miles, transatlantic telephone service was finally accomplished for the whole United States. The human voice traveled over hardened copper wire through Chicago and New York to Long Island. There the voice jumped almost 3,000 miles to be picked up by only a small copper wire at an English station.

At the eastern end of our continent it was magnified 2,000,000 for its journey thru the ether, a la radio. Transatlantic engineers arranged a path for it over the water with a 3,000 meter wave length, and skipping at incalculable speed, away went the human voice.

The American telephone system deserves credit for giving this new service to the public. It pioneered the undertaking, just as American genius gave the telephone to the world and furnished transcontinental telephone service in the United States before other countries had even fair telephone communication.

Once again our telephone system developed and carried on by private initiative and enterprise, gives an object lesson to its superiority in rendering service to the people, in comparison with the less publicly owned systems of Europe.

"Sent to Coventry"

This phrase, which is in quite general use in English schools, seems to ignore a person absolutely. The generally accepted explanation is that the citizens of Coventry objected at one time to the soldiers sent to the town. They treated them with silent contempt, and for a soldier to be ordered to the town meant little less than a mild excommunication.

Druggists' Mortar Old

The druggists' mortar, which has come down to modern generations almost unchanged in shape, can be traced back to prehistoric times. The mortar in its present shape was used centuries before medicine was known as an art, and was used to crush hard bodies. It was used by savages as well as civilized people.

ORGANIZE CLUB WORK

Any Boy or Girl, Ten to Twenty Are Eligible

Now is the time of year to be thinking of club work for your boy or girl. Any boy or girl between the ages of ten and twenty are eligible to enroll and be a part of this great educational movement. Five members are necessary to form a club, also some interested person to act as leader, and cooperation of the community.

For the girls we have canning club work which is very instructive and of great practical benefit to the members. For the boys and girls we have Calf club work, Sheep club, Pig clubs and Crop clubs such as potatoes, beans, corn, etc. If your boys and girls are interested in any of these clubs, please inform your agent of their desires and efforts will be made to organize as many clubs as possible. Our goal is to have 175 members for 1927. Over a hundred now. Can we do it? Sure!

Coming April 4th.

Monday, April 4th is the date when Dr. Leahy, the optometrist, will be at the Hotel Charl

Mail Flyer Presented With Trophy

Shirley J. Short, outstanding post office air mail pilot, who was presented with the Harmon trophy for 1926 by President Coolidge. This much-coveted prize is awarded annually by the American section of the International League of Aviators to the flier who has done most during the year to demonstrate the reliability of the airplane as a means of transportation. In the photograph, left to right: L. D. Gardner, editor of Aviation; President Coolidge; Postmaster General Harry S. New; Assistant Postmaster General W. L. Glover and Shirley J. Short.

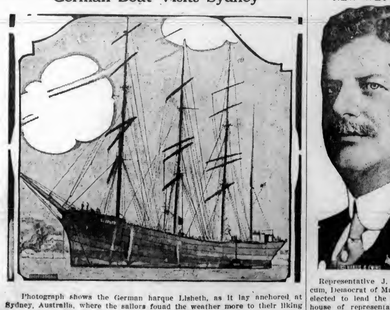
Thrilling Scene on Jersey Waterfront

Photograph shows a view of the million-dollar Jersey City pier fire, taken from a ferryboat on the river. Fifty freight cars on the Pennsylvania railroad piers were destroyed by the flames.

Mellon's New Assistant

Secretary Mellon of the treasury, at left, with Odgen L. Mills, who has been sworn in as under secretary, succeeding Mr. Winston. Photograph taken as they left the capitol after the adjournment of the Sixty-ninth congress.

German Boat Visits Sydney



Photograph shows the German barque Lisbeth, as it lay anchored at Sydney, Australia, where the sailors found the weather more to their liking than the cold of Europe.

OF INTEREST TO EVERYBODY

Accidents in homes decreased 9 per cent last year.

A total of 1,612,780 patents have been granted by the United States patent office.

The cane of a man literally "scared blue" is absorbing the attention of the medical profession in Paris.

A machine has been developed capable of making leakproof seams on steel by a stitching process.

Three-fourths of the protoplasm of the human body consists of water.

Builders say that 63 per cent of the cost of a house is spent in putting the parts together.

Only unmarried Aztec girls could chew chewing gum, made of resin or bitumen, in public.
